NEW QUESTION: 1
Which of the following ports does RDS for MySQL listen on by default?
A. Port 8080
B. Port 3600
C. Port 3306
D. Port 3060
Answer: C (LEAVE A REPLY)

NEW QUESTION: 2
Object Storage Service (OSS) supports sub accounts, and you can allocate access permissions to different buckets for each sub account.
A. False
B. True
Answer: (SHOW ANSWER)

NEW QUESTION: 3
You need to create a new ECS instance for a 10-data test. Which of the following billing methods is most cost-effective?
A. Subscription
B. Pay-AS-You-Go with Savings Plan
C. Pay-As-You-Go
D. Preemptible
Answer: A (LEAVE A REPLY)

NEW QUESTION: 4

The Alibaba Cloud CDN can directly accelerate access to the files stored in OSS and reduce OSS traffic costs.
A. False
B. True
Answer: B (LEAVE A REPLY)

NEW QUESTION: 5
Alibaba Cloud Server Load Balancer (SLB) provides services for distributing traffic among multiple ECS instances SLB can expand the application system's service capacity through traffic distribution, and improve the system's availability by eliminating SPoFs (Single Points of Failure). Which of the following statements are correct? (Number of correct answers; 2)
A. When recreating an SLB instance that has an Internet IP address, a new Internet IP address will be assigned to the SLB instance.
B. One of SLB's features is the Health Check. If some of the backend ECS instances are down, whereas other backend ECS instances can still provide services, then the system can continue to work normally.
C. Before using SLB to provide external services, make sure that you have installed and correctly configured the SLB agent on all of the backend ECS instances.
D. SLB provides a function to automatically synchronize data among backend ECS instances using rsync remote synchronization.
Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 6
OSS supports multi-part uploading for large files, namely dividing a large file into multiple parts and uploading them in order. This function is suitable for scenarios such as uploading large files or uploading files with poor connectivity.
After completing all the multi-part uploading tasks, if you forget to invoke the "Complete Multipart Upload" interface, there will be fragment files left in OSS, occupying bucket storage space-To facilitate deleting those files, OSS provides the_____function.
A. OpenAPI batch deletion
B. Online batch deletion
C. Bucket clearing
D. Fragment management
Answer: B (LEAVE A REPLY)

NEW QUESTION: 7
Company A constructed a sales management platform using three Elastic Compute Service (ECS) instances. One of the instances runs MySQL, and is used as the database server. The other two instances are used as Web servers After some time, the number of

employees in Company A dramatically increases, leading to higher sales volumes At the same time, the platform response speed is gradually decreasing too.
According to the report from CloudMonitor, the average CPU utilization rate of the two Web servers exceeds 70%, and database load reaches 75% Company A can select Alibaba Cloud_____ services.to cope with the issue and optimize the performance. (Number of correct answers: 2)
A. Replace the self-built MySQL database with ApsaraDB for RDS to obtain better database performance, and utilize RDS read-only instances to handle read-only requests
B. Import database data into Object Storage Service (OSS) to share the storage pressure on the platform
C. Incorporate Server Load Balancer (SLB) and add additional ECS instances to relieve the load on existing ECS instances
D. Use Content Delivery Network (CDN) to enhance content loading speed
Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 8
Which of the following privilege is required to manually install Alibaba Clod Security Center on the server?
A. System administrator privilege
B. FTP service privilege
C. Common user privilege
D. Database Access privilege
Answer: C (LEAVE A REPLY)

NEW QUESTION: 9
Names of the files in each OSS bucket must be unique Also, they can be renamed.
A. False
B. True
Answer: A (LEAVE A REPLY)

NEW QUESTION: 10
When creating an ECS instance in your Alibaba Cloud VPC, you must specify a VSwitch for that instance at the same time. Otherwise, you will not be able to create this ECS instance.
A. False
B. True
Answer: B (LEAVE A REPLY)

NEW QUESTION: 11

An online education website is built based on ECS. SLB and Auto Scaling, which greatly reduces resource cost, O&M cost and without compromising system stability and user experience.
Now. the website admin wants to keep the user information (such as source IP, accessed URLs, and duration on each page) for analysis to support their upcoming campaign events In this case, which of the following statements is NOT correct?
A. Synchronize user-Synchronize user-related access information to ApsaraDB for Memcache in real time or quasi real time. Then, access Memcache using an application or make the data in Memcache persistent based on certain rules and then can use the persistent data for further analysis.
B. Let each ECS instance in the scaling group keeps the user access information it processes Thus, the data saved by these ECS instances can be accessed and analyzed at any time, making the solution not only simple, but also efficient reliable, and cost-effective.
C. Synchronize user-related access information to OSS in real time or quasi real time for further use
D. Save user-related access information to ApsaraDB for RDS in real time or quasi real time, which can then be used for performing query and analysis.
Answer: (SHOW ANSWER)

NEW QUESTION: 12
When you create an Alibaba Cloud VPC. a VRouter and a route table will be created automatically. Which of the following statements is NOT correct about the route table?
A. When a VPC is deleted, the corresponding route table is also deleted.
B. Each VRouter may have multiple route tables.
C. This route table cannot be deleted
D. The routing entries of the route table can not be modified manually.
Answer: A (LEAVE A REPLY)

NEW QUESTION: 13
The difference between public and private Server Load Balancers (SLBs) is that private SLBs connect to their backend ECS instances using the private network (Intranet) while public SLBs connect to their backend ECS instances using the public network (Internet).
A. False
B. True
Answer: (SHOW ANSWER)

NEW QUESTION: 14
Alibaba Cloud Elastic Compute Service (ECS) instances in different Security Groups will definitely have no way to communicate with each other.
A. False
B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 15
A startup video streaming company deploys its service on Alibaba Cloud Elastic Compute Service (ECS) Christmas is coming soon and the CEO knows that they need to prepare more computing resources However, they don't want to purchase a large number of Elastic Compute Service (ECS) instances tor a long period of time. Instead, they want to buy ECS instances for a short period of time and release them after the event is over. Which of the following billing methods of ECS is the most suitable?
A. Pay-As-You-Go Only
B. Pay-As-You-Go with Savings Plan
C. Subscription with Reserved Instances
D. Pay-As-You-Go with Reserved Instances
Answer: B (LEAVE A REPLY)

NEW QUESTION: 16
When using Alibaba Cloud SLB to forward layer 7 (HTTP) service requests. SLB will replace the IP address in the HTTP header file to forward requests.
Therefore the source IP address that can be seen on the backend ECS instance is the IP address of SLB instead of the clients real IP address.
A. False
B. True
Answer: (SHOW ANSWER)

NEW QUESTION: 17
A large enterprise wants to migrate the entire business system to Alibaba Cloud to save the overall IT procurement and O&M costs From the security aspect, the company requires that
1. Must support secured remote O&M because the administrator often takes business trips.

2. Networks between subsystems should be isolated because subsystems are independently used by different departments Which of the followings should be used together to meet the company's requirements? (Number of correct answers: 3)
A. Enable the VPN on the bastion host (or directly use the VPN image on Alibaba Cloud Marketplace). The administrator uses VPN encrypted communication during O&M.
B. Create multiple ECS instances in the VPC to install subsystems of different departments- Allocate only Intranet IP addresses to all ECS instances, and deploy them in the same security groups.
C. Build an independent ECS instance as the bastion host or remote logon and O&M, and authorize the bastion host to access ECS instances running other subsystems.
D. Use the security group function of the ECS instance, and respectively deploy ECS instances running different subsystems to independent security groups.
Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 18
Auto Scaling can automatically adjust the number of ECS instances based on user-defined scaling rules to meet service needs. If a user cannot predict service changes or does not have enough history data, he/she can still use dynamic scaling mode to automatically add/remove ECS instances based on certain CloudMonitor performance metrics (such as the CPU utilization rate)
A. False
B. True
Answer: B (LEAVE A REPLY)

NEW QUESTION: 19
Alibaba Cloud SLB can distribute user requests to backend ECS instances. These ECS instances must have the same specification (CPU, Memory)
A. False
B. True
Answer: B (LEAVE A REPLY)

NEW QUESTION: 20
Alibaba Cloud provides comprehensive security protection covering networks, hosts, applications, databases, and content for on-cloud clients. Users using Alibaba Cloud services only need to focus on their own services, without the need to pay any attention to security protection issues.
A. False
B. True
Answer: A (LEAVE A REPLY)

NEW QUESTION: 21

You are using Auto Scaling with one scaling group already created, then you want to execute a task at a specific time such as removing 1 ECS instance every night at 00:00. To achieve this, which of the following operations should be performed'? (Number of correct answers; 2)

A. Create a new scaling group.

B. Create a scheduled task.

C. Create a scaling rule

D. Create an event-triggered task.

Answer: (SHOW ANSWER)

NEW QUESTION: 22

When using Alibaba Cloud SLB. you can set different weights for backend ECS instances The higher the weight of a backend ECS instance the more load will be assigned to it An SLB instance has 5 ECS instances in the backend server pool, all of which are healthy Among these 5 ECS instances, the weight of ecs_inst1 is set to 100. Which of the following statements is correct?

A. Based on SLB's working mechanism, approximately 20% of loads will be assigned to ecs_inst1

B. We do not know the weight settings of the remaining 4 ECS instances, so we cannot tell what would happen

C. Based on request level parameters of external requests, all requests with a request level parameter of 100 will be transferred to ecs_inst1

D. 100% of loads will be assigned to ecs__inst1, and the remaining 4 ECS instances will stay idle

Answer: (SHOW ANSWER)

NEW QUESTION: 23

If you want to build a secure and isolated network environment on Alibaba Cloud; meanwhile, design your network topology and specify Intranet IP addresses or CIDR Blocks in this network environment as needed, you can choose

A. Auto Scaling

B. Leased line

C. Virtual Private Cloud (VPC)

D. Express Connect

Answer: C (LEAVE A REPLY)
