NEW QUESTION: 1

You are responsible for a Drupal recipe site. Currently, each recipe node can have a title, body text and image.

To provide a better user experience, you have been asked to allow each recipe to be freely tagged by its author.

How can you provide free tagging for the recipe nodes?

- A.** From the recipe content type's "Manage form display" page, drag the Tags" field up out of the "Disabled" section.
- B.** From *ne recipe content type's "Manage fields" page, create a text field called "Tags". Ensure it can accept multiple values.
- C.** From the recipe content type's "Manage display" page, enable the "display free tagging information" option.
- D.** From the recipe content type's "Manage fields" page, create a Taxonomy term reference field, referencing the tags vocabulary. Check "Create referenced entities if they don't already exist."

Answer: A (LEAVE A REPLY)

NEW QUESTION: 2

You've been asked to add several new fields and a view for the news area of a site with a very busy comments section. The QA team wants to review your work in staging before rolling everything out to production all at once.

How can you meet these requirements without interfering with the production site's comment activity or having to create the new functionality independently in both environments?

- A.** Configuration created in the staging environment is automatically available to the production environment since they share a database
- B.** Create the fields and view in a development copy of the site. Export the site configuration to code Push that code to the staging environment and import the site configuration there Once QA is satisfied, repeat the process in production.
- C.** Copy the production database into the staging environment Create the fields and view there Once QA is satisfied, copy the staging database into the production environment.
- D.** Create the fields and view in a fresh installation of Drupal core Export the site configuration into your site's existing codebase, push the code to the staging environment, and import the site configuration there Once QA is satisfied, repeat the process in production.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 3

You are asked to require a site visitor to enter First name and Last name when creating a new account How can you do this in Drupal?

- A.** In Account settings, go to Manage fields and add fields for First name and Last name. Set them to "required."
- B.** In Permissions, check "Require first and last name for user registrations"
- C.** Create a block type with fields for First name and Last name, set them to "required" and add the block to the/user/register page.
- D.** In Account settings, under "Who can register accounts'?" select "Visitors, but full name is required"

Answer: A (LEAVE A REPLY)

NEW QUESTION: 4

You've downloaded a new contributed module from drupal.org and added its code to your site's codebase However, its functionality is not yet available on the site.

What remaining steps might you need to take to get this module working? Choose 2 answers

- A.** Contact the module maintainer to get your site authorized to use the module
- B.** Log in as an administrator and visit /admin/install/module-name to finish the installation.
- C.** Enable the module from the "Extend" page in the site's administrative user interface
- D.** Verify that the module's code is in the correct location in the codebase

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 5

The marketing department wants to drive social engagement by collecting users' social profile links every time they comment on a blog post You've been asked to make sure that

this only happens on blog post comments, comments on other content types should not collect this information How can you make this possible?

- A.** Custom comment types per content type are not supported in Drupal 8
- B.** Add custom fields for collecting social profile links to the default comment type. When configuring each field's visibility settings, go to "Content types" and make sure only the blog post content type is selected.
- C.** Create a custom comment type with the appropriate custom fields for collecting social profile links. Add a Comments field to the blog post content type, making sure it uses your new custom comment type.
- D.** In the blog post content type's "Manage form display" section, go to the settings for the "Comment" field and select "collect social profile information."

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

You are asked to implement a "employee of the month" block into your corporate website The block should show name and picture of the employee and should be editable over the normal block layout All the employees are users of the website How do you implement the block?

- A.** Add a custom block and select the type "user account information", activate the user name and picture fields
- B.** Create a new Users View with user name field and user picture and an exposed filter on uid Add a block display to the view and place the block in the block layout
- C.** Install the user_blocks module from Drupal org, select the fields you need and place block via block layout
- D.** Create a user view mode with user name and picture Add a user reference field to one of your block types and let the user reference field use the new user view mode

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

You are running a Drupal 8 site, and the Status report page shows two errors that there is a security update available for your version of Drupal, and that the trusted_host_patterns setting is not configured in settings.php What are the next steps to solve these errors?

- A.** Update Drupal core and configure the trusted_host_patterns setting in your settings php file
- B.** Update Drupal core This will fix both errors, since updating Drupal automatically updates settings php
- C.** Update Drupal core and enable the Trusted Host Settings module.
- D.** Update Drupal core, using the "update settings" option

Answer: **A** ([LEAVE A REPLY](#))

NEW QUESTION: 8

You are having trouble using a certain contributed module. You have read the module's documentation and ensured it is configured correctly.

How should you find help? Choose 2 answers

- A. Search for answers and ask questions in the module's issue queue on drupal.org
- B. Create a comment of type "support request" on the module's project page
- C. Ask questions in the #drupal-support channel on IRC or in the #support channel on Drupal Slack group
- D. Email the module's maintainer and ask for help

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Your company has multiple offices around the world, each of which has its own detail page on the company website. Offices will be added regularly by the content maintenance team, with each office assigned to one of a limited number of global regions. You've been asked to create a directory page listing all of these offices, grouped by region. In order to keep the list of regions small, you've been asked to make sure that only site administrators can create, modify, or delete regions.

What kind of Drupal content architecture would best support this?

- A. Create a "Regions" taxonomy vocabulary. Each office is a "Basic page" node, assigned to its region using a term reference field added to the "Basic page" content type.
- B. Create an "Office" content type and a "Regions" taxonomy vocabulary. Office nodes are assigned to regions using a term reference field on the "Office" content type.
- C. Create an "Office" content type and a "Region" content type. The "Region" content type includes a node reference field that can contain multiple office nodes.
- D. Each office is a "Basic page" node. The office's regional location should be listed in the node's body text.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

You have installed a custom theme for your website, and you notice the theme displays a Druplicon as the logo in the upper left corner. As much as you love Drupal, you would like to remove this logo and display your company's logo instead. How would you do this in the Drupal admin interface? Choose 2 answers

- A. Go to Appearance > Settings and upload your new logo
- B. Create a custom block. Include your logo in the block and place it in the appropriate region. Uncheck the "Use the logo supplied by the theme" option.
- C. This cannot be accomplished through the admin interface. You must update the theme in code.

D. Use a contributed module to inject CSS to hide the Druplicon and display your logo instead

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 11

Your Mam navigation menu has two levels of menu items site sections, and child pages within each section Your UX team wants to make it easier for a site visitor viewing a child page to see what other pages are in that section. They have asked you to add a submenu to the Sidebar region on child pages How can you add a submenu to the child pages that shows all child pages in the section?

A. In Block layout, place the Main navigation block in the Sidebar region. Set the Initial visibility level to 2

B. Create a new menu for each main section containing links for each child page, and add each menu's block to the Sidebar region

C. In Block layout, place the Main navigation block in the Sidebar region Set the Initial visibility level to

D. Add the Main navigation menu to the Sidebar region, and use CSS to hide the top level menu items

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

What is meant by headless Drupal? Choose 2 answers

A. Applying security updates automatically to Drupal installation

B. Publishing content automatically in Drupal.

C. Exposing Drupal content to other systems such as native applications.

D. Just another phrase for "decoupled Drupal"

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 13

The content editor assigned to approve comments on the site wants to see all the unapproved comments sorted by the node on which they are posted, but can't do this on the Comments page What is the simplest way to solve this problem?

A. Create an Export view, so the content editor can review comments in a spreadsheet

B. Edit the Comments View; and update the table settings to make the Entity ID field sortable

C. Have the content editor review comments by visiting the node instead of using the Comments page

D. Create a View of unapproved comments and set the sort order to "Entity ID "

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 14

Your site review team reports that the new Product pages look good, but takes a long time to load.

What are two possible causes? Choose 2 answers

- A. Internal Dynamic Page Cache is installed, but the reviewers are testing while logged in
- B. The permission "View cached pages" is not set for Anonymous users.
- C. images are being loaded without using Image styles to load correctly sized versions
- D. The Performance setting for Caching is set to "no caching."

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

You are pitching for development of a Drupal based website to your new customer. You want to emphasize how flexible Drupal is.

Which THREE points would support your case? Choose 3 answers

- A. Drupal allows you to create customized and branded site designs.
- B. Drupal allows you to directly rename database columns from the UI.
- C. Drupal allows you to build pages containing lists of content using UL
- D. Drupal.org has an online store where you can purchase modules and themes.
- E. Drupal has configurable content types and field types for modeling content.

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 16

The UX team wants to display a search box in the site header region on all pages except for the search page itself The search page path is "/search." What is the simplest way to add the search form to the header region, and exclude it from the search page"

- A. Check the "show search" option in the site branding block, and set the block to be excluded from the page "/search."
- B. Add the search block to all pages, and hide it from "/search" using css
- C. In the Block layout settings, add the search form block to the Header section and set the block to be excluded from the page "/search."
- D. Write a custom search View with a block layout Set a filter in the View to exclude the path "/search."

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 17

The information security team wants to make it harder for bots and unauthorized users to create and activate new accounts. What are two ways to reduce the number of unwanted new, active accounts? Choose 2 answers.

- A.** Set "Who can register accounts" to "Administrators only," and assign the task of new account creation to site admins.
- B.** Set the Registration and Cancellations settings to "Require email verification when a visitor creates an account."
- C.** Set the personal contact form for new users to disabled, and set email verification to use the personal contact form method.
- D.** Set "Who can register accounts" to "Visitors," and check "Enable password strength indicator"

Answer: C (LEAVE A REPLY)

NEW QUESTION: 18

You had installed a contributed module on your website, but your site no longer needs it. No other modules have dependencies on this module. How can you safely uninstall the module?

- A.** Delete the module from the codebase
- B.** Delete the module from the database
- C.** Uninstall the module on the Extend > Uninstall interface.
- D.** You can only disable modules, not uninstall them

Answer: D (LEAVE A REPLY)

NEW QUESTION: 19

You are building a recipe site in which users submit their favorite recipes as nodes, tagged with common ingredients from a carefully curated taxonomy vocabulary. You've been asked to create a page on which site visitors can select the ingredients they have on hand and view all the site's recipes that use those ingredients.

You've already created a view listing all Recipe nodes.

How can you modify the view to support filtering by ingredient?

- A.** Include a "Combine fields" filter that searches all fields for the ingredient name(s) the user enters.
- B.** Add a menu block listing all ingredients. Each item in the menu block should link to a subdirectory URL associated with the listed ingredient.
- C.** Create a filter using the Recipe content type's "Ingredients" field. Expose the filter to users, making sure it allows multiple selections.

D. For each ingredient, create a separate view display with a contextual filter to limit results by that ingredient

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

How can you set the default country and time zone for a Drupal site?

- A. Go to Configuration > Regional and language > Regional settings (admin/config/regional/settings) and fill Default country and Time zone
- B. Go to Configuration > Regional and language > Date and time formats (admin/config/regional/date-time) and fill Default country and Time zone.
- C. Go to Configuration > System > Basic site settings (admin/config/system/site-information) to change the Default country and Time zone
- D. Go to Appearance > Region and Language > Regional settings (admin/appearance/settings/regional) and fill Default country and Time zone

Answer: ([SHOW ANSWER](#))
