NEW QUESTION: 1

A website built on AEM Sites displays the company's stock price in the footer of all pages. The stock data is retrieved from a third party REST service using two-way SSL and rendered in an AEM component using HTL. During performance testing in the last development sprint it becomes apparent that the third party service sometimes takes up to 30 seconds to respond, which degrades the overall site performance.

How should an Architect address this issue?

- A. Temporarily remove the component from all content
- B. Load the stock data component asynchronously
- C. Add a 5 second timeout to the REST call
- D. Call the REST service directly from the browser

Answer: B (LEAVE A REPLY)

NEW QUESTION: 2

A news agency editor wants to publish news articles to an intermediate Publish (preview) instance for internal review before publishing the article to production Publish instance.

Which two steps should the Architect recommend? (Choose two.)

- A. Create a custom publish workflow
- B. Create a separate live copy to preview content
- C. Set up a new replication agent for preview server
- D. Create a closed user group (CUG) for editors
- E. Create a reverse replication agent on preview server

Answer: (SHOW ANSWER)

NEW QUESTION: 3

An enterprise client is on-boarding an AEM Desktop application to provide authors with the ability to load the AEM repository virtually on the file system. The desktop application is

unable to connect to the AEM Author, which has SSL enabled. The intermediate certificate is installed on Apache.

How should an Architect resolve this issue?

- A. Install the Root certificate to the AEM truststore
- B. Install the certificate chain to the AEM truststore
- C. Install the certificate chain to the keystore of the AEM ssl-service user
- D. Install the certificate chain to the keystore of the AEM authentication service user

Answer: (SHOW ANSWER)

NEW QUESTION: 4

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Enable Encapsulated Token Option
- B. Configure the Dispatcher to run with a Dedicated System User
- C. Enable Round Robin processing in Dispatcher configuration
- D. Configure Sticky Connections

Answer: C (LEAVE A REPLY)

NEW QUESTION: 5

A retail customer with an international presence and both in-store and online sales needs a new assets platform. The customer decides to use AEM assets. The customer's sites will continue to run on their proprietary CMS for websites.

The customer wants to be able to scale the platform for spikes in user traffic such as on local sales or online marketing campaigns. Under some circumstances, the customer also has a higher load of editors for a certain period of time.

Which architecture should an Architect use for this business case?

- A. An AEM as a Cloud Service Assets setup using the combined CDN for delivery
- B. An AEM Publish instance on Adobe Managed Services with auto scaling
- C. An AEM as a Cloud Service Sites with Dynamic Media
- D. An AEM Assets setup on Adobe Managed Services with Cloud Manager

Answer: (SHOW ANSWER)

NEW QUESTION: 6

A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance. The customer currently hosts many assets (images, videos, documents) in the DAM.

Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites.

What should an Architect do as part of this migration?

- A. Move to a shared datastore and enable binary less replication

- B. Set up a horizontally scalable AEM environment on MongoDB
- C. Run online revision cleanup before moving to the new storage format
- D. Set up Connected Assets to share the DAM assets in the sites

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 7

A customer has an international presence and a strong brand image. The customer considers the exceptional quality images used for both print and on the website to be essential for its business, The customer uses AEM

6.5 managed services with a configuration of 2 dispatchers, 2 publishers, and 1 author.

The original images can weigh up to 500Mb with videos weighing even more. Renditions are generated after files are uploaded to AEM DAM by the Design team so the Authoring team can use them on the website.

The teams report issues with platform stability and slowness. Visitors report that images look pixelated on some screens and pages are very slow to load.

Which two actions should the Architect take to resolve these issues? (Choose two.)

- A. Allocate more memory to ImageMagick and FFmpeg
- B. Optimize renditions for the different viewports used by the visitors
- C. Train the design team to upload smaller assets and save the originals elsewhere
- D. Split AEM Assets and Sites in two different stacks and use Connected Assets
- E. Add more dispatchers and publishers to the AEM configuration

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

A new AEM Sites implementation includes a component that lists the 10 most recently published PDF documents in AEM Assets. The component works as expected during development and passes QA testing. The business starts to use it while entering content and uploading assets in preparation for go-live. A few days later, the component's PDF list is empty.

What is the most likely cause of the issue?

- A. The component is missing a matching Oak index.
- B. The component is missing the HTL display context to escape the PDF title.
- C. A PDF with incorrect MIME type has been uploaded.
- D. A PDF with too large file size has been uploaded.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 9

During an optimization session, a client using AEM 6.5 mentions that they face challenges with their AEM Author setup. The client has significant repository growth and can see an increased amount of TAR files in the segmentstore on disk. When editors are working, they see that workflows take up more time. The purging of workflows works as expected. Which

two optimizations should an Architect suggest to take into and further investigate? (Choose two.)

- A. Execute an offline tar compaction twice a day
- B. Increase the maxFileSize of the TAR segmentstore
- C. Leverage Transient Workflows where possible
- D. Leverage workflow offloading for all workflows
- E. Configure the Maximum Parallel Jobs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

A media company surveys the end users of their AEM Sites website. The survey identifies that it is difficult to locate content on the site due to lack of relevancy and slow performance when navigating through the large volume of content.

To address both issues, the business team suggests integrating an innovative taxonomy product to the company's AEM implementation. The product is new on the market and the development team has no experience with the technology.

Which two steps should an Architect recommend to evaluate this new feature? (Choose two.)

- A. Test usability of the feature with selected business users
- B. Test usability of the feature with selected end users
- C. Develop the integration as proof of concept with full production content
- D. Develop the integration and deploy it to 50% of the production AEM instances
- E. Develop the integration as proof of concept with sample content

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 11

A company with various departments wants to use tagging to improve search capability. Each department is restricted to use its own tags. How should an Architect organize the tags?

- A. Create tags in "departmentName:tagName" format
- B. Use department ID as a prefix of each tag
- C. Create a namespace for each department
- D. Create a department sub-tag in each tag

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 12

A customer has a website with 10,000 pages and wants to improve performance. Which option should be used?

- A. Increase .stat file level from the default
- B. Decrease .stat file level from the default
- C. Advise to use URL parameters instead of sling selectors

D. Specify a wildcard allow rule in the invalidate section

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

A large retail customer is building their ecommerce platform on AEM. Several third-party vendors sell products through their site. Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.

Which approach should the Architect recommend?

- A. Use the Preview Capabilities of AEM Author Server
- B. Add a Publish (preview) Server and provide access
- C. Export content as PDF and share with the vendors
- D. Give third-party vendors access to the Author Server

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

A customer is migrating from their On-Premises AEM 6.4 instances to AEM as a Cloud Service. Next to the required code refactoring, a content migration of approximately 100,000 pages needs to be performed. The customer wants the content freeze period to be limited so that editors can continue to do content actions as long as possible.

Which two recommendations should the Architect make for the migration of the content pages? (Choose two.)

- A. Upscale the memory of the On-Premise AEM instance
- B. Migrate content deltas using a query-based packaging tool
- C. Ensure sufficient storage space on the On-Premise AEM instance
- D. Migrate the content using the Content Transfer Tool
- E. Migrate the content using Lazy Content Migration approach

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 15

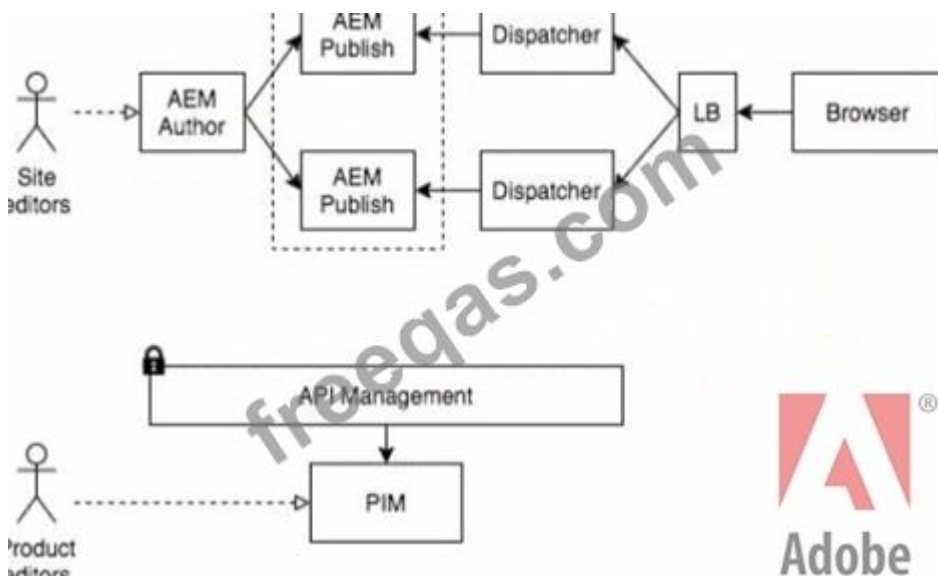

A large digital agency has 10 TB of assets in their DAM where renditions for each Asset must be created without affecting performance for the authors. Which capability should the Architect recommend to meet the requirements?

- A. Create AEM multi-threaded workflow
- B. Reduce the number of AEM Asset versions
- C. Use AEM Asset Offloading
- D. Update dispatcher configuration to cache Assets

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

Refer to the exhibit.

A customer with an existing AEM implementation wants to enrich product pages with technical data coming from their PIM system. The PIM system sits behind an API Management solution that publicly exposes the PIM API's as RESTful web services with basic authentication as the security mechanism. Data consistency with the PIM and secure access to the APIs are key elements of the integration.

How should the Architect set up the integration between AEM and the PIM?

- A. Integrate the AEM Publishers directly with the API Management solution
- B. Import the technical data into the AEM Author and replicate to Publishers
- C. Convert the technical data to Content Fragments and expose using Content Services
- D. Use a client-side integration with AJAX from the browser to the API Management

NEW QUESTION: 17

A client is in the discovery process for building a React native app, which is a single codebase that runs natively on iOS and Android. The goal is to reduce development costs. The client wants to reduce content creation costs in the new react Native app by reusing as much of the marketing content already publish in their AEM instance.

What should the Architect recommend to meet this requirement?

- A. OSGi Bundles
- B. Sling Resource Resolution

C. Experience Fragments

D. Content Fragments

Answer: B ([LEAVE A REPLY](#))
