NEW QUESTION: 1

During the initial configuration of a VSX Gateway cluster, the VSX Administrator is prompted to specify each cluster member's name, as shown below: Which of the following best describes this name?

- A. Any name the VSX Administrator chooses to describe the cluster member
- B. Customer for which this VSX Gateway in the cluster
- C. IP Address of the individual VSX Gateway in the Cluster
- D. Hostname of the individual VSX Gateway in the cluster

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

When configuring Virtual Systems with overlapping IP Addressing, the Virtual Systems must:

- A. Be on the same network
- B. Be include in a VPN
- C. Perform Network Address Translation
- D. Perform in Bridge Mode
- E. Define VLAN tags

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

The _____ is a single-bit flag that indicates that the format of MAC address information is presented in a standard form.

- A. Canonical Format Indicator
- B. Tag Control Information
- C. User_Priority
- D. VLAN Identifier
- E. Tag Protocol Identifier

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 4

At installation, the _____ is bound to all configured physical interfaces of a VSX Gateway, UNLESS the interfaces are specifically assigned to another component.

- A. VSX Management Server
- B. Internal Virtual Router
- C. External Virtual Router
- D. Management Virtual System
- E. Synchronization Network

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

You need to provide a security layer for an existing core network. You need an inspection module that operates at layer 2, is completely transparent and does not impact the existing IP structure or different control protocols in use. Which of the following virtual devise will perform the kind of inspection you need?

- A. Virtual System in Bridge Mode
- B. Virtual System
- C. External Virtual Router
- D. Virtual Switch
- E. Internal Virtual Router

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Which of the following objects allows you to configure resource settings, to limit the number of concurrent connections?

- A. Internal Virtual Switch
- B. External Virtual Switch
- C. VSX Gateway
- D. Virtual Router
- E. Management Virtual System

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

What is the netmask for each configured Warp Link?

- A. 255.255.255.255
- B. 0.0.0.0
- C. 255.255.255.0
- D. Same as the netmask of the default route of the External Virtual Router
- E. 255.255.0.0

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 8

How many Management Virtual System instances does each member of a VSX Gateway cluster run?

- A. One for each Virtual System configured on the Gateway
- B. One for each physical interface on the Gateway
- C. One for each cluster member
- D. Only one
- E. Two, the cluster MVS and the unique Gateway MVS

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 9

The VSX Management Server uses which of the following channels to communicate with components of the VSX Gateway?

- A. Forwarding Configuration
- B. Gateway Management Configuration
- C. Security Management
- D. Context Identification
- E. VSX Inspection Verification

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which of the following VSX components maintain Layer 3 Connectivity?

- A. Internal Virtual Switch

- B. External Virtual Switch
- C. Virtual System in Bridge Mode
- D. VLAN Interface
- E. Virtual Router

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

What is the required to prevent loops in Virtual Systems in a Cluster XL environment?

- A. BPDU
- B. MPLS
- C. OSPF
- D. STP
- E. VRRP

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

Which of the following MDS types allows you to create and manage a VSX Gateway?

- A. MDS MLM
- B. MDS Manager station
- C. MDS Container station
- D. MDS SmartCenter for VSX
- E. MDS VSX Integrator

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

You are configuring source-based routing in a VSX Gateway deployment with both External and Internal Virtual Routers. Which of the following functions can't be configured for the Virtual Systems?

- A. Remote Access VPNs
- B. Virtual System clustering
- C. Anti-spoofing measures
- D. Intranet VPNs
- E. Network Address Translation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

When configuring Virtual Switch leading to the internet, which of the following items is required when creating a virtual switch object?

- A. VLAN tag
- B. IP Address
- C. Dedicated interface
- D. Subnet mask

E. Default Gateway

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 15

The _____ interface is configured in a VLAN environment, to allow multiple Virtual Systems to share a single physical interface on a VSX Gateway.

A. Symbolic

B. Warp

C. Physical

D. Synchronization

E. Virtual

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 16

When deploying a VSX Gateway managed by a SmartCenter Server, which of the following statements is TRUE?

A. All Customer objects, rules and users are shared in a single database

B. Each Virtual System has its own unique Certificate Authority

C. Multiple Administrators can simultaneously connect to the same databases to manage multiple customers

D. VSX Superuser Administrators can configure granular permissions for each Customer Administrator

E. VSX Administrators can configure different domains for each Virtual System

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

The _____ interface is configured in a VLAN environment, to allow multiple Virtual systems to share a single physical interface on a VSX Gateway.

A. Warp

B. Physical

C. Synchronization

D. Symbolic

E. Virtual

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

Security Policies enforced by Virtual Systems are applied to _____ connected to the Virtual IP Stack.

- A. Warp Interfaces
- B. All Interfaces
- C. Warp and Virtual Interfaces
- D. Virtual Interfaces
- E. Physical Interfaces

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

Which of the following is a Multi-Context process?

- A. cpd
- B. vsxd
- C. gwd
- D. psd
- E. synd

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

In a VLAN Tag added to a frame header, the _____ is a 2 byte number that identifies a frame as tagged.

- A. Tag Control information
- B. VLAN identifier
- C. Canonical Format Indicator
- D. Tag Protocol Identifier
- E. User_priority

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 21

Bridged Virtual Systems in a cluster monitor which of the following protocols, to fail over a bridged system?

- A. VTP
- B. STP
- C. PBDU
- D. MPLS
- E. OSPF

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 22

Consider the following scenario: A hub connects four hosts a VLAN-Tagged port on a switch. The hosts have IP addresses ranging from 10.0.0.1 to 10.0.0.4. The switch adds a VLAN Tag of 400 to all communication passing through it. Once communication from the second host on the hub passes through the switch port on the way to its destination on the external network, how does the traffic appear in SmartView Tracker? Assume that traffic enters the Gateway on interface eth3.

- A. eth3.2
- B. eth3.400.2
- C. eth3.402
- D. eth3.2.400
- E. eth3.400

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 23

When configuring a new Virtual System for your VSX Gateway configuration, what should you do first?

- A. Open the Admin CMA SmartDashboard and create a new CMA object to be used as the Virtual System's Management Server
- B. Add a new Virtual System to the Main Customer, so that the Admin CMA can be used as the Management Sever
- C. Create a new Customer and CMA, to be used as the Virtual System's Management Server
- D. Open the Global SmartDashboard and create a new Virtual System object
- E. Open the Admin CMA SmartDashboard and create a new Virtual System object

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 24

Which of the following virtual devise will NOT fail over, if its interface fails in a VSX High Availability configuration?

- A. Management Virtual System Interface
- B. Virtual System in Bridge Mode
- C. Internal Virtual Router
- D. Virtual System with VLAN interfaces
- E. External Virtual Router

Answer: B ([LEAVE A REPLY](#))
