NEW QUESTION: 1

What are critical components of process automation in OpsRamp? (Select two.)

- A. Manual incident resolution
- B. Predefined action templates
- C. Workflow orchestration tools
- D. Hardware refresh cycles

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

What is a key component of an OpsRamp deployment?

- A. Virtual Machine (VM) provisioning services
- B. Integration-only cloud tools
- C. Centralized hardware procurement
- D. Role-based access controls (RBAC)

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 3

What are the core benefits of OpsRamp? (Select two.)

- A. Unified monitoring for hybrid IT environments
- B. Limiting integrations to on-premises systems
- C. Automated incident and alert management
- D. Automatic configuration of legacy hardware

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

What criteria should be considered when selecting an access control method?

- A. The organization's security and compliance requirements

- B. Availability of backup hardware
- C. The number of PoDs in the deployment
- D. Data storage location

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

How does OpsRamp ensure secure dashboard access? (Select two.)

- A. Limiting dashboard access to predefined templates
- B. Role-based access control (RBAC)
- C. Multi-factor authentication (MFA) for administrators
- D. Automating credential sharing across users

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

What is a key feature of OpsRamp's incident management system?

- A. Automatic assignment of incidents to all users
- B. Limiting escalation to a single user role
- C. Predefined workflows for incident escalation
- D. Manual categorization of all incidents

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 7

What advantages does RBAC provide in OpsRamp? (Select two.)

- A. Eliminates the need for MFA
- B. Enhances security by limiting unnecessary access
- C. Automatically optimizes system performance
- D. Restricts access based on user roles

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

What is a primary role of the OpsRamp platform in hybrid IT management?

- A. Network routing optimization
- B. Automated hardware procurement
- C. Exclusive on-premises monitoring
- D. Unified visibility across IT environments

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 9

What are key capabilities of OpsRamp's monitoring and alert management features? (Select two.)

- A. Setting thresholds for alert generation

- B. Collecting real-time performance metrics
- C. Automatically disabling low-priority alerts
- D. Restricting monitoring to on-premises systems

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

How does process automation enhance incident management in OpsRamp?

- A. By automatically escalating unresolved alerts
- B. By restricting incident data visibility
- C. By disabling workflow orchestration
- D. By suppressing low-priority incidents

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

What primary challenge does OpsRamp address for IT teams?

- A. Ensuring compatibility with proprietary hardware solutions
- B. Simplifying hardware procurement processes
- C. Managing data growth in legacy storage systems
- D. Providing unified visibility and management across hybrid IT environments

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

What are the key benefits of using MFA? (Select two.)

- A. Enhanced security by requiring multiple authentication factors
- B. Protection against credential-based attacks
- C. Simplification of hardware configurations
- D. Faster logins without verification steps

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

What is the primary purpose of the OpsRamp gateway?

- A. To store all backup files locally
- B. To facilitate communication between monitored devices and the platform
- C. To manage hardware provisioning for cloud instances
- D. To ensure compliance with regulatory standards

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 14

What is a key feature of OpsRamp that enhances hybrid IT management?

- A. On-premises-only monitoring capabilities
- B. Manual incident escalation workflows

- C. Limiting monitoring to legacy systems
- D. Unified visibility across cloud and on-premises environments

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

What is the primary function of a PoD in the OpsRamp architecture?

- A. To isolate and manage resources for a specific customer or workload
- B. To automate the patch management process
- C. To serve as a centralized monitoring dashboard
- D. To manage user roles and permissions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

What is a common challenge in deploying patches in distributed environments?

- A. Verifying patch compatibility manually
- B. Limiting patches to on-premises systems
- C. Automating patch downloads
- D. Scheduling deployments to minimize downtime

Answer: D ([LEAVE A REPLY](#))

Valid HPE2-N71 Dumps shared by PrepPdf.com for Helping Passing HPE2-N71 Exam!
PrepPdf.com now offer the **newest HPE2-N71 exam dumps**, the PrepPdf.com HPE2-N71 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com HPE2-N71 dumps with Test Engine here:

Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

Which type of environment is best suited for OpsRamp deployment?

- A. Legacy systems with no external integrations
- B. Cloud-native applications with no hybrid requirements
- C. Hybrid IT environments with diverse infrastructure components
- D. On-premises data centers only

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 18

What is the primary method for rolling out agents in OpsRamp?

- A. Sending user-specific activation links
- B. Manual installation on each device

- C. Using deployment scripts or automated tools
- D. Configuring devices via remote desktop sessions

Answer: C (LEAVE A REPLY)

NEW QUESTION: 19

What features does OpsRamp's incident management offer? (Select two.)

- A. Automated escalation workflows
- B. Incident correlation and grouping
- C. Exclusive support for cloud environments
- D. Manual alert grouping for prioritization

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 20

What are common use cases for OpsRamp dashboards? (Select two.)

- A. Disabling alert workflows for legacy systems
- B. Visualizing real-time network performance metrics
- C. Automating application performance tuning
- D. Centralized monitoring of hybrid IT environments

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 21

Which feature of OpsRamp most directly helps organizations reduce downtime?

- A. Manual patch management
- B. Hardware procurement automation
- C. Synthetic monitoring
- D. Hardware lifecycle tracking

Answer: C (LEAVE A REPLY)

NEW QUESTION: 22

What are key benefits of process automation in OpsRamp? (Select two.)

- A. Enhancing compliance reporting
- B. Reducing manual intervention in repetitive tasks
- C. Limiting real-time monitoring capabilities
- D. Suppressing critical alert escalation

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 23

What are essential tasks during patch testing and validation? (Select two.)

- A. Simulating real-world scenarios to assess patch effectiveness
- B. Applying patches directly to production systems
- C. Identifying potential conflicts with existing configurations

D. Automating all aspects of patch testing

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 24

What methods does OpsRamp support for integration setup? (Select two.)

- A. Manual data migration scripts
- B. Pre-built connectors for common tools
- C. API-based integrations
- D. Network hardware bypass

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 25

What best practices enhance access control security in OpsRamp? (Select two.)

- A. Enforcing strong password policies
- B. Regularly updating role-based permissions
- C. Disabling MFA for faster logins
- D. Avoiding SSO to reduce complexity

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 26

What is a common limitation of patch management in hybrid IT environments?

- A. High storage costs for patches
- B. Incompatibility with older software versions
- C. Automation of patch verification processes
- D. Limited support for cloud-native applications

Answer: B (LEAVE A REPLY)

NEW QUESTION: 27

What type of reporting is supported by OpsRamp dashboards?

- A. Static weekly summaries
- B. Limited data visualization for legacy systems
- C. Real-time performance metrics and alerts
- D. Automated hardware provisioning reports

Answer: C (LEAVE A REPLY)

NEW QUESTION: 28

Why might legacy systems benefit from OpsRamp?

- A. It replaces hardware components with virtualized solutions
- B. It eliminates network latency
- C. It enables seamless integration with modern cloud tools
- D. It removes the need for on-premises IT staff

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 29

How does OpsRamp manage alerts and incidents?

- A. By requiring manual intervention for all incidents
- B. By using predefined escalation rules and workflows
- C. By restricting alerts to high-priority incidents only
- D. By disabling automatic incident creation

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 30

What are common use cases for OpsRamp? (Select two.)

- A. Managing single-cloud environments exclusively
- B. Monitoring cloud and on-premises systems
- C. Optimizing IT asset management across hybrid IT
- D. Automating hardware procurement

Answer: B,C ([LEAVE A REPLY](#))
