Exam Code:	H12-521_V1.0-ENU
Exam Name:	HCIP-Intelligent Vision V1.0
Certification Provider:	Huawei
Free Question Number:	157
Version:	v2022-06-11
# of views:	2650
# of Questions views:	1570
https://www.freeqas.com/qa/Huawei/H12-521_V1.0-ENU/Huawei.H12-521_V1.0-ENU.v2022-06-11.q157.html	

NEW QUESTION: 1

The () function of the ball camera can ensure that the camera automatically returns to the preset position after manual operation.

- A. Caretaker
- B. Preset position
- C. Electronic map
- D. Cruise

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Which of the following is not a technical process for face detection?

- A. Sliding window
- B. Classification
- C. Align
- D. Merger

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 3

What indicators are included in the function module of the Power Cube 500 video site?
(Multiple choice)

- A. Location indicator
- B. Fault indicator
- C. Running indicator
- D. Alarm indicator

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Huawei HoloSens IVS1800 stand-alone deployment network, what is the largest camera access scale?

- A. 64
- B. 8
- C. 32
- D. 16

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

Regarding the replacement of parts, which of the following descriptions is correct?
(Multiple Choice)

- A. The process of removing the functional module. Record the cable connection position of the functional module - use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn, and do insulation protection to remove the old functional modules
- B. The process of replacing the lithium battery module, wear protective gloves - remove the old lithium battery module H install a new lithium battery module take off the protective gloves
- C. The process of removing the lithium battery module. Record the cable connection position of the lithium battery module + use a flat-blade screwdriver to pry off the fastening lock on the quick-plug terminal. Remove the quick-plug terminal - remove the interface cables in turn. And do a good job of insulation protection - remove the old lithium battery module
- D. Process of replacing the functional module X Put on protective gloves - disconnect the mains front input circuit breaker of the functional module - remove the old functional module - install the new functional module-close the AC front input circuit breaker of the functional module - take off Gloves

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 6

Which of the following is not a part of the view library standard GA/T1400?

- A. Application platform technical requirements
- B. Teaching database technical requirements
- C. Video networking technical requirements
- D. General technical requirements

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 7

In the following face capture image problem, which cannot be optimized by adjusting the parameters, which installation position must be changed?

- A. Yin and Yang face
- B. Front light face overexposed
- C. Backlit face image is dark
- D. Motion blur

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 8

Which of the following statements about camera access are correct? (Multiple choice)

- A. When adding in batches automatically, there is no need to know the IP address of each camera
- B. When using the manual batch adding method to access the camera, the camera must be online and the access protocol must be HW SDK or ONVIF
- C. When manually adding in batches, there is no need to know the IP address of each camera
- D. When using the automatic batch add method to access cameras, the cameras must be online and the access protocol must be HW SDK or ONVIF

Answer: [A,D \(LEAVE A REPLY\)](#)

NEW QUESTION: 9

Which of the following description about the principle of face alignment is incorrect?

- A. The image can be translated, rotated, and zoomed to generate feature values
- B. Let the computer automatically generate measured values through the key points found
- C. After detecting the key points of the face, you need to make progress to extract the key points so that the computer can recognize them
- D. Face key point detection is to clarify the contours of the face and key parts such as eyebrows, nose, mouth, etc.

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 10

Regarding the central platform equipment, which of the following description is wrong? (Multiple Choice)

- A. Universal server 2288H v5 provides system disk and data disk resources for management plane and business plane virtual machines
- B. oceanStor 9000 stores video and image data for the business layer
- C. OceanStor 5500 V5 is used to deploy HUAWEI CLOUD Stack to provide computing resources (such as memory, network card, etc.) for users to create virtual machines on physical servers as upper-layer services (CSP, IVS)
- D. FusionServer G5500 GPU hardware physical resources, providing GPU acceleration and hard decoding capabilities for business layer virtual machines

Answer: [A,C \(LEAVE A REPLY\)](#)

NEW QUESTION: 11

200 channels of cameras are stored for 1 day according to the code stream of 1080P4 Mbps, and the storage space occupied by recording is about ()TB.

- A. 12
- B. 8
- C. 10
- D. 6

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

IVS3800 server comprising Imer_Service , Outer_Service , Immer_OM , Outer_OM and Mgmt this . 5 network planes.

Which statement about lgmt is wrong?

- A. Engineers can access the iBMC interface of the server through the network plane
- B. The network plane represents the server management network port
- C. Engineers can access the virtual console of the server through the network plane to install CSP
- D. Engineers can access the CSP OM Portal interface of the server through the network plane

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 13

Regardless of whether the product selected by the intelligent vision platform is IVS 3800 or IVS1800, engineers need to install and configure the corresponding algorithm plug-in before performing platform intelligent behavior analysis.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

The "Floating IP" set when installing the IVS 3800 to manage the master node is the IP address used when logging in to the CSP OM Portal.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 15

When installing the light edge IVS3800, some verification tools are required to verify the integrity of the installation package and algorithm package to prevent malicious tampering of the package during delivery or storage.

- A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 16

After the intelligent vision platform enters the stable operation period, maintenance engineers are also required to perform routine maintenance on the system, the purpose of which is to detect and eliminate the hidden faults in the platform and equipment in time.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

If the encoding protocol of the camera configuration is H.265, and the bit stream format set on the intelligent vision platform is H.264, the live image of the camera will be unclear when viewed on the iClient.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 18

Camera log types include (). (Multiple Choice)

A. Operation log

B. Exception log

C. Alarm log

D. Run log

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

Which of the following descriptions of the SDC OS lightweight microservice governance framework is correct?

A. Mainly responsible for providing external interface services

- B. The framework is developed based on the Android kernel
- C. Realize service registration and discovery through file operations, and maintain inter-service communication
- D. The purpose is to realize the management of third-party apps

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

IVS1800 supports two configuration modes: local man-machine and iClient.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

When the bayonet camera is used in conjunction with the radar, the distance for the radar speed measurement to capture is 15m-30m.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

If it is found on the intelligent vision platform that the camera to be subscribed is performing an intelligent analysis task, continue to click "Subscribe", and the intelligent analysis task of the camera will be interrupted.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 23

Through the () function, the overall status of the system can be checked, including resource operating status, basic database information, etc.

- A. Cruise
- B. Log
- C. Inspection
- D. Alarm

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 24

The micro edge is suitable for small surveillance scenarios such as supermarkets, schools, bank business halls, and parks.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

IVS3800 complete installation scenario, the server shipped to the site has completed the installation of Host os CSP and IVS applications.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 26

Which of the following descriptions about the relationship between virtualization and cloud computing is wrong?

- A. At present, cloud computing will use container and virtual machine technology
- B. Without cloud computing, virtualization has no value
- C. Virtualization is a technology, and cloud computing is a service model. Virtualization promotes the development of cloud computing
- D. Virtualization is one of the important technologies to realize cloud computing

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

Which of the following RAID modes are supported by the IVS1800 business data disk?
(Multiple choice)

- A. RAID 6
- B. NON-RAID
- C. RAID 1
- D. RAID 5

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

Algorithm collaboration does not support two intelligent vision platforms as upper and lower algorithm warehouses for each other. For example the configuration A docking platform superior B Algorithm Storage platform cannot then B internet subordinate algorithm as warehouses, docking A method warehouse platform.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

The transmission access methods provided by the integrated site include ().

- A. GPON wired access
- B. Ethernet wired access

- C. Microwave wireless access
- D. LTE wireless access

Answer: (SHOW ANSWER)

NEW QUESTION: 30

In the IVS3800 system, it is necessary to configure "IPC HTP synchronization ". The reason does not include which of the following options?

- A. Set the time separately on the camera web interface, which is easy to cause the time deviation between the cameras and between the cameras and the server.
- B. The time between the camera and the server is not synchronized, which may cause the platform video to not be saved
- C. The system provides the NTP synchronization function. The camera automatically synchronizes the time with the connected node and the node automatically synchronizes the time with the management node to ensure that the system time is consistent.
- D. The camera cannot be separately configured for NTP synchronization

Answer: D (LEAVE A REPLY)

NEW QUESTION: 31

The volume of video network sharing services will affect the number of hard disks and thus the number of single servers.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

(500 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 32

In front-end intelligence, different modules correspond to different functions.

Which of the following statements is correct?

- A. The function of the platform analysis module of the IVS platform is to store and retrieve structured data to realize intelligent analysis of image streams and video streams
- B. The main function of the smart camera is to perform target detection and partial recognition, and convert the video stream into basic structured data

C. The third-party application platform can subscribe to the IVS platform for smart data, display data, etc.

D. The main function of the access platform module of the IVS platform is to support the access of smart cameras, the storage and forwarding of original videos, pictures, and structured data

Answer: (SHOW ANSWER)

NEW QUESTION: 33

Cross-line statistics refers to setting up a cordon in a designated area, counting the number of people entering and exiting, and alerting based on the difference in the number of people.

A. True

B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 34

The PowerCube500 alarm indicator flashes yellow slowly, indicating:

A. The module has no power input or malfunction

B. The module has an alarm and can be recovered

C. The module has an internal fault and cannot be recovered

D. The module has an external fault and can be recovered

Answer: B (LEAVE A REPLY)

NEW QUESTION: 35

During video backup between platforms, the configuration server backup download speed is extremely fast, for example, the video is backed up at 1 time, 2 times, 4 times and 8 times the speed of the camera code. Which of the following types supports setting 2 times speed backup? (Multiple choice)

A. The ongoing scheduled real-time backup of the server

B. Manual recording stored on the server

C. Planned video stored on the server

D. Manual real-time backup of the server

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 36

Which two types of domains does Huawei Nss protocol use for docking?

A. Any platform is fine

B. Huawei platform and third-party platform

C. Both are third-party platforms

D. Both are Huawei platforms

Answer: D (LEAVE A REPLY)

NEW QUESTION: 37

Execute () operation, except the device IP, device port, user upload certificate, and the focus position of the hemisphere and drum machine in manual/semi-automatic mode, all other parameters are restored to the factory configuration.

- A. Completely restore the default configuration
- B. Device reset
- C. Restore the default configuration
- D. Set up self-test

Answer: C (LEAVE A REPLY)

NEW QUESTION: 38

A city wants to establish a video site along the coast. This area is remote, and the network conditions are poor and there is no wired network coverage. Which network access method is appropriate?

- A. Microwave wireless access
- B. Ethernet wired access
- C. All of the above
- D. GPON wired access

Answer: A (LEAVE A REPLY)

NEW QUESTION: 39

When checking the license operating status of the intelligent vision platform, what needs to be focused on is whether the license status is activated and the license utilization rate.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 40

Regarding the face deployment control operation of the intelligent vision platform, which of the following statements is wrong?

- A. When controlling the face, you need to upload the picture of the specific person to the platform or select the object to be controlled from the list library
- B. After a face control alarm occurs, you can view the live and video playback to obtain more information when the control alarm occurs
- C. If the face control task is set, there is no need to open the intelligent analysis task of face recognition on the platform
- D. After the face control alarm occurs, you can view the corresponding alarm result on ic1ient

Answer: C (LEAVE A REPLY)

NEW QUESTION: 41

Regarding the wiring method, which of the following descriptions is correct? (Multiple choice)

- A.** EOR (End of Rack) access switches are deployed at the top of each row of cabinets, and all servers in the row of cabinets communicate with the outside through the access switches
- B.** TOR (Top of Row) access switches are deployed at the top of each row of cabinets, and all the servers in the row of cabinets communicate with the outside through the access switches
- C.** The EOR (End of Rack) access switch is deployed in the cabinet at the end of each row of cabinets, and the servers in all the cabinets in the row are connected to the switch through horizontal wiring
- D.** The TOR (Top of Row) access switch is deployed in the cabinet at the end of each row of cabinets. The servers in all the cabinets in the row are connected to the switch through horizontal wiring.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 42

By configuring the camera video quality diagnosis plan, which of the following screen abnormalities can be automatically identified? (Multiple choice)

- A.** Jitter
- B.** Snow noise
- C.** The video screen freezes
- D.** Color cast

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 43

Regarding the management node of the IVS 3800, which of the following statements is incorrect?

- A.** The server containing the CSPOM container is defined as the management node
- B.** IVS3800C can be deployed as a management node
- C.** The management node can be deployed in a single machine or in a cluster
- D.** On the "Server Node" tab of the LLD report, if the "Node Type" is "Management Node", the server is used as the CSP management node

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 44

If the engineer forgets to enable the " Bayonet Data Storage " and " Metadata Subscription " functions on the HoloSens iClient when configuring the front-end intelligent functions of a certain vehicle recognition camera.

So what are the consequences?

- A. Cannot see the live status of the camera on iClient
- B. When performing vehicle bayonet data detection, the data from the front-end camera cannot be found
- C. Cannot configure intelligent analysis task for this camera on iClient
- D. The camera cannot be recorded on iClient

Answer: B (LEAVE A REPLY)

NEW QUESTION: 45

Which of the following are not part of the ONVIF protocol standard?

- A. Profile B
- B. Profile T
- C. Profile S
- D. Profile A

Answer: A (LEAVE A REPLY)

NEW QUESTION: 46

For the two-way single-lane scene where vehicles pass, which of the following camera selection methods is most suitable for?

- A. 4-cylinder machine 2 ball machine
- B. 2-cylinder machine 1 ball machine
- C. 4-cylinder machine
- D. 3-cylinder machine 2 ball machine

Answer: B (LEAVE A REPLY)

NEW QUESTION: 47

Regarding the Huawei HoloSens IVS1800 interface, which of the following descriptions is correct? (Multiple choice)

- A. IVS1800 alarm interface is used to connect external alarm input equipment and external alarm output equipment
- B. The USB interface of IVS1800 can be used to connect a U disk, connect a USB mouse, and connect a mobile hard disk

C. The HDMI interface of IVS1800 is used for HDMI video output, and does not support dual HDMI heterogeneous output

D. IVS1800 serial port is used for equipment maintenance access

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 48

Manually rotate the aperture knob on the lens to adjust the aperture size.

A. False

B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 49

Which of the following product forms of IVS3800 need to build RAID5 and RAID1 when configuring data disk RAID?

A. IVS3800R V2

B. IVS3800S V2

C. IVS3800F V2

D. IVS3800C V2

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 50

If a suspected vehicle needs to be intercepted and checked on a certain road section, control measures can be implemented on the vehicle on the video service platform.

A. True

B. False

Answer: B (LEAVE A REPLY)

NEW QUESTION: 51

When the smart analysis task is executed on the " Smart Application > Task Management " interface on the HoloSens iClient, a failure is prompted.

Which of the following may not be included?

A. The number of platform licenses is insufficient

B. The camera is offline

C. Insufficient analysis resources of the platform

D. The docking of the access platform and the analysis platform is not completed

Answer: D (LEAVE A REPLY)

NEW QUESTION: 52

Huawei's integrated video site is suitable for power supply of various low-power devices, matching the needs of the entire site, and is widely used in smart city highways, highways, parks, scenic spots and other scenarios

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 53

Regarding the monitoring platform docking analysis platform, which of the following statements is incorrect?

A. If there are IVS3800s, IVS3800C and IVSS3800R in the environment, the monitoring platform and the analysis platform need to be connected

B. If the connection is successful, various smart applications can be viewed in the " Smart Applications " on the homepage of iClient, and if it fails, there is only one application of " Smart Recognition "

C. If there is only IVS3800F in the environment, there is no need to connect the monitoring platform and the analysis platform

D. If not successful docking analysis platform, log in iClient the client, the interface will pop up " intelligence account user name or password is empty " warning

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 54

Regarding UPS equipment, is the following description wrong? (Multiple Choice)

A. UPS5000 is suitable for medium and large data centers, such as dispatch centers, control centers, management centers and other key power supply scenarios

B. FusionPower is suitable for small data centers, such as branches, business outlets, offices, etc.

C. UPS2000 is suitable for small data centers, such as branches, business outlets, offices, etc.

D. UPS2000 is suitable for large data centers, such as large cloud data centers, large enterprise headquarters, etc.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

After the camera performs the restoration of the default configuration, all the parameters except () are restored to the factory configuration, which should be used with caution.

(Multiple choice)

A. Device IP

B. User upload certificate

C. Focus position of hemisphere and tube machine in manual and semi-automatic mode

D. Device port

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 56

Huawei HoloSens IVS3800 networking mode includes ().

- A. Three-level networking
- B. Multi-level and multi-domain networking
- C. Single domain networking
- D. Secondary networking

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 57

Which of the following statements about the supporting equipment of the electric police bayonet camera is wrong?

- A. Radar can be used for speed measurement, usually there are single-lane radar and multi-lane radar.
- B. The coil is buried under the road to detect the passing of vehicles, and it can also be used to measure speed
- C. The flashing light can fill the environment, the appearance of the vehicle / license plate and the cab in the car. It is often used for electric police mode monitoring, assisting in capturing illegal behaviors such as running red lights.
- D. The dialogue with the control center can be realized by connecting external pickups and amplifiers

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 58

The light edge network platform uses Kubernetes as the container scheduling engine.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 59

In the process of face recognition, we need to align the face, and affine transformation is an important step in face alignment, the purpose is to accurately locate the key parts of the face and follow it accurately.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 60

The light edge platform IVS3800 uses Kubernetes as the container scheduling engine.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 61

POE+ adopts IEEE802.3bt standard, and its output power consumption does not exceed ().

- A. 50W
- B. 30W
- C. 15.4W
- D. 90W

Answer: D (LEAVE A REPLY)

NEW QUESTION: 62

When multiple lens devices are installed in a certain area (exceeding the maximum number of windows supported by the client), and these video sites need to view the live video, which of the following functions can be used to achieve?

- A. Cruise
- B. Multiple layouts
- C. On the wall
- D. Polling

Answer: D (LEAVE A REPLY)

NEW QUESTION: 63

The number of video analysis channels will affect the number of single-check servers.

- A. False
- B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 64

Which of the following is not a typical scenario of "prevention and control grid"?

- A. Financial unit
- B. Square
- C. Sports venues
- D. Community

Answer: A (LEAVE A REPLY)

NEW QUESTION: 65

In the process of cross-line detection, which feature value of the moving object does not need to be obtained?

- A. Movement trends
- B. Movement direction
- C. Movement speed
- D. Exercise time

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 66

If you need to install a third-party vendor's smart algorithm plug-in on the smart vision platform, you need to import the corresponding license in the " Third Party License Management " interface of the platform.

- A. False
- B. True

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 67

Huawei HoloSens IVS1800 multi-machine deployment network, what is the largest camera access scale?

- A. 256
- B. 64
- C. 32
- D. 128

Answer: [A \(LEAVE A REPLY\)](#)

NEW QUESTION: 68

Which of the following is not a prerequisite for the intelligent vision platform to perform target capture statistics?

- A. Have subscribed to the face metadata generated by the smart camera on the platform
- B. A target fortification mission has been created for the camera on the platform
- C. The target recognition algorithm plug-in has been installed on the platform
- D. Target recognition intelligent analysis task has been created for the camera on the platform

Answer: [B \(LEAVE A REPLY\)](#)

NEW QUESTION: 69

In the basic construction stage of the video site, civil construction is an important link, which mainly includes site infrastructure construction, hand well construction, power and transmission introduction trench excavation and landfill.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 70

If the two intelligent vision platforms are in a superior-subordinate relationship, and the subordinate platform actively initiates registration to the superior platform, this relationship is called cascading.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 71

Which of the following functions can be achieved by intelligent analysis of the target intelligent vision platform? (Multiple Choice)

A. It can compare the analyzed facial feature value of the camera with the customer's target feature database in real time, to obtain the corresponding identity information from the customer's target feature database

B. You can compare two pictures to give a similarity value to help users judge the probability that the two are the same person

C. Target retrieval can be performed based on the target image uploaded by the user

D. Can identify the target information that appears in the video or video

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 72

Which of the following is not under the core specification of the ONVIF protocol?

A. Live streaming

B. Device discovery

C. Signaling control

D. PIZ control

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 73

Which of the following descriptions about chip functions are correct? (Multiple choice)

A. CPU: suitable for processing control tasks with complex processes

B. GPU: It is a programmable chip, suitable for some scenes that require accelerated calculations

C. NPU: Neural network dedicated chip, which can be customized and developed in combination with applications

D. FPGA: suitable for image processing, often used in fields such as games and images

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 74

IVS3800 improves the reliability of data through the backup function. Which of the following statement about backups is wrong?

- A. Backup source server and destination server can be in the same cluster
- B. Real-time backup is to back up the real-time video of the camera and the metadata obtained by analysis
- C. Support for backing up videos and pictures to parallel domains and superior domains
- D. Historical backup is to back up the historical data of the camera

Answer: A (LEAVE A REPLY)

NEW QUESTION: 75

If the solar photovoltaic module bracket is corroded and rusted, it can be replaced when the solar photovoltaic module is damaged.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 76

Resource collaboration means that when the analysis resources of the upper-level domain IVS platform are tight, according to the business scenario, you can apply for the analysis resources of the lower-level domain or cross-level domain to perform intelligent analysis tasks based on video files.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 77

Huawei's " software-defined camera SDC" is all based on professional AL cores, open operating systems, and a rich ecosystem to define security cameras in the smart era.

- A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 78

The resolution of a camera is 1080P, the code rate is 4Mbps, it needs to be stored for 30 days, and it needs () storage space.

A. 1.25T

B. 0.75T

C. 2.15T

D. 1.85T

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 79

Which of the following statement about IVS1800 is wrong ?

A. The iClient client scenario is applicable to multiple IVS1800 scenarios

B. iClient field is, need to prepare - a PC is used to configure the business

C. For local man-machine scenarios, a PC needs to be prepared for business configuration

D. The local airport is suitable for a single IVS1800 scene

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 80

On the CS POM Porta1 resource monitoring interface, you can view the running status of nodes and containers.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 81

The license plate captured by the camera is blurry. Which reason is not included?

A. Focus on other places

B. Shutter speed is too high

C. Shutter speed is too slow

D. The image sharpness is too low

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 82

In the process of installing IVS applications, which of the following materials are needed?
(Multiple choice)

A. Process documents

B. CSP installation image package

C. Json file

D. VS3000 application software package

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 83

The following description of the human intelligence analysis of the intelligent vision platform, which is wrong? (Multiple choice)

A. Human body picture retrieval refers to importing a picture containing a human body into the platform, the system automatically analyzes the human body characteristics in the picture, and searches according to the characteristics, and sorts according to the similarity

B. Human body condition retrieval means that the system searches for matching human pictures based on the input condition attributes

C. Human body intelligent analysis and face intelligent analysis share an intelligent algorithm package, so the platform does not need to install an additional algorithm package for human intelligent detection

D. Human body recognition refers to identifying the human body that appears in the monitoring area, and obtaining the attributes of the human body, including gender, age group, top coat style / texture / color, bottom coat style / color, backpack, hat, rainy year, etc.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 84

Regarding the connection between Micro Edge and other platforms, which of the following statements is wrong?

A. After IVS1800 is connected to IVS3800, IVS3800 can perform live browsing and video playback operations on the cameras under IVS1800

B. IVS1800 supports access to the IVS3800 platform through the ONVIF protocol

C. IVS1800 does not support access to VS3800 as NVR device

D. IVS1800 supports access to the IVS3800 platform through the T28181 protocol

Answer: C (LEAVE A REPLY)

NEW QUESTION: 85

Regarding the access method of Huawei cameras, which of the following statements is wrong?

A. When adding a small number of cameras, it supports single addition

B. Support automatic batch addition and manual batch addition

C. Automatic batch mode supports adding offline cameras

D. Manual batch addition supports adding offline cameras

Answer: C (LEAVE A REPLY)

NEW QUESTION: 86

POE adopts IEEE802.3af standard, and its output power consumption does not exceed ().

- A. 30W
- B. 15.4W
- C. 50W
- D. 71W

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 87

Which of the following descriptions about the view gallery application platform is correct?

- A. During data retrieval, the platform supports online retrieval across multi-level visual galleries
- B. Since the upper and lower units of the visual library system are cascaded, the application platforms of different levels are exactly the same
- C. All of the above options are correct
- D. The video gallery application platform does not support user management

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 88

What are the common installation methods of bolt and tube machine? (Multiple choice)

- A. Wall mount bracket + universal joint
- B. Embedded installation
- C. Hoop + universal joint
- D. Hoop + wall bracket + universal joint

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 89

The distribution rate of a camera is 1080P, the code rate is 4Mbps, it needs to be stored for 30 days, and it needs storage space of ().

- A. 1.85T
- B. 0.75T
- C. 2.15T
- D. 1.25T

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 90

Which of the following descriptions about the utility scheme is wrong?

- A. The battery has a life span, this factor needs to be considered in the planning stage
- B. If there is no power outage in a certain area, the site power supply plan needs to adopt the city power + lithium battery plan
- C. The lithium battery module guarantees the power supply of the site equipment in the event of a power failure

D. Stations powered by city power do not need to be equipped with lithium battery modules at all sites

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 91

When choosing the installation method of the camera, you can consider from the two dimensions of the installation environment and the camera type.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 92

Gauss DB is widely used in video cloud platforms. Which of the following descriptions about Gauss DB OLTP are correct? (Multiple choice)

A. Simple and easy to use

B. Is a NoSQL database

C. Extreme performance

D. Safe and reliable

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 93

The single-choice SDK protocol can be used for real-time preview, voice intercom, voice broadcast, cloud mirror control, arming and disarming, parameter configuration, equipment management, intelligent analysis, etc.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 94

Which of the following functions is not available in IVS 1800?

A. People and Vehicle Inspection Elements

- B. Intelligent behavior analysis
- C. Docking with IVS3800
- D. Stacking

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 95

Which of the following are the reasons for the blurring of the monitoring screen? (Multiple Choice)

- A. The lens aperture size is inappropriate
- B. The surface of the lens is dirty or there are water stains, dust etc.
- C. Influence of noise reduction intensity
- D. Incorrect lens focal length or inaccurate focus

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 96

About IVS 3800 description and analysis platform monitoring platform system, which of the following is incorrect?

- A. IVS3800F contains both a monitoring platform and an analysis platform
- B. One monitoring platform can only be connected to one analysis platform, but one analysis platform can be connected to multiple monitoring platforms
- C. Analysis platform refers to image analysis service and image retrieval service, mainly responsible for the processing of intelligent business
- D. The monitoring platform refers to the image management service, which is mainly responsible for the access, storage and forwarding of the view

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

After the camera performs the restoration of the default configuration, all parameters except () are restored to the factory configuration, which must be used with caution.

- A. Device IP
- B. Device port
- C. Focus position of hemisphere and tube machine in manual / semi-automatic mode
- D. User upload certificate

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 98

Which of the following is not the Huawei Ho1oSens IVS1800 device model?

- A. NS1800-C08-64T
- B. VS1800-C08-16T
- C. VS1800-C08-32T
- D. VS1800-C08-4T

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 99

The video big data system can aggregate and store all kinds of video data (vehicles, faces, portraits, etc.) and perform standardized processing.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 100

The basic construction of the video site includes nine parts: positioning and laying out, excavation of foundation pit, construction materials entering the site, foundation pit bottoming, grounding parts production and grounding, formwork fixing, concrete construction, exit maintenance, and muck backfilling.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 101

In order to prevent light reflection, the strobe lights for bayonet cameras are usually installed crosswise, and the strobe lights are more than 2 meters away from the camera.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 102

After the upper-level domain is connected, what operations can the upper-level domain do to the lower-level domain? (Multiple choice)

- A. The upper-level domain can add or delete users for the lower-level domain
- B. The upper-level domain can view the alarm information reported by the lower-level city
- C. The upper-level domain can view the live images of all cameras in the lower-level domain
- D. The upper-level domain can add and delete cameras for the lower-level domain

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 103

In a certain project, the customer purchased two IVS3800F, so when the delivery engineer is planning the network, how many optical ports and electrical ports need to be reserved for the server to meet the hardware connection requirements?

- A. 3 optical ports: 3 electrical ports
- B. 6 optical ports: 6 electrical ports

- C. 3 optical ports: 6 electrical ports
- D. 6 optical ports: 3 electrical ports

Answer: B (LEAVE A REPLY)

NEW QUESTION: 104

In the IVS3800 management node cluster deployment scenario, which of the following statements are correct? (Multiple choice)

- A. The installation order of the management master node and the management slave node is in no particular order
- B. IVS3800 and IVS3800F can be used as management nodes or business nodes
- C. In the cluster scenario, there are 3 servers that contain CSPOM containers. You need to manually specify 1 server as the CSP management master node and the remaining 2 servers are the CSP management slave nodes.
- D. You can log in to the CSP OM Portal only after the master node is successfully installed

Answer: B,C,D (LEAVE A REPLY)

NEW QUESTION: 105

The intelligent vision platform can conduct intelligent vehicle analysis by subscribing to the passing metadata of the smart camera.

- A. False
- B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 106

There are many ways to configure the camera's IP address, including (). (Multiple choice)

- A. The network camera automatically obtains an IP address through DHCP
- B. through the computer to access the network camera web end manually modify the default IP address
- C. Manually configure the IP address through configuration tools such as engineering treasure
- D. Get the camera IP address through the platform client's active addition method

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 107

In order to deal with different power supply scenarios, the power supply methods provided by the video site include () (Multiple choice)

- A. Pure mains solution
- B. Optoelectronic solutions
- C. Electric hybrid solution
- D. Pure light solution

Answer: (SHOW ANSWER)

NEW QUESTION: 108

"V" on the universal meter is a jack used to measure voltage, resistance, diodes, and triodes, and is dedicated for red pens.

- A. True
- B. False

Answer: B (LEAVE A REPLY)

NEW QUESTION: 109

By turning on the () function, you can monitor the abnormal jitter, noise and other phenomena of the video screen in a specific area, and at the same time, you can report an alarm to the platform.

- A. Video occlusion
- B. Intelligent analysis
- C. Video quality diagnosis
- D. Motion detection

Answer: C (LEAVE A REPLY)

NEW QUESTION: 110

The WIFI indicator of the Power Cube 500 function module shows a steady red light, indicating that the WIFI function () at this time.

- A. WLAN module failure
- B. The WLAN module has been identified and can work normally
- C. The WLAN module is not inserted or the inserted WLAN module cannot be recognized
- D. First access, need to re-function module

Answer: A (LEAVE A REPLY)

NEW QUESTION: 111

The Shengteng chip supports both training and reasoning functions. The camera equipped with this chip has the ability to actively evolve the body.

A. False

B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 112

The power supply mode of the camera only supports the power supply mode of the power cord.

A. False

B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 113

What are the categories of storage virtualization? (Multiple choice)

A. File-level virtualization

B. Block-level virtualization

C. Application-level virtualization

D. Page-level virtualization

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 114

Which two subsystem functions does Huawei's smart vision platform have?

A. Video image information database, video image information (comprehensive) application platform

B. Video image information acquisition equipment or system, video image information (comprehensive) application platform

C. Video image analysis system, video image information collection equipment or system

D. Video image analysis system, video image information (comprehensive) application platform

Answer: D (LEAVE A REPLY)

NEW QUESTION: 115

SDC os is based on the characteristics of the container, ensuring that the camera can be started normally only after the integrity and legality of the system software package is verified during the startup phase, avoiding the malicious flashing of the outdoor deployment camera, and intruding into the user network.

A. False

B. True

Answer: B (LEAVE A REPLY)

NEW QUESTION: 116

Which of the following functions can be achieved by the intelligent face analysis of the intelligent vision platform? (Multiple choice)

- A. It can compare the analyzed facial feature value of the camera with the customer's facial feature database in real time, so as to obtain the corresponding identity information of the person from the customer's facial feature database
- B. The face search can be performed based on the face image uploaded by the user
- C. You can compare two pictures to give a similarity value to help users judge the probability that the two are the same person
- D. It can recognize the facial information that appears in the video or video

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 117

If each Huawei HoloSens IVS1800 is connected to 64 cameras, how many IVS1800 can one iClient support at most?

- A. 8
- B. 16
- C. 4
- D. 2

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 118

When the upper and lower domains of the intelligent vision platform collide, which of the following network planes should be used for connection between the servers?

- A. Outer--OM (External Management Network)
- B. Inner_OM (internal management network)
- C. Inner_Service (internal business network)
- D. BNC_OM (Device Management Network)

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 119

After the micro-mount camera is installed, the still objects in the picture are clear and the moving objects are blurred. Which of the following measures can solve the problem?

- A. Increase saturation
- B. Lower the shutter limit value
- C. Increase airspace noise reduction parameters
- D. Improve sharpness

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 120

Which of the following are the reasons why the video cannot be played after logging in to the live page? (Multiple choice)

- A. The local firewall is not turned off
- B. The playback control is not installed normally or is forbidden to run
- C. When the native operating system is Windows 7/8/10 operating system, the browser is not run as an administrator
- D. Browser setting problem

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 121

The video cloud storage system also adopts Erasure Code to ensure data consistency and ensure the safety and reliability of data in massive data storage scenarios.

While writing, by the client slice (N) and transcoding (M), co-generating N + M pieces of data, what is the maximum value of M in them?

- A. 4
- B. 2
- C. 3
- D. 5

Answer: C (LEAVE A REPLY)

NEW QUESTION: 122

The information needed to establish a vehicle information file comes from vehicle video data.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 123

Which of the following are the development trends of data centers? (Multiple choice)

- A. Resource cloudification
- B. Business automation
- C. Intelligent hardware system
- D. Modular components

Answer: (SHOW ANSWER)

NEW QUESTION: 124

If the "full coverage" method is used to configure the recording and bayonet data storage strategy, when the storage space is full, in what order will the system perform data coverage in turn?

- A. Recordings or pictures without a retention period → Videos or pictures beyond the retention period → The earliest video or picture within the retention period
- B. Videos or pictures beyond the retention period → Videos or pictures without a retention period → The earliest video or picture within the retention period
- C. The earliest record retention period or pictures → not configured retention period of the video or pictures → exceed retention of video or pictures over
- D. retention period of the video or pictures → retained the earliest period of the video or pictures → not configured retention period of the video or picture

Answer: B (LEAVE A REPLY)

NEW QUESTION: 125

What are the intelligent analysis functions supported by MCS algorithms? (Multiple choice)

- A. Tagging
- B. NVN
- C. Search
- D. Fortification

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 126

Which of the following descriptions about the video site network selection is wrong?

- A. For some remote areas that cannot be covered by wired networks, consider using wireless methods such as microwave and LTE
- B. The transmission distance of microwave is not far, usually less than km. Therefore, the microwave method cannot be used in scenarios with long transmission distance.
- C. In the bustling urban area, the network access method of the switch is usually considered
- D. The GPON method is suitable for deploying optical fiber areas, and the video sites are covered by large-capacity and high-density

Answer: B (LEAVE A REPLY)

NEW QUESTION: 127

In video analysis, if you want to obtain the trajectory of the target object, you can track the moving object and record the center of mass of the moving object to connect all the center of mass to form the trajectory of the moving object.

- A. False

B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 128

When the CSP after the installation is complete, the virtual console in the need to disconnect the disc image, and iBMC on interface " boot media is valid " is set to " permanent ", " boot media " modify " hard "

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 129

Container and cloud computing technologies have been applied to light edge platforms and central cloud platforms respectively. Which of the following descriptions of the two technologies are correct? (Multiple choice)

A. A virtual machine provides an environment for virtual hardware machines at the hardware level, while a container provides an environment for virtual operating systems at the operating system level

B. Due to the excellent virtualization capabilities and resource utilization capabilities of the container, its scalability is better than that of virtual machines.

C. The commonality of virtual machines and containers is the solution of virtualizing one resource object into multiple resource objects through virtualization technology

D. Compared with the virtual machine, the security performance of the container is insufficient, and the scope of impact after being hacked is large

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 130

To determine whether a site's network transmission supports microwave mode, which of the following site survey elements should be paid attention to?

A. Site installation location

B. Camera irradiation area

C. Site network transmission method and routing

D. On-site constructability survey

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 131

For the routine inspection of CSP, which of the following parts are mainly included? (Multiple choice)

A. View the running status of the cluster

B. Check the status of the license

C. View the running status of CSP and container

D. Check CPU and memory usage status

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 132

The device can be restarted remotely on the camera web surface.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 133

Regarding the description of the MPUT and MPUR nodes of the intelligent vision platform, which of the following statements is correct?

A. Both MPUT and MUPR support video forwarding

B. Both MPUT and MUPR support camera access

C. Both MPUT and MUPR support video backup

D. Both MPUT and MUPR support platform video storage

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 134

In the pre-installation scenario of IVS3800, which of the following steps is not required?

A. Install server and switch hardware

B. Configure the switch network

C. Install CSP and IVS applications

D. Design LLD

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 135

After the upper-level domain is connected, what operations can the upper-level domain do to the lower-level domain? (Multiple choice)

A. The upper-level domain can add or delete cameras for the lower-level domain

B. The upper-level domain can view the alarm information reported by the lower-level domain

C. The upper-level domain can view the live images of all cameras in the lower-level domain

D. The upper-level domain can add or delete users for the lower-level domain

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 136

When configuring the front-end camera to connect to the platform, different access methods are used in different scenarios. Regarding the choice of camera access method, which of the following statements is correct? (Multiple choice)

- A.** When the user only knows the IP address segment, and there are a large number of online cameras that need to be connected to the IS platform, they can be quickly added by manual batch addition
- B.** When users have planned specific IP addresses for a large number of cameras, and want to connect them to the platform, they can add them in batches automatically
- C.** ADVR, DVS or NVR only supports analog camera access, so you need to add analog cameras to the platform by adding DVR/DVS/NVR
- D.** When a small number of cameras are added and they are to be connected to the IVS platform, they can be added in a single way

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 137

Regarding the access platform docking analysis platform, which of the following statements is incorrect?

- A.** If the connection is successful, various smart applications can be viewed in the " Smart Applications " on the homepage of iClient, and if it fails, there is only one application of " Smart Recognition "
- B.** If there are IVS3800S, IVS3800C and IVS3800R in the environment, you need to connect the access platform and the analysis platform
- C.** If there is only IVS3800F in the environment, there is no need to connect the access platform and the analysis platform
- D.** If not successful docking analysis platform, log in iClient the client, the interface will pop up " intelligence account user name or password is empty " warning

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 138

The central cloud platform uses the Huawei Cloud stack solution. Which of the following descriptions of the virtualization components in the Huawei Cloud stack is incorrect?

- A.** CNA can manage cluster network, storage, and computing resources
- B.** VRM can run on CNA, or it can be deployed on a separate physical machine
- C.** CNA provides computing resources for virtual machines

D. VRM provides a management portal for administrators

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 139

PowerCube 500 function module and lithium battery module communicate through () interface.

- A. PoE interface
- B. COM_CAN interface
- C. POE+ interface
- D. RS485 interface

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 140

When configuring a cloned camera on the intelligent vision platform, it supports not only the cloning of the local camera, but also the subduing of the external camera.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 141

What can effectively compensate for the dark defect of the main body of the picture when the camera is shooting in a backlight environment.

- A. Strong light suppression
- B. White balance
- C. Backlight compensation
- D. Noise reduction

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 142

The lens surface is not clean, or the presence of water stains, dust, etc. may cause which of the following failures?

- A. There is an unclear situation in the monitoring interview
- B. Fuzzy screen appears on the live screen
- C. The picture is dark or bright
- D. The overall image noise is too much, resulting in unclear image lines

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 143

Which of the following reasons will not cause a large number of dropped calls has been registered in the camera platform? (Multiple choice)

- A. The account and password for camera access have expired

- B. There is a problem with the power supply line of the camera
- C. The network connecting the camera to the platform fails
- D. The time set by the camera is not synchronized with the time on the platform

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 144

Regarding the relationship between smart vision platform equipment and business requirements, which of the following descriptions is correct?

- A. The number of Huawei HoloSens IVS3800S is affected by the volume of video image analysis services
- B. The number of Huawei HoloSens IVS3800C is affected by the volume of video image retrieval services
- C. The number of Huawei HoloSens IVS3800R is affected by the volume of video network sharing services
- D. The number of Huawei HoloSens IVS3800S is affected by video networking services

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 145

If the two intelligent vision platforms are in a superior-subordinate relationship, the subordinate platform actively initiates registration to the superior platform, and then pushes the directory and device information under its jurisdiction after the superior authentication.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 146

When checking the power supply of the camera, for the ball camera without power supply instructions, you can judge whether the power supply of the camera is normal by checking whether it can automatically rotate after power-on.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 147

Which of the following conditions is not a requirement for the installation environment of intelligent traffic surveillance cameras?

- A. ambient brightness needs 701ux to 9001ux between
- B. Try to avoid installing near objects with strong reflective characteristics such as glass, floor tiles, water surfaces, leaves, road signs, billboards, etc.
- C. Try to avoid any liquid that can flow into the inside of the equipment
- D. Try to install on both sides of the road to get the best view

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 148

In the central cloud platform solution, the data disk on Ocean Stor9000 is used to store structured and semi-structured data.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 149

Which of the following descriptions about the characteristics of the view library system are correct?

- A. Visual library system architecture can realize the separation of data and application
- B. Video gallery cannot solve the problem of video information storage
- C. The video library system architecture cannot support big data applications
- D. All equipment that realizes the extraction of " key information " of video content must meet the standards of the video library system

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 150

Which of the following descriptions about the view library system interface is wrong?

- A. Depending on the data of each subsystem of the library, the information interaction needs to be completed through the corresponding interface
- B. All levels of video information databases are interconnected through cascading interfaces
- C. Cross-level fortification information interaction needs to be completed through the corresponding interface, and non-cross-level fortification information interaction can be completed without the corresponding interface.
- D. Through the collection interface, the video data can be collected into the video information database

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 151

Which of the following descriptions about the road situation security scene and the camera selection is wrong?

- A. For the two-way primary and secondary arterial road scenario, the deployment principle is that one simple machine covers one direction and two simple machines are required, and the dome machine is optional
- B. directed to T do scene-junction, a cylinder machine deployment principal cover in one direction, need four simple machines, a ball dome and remote security dynamic fill blind

C. For the entrance and exit scenarios of important buildings / places, the deployment principle is that one simple machine covers the entrance and exit, one or two tube machines cover the intersection, and one dome camera is used for dynamic blind compensation and long-distance security.

D. For the crossroad scene, the deployment principle is that one tube machine covers one direction, four simple machines are needed, divided into two pole stations, and two balls are used for dynamic blind compensation and long-distance high security.

Answer: B (LEAVE A REPLY)
