### NEW QUESTION: 1

The relationship between user groups and accounts in user management is stored in a tree on the Agile Controller-Campus. An account belongs to only one user group.

Consistent with the corporate organizational structure: If the OU (OnizbonUnit) structure stored in the AD/LDAP server is consistent with the corporate organizational structure, users are stored Under 0OU, when the Agile Controller-Campus synchronizes AD/LDAP server accounts, which synchronization method can be used?

- A. AO Synchronize by "group", "0U describes the organizational structure
- B. LDAP synchronization by "group"
- C. AO Press "Group" "Synchronize," "Group" Jida organization structure
- D. Press"0U" to synchronize

**Answer: D (LEAVE A REPLY)**

### NEW QUESTION: 2

Business accompanying is-A special access control method, according to the user's access location, access time, access method and terminal use to grant designated investment limits, among which the physical connection can be divided into 3 Class, excluding which of the following access methods?

- A. VPN Access
- B. 802.1X Access
- C. Wireless access
- D. Wired access

**Answer: (SHOW ANSWER)**

### NEW QUESTION: 3

Traditional access control policy passed ACL or VLAN Can not be achieved with IP Address decoupling, in IP The maintenance workload is heavy when the address changes. And because

the agile network introduces the concept of security group, it can achieve the same IP Address decoupling.

A. False

B. True

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 4

Visitors refer to users who need temporary access to the network at a specific location.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

#### NEW QUESTION: 5

BY00 The products and textiles provided by the history solution program cover the entire terminal network\Application and management and other fields/include: Serialization BC Equipment, paperless network system network access support, VPN Gateway, terminal security customer ladder software, authentication system, mobile device management(MDN),move eSpace UC.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

#### NEW QUESTION: 6

Which of the following options is correct for the description of the role of the isolation domain?

A. Isolation domain refers to the area that is allowed to be accessed when the terminal user passes the identity authentication but fails the security authentication,such as patch server, virus database server.

The area where the server is located.

B. End users can access the isolated domain regardless of whether they pass identity authentication.

C. Isolation domain refers to the area that terminal users can access after passing identity authentication and security authentication, such as ERP system, financial system database system. The area where you are.

D. Isolation domain refers to the area that the terminal host can access before passing the identity authentication, such as DNS server, external authentication source, business controller (SC)c The area where the service manager (SM) is located.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 7

In the park, users frequently enter and leave the wireless signal coverage area due to office needs. If you need to ensure the user's Internet experience, after the user passes an authentication, when

he accesses the network again, no important authentication is required: Which of the following authentication methods is recommended?

- A. MAC Certification
- B. Portal Certification
- C. 802.1X Certification
- D. MAC (prioritized)

**Answer: D (LEAVE A REPLY)**

#### **NEW QUESTION: 8**

Which of the following law items is the most blessed for safety? This should be true?

- A. Terminal host security management is mainly implemented by inspection strategies, and end user behavior management is mainly implemented by monitoring strategies.
- B. Monitoring strategies are mainly used for real-time monitoring of events that occur in the system, such as whether anti-virus software is installed and whether PPPOE dial-up access is used Network, etc.-Once an incident is detected, some control can be taken.
- C. The security check strategy only includes two types of end-host check-type strategies and end-user behavior check-type strategies.
- D. Checking strategies are mainly used to check some static settings of the terminal, such as whether the screen saver is set, whether the antivirus software is installed; whether there is illegal Outreach etc. z00

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 9**

The user accesses the network through the network access device, and the third-party RADIUS server authenticates and authorizes the user. Regarding the certification process, which of the following options is wrong?

- A. Configure RADIUS authentication and authorization on the Agile Controller-Campus.
- B. Configure RADIUS authentication and accounting on the device side. W"
- C. Configure the Agile Controller-Campus for local data source authentication, receive the packets sent by the device, and perform authentication.
- D. Configure RADIUS authentication and accounting on the RADIUS server.

**Answer: C (LEAVE A REPLY)**

#### **NEW QUESTION: 10**

Security authentication is mainly achieved through security policies. The terminal host support management for the security check of monthly users is mainly realized by loose check policies. End user behavior management is mainly realized by monitoring policies. If users need to formulate policies according to their own wishes, they can use them. Custom strategy.

- A. True
- B. False

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 11**

The service free mobility function of the Agile Controller can guide the flow to the security center for processing according to the service, improving the utilization of physical equipment.

- A. True
- B. False

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 12**

After the user is successfully authenticated, Agile Controller-Campus Which of the following actions can be performed on the user (Multiple choice)

- A. Force users to go offline.
- B. Disable the mobile certificate account/Disable and assign roles.
- C. Audit users' online and offline records.
- D. To use Any Office The connected user performs remote assistance.

**Answer: A,B,C,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 13**

MAC Certification refers to 802.1x In the protocol authentication environment, the terminal does not respond to the connection control device after accessing the network 802.1x When protocol authentication is requested, the access control does not automatically obtain the terminal's MAC The address is sent as a credential to access the network RADIUS The server performs verification.

- A. False
- B. True

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 14**

The AD/LDAP account can be synchronized to the AgileController-Campus or not to the Agile Controller-Campus. Synchronize.

The Agile Controller-Campus can only be authorized by user group. If it is not synchronized to the Agile Controller-Campus, it can be fine-tuned based on the account.

Authorization

- A. False
- B. True

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 15**

Regarding the file source set in the software management, which of the following descriptions is correct?

- A. When the file source is an external data source, Any Ofce will obtain the software to be distributed.
- B. External data sources cannot distribute files from FTP-type file servers.
- C. When the file source is an internal data source, when distributing software, the business manager will only send thepath of the data source of the software to be distributed to Any Office
- D. The Microsoft Windows file sharing server uses the UNC (Universal Naming Conversion) path (beginning with "\\") to provide waiting. The path to distribute the software.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 16**

Regarding patch management and Windows patch checking strategies, which of the following descriptions is wrong?

- A. Patch management focuses on checking whether the terminal host has installed the specified patch,Perform access control on the terminal host.
- B. When the terminal host does not install the specified Windows When making a system patch, according toWindows The patch check policy prohibits terminal hosts from accessing the controlled network.
- C. Patch management and Windows The patch check strategy can check whether the terminal host has installed the specified Windows Make system patches.
- D. Windows Patch check strategy focuses on checking whether the terminal host is installed Windows Operating system patches.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 17**

Which of the following options is about SACG The description of the online process is wrong?

- A. Agile Controller-Campus Server gives SACG Carrying domain parameters in themessage
- B. Terminal and Agile Controller-Campus Server communication SSL encryption
- C. Authentication fails, end users can onlyaccess resources in the pre-authentication domain
- D. Security check passed,Agile Controller-Campus Server notification SACG Will end user's IP Address switch to isolated domain

**Answer:** D ([LEAVE A REPLY](#))

**NEW QUESTION: 18**

A policy template is a collection of several policies. In order to audit the security status of different terminal hosts and the behavior of end users, the administrator needs to customize.

The same policy template is used to protect and manage terminal hosts. Regarding the policy template, which of the following option descriptions are correct? (multiple choice)

- A. You can assign a policy template to a certain network segment.
- B. When configuring the policy template, you can inherit the parent template and modify the parent template policy
- C. Only the strategy in the strategy template can be used, and the administrator cannot customize the strategy.
- D. If different policy templates are applied to departments and accounts, the policy template assigned to the highest priority will take effect. The priority relationship of the number is: account>department

**Answer: A,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 19**

In some scenarios, an anonymous account can be used for authentication. What are the correct descriptions of the following options for the anonymous account?? (Multiple choice)

- A. Administrators cannot delete anonymous accounts "~anonymous".
- B. By default, the access control and policy of anonymous accounts cannot be performed. 1 Operations such as invoking patch templates and software distribution.
- C. The use of anonymous accounts for authentication is based on the premise of trusting the other party, and the authentication agency does not need the other party to provide identity information to provide services to the other party.
- D. Agile Controller-Campus Need to be manually created "~anonymous" account number.

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 20**

Jailbroken mobile terminal \ Mobile terminals with non-compliant applications installed or terminals with non-compliant lock screen passwords connecting to the corporate network for office operations are not safe for companies. Any Office How to solve the problem of mobile office system?

- A. Directly discard data sent by devices that do not comply with regulations
- B. Send alarm information to notify the administrator to deal with it.
- C. Check for non-compliant terminals, Prohibit unsafe devices from accessing the network.
- D. Certification of non-compliant equipment.

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 21**

Use on access control equipment test-aaa Command test and Radius When the server is connected, the running result shows a timeout, which may be caused by incorrect account or password configuration.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

#### NEW QUESTION: 22

Portal The second-level authentication method of authentication refers to the direct connection between the client and the access device(Or only layer devices exist in between),The device can learn the user's MAC Address and can be used IP with MAC Address to identify the user.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

#### NEW QUESTION: 23

Secure email is Any office Solution for corporate office OA The killer application provided, it provides powerful email business capabilities and rich email strategies. For secure mail, which of the following descriptions are correct? (Multiple choice)

A. Online survey of attached documents is not supported.

B. Through the mail client, you can connect No or Exchange Mail system.

C. Support automatic mail transmission encryption, transmission encryption method supports a full range of IPSec/TLS protocol.

D. Support MAP4/SMTP/EAS Send and receive emails with standard protocols such as, and support real-time email push.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 24

What are the three main steps of business free deployment? (Multiple choice)

A. The system runs automatically

B. Define user groups

C. Define and deploy group policies

D. Security group reported by the system

E. Define security group

Answer: A,C,E ([LEAVE A REPLY](#))

#### NEW QUESTION: 25

Which of the following options is not included in the mobile terminal life cycle?

A. Obtain

B. deploy

C. Uninstall

D. run

**Answer: C ([LEAVE A REPLY](#))**

**NEW QUESTION: 26**

Regarding the definition of WIPS/WIDS, which of the following statements is correct?

- A. WIPS Wireless intrusion detection system
- B. WIPS Is a wireless intrusion prevention system
- C. WIDS Is a wireless intrusion countermeasure system
- D. WIDS Is a wireless intrusion prevention system

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 27**

According to the different user name format and content used by the access device to verify user identity, the user name format used for MAC authentication can be changed.

There are three types. Which of the following formats is not included?

- A. Fixed username form
- B. MAC Address format
- C. DHCP Option format
- D. ARP Option format

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 28**

Which of the following options is not a challenge brought by mobile office?

- A. The mobile office platform is safe and reliable and goes online quickly.
- B. Network gateway deployment
- C. Unified terminal management and fine control.
- D. Users can access the network safely and quickly.

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 29**

Which of the following options is right PKI The sequence description of the work process is correct?

1. PKI Entity direction CA ask CA Certificate. .
2. PKI Entity received CA After the certificate, install CA Certificate.
3. CA receive PKI Entity CA When requesting a certificate, add your own CA Certificate reply to PKI entity.
4. PKI Entity direction CA Send a certificate registration request message.
5. PKI When the entities communicate with each other, they need to obtain and install the local certificate of the opposite entity.
6. PKI Entity received CA The certificate information sent.

7. PKI After the entity installs the local certificate of the opposite entity, Verify the validity of the local certificate of the peer entity. When the certificate is valid, PC The public key of the certificate is used for encrypted communication between entities.

8. CA receive PKI The entity's certificate registration request message.

A. 1-3-2-4-8-6-5-7

B. 1-3-5-4-2-6-7-8

C. 1-3-5-6-7-4-8-2

D. 1-3-2-7-6-4-5-8

**Answer: A (LEAVE A REPLY)**

### NEW QUESTION: 30

When a guest needs to access the network through an account, which of the following methods can be used to access? (Multiple choice)

A. No authentication, no account required

B. Create new account

C. Use existing socialmedia accounts

D. Scan public QR code

**Answer: A,B,C,D (LEAVE A REPLY)**

### NEW QUESTION: 31

Regarding the identity authentication method and authentication type, which of the following descriptions is correct?

A. User passed web The method can support two authentication types: local authentication and digital certificate authentication.

B. User passed Agent The method can support three authentication types: local authentication, digital certificate authentication and system authentication.

C. User passed web Agent The method can support two authentication types: digital certificate authentication and system authentication.

D. User passed web Agent The method can support two authentication types: digital certificate authentication and local authentication.

**Answer: B (LEAVE A REPLY)**

**NEW QUESTION: 32**

Configuring WLAN device detection can realize the monitoring of the entire network, but you need to set the working mode of the AP first, which of the following options are.

What is the working mode of AP? (multiple choice)

- A. Mixed mode
- B. access mode
- C. Normal mode
- D. Monitoring mode

**Answer: C,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 33**

VIP Experience guarantee, from which two aspects are the main guaranteesVIP User experience? (Multiple choice)

- A. bandwidth
- B. Authority
- C. Forwarding priority
- D. Strategy

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 34**

Which of the following options are correct for thedescription of visitor management? (Multiple choice)

- A. Guest login can only be configured as Web Way of webpage
- B. Visitor account approval information can be notified to visitors via SMS
- C. Anonymous account authentication cannot be performed on the guest authentication page
- D. Visitor registration account can be configured to be exempt from approval

**Answer: B,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 35**

In the scenario of SACG linkage in bypass mode, only the traffic initiated by the terminal user will pass through the firewall, and the server will return to the terminal in use.

The traffic does not need to go through the firewall y. For the firewall, it belongs to the scenario ofinconsistent traffic back and forth paths, this needs to turn off the session state check function.

- A. False
- B. True

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 36**

About the software SACG And hardware SACG Description, which of the following is correct?

- A. hardware SACG Thansoftware SACG cut costs.
- B. hardware SACG The security is higher.

- C. software SACG use Any Office Perform admission control.
- D. hardware SACG use Any Office Perform admission control.

**Answer: C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 37**

Which of the following options are relevant to Any Office The description of the solution content is correct?

(Multiple choice)

- A. It can be quickly integrated and docked with the enterprise application cloud platform.
- B. The tunnel is dedicated and cannot be penetrated by viruses.
- C. Provide unified and secure access to enterprise mobile applications on mobile terminals.
- D. Applications are quickly integrated and can be extended.

**Answer: A,B,C,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 38**

Using Agile Controller-Campus for visitor management, users can obtain the account they applied for in a variety of ways, but which of the following are not included A way?

- A. E-mail
- B. Short message
- C. Web Print
- D. Voicemail

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 39**

Regarding the role of each role in the Portal authentication framework, which of the following descriptions are correct? (multiple choice)

- A. The AAA server saves information such as usernames and passwords for authentication of access users.
- B. The web server is used to push the Portal authentication page to the user.
- C. The AAA server is used to push the Portal authentication page to the user.
- D. The Web server saves informationsuch as user names and passwords for authentication of access users.

**Answer: A,C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 40**

How to check whether the SM and SC silverware start normally after installing the Agile Controller-Campus) (multiple delivery)

- A. Open https://SC Server IP:8443 in the browser and enter the account admin and the default password Changeme123. If the login is successful, it will be explained. The SC component is normal.

**B.** After logging in to SC, select Resources>Users>User Management to create a common account. Open

https://SM server IP:8447 in the browser newauth, if you can successfully log in using the account created in the previous step, the SM component is normal.

**C.** After logging in to SM, select Ziyuan>User>User Management, and Xinlu has a common part number.

Open https://SC server IP:8447 newauth in the browser. If you can successfully log in with the account created in the previous step, it means that the SC component is Wang Chang.

**D.** Open https://SM server IP:8943 in the browser, enter the account admin and the default password Changeme123, if the login is successful, it will be explained. The SIM components are normal.

**Answer: C,D (LEAVE A REPLY)**

#### **NEW QUESTION: 41**

In the Agile Controller-Campus admission control technology framework, regarding the description of RADIUS, which of the following options is correct?

**A.** PADIUS Used in 802.1X Switch and AAA Information such as user name and password are passed between servers.

**B.** PADIUS Used for Portal Server pushes to users Web page.

**C.** PADIUS Used on the client and 802.1X Information such as user names and passwords are passed between switches.

**D.** PADIUS Used for server to SACG Security policy issued by the device

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 42**

There is a three-layer forwarding device between the authentication client and the admission control device: If at this time Portal The certified three-layer authentication device can also obtain the authentication client's MAC address, So you can use IP Address and MC The address serves as the information to identify the user.

**A.** True

**B.** False

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 43**

Wired 802.1X During authentication, if the access control equipment is deployed at the Jiangju layer, this deployment method has the characteristics of high security performance, multiple management equipment, and complex management.

**A.** False

**B.** True

**Answer: A (LEAVE A REPLY)**

#### NEW QUESTION: 44

Agile Controller-Campus All components are supported Windows System and Linux system.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

#### NEW QUESTION: 45

About the hardware SACG Certification deployment scenarios, which of the following descriptions are correct? (Multiple choice)

- A. SACG Authentication is generally used in scenarios where a stable network performs wired admission control.
- B. SACG Authentication is generally used in scenarios where new networks are used for wireless admission control.
- C. SACG It is generally deployed in a bypass mode without changing the original network topology.
- D. SACG Essentially through 802.1X Technology controls access users.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 46

Hardware in useSACG At the time of certification,SACG After the configuration is completed, you can seeSACG andAgile Agile Controller-Campus The linkage is successful, but the user authentication fails. This phenomenon may be caused by the following reasons? (Multiple choice)

- A. SACG There is no closed state detection on it.
- B. User flow has not passed SACG.
- C. Agile Controller-Campus On and SACG Wrong key configuration for linkage
- D. SACG There is no release on the user stream.

Answer: A,D ([LEAVE A REPLY](#))

#### NEW QUESTION: 47

In order to increase AP The security can be AC Going online AP Perform authentication. Currently Huawei AC What are the supported authentication methods? (Multiple choice)

- A. Password authentication

- B. MAC Certification
- C. Not certified:
- D. SN Certification

**Answer: B,C,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 48**

For the terminal Wi-Fi The order of the push, which of the following is correct?

1. Any Office Mobile office system push Wi-Fi Configuration
2. Any Office The mobile office department automatically applies for a certificate.
3. The administrator configures the enterprise Wi-Fi Push.
4. The terminal automatically connects to the enterprise Wi-Fi.

- A. 3-2-1-4
- B. 4-2-3-1
- C. 2-3-1-4
- D. 1-2-3-4

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 49**

According to different reliability requirements, centralized networking can provide different reliability networking solutions. Regarding these solutions, which of the following descriptions are correct? (Multiple choice)

- A. DB In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup DB..
- B. Basic networking includes deploying one SM Server, one SC Server, one DB and a AE server.
- C. AE In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup SC server.
- D. SC In addition to the deployment of basic networking components, the reliability of the network also requires the deployment of an additional backup SM server.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 50**

Regarding the application scenarios of Agile Controller-Campus centralized deployment and distributed deployment, which of the following options are correct? (Multiple select)

- A. If most end users work in one area and a few end users work in branch offices, centralized deployment is recommended.
- B. If most end users are concentrated on--Offices in several regions, and a small number of end users work in branches. Distributed deployment is recommended.
- C. If end users are scattered in different regions, a centralized deployment solution is recommended.
- D. If end users are scattered in different geographical locations, a distributed deployment solution is recommended.

**Answer: A,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 51**

The multi-level defense system is mainly reflected in the network level and the system level. Which of the following options are used for security defense at the network level? (Multiple choice)

- A. software SACG
- B. 802.1X switch
- C. hardware SACG
- D. Authentication server

**Answer: A,B,C ([LEAVE A REPLY](#))**

**NEW QUESTION: 52**

Guest management is Agile Controller-Campus Important function of, regarding visitor management, which of the following statements are correct? (Multiple choice)

- A. Reception staff cannot create guest accounts
- B. The administrator can assign different permissions to each visitor
- C. There is a violation of the guest account, and the administrator cannot retrospectively
- D. Visitors can use their mobilephone number to quickly register an account

**Answer: B,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 53**

View on the switch Agile Controller-Campus The policy issued by the server is as follows: For this strategy, which of the following options are correct? (Multiple choice)

- A. VIP Users can access Internet w H.
- B. Common\_ user Users can accessInternet www H.
- C. VIP Can visit Mail Server H.
- D. Common user Users can access Mail\_ Sever resource.

**Answer: A,C,D ([LEAVE A REPLY](#))**

**NEW QUESTION: 54**

Which of the following options is about Portal The description of the certification process is correct?

- A. Server for a terminal Portal Certification will only give one Portal Device sends authentication message
- B. Portal The certification process is only used in Web Certification
- C. Portal The authentication message will not carry the result of the security check
- D. Switch received Portal Online message, will give Radius Server send Radius Certification request

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 55**

Agile Controller-Campus The department includes four parts of the management center(MC)Business manager(SM)And business controller(SC)And client network access equipment (NAD)As a component of the solution, it is linked with the service controller to realize user access control and free mobility.

- A. False
- B. True

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 56**

Mobile smartphone, tablet PC users through Any Office Client and AE Establish IPsec Encrypted tunnel, After passing the certification and compliance check, visit the enterprise business.

- A. True
- B. False

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 57**

In the Agile Controller-Campus solution, which device is usually used as the hardware SACG?

- A. router
- B. Firewall
- C. switch
- D. IPS

**Answer: B ([LEAVE A REPLY](#))**

**NEW QUESTION: 58**

Import the user information of the AD server on the Agile Controller-Campus to realize the user's access authentication. If the user is in the Agile.

The user information is not found on the Controller-Campus. Which of the following actions will be performed in the next step?

- A. Discard user information.
- B. Synchronize the database again.
- C. Straight forward to return authentication failure information.
- D. User 91 Information sent to AD The server performs verification.

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 59**

Which of the following series of devices does not support the function of accompanying business?

- A. S5720HI Series Switch:
- B. USG6000 Series firewall
- C. SVN5600 series
- D. AR Series router

**Answer: ([SHOW ANSWER](#))**

**NEW QUESTION: 60**

Regarding the policy for checking account security, which of the following descriptions are correct?  
(Multiple choice)

- A. You can check whether the account has joined a specific group.
- B. It cannot be repaired automatically.\_
- C. You can check whether there is a weak password.
- D. It is not possible to check whether the password length meets the requirements.

**Answer: A,C (LEAVE A REPLY)**

**NEW QUESTION: 61**
