

Huawei.H13-611_V4.5-ENU.v2022-05-17.q137

Exam Code:	H13-611_V4.5-ENU
Exam Name:	HCIA-Storage V4.5
Certification Provider:	Huawei
Free Question Number:	137
Version:	v2022-05-17
# of views:	2667
# of Questions views:	1370
https://www.freeqas.com/qa/Huawei/H13-611_V4.5-ENU/Huawei.H13-611_V4.5-ENU.v2022-05-17.q137.html	

NEW QUESTION: 1

What is the default multi-path load balancing strategy used by Huawei OceanStor V3 storage products?

- A. Polling
- B. Minimum IO number
- C. Minimal task
- D. Minimum queue depth

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

What is the function of using multi-path software? (Multiple choice)

- A. Failure path switching
- B. Data recovery
- C. Load balancing of IO traffic
- D. Failed path recovery

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

From the perspective of the cloud computing business model, Huawei's network disk belongs to PaaS.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 4

A company purchasing a set of Huawei storage services needs to provide file services while providing block services. Which of the following is correct?

- A. CIFS/NFS are both C/S mode
- B. Support AD domain environment
- C. Support non-domain environment
- D. Support CIFS and NFS deployment on the same network

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

Snapshot refers to a consistent data copy of source data at a certain point in time. After the snapshot is generated, it can be read by the host or used as a data backup at a certain point in time.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

After employee A of a company logs in to the storage device of the company system, he finds that he has certain control rights. However, the system time cannot be modified, and user management cannot be performed. Excuse me, which of the following roles does employee A have?

- A. Super Administrator
- B. Ordinary users
- C. Read-only users
- D. Administrator

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which of the following two descriptions is correct?

Description 1: The maintenance cost of traditional PC is usually lower than that of a desktop cloud.

Description 2: In cloud computing, data is stored and managed centrally.

- A. Both descriptions 1 and 2 are wrong
- B. Description 1 is wrong, description is correct
- C. Both descriptions 1 and 2 are correct
- D. Description 1 is correct, description 2 is wrong

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

Which of the following are not the advantages of cloud data centers?

- A. Use large servers to improve performance

- B. Agree that resource management improves operation and maintenance efficiency
- C. Virtualization improves resource utilization
- D. Distributed computing and storage improve system reliability

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

An enterprise adopts cloud primary and backup data-level disaster recovery. During business planning, storage can be divided into two types of LUNs based on actual needs: protected LUNs and unprotected LUNs. VMs that need disaster recovery are created on the protected LUNs, and only configure array replication for protection LUNs to save the storage space requirements of the disaster recovery center.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 10

IP scale-out is the scale-out that constructs the pcie protocol and is generally used in high-end industrial storage business scenarios.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

Regarding the description of eSight, which of the following statements are correct? (Multiple Choice)

- A. eSight adopts a componentized architecture, customers can choose the required components according to their own situation
- B. eSight adopts B/S architecture
- C. eSight only supports the management of Huawei devices
- D. eSight supports unified management of Huawei servers, storage, virtualization, switches, routers, WLAN, firewalls, etc.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

If a company uses an OLTP database, which migration strategy is suitable for the company's Smart Tier?

- A. Automatic migration
- B. No migration
- C. Migrate to the high-performance tier
- D. Migrate to the low-performance tier

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

In the Huawei Ocean Stor storage system, when creating a clone, the original LUN can be a Thick LUN or Thin LUN, and the secondary LUN can only be a Thin LUN.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

Which of the following statements are correct about flash memory particles? (Multiple Choice)

- A. In MLC, one cell can store 2 bits of data
- B. In QLC, one cell can store 3 bits of data
- C. In SLC, one cell can store 1 bit of data
- D. In TLC, one cell can store 4 bits of data

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 15

In Huawei OceanStor V3 based on RAID 2.0+, when a user creates a file system, the system will first automatically create a corresponding LUN and generate a file system on the LUN.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 16

A device can only have one WWPN, but there can be multiple WWNNs.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! PrepPdf.com now offer the **newest H13-611_V4.5-ENU exam dumps**, the PrepPdf.com H13-611_V4.5-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H13-611_V4.5-ENU dumps with Test Engine here: https://www.preppdf.com/Huawei/H13-611_V4.5-ENU-prepaway-exam-dumps.html (538 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

Two CKs in a CKG of RAID 2.0+ can come from the same hard disk.

- A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 18

Images and music belongs to unstructured data.

A. True

B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 19

FTP is a very secure protocol, there is no security risk.

A. False

B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 20

Regarding PCIe Lscale-Out and IP Scale-Out, which of the following are correct? (Multiple Choice)

A. PCIe Lscale-Out can support Ethernet protocol

B. PCIe Lscale-Out integrates PCIe channels and RDMA technology to achieve controller service exchange

C. PCIe Lscale-Out is Lscale-Out technology built on PCIe protocol, IP Lscale-Out is based on IP protocol

D. PCIe Lscale-Out can support iWARP technology

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 21

Snapshots used for backup purposes should be set to read-only to prevent being modified by other applications and affecting the consistency of backup data.

A. True

B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

The disadvantage of a full backup is that it must rely on the last full backup and the current differential backup to restore the data completely.

A. True

B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 23

In a traditional RAID group, when a certain number of hard disks fail, the entire RAID group can prevent data loss, and the data recovery process has not yet started. What is this state?

- A. Failure
- B. Downgrade
- C. Refactor
- D. Normal work

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Realizes unified hard disk management based on software RAID and RAID card

- A. False
- B. True

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 25

In a database, all small IO requests, the engineer should configure

- A. raid 6
- B. raid 0
- C. raid 3
- D. raid 5

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 26

The management IP address of a storage device is 192.168.5.12. Which of the following needs to be entered by Engineer A in the browser to log in correctly?

- A. https://192.168.5.12
- B. https://192.168.5.12:8088
- C. http://192.168.5.12
- D. 192.168.5.12

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 27

Database data belongs to structured data, and audio and video data belong to unstructured data. At present, the growth of storage space mainly comes from the rapid growth of unstructured data.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 28

Which of the following storage system architectures has its own file system?

- A. IPS AN

- B. NAS
- C. FC SAN
- D. DAS

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 29

Which of the following description about NAS is wrong? (Multiple choice)

- A. NAS devices can use cluster technology for failover
- B. Do not allow NAS to be accessed by multiple clients at the same time
- C. NAS provides a console centralized management, which can effectively manage the file system
- D. A client cannot connect to multiple NAS devices at the same time

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 30

A media company purchased storage equipment from multiple manufacturers during the construction of its data center. The chief technology officer hopes to centrally manage these storage devices through storage virtualization. Which of the following is not a function of storage virtualization?

- A. Reducing the limitation of storage physical capacity
- B. Support unified deployment management functions
- C. Enable the server to directly access the storage hardware
- D. Hide the complexity of the physical device from the user

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 31

When configuring the hyper metro feature in Huawei storage, the arbitration server can only be deployed on the physical server, not on the virtual machine.

- A. True
- B. False

Answer: ([SHOW ANSWER](#)**)**

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! PrepPdf.com now offer the **newest H13-611_V4.5-ENU exam dumps**, the PrepPdf.com H13-611_V4.5-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H13-611_V4.5-ENU dumps with Test Engine here: https://www.preppdf.com/Huawei/H13-611_V4.5-ENU-prepaway-exam-dumps.html (**538** Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 32

Statement 1: When Windows mounts a CIFS share with the same IP address (domain name or machine name), the same user can mount one or more shares at the same time, but different users cannot mount the same or different shares.

Statement 2: When Windows mounts the Homedir share with the same IP address (domain name or machine name), multiple users cannot mount multiple shares.

- A. Statement 1 is correct, Statement 2 is correct
- B. Statement 1 is correct, Statement 2 is wrong
- C. Statement 1 is wrong, Statement 2 is wrong
- D. Statement 1 is wrong, Statement 2 is correct

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 33

Based on Huawei Oceanstor distributed storage, which of the following statements about network plane division is correct?

- A. The replication plane connects the storage node with the disaster recovery site for data synchronization and replication
- B. The BMC plane is used to access the management node and find the MGM1 interface of the storage node to provide transport equipment management functions
- C. The management plane is used for customer application docking to provide an interface for management and maintenance
- D. The arbitration plane is used to communicate with the double arbitration reflexive. The real plane will only be planned when both parties are in the service plan.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 34

In the Huawei OceanStor V3 storage system, one LUN can create multiple snapshots, but only one snapshot can be in the activated state.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 35

Which of the following steps does the CIFS protocol need to go through? (Multiple Choice)

- A. File operations
- B. Shared connection
- C. Disconnection
- D. Safety certification
- E. Protocol handshake

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 36

The dual-switch network design is widely used in the FC SAN environment. Which of the following descriptions about the dual-switch network redundancy design is correct? (Multiple choice)

- A. Deploy two FC switches cross-connected to the two controllers of the storage device in the SAN environment
- B. The host port and storage device port that need to communicate on the switch must be in the same zone
- C. Although there are multiple paths, the dual-switch network only supports link redundancy and does not support load balancing
- D. Each host needs 2 available FC ports and connect the two ports to different switches

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 37

What are the synchronization types of asynchronous remote replication? (Multiple Choice)

- A. Wait regularly after synchronization starts
- B. Manual
- C. Automatic
- D. Wait regularly after synchronization is completed

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 38

Create a Thin LUN on Huawei OceanStor V3 with a capacity of 100G and an initial allocated capacity of 10G. After the LUN is mapped to the Windows 2012 host, the corresponding disk is scanned on the host. The displayed capacity of the disk should be 10G.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 39

In the Huawei OceanStor V3 storage system, which one of the following statements about mapping snapshot LUNs is correct?

- A. The snapshot LUN mapped to the host can only be read but not written
- B. Snapshot LUN can only be mapped to the same host as the original LUN
- C. The activated snapshot LUN can be mapped to the host for reading and writing
- D. All statements above are correct

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 40

Deduplication and compression can only be enabled for Thin LUN.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 41

What scenarios can RDMA technology be applied to? (Multiple Choice)

- A. Data center servers are interconnected through ROCE
- B. Server and storage are interconnected through Infiniband
- C. Data center servers are interconnected through Infiniband
- D. The storage disk enclosure is connected to the hard disk through ROCE

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 42

Which of the following about the Thin LUN reading data process is correct?

- A. Capacity-on-write
- B. Direct-on-read
- C. Capacity-on-read
- D. Direct-on-time

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 43

The cloudification of IT architecture is moving from "separation" to "convergence". What does convergence mean?

- A. Convergence of applications and servers
- B. Multi-application sharing, open "cloud computer"
- C. Convergence of hardware and software
- D. Convergence of IT infrastructure

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 44

Which of the following description about CIFS and NFS sharing is incorrect? (Multiple choice)

* If the file system has been set as a CIFS share and then an NFS share is added, the NFS share can only be set as read-only.

* If the file system has been set as an NFS share and then a CIFS share is added, the CIFS share can only be set as read-only.

Protocol	Transfer Protocol	Client	Failure Effect	Efficient	Supported operating system
CIFS	TCP/IP	Operating system integration does not require other softwares	Big	High	Windows
NFS	TCP or UDP	Need other softwares	Small: The connection can be automatically restored when the interactive process is interrupted.	Low	Linux

* CIFS is a network-based sharing protocol, which requires high reliability of network transmission, so it usually uses TCP/IP. NFS is used for independent transmission, so it uses TCP or UDP.

* One disadvantage of NFS is that the client must be equipped with dedicated software. CIFS is integrated into the operating system and no additional software is required.

* NFS is a stateless protocol. And Cifs is a stateful protocol. After NFS connection fails, the connection can be automatically restored, but CIFS cannot. CIFS only sends a little redundant information, so it has a higher transmission efficiency than NFS.

A. NFS is a stateless protocol, while CIFS is a stateful protocol. NFS can automatically recover from link failures, while CIFS cannot

B. One disadvantage of CIFS is that Windows clients must install professional software

C. Regardless of CIFS or NFS protocol, the client is required to perform file format conversion.

D. CIFS is a protocol based on network sharing, which has high requirements on the reliability of network transmission, so TCP protocol is usually used for transmission

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 45

There are two statements of fiber optic switches below, which is correct?

Statement 1: A port can be in multiple zones.

Statement 2: A switch can have multiple zones.

A. Statement 1 is correct, Statement 2 is wrong

B. Both Statement 1 and Statement 2 are correct

C. Both Statement 1 and Statement 2 are wrong

D. Statement 1 is wrong, Statement 2 is correct

Answer: B (LEAVE A REPLY)

NEW QUESTION: 46

Among flash memory media chips, QLC is lower in cost than TLC, supports frequent rewriting, can provide high-speed read and write rates, and is suitable for server memory.

A. True

B. False

Answer: B (LEAVE A REPLY)

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! NEW QUESTION: 47

In which of the following scenarios InfiniBand can be applied? (Multiple Choice)

- A. Interconnection between storage controllers
- B. Storage interconnection between ordinary disk enclosures
- C. Interconnection between Fusion Cube devices
- D. Interconnection between distributed storage nodes

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 48

Which description is correct about FC protocol port? (Multiple Choice)

- A. N-port: the port of the FC switch access end node
- B. F-port Fabric port is the connection point of Fabric facing user N-port
- C. G-port: ordinary port, can be converted to E or F port
- D. E-port: Expansion port (switch-switch)

Answer: (SHOW ANSWER)

NEW QUESTION: 49

What kind of technology does the OceanStor 5300 V3 expansion controller belong to?

- A. Scale-deep
- B. Scale-up
- C. Scale-out
- D. Scale-in

Answer: (SHOW ANSWER)

NEW QUESTION: 50

Regarding the description of the Hyper Clone function, which are correct? (Multiple Choice)

- A. If the hard disk of the source LUN configured with Hyper Clone has a physical failure, the service can continue to be provided through the split target LUN
- B. In the event of a logical failure of the source LUN, data can be reversely synchronized through the target LUN to restore the business of the source LUN

- C. If there are multiple applications that need to use the business data of the source LUN, you can use the Hyper Clone feature to generate multiple target LUNs for multiple applications
- D. When the business source LUN fails, the data backed up by the Hyper Clone feature can be restored to the business data at any point in time

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

Regarding the description of the NFS protocol, which is wrong?

- A. It is very convenient for users to share through the CZFS protocol to read, write, author and operate files stored in the storage system just like using this machine.
- B. Also known as SMB (server message Block) has been released in multiple versions, such as SMB 1.0, SMB 2.0, SMB 3.0, so it needs version matching when using
- C. CIFS adopts the B/S architecture model, so the administrator needs to confirm the browsing version when performing attachments.
- D. The supported authentication methods are NILMKberos

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 52

Statement 1: There is an interconnection line between the controllers of the storage system. If one of the controllers is broken, the working controller belonging to the LUN managed by it will be switched to a working controller.

Statement 2: The working controller and the owning controller of a LUN must be unified into one controller.

- A. Statement 1 is wrong, Statement 2 is correct.
- B. Statement 1 is correct, Statement 2 is wrong.
- C. Statement 1 is correct, Statement 2 is correct.
- D. Statement 1 is wrong, Statement 2 is wrong.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 53

Statement 1: The file system of SAN storage is deployed on the storage side, and the file system of NAS storage is on the host side.

Statement 2: Dynamic hierarchical storage can realize data migration between storage media with different performance

- A. Statement 1 is wrong, Statement 2 is wrong
- B. Statement 1 is wrong, Statement 2 is correct
- C. Statement 1 is correct, Statement 2 is correct
- D. Statement 1 is correct, Statement 2 is wrong

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 54

Regarding the snapshot technology, which of the following statement is incorrect?

- A. When manually creating a snapshot for a file system, if the product specification limit is exceeded, a new snapshot cannot be created for the file system
- B. When rolling back a file system snapshot, you must cancel the shared mount of the source file system
- C. When creating a periodic snapshot for the file system, the storage system automatically deletes the earliest created snapshot and automatically generates a new snapshot
- D. After opening multiple snapshots of the same file system, roll back to one of the snapshots. After the roll-back is completed, all snapshots after the point-in-time when the target snapshot was created will be deleted

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

After the all-flash device (for example: Huawei Oceanstor) is configured for remote replication, the slave lun can be set to the p-writable state, which can be done before the master-slave switchover or after the master-slave switchover.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 56

Which of the following statements about the filtering function of the storage system CLI commands is wrong?

- A. show hbu general | firter column list=Inter/SID The include meaning is to filter information that does not need to be displayed
- B. The filtering function of CLI commands can remove redundant information and display valid information on demand
- C. Use the filter row command to filter
- D. Use the filter column command to filter

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 57

In Huawei storage, such as Huawei OceanStor hybrid flash memory, the Hyper Metro feature uses strong consistent feature technology. Which of the following description of strong consistency is wrong?

- A. When writing data again, IO is written to this segment LUN and end LUN at the same time to maintain data consistency
- B. Consistency at the application layer can be achieved through cluster technology
- C. If the remote storage restarts to the point where it cannot maintain consistency
- D. Use a distributed lock mechanism in Hyper Metro to maintain the uniqueness of data and ensure data consistency

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 58

Statement 1: NAS file system is managed by storage or server that provides resources.

Statement 2: The file system of the SAN is managed by the host itself.

- A. Statement 1 is wrong, Statement 2 is correct
- B. Statement 1 is wrong, Statement 2 is wrong
- C. Statement 1 is correct, Statement 2 is correct
- D. Statement 1 is correct, Statement 2 is wrong

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 59

The company has received a new batch of storage devices, which does not require much access speed, and can use IP-SAN networking.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 60

Which of the following belong to the operation and maintenance standard system? (Multiple Choice)

- A. ITIL (Information Technology Infrastructure Library)
- B. SNIA (Storage Networking Industry Association)
- C. ISO 2000 (International Organization for Standardization 2000)
- D. IEEE (Institute of Electrical and Electronics Engineers)

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 61

DAS is divided into internal DAS and external DAS

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! NEW QUESTION: 62

The data compression feature saves space by deleting data.

- A. TRUE
- B. FALSE

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 63

The following are two statements about cloud computing:

Statement 1: A deployment model of cloud computing is to divide a large physical server into multiple small virtual machines.

Statement 2: A deployment model of cloud computing is to aggregate multiple small physical servers into one large host.

- A. Both Statement 1 and Statement 2 are wrong
- B. Statement 1 is wrong, Statement 2 is correct
- C. Statement 1 is correct, Statement 2 is wrong
- D. Both Statement 1 and Statement 2 are correct

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 64

Two-dimensional table database belongs to structured data.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 65

During the daily inspection, an operation and maintenance engineer found that the storage device was alarming and required quick maintenance. Which of the following operations is wrong?

- A. Check the status of the indicator light and deal with related abnormalities
- B. Check business status and handle related abnormalities
- C. Check system performance and handle related abnormalities
- D. Restart the storage device

Answer: (SHOW ANSWER)

NEW QUESTION: 66

Which of the following descriptions about Huawei RAID 2.0+ technology is correct? (Multiple choice)

- A. Grain is the smallest granularity of data migration and the basic unit that constitutes Thin LUN
- B. The user can set the "RAID strategy" for each storage tier in the storage pool.

- C. The hard disk types of each storage layer in the hard disk domain are the same
- D. The hard disk space is divided into fixed-size blocks

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 67

There is a problem with the source LUN of remote replication, and the target LUN will take its place.

- A. FALSE
- B. TRUE

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 68

Regarding the description of the hard disk domain in Huawei RAID 2.0+ technology, which of the following statement is incorrect?

- A. In a disk domain, disks of the same type must be of the same size and rotational speed
- B. A hard disk can only belong to one hard disk domain
- C. A hard disk domain is a group of hard disks
- D. OceanStor V3 storage system can create one or more disk domains

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 69

Which of the following descriptions about RAID and LUN is wrong?

- A. A LUN can be created on a RAID
- B. Multiple LUN can be created on a RAID
- C. A RAID group is like a physical volume containing many disks
- D. A LUN can belong to multiple RAID groups

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 70

Huawei ocenter can only be expanded through PCI and Scale-out.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 71

Compare NAS storage and SAN storage in terms of principle, performance, cost, sharing, and application scenarios. Which of the following descriptions is correct? (Multiple choice)

- A. SAN is a high-speed optical fiber-connected disk network, which provides disk resources to the host. It has no file system itself, which is equivalent to a hard disk in the network.
- B. NAS is a storage device with a file system, sharing files through the network, equivalent to a host in the network

- C. NAS performance is higher than SAN, and its cost is higher than SAN
- D. SAN is mainly suitable for file sharing scenarios, sharing is more convenient

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 72

Due to the earthquake, a company's IT system went down at 16:00 on November 11 leading to a business halt. By 23:00 on the same day, the IT system resumed operation and the data at 12:00 of that day can be restored. Then what respectively are the RTO and the RPO?

- A. RTO=7 hours, RPO=3 hours
- B. RTO=7 hours, RPO=4 hours
- C. RTO=4 hours, RPO=7 hours
- D. RTO=2 hours, RPO=4 hours

Answer: (SHOW ANSWER)

NEW QUESTION: 73

The data replication technology based on the SAN network is a storage area network (SAN) between the front-end application server and the back-end storage system, adding a layer of intelligent switches, the front-end is connected to the server host, and the back-end is connected to the storage device.

- A. False
- B. True

Answer: (SHOW ANSWER)

NEW QUESTION: 74

What kind of data does company employees look for in mySQL for payroll?

- A. Metadata
- B. Unstructured data
- C. Structured data
- D. Semi-structured data

Answer: C (LEAVE A REPLY)

NEW QUESTION: 75

Distributed storage can provide: block services, big data services, object services and file services.

- A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 76

Which of the following options are correct regarding the advantages of NVMe? (Multiple Choice)

- A. High IOPS
- B. High bandwidth
- C. Low energy consumption
- D. Low latency

Answer: A,B,C,D ([LEAVE A REPLY](#))

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! PrepPdf.com now offer the **newest H13-611_V4.5-ENU exam dumps**, the PrepPdf.com H13-611_V4.5-ENU exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H13-611_V4.5-ENU dumps with Test Engine here: https://www.preppdf.com/Huawei/H13-611_V4.5-ENU-prepaway-exam-dumps.html (538 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 77

Which of the following is the advantage of object storage? (Multiple choice)

- A. External SCSI or file interface
- B. Object interface, flexible data segmentation
- C. Improved data integrity and security
- D. Flat objects, easy to access and extend

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 78

Which of the following two descriptions is correct?

Description 1: Synchronous remote replication. When the primary storage fails, the amount of data loss can be zero.

Description 2: When the host is a Linux-based file system, asynchronous remote replication must be used.

- A. Both description 1 and description 2 are correct
- B. Both description 1 and description 2 are wrong
- C. Description 1 is wrong, description 2 is correct
- D. Description 1 is right, description 2 is wrong

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 79

Which of the following statement of Quota tree is correct?

- A. Quota tree can be renamed and deleted when shared by agreement
- B. Ordinary users can perform quota management on the number or capacity of files under Quota Tree
- C. Can only be created, deleted, and renamed by the administrator through the command line or GUI management interface, ordinary users can delete the empty Quota tree
- D. Quota tree is a first-level directory under the file system,

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 80

A company is mainly used for file system sharing in Linux, UNIX, MacOS and VMware operating system environments. Which of the following file access protocols is suitable for this company?

- A. Telnet
- B. NFS
- C. CIFS
- D. HTTP

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 81

What versions of the NFS protocol are there? (Multiple choice)

- A. NFS V2
- B. NFS V1
- C. NFS V4
- D. NFS V3

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 82

A company's applications and data have high security requirements. During the inspection, it was found that two NL-SAS hard disks were offline and the data was lost. In order to avoid this situation, it is necessary to complete the RAID configuration and require the utilization of the hard disk. To be greater than 60%, which of the following are eligible? (Multiple Choice)

- A. Use 4+P hard disk to create RIAD 5
- B. Use 4+2P hard drives to create RAID 6
- C. Use 2+2P hard drives to create RAID 6
- D. Use 6+2P hard drives to create RAID 6

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 83

The composition of the backup system does not include?

- A. Backup media
- B. Backup strategy

- C. Backup server
- D. Backup software

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 84

Which of the following statements is correct about dual-controller storage? (Multiple Choice)

- A. There are two working programs: Active-Standby mode and Active-Active mode
- B. Compared with the Active-Standby mode, when a controller fails, the active-active mode switches higher
- C. There is only one controller at the same time in Active-Standby mode
- D. In the Active-Standby mode, a controller is not enough for business at all

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 85

Which of the following options belong to the subsystem of the storage device? (Multiple Choice)

- A. Storage management software subsystem
- B. Control subsystem
- C. Hardware subsystem
- D. Connect the subsystem

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 86

Regarding the new era of ICT and technology, which of the following statements is correct? (Multiple choice)

- A. social media is a virtual community and network platform that people use to create, share, and exchange opinions, opinions and experiences
- B. In the new ICT era, ICT systems migrate from support systems to production systems
- C. CPS (Cyber Physical System) includes system engineering such as ubiquitous environment perception, embedded computing, network communication and network control in the future. It is a physical system with functions of computing, communication, precise control, remote collaboration and autonomy.
- D. Cloud computing is an increase, use and delivery model of Internet-based related services, usually involving the provision of dynamic, easy-scalable and often virtualized resources through the Internet

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 87

Extent is the logical storage space divided on the basis of CKG. It is the smallest unit of hot data statistics. The extent size in the same storage pool can be different.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 88

When the RPO time requirement is at the minute level, the traditional tape backup method can be used.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 89

One port of a host connected to the switch cannot belong to multiple zones, but can only be divided into one zone.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 90

RAID 2.0+, which of the following is correct?

- A. The size of the chunk and SATA/NL-SAS is a fixed size of 64MB
- B. It is the largest unit that applies for and releases space in the storage pool.
- C. The extent size of different storage pools can be different, but the extent size in the same storage pool is the same.
- D. The size of the chunk and SAS/SSD is a fixed size of 256MB

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 91

When checking the hot data situation on a regular basis, which of the following features is the migration list for the hot data from the capacity tier to the high-performance tier?

- A. Hypersnap snapshot
- B. Hyper clone
- C. Smart Qos flow control
- D. Hyper replication
- E. Hyper metro dual-active
- F. Smart Tier

Answer: F ([LEAVE A REPLY](#))

been corrected get the **newest** PrepPdf.com H13-611_V4.5-ENU dumps with Test Engine here: https://www.preppdf.com/Huawei/H13-611_V4.5-ENU-prepaway-exam-dumps.html (538 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 92

A company purchased a set of Huawei storage (such as Huawei OceanStor hybrid flash memory) equipment, using SAS interface hard drives.

In addition to SAS hard drives, what types of hard drives can the storage support? (Multiple Choice)

- A. NLS AS hard disk
- B. SSD hard disk
- C. FC hard disk
- D. SCSI hard disk

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 93

What is necessary for the initial configuration of the storage system? (Multiple Choice)

- A. Change password
- B. Configure the accessible IP address
- C. Enter Device Manager
- D. Configure the management port IP address

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 94

Which of the following snapshots are correct? (Multiple Choice)

- A. Snapshot recovery technology can be used to detect the business volume of the last month
- B. Can use snapshot technology to test and develop software
- C. Can detect business volume in real time
- D. You can use snapshot recovery data to recover data lost by physical problems

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 95

When does data become information?

- A. When the company understands the meaning of the data and extracts the content needed for decision-making from it
- B. When it has been stored in the correct file format
- C. When the data has been verified to be correct
- D. When the data has been stored in digital form

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 96

Which is correct about HyperMeteor? (Multiple Choice)

- A. It can only be configured between storage devices of the same model and version
- B. Support automatic storage failover
- C. Arbitration server must be configured
- D. The local site and the remote site can run services at the same time

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 97

Which of the following statements of RAID 1 is incorrect?

- A. RAID 1 writes data to each member disk, and the data on each member disk is the same
- B. Normally, RAID 1 reads data from the data disk and the mirror disk
- C. RAID 1 uses X OR algorithm to check
- D. When the data of some member disks is damaged, RAID 1 allows it to quickly recover data from other member disks

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 98

In the OceanStor V3 storage system, the types of hard disks in the same hard disk domain must be the same

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 99

Which of the following has the highest performance?

Table 2. Data Access Priorities for SCSI Addresses

Priority	SCSI Address	SCSI Device Name
Highest	7	SCSI-2 Fast/Wide PCI Adapter / Ultra SCSI Fast/Wide PCI Adapter
↓	6	
↓	5	
↓	4	
↓	3	
↓	2	
↓	1	
↓	0	
↓	15	
↓	14	
↓	13	
↓	12	
↓	11	
↓	10	
↓	9	
Lowest	8	

HUAWEI

- A. SLC
- B. QLC
- C. TLC
- D. MLC

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 100

With the advent of the era of big data, storage technology is also undergoing changes. Which of the following is correct about the changes in storage technology? (Multiple Choice)

- A. Traditional NAS faces PB-level data, and complex volume management leads to uneven capacity allocation
- B. Mass storage is characterized by more complex file systems and more complex management
- C. The file system has evolved from a local system to a cluster file system and a distributed file system
- D. Large-scale expansion capability is a characteristic of mass storage

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 101

Which of the following descriptions of SAN and NAS are correct? (Multiple choice)

- A. SAN is more used in the database scenario to store this structured data
- B. The characteristic of NAS is to put the file system of the server in the storage, so that the server can share data through the network.
- C. Now NAS is a storage for unstructured data, such as shared file servers used by employees in many departments for key office document sharing and centralized storage.
- D. DAS, NAS and SAN are all external storage, so storage resource sharing can be easily realized.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 102

A government unit adopts Huawei's two-location three-center solution for disaster recovery construction, and its business is mainly concentrated from 8:00 to 18:00. Which of the following is wrong?

- A. The production center and the remote disaster recovery center should adopt synchronous remote replication
- B. The BC Manager software can be used to set the data synchronization period
- C. When doing remote replication, a consistency group should be created according to the business of the unit, and related businesses should be placed in a consistent group
- D. The time period for data synchronization between the production center and the disaster recovery center should be selected at night when the business volume is small

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 103

In order to access the bearer server, the data center establishes the infrastructure, which can be divided according to the business? (Multiple Choice)

- A. Enterprise Data Center
- B. Internet Data Center
- C. Operating the data center
- D. Cloud Data Center

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 104

An enterprise has established active-active data centers in city A and city B.

If the active-active arbitration mode of storage (such as Huawei OceanStor hybrid flash memory) is static priority mode, site A is a static priority site.

Which of the following descriptions are correct? (Multiple Choice)

- A. The link between the host and site A and site B fails at the same time, and the dual-active pair status is displayed as "normal"
- B. The link between the storage systems is faulty, and both sites A and B continue to run services
- C. Site B fails, site A automatically takes over the business
- D. Site A fails, site B automatically takes over the business

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 105

What is the difference between synchronous replication and asynchronous replication? (Multiple Choice)

- A. Asynchronous remote replication, when a disaster occurs, data will be lost from the center
- B. Synchronous remote replication will affect the performance of the host, while asynchronous remote replication will not affect the performance of the host
- C. There is no limit to the network distance of synchronous replication
- D. Synchronous replication is to replicate real-time data, and asynchronous replication is to replicate periodic replication

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 106

pcie can provide the business interface between the control box and the data switch for exchanging control flow and data flow information between the control boxes.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

Valid H13-611_V4.5-ENU Dumps shared by PrepPdf.com for Helping Passing H13-611_V4.5-ENU Exam! NEW QUESTION: 107

The IT storage equipment of a bank was relocated, and the mechanical hard disk could not be read. The engineer judged that the hard disk was broken. What are the possible reasons?

(Multiple Choice)

- A. Broken head
- B. The control circuit is short-circuited and burned out
- C. Head displacement scratches the disc
- D. The flash memory particles are bad

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 108

Which of the following PCIe versions are currently available? (Multiple Choice)

- A. PCIe 1.0
- B. PCIe 3.0
- C. PCIe 4.0
- D. PCIe 2.0

Answer: A,B,C,D (LEAVE A REPLY)

NEW QUESTION: 109

Data management is the process of using computer hardware and software technology to effectively collect, store, process and apply data. In chronological order, what phases can data management be divided into? (Multiple Choice)

- A. Manual management
- B. Big data management
- C. Traditional database system management
- D. File system management

Answer: (SHOW ANSWER)

NEW QUESTION: 110

Regarding database-level disaster recovery, which of the following statement is wrong?

- A. Database-level disaster recovery is mainly achieved by transmitting data logs and replaying them at the disaster recovery site.

- B. Database-level disaster recovery, more data will be lost in asynchronous mode, at least one log file will be lost.
- C. Database-level disaster recovery supports WAN, but requires separate hardware support.
- D. Database-level disaster recovery technology is a disaster recovery solution designed for fixed databases.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 111

When using the NFS protocol, adding a client and setting read and write permissions will have an impact on performance.

- A. False
- B. True

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 112

Which of the following statements about RAID write penalties are correct? (Multiple Choice)

- A. RAID 6 has two parity bits. Compared with RAID 5, it will suffer a greater write penalty
- B. For RAID 5, compared with RAID 1, the write penalty is worse than RAID 5's read performance

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 113

In the backup system, the backup data center needs to pass through the media server before it can be transferred to the storage system.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 114

When the disk is read and written, the sector is the smallest addressing unit. You can write a piece of data to the first half of a sector, and then write a piece of data to another sector.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 115

SAS is a point-to-point, half-duplex, dual-port interface.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 116

Which of the following is not a backup type?

- A. Real-time backup
- B. Differential incremental backup
- C. Cumulative incremental backup
- D. Full backup

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 117

Which CLI shortcuts are correct? (Multiple Choice)

- A. Q is the exit instruction manual
- B. page up and page down two keys are the previous page and the next page
- C. A is to view command parameters
- D. R is the view command

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 118

Which of the following statements about Huawei RAID 2.0+ is correct? (Multiple choice)

- A. RAID 2.0+ uses an independent hot spare disk
- B. Chunk size and Extent size are not adjustable
- C. Hot spare space cannot cross engines
- D. Automatically reserve a certain amount of hot spare space in the disk domain according to the hot spare policy

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 119

A company belongs to the fields of banking and finance, with a large amount of business data and high security requirements. Which RAID level is suitable for this company?

- A. RAID0
- B. RAID 5
- C. RAID 1
- D. RAID 10

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 120

Which of the following descriptions is correct? (Multiple choice)

- A. In the OceanStor V3 series of new-generation storage products, the back-end loop of the same SAS interface card can be mixed with ordinary disk enclosures and high-density disk enclosures.
- B. OceanStor V3 series products support 8 controllers, and the switching plane between the controllers is IP-based Scale-out interconnection

C. OceanStor V3 mid-range storage arrays use IP switches for interconnection, which has cost advantages. PCIe switches are dedicated switches and have relatively high costs. They are mainly used in high-end storage.

D. When the control frame of OceanStor5300 V3 is expanded from 2 controllers to 4 controllers, either direct connection networking or switch networking can be used

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 121

Incremental backups must rely on the last full backup and the last incremental backup to fully restore the data during data restoration. Data reconstruction during restoration is slower than a full backup, and the restoration window is larger.

A. False

B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 122

Description 1: The CIFS share provided by a company's storage system is a public directory, and all users with permissions can access it.

Description 2: A company's storage system sets up Homedir sharing so that different users can only access private directories with the same user name.

A. Description 1 is correct, description 2 is wrong

B. Description 1 is wrong, description 2 is wrong

C. Description 1 is wrong, description 2 is correct

D. Description 1 is correct, description 2 is correct

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 123

Engineer A wants a RAID that does not affect the CPU, and engineering B wants a RAID that the CPU runs. Which of the following is correct? (Multiple Choice)

A. Engineer A hardware RAID

B. Engineer B software RAID

C. Engineer B hardware RAID

D. Engineer A software RAID

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 124

In the Huawei OceanStor V3 storage system, which of the following statement of Smart Thin LUN is correct?

- A. The types of LUNs in a storage pool must be the same, either all thin LUNs or thick LUNs
- B. You can create a Thin LUN without specifying the initial capacity allocation
- C. Thin LUN cannot be converted to Thick LUN
- D. When creating a thin LUN, it cannot be allocated a capacity larger than the free space available in the storage pool.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 125

For the data stored on the media, there is no situation that requires physical shredding or destruction like data recorded on paper.

- A. False
- B. True

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 126

Which of the following statement is wrong? (Multiple choice)

- A. Backup can directly take over the business
- B. Backup to solve the recovery of data loss
- C. Backup cannot solve the recovery of historical data
- D. Backup cannot solve the recovery of data damage

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 127

If the GE network uses the required bandwidth calculation formula to get <100M/s, which backup network should be selected?

- A. Server-Free
- B. NDMP
- C. LAN-Free
- D. LAN-Base

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 128

Storage architecture is developing from distributed to centralized.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 129

When CIFS share permissions are assigned, if a user lives in a different user group, and for a share, the CIFS share grants different permissions to the user group and the user, and the user's permissions are the maximum authority of the user group and user permissions of the user.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 130

Which of the following descriptions is correct?

Description 1: LUN is composed of multiple Extents in the storage pool.

Description 2: LUN can contain one or more types of Extent.

- A. Description 1 is correct, description 2 is correct
- B. Description 1 is wrong, description 2 is wrong
- C. Description 1 is correct, description 2 is wrong
- D. Description 1 is wrong, description 2 is correct

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 131

Which interfaces are used for mechanical hard drives in the storage system? (Multiple Choice)

- A. SAS
- B. PCIe
- C. SATA
- D. NV ME

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 132

What are the functions that can be achieved by storage snapshots? (Multiple Choice)

- A. Take regular snapshots of the storage at 12 o'clock every evening, and use the snapshot data for backup
- B. Use the snapshot LUN data for the development and testing of the new version
- C. Obtain real-time data analysis business status through snapshot data
- D. Take a snapshot of the business LUN at the end of the month and analyze the business data of the previous month through the snapshot.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 133

Which of the following RAID technologies need to calculate parity data when writing data? (Multiple Choice)

- A. RAID 50
- B. RAID 6
- C. RAID 3
- D. RAID 0

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 134

Smart Tier cannot be enabled for a storage pool composed of a single hard disk type.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 135

What value does the streamlined configuration technology bring to customers? (Multiple choice)

- A. Reduce the overall TCO of the storage system
- B. Improve storage resource utilization
- C. Reduce the storage space occupied by data
- D. Reduce initial purchase cost

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 136

A company has newly purchased a batch of mainframes and storage equipment, and will deploy the company's important business according to the plan. The storage network is required to have low latency, high performance, large bandwidth, lossless transmission, and can support Ethernet transmission. Which of the following protocol needs to be selected?

- A. IB protocol
- B. FC protocol
- C. SAS protocol
- D. FCoE protocol

Answer: D ([LEAVE A REPLY](#))
