

Huawei.H35-561.v2022-05-14.q65

Exam Code:	H35-561
Exam Name:	HCIP-LTE-RNP&RNO V1.0
Certification Provider:	Huawei
Free Question Number:	65
Version:	v2022-05-14
# of views:	1147
# of Questions views:	650
https://www.freeqas.com/qa/Huawei/H35-561/Huawei.H35-561.v2022-05-14.q65.html	

NEW QUESTION: 1

Which of the following is not the main function of LTE Layer 2?

- A. Encryption
- B. ARQ
- C. Scheduling
- D. Power control

Answer: D (LEAVE A REPLY)

NEW QUESTION: 2

The reporting period of the SRI (Scheduling Request Indicator) is divided into fixed and adaptive. Which of the following factors will be used for the adjustment of the SRI period?

(Multiple Choice)

- A. Number of users
- B. SRI resource load situation
- C. User establishes bearer QCI
- D. The user establishes a bearer ARP.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 3

Site verification is an important step in ensuring that each individual site can work properly.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 4

RF optimization, as a stage in single-station verification, optimizes radio frequency signals to optimize coverage and reduce ping-pong switching.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

The virtual resource block (VRB) is used to describe the LTE downlink transmission resource allocation mode. What are the two resource mapping modes supported by the VRB? (Multiple choice)

- A. Continuous distribution
- B. Centralized distribution
- C. Separate distribution
- D. Discontinuous allocation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

Prior to R10, only QPSK, 16QAM, and 64QAM modulation modes were supported. The R12 protocol supports downlink 256QAM.

- A. False
- B. True

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 7

Which of the following network elements can generate STN-SR? (Multiple choice)

- A. ATCF
- B. AS
- C. MME
- D. HSS

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

PDCCH/ePDCCH is used to transmit DCI (Downlink Control Information). Which of the following information does the DCI include?

- A. Scheduling strategy
- B. Uplink authorization
- C. Power Control Command
- D. Downlink authorization

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 9

Regarding the LTE random access preamble format, which of the following statements are correct? (Multiple choice)

- A. Random access preamble format is randomly selected by the UE
- B. The choice of the random-access preamble format is mainly affected by the coverage radius of the cell.
- C. The choice of random-access preamble format is mainly affected by multipath environment
- D. The random-access preamble format is notified by the eNodeB to the UE through the SIB.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 10

Which of the following messages contains UE history information?

- A. Path Switch Req
- B. SN Status Transfer
- C. Handover Request
- D. RRC Connection Reconfiguration

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which of the following services of the M2000 server resolves the packets reported by the NE to a unified structure, and the performance service stores the data required by the user into the performance database?

- A. Physics
- B. Adaptation
- C. IP
- D. Application

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 12

Regarding the reason for the establishment of the RRC connection, which of the following options are not related to the Service Request? (Multiple Choice)

- A. MO-Data
- B. MT-Data
- C. MO-Signaling
- D. MT-Access

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which parameter is the threshold detection threshold of the LTE system?

- A. Sintersearch
- B. SinterRATsearch
- C. snonintraserach

D. Sintrasearch

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which of the following descriptions is wrong?

- A. BCCH can be mapped to BCH
- B. DTCH can be mapped to MCH
- C. CCCH can be mapped to DL-SCH
- D. BCCH can be mapped to DL-SCH

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

The default path for saving logfile is C:\Program Files\Logfile.

- A. True
- B. False

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 16

The VoLTE terminal needs to establish a default bearer carrying the QCI1 service when registering in the EPC network.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

Valid H35-561 Dumps shared by PrepPdf.com for Helping Passing H35-561 Exam! PrepPdf.com now offer the **newest H35-561 exam dumps**, the PrepPdf.com H35-561 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H35-561 dumps with Test Engine here:
<https://www.preppdf.com/Huawei/H35-561-prepaway-exam-dumps.html> (62 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

In which of the following process, MME use DNS parse function based on GUTI to select new MME? (Multiple Choice)

- A. Service Request
- B. Handover
- C. TAU
- D. Attach

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 18

When the UE is powered on or enters the coverage area from the uncovered area, which of the following PLMNs is selected for registration?

- A. Last registered PLMN (RPLMN)
- B. EHPLMN
- C. HPLMN
- D. According to PLMN in the file "the User Controlled PLMN Selector with Access Technology" which saved in USIM card

Answer: A (LEAVE A REPLY)

NEW QUESTION: 19

Which of the following scenarios will release the NAS signaling connection after the TAU is completed?

- A. TAU initiated under CONNECTED, Active flag=0
- B. TAU initiated in the IDLE state, Active flag=0
- C. TAU initiated under CONNECTED, Active flag=1
- D. TAU initiated in IDLE state, Active flag=1

Answer: B (LEAVE A REPLY)

NEW QUESTION: 20

Which control signaling can the uplink PUCCH send back? (Multiple Choice)

- A. RI
- B. PMI
- C. CQI
- D. QoS

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 21

What factors do not need to be investigated for the failure of the E-RAB establishment caused by the core network?

- A. Authentication parameters
- B. Reason for rejection or abnormal release
- C. Message waiting timer
- D. Core network configuration parameters carried in the signaling

Answer: A (LEAVE A REPLY)

NEW QUESTION: 22

What information is determined by the location of the PHICH resource for each upstream user? (Multiple Choice)

- A. User's PUSCH information location

- B. Number of PHICH channel groups
- C. Number of PHICH processes
- D. PHICH channel duration

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

When the cellular network is used, which of the following is the station spacing company of the three-sector base station?

- A. 1.949R
- B. 1.732R
- C. 1.5R
- D. 2R

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 24

3GPP protocol defines the RRC reestablishment message of +U313. What are the cause values? (Multiple Choice)

- A. Radio Link Failure
- B. Handover Failure
- C. Reconfig Failure
- D. other

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 25

The eNodeB filters the edge UE according to the measurement report of which event that the UE reports?

- A. A2
- B. A4
- C. A3
- D. A1

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 26

Which of the following statements about LTE tools is ? (Multiple Choice)

- A. OMStar can be used for network verification
- B. PRS can be used for simulation and base station selection
- C. Probe can be used for road test and playback
- D. M2000 can be used to configure the network and check the message system.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

In the LTE network, which of the following is the handover command eNodeB sent to the UE under UU port?

- A. Handover
- B. RRC Connection Reconfiguration
- C. Handover Command
- D. Handover Request

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 28

Which network element can map the phone number to a SIP URI number?

- A. DNS
- B. HSS
- C. ENUM
- D. P-CSCF

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

Which of the following statements about MIMO are incorrect?

- A. MIMO supports transmit diversity
- B. MIMO is only used for the downlink
- C. MIMO is divided into single-user MIMO and multi-user MIMO
- D. MIMO requires at least 2 antennas

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 30

Which network elements will be used on the calling side for a basic IMS call? (Multiple choice)

- A. P-CSCF
- B. I-CSCF
- C. HSS
- D. S-CSCF

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

What is the general transmission mode of the bearer at the RLC layer of the port?

- A. NM
- B. TM
- C. AM
- D. UM

Answer: ([SHOW ANSWER](#))

Valid H35-561 Dumps shared by PrepPdf.com for Helping Passing H35-561 Exam! PrepPdf.com now offer the **newest H35-561 exam dumps**, the PrepPdf.com H35-561 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H35-561 dumps with Test Engine here:

NEW QUESTION: 32

What is the maximum rate of NB-IoT defined?

- A. 200Kbps
- B. 500Kbps
- C. 100bps
- D. 1Mbps

Answer: A (LEAVE A REPLY)

NEW QUESTION: 33

RSRP reference signal received power refers to the average signal power received by all REs of a Symbol bearer Reference Signal within the measured frequency bandwidth.

- A. True
- B. False

Answer: A (LEAVE A REPLY)

NEW QUESTION: 34

What are the differences between FDD and TDD in PRACH channel design? (Multiple choice)

- A. The short RACH time domain resource is on the UpPTS and shares the UpPTS frequency domain resource with Sounding.
- B. Because there are few TDD uplink subframes, multiple RACH channels in the same subframe are allowed.
- C. frequency domain occupies 6 RBs, the number of symbols occupied by the time domain is determined by the radius of the supported access
- D. TDD supports short RACH (format4)

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 35

Regarding the TAC/TAU process, which of the following descriptions are wrong? (Multiple Choice)

- A. The TAU process must first perform random access, and the number of PAGINGs in all cells in the TAC is the same.

- B. TAU is initiated in IDLE mode and is divided into normal TAU and periodic TAU.
- C. TAU is the process of the NAS layer, and the TAU process does not use random access.
- D. TAC is the area that mobile management by MME to UE, the TAU may be initiated in the mode of IDLE or CONNECT

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 36

According to the definition of the protocol, the maximum transmit power of the LTE UE is 23dBm.

- A. True
- B. False

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

Which of the following command can query the model and supported band of RRU?

- A. DSP BRD
- B. DSP RRU
- C. DSP BRDMFRINFO
- D. LST RRU

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 38

For FDD, which of the following time slots are the primary synchronization signals transmitted? (Multiple choice)

- A. TS1
- B. TS11
- C. TS0
- D. TS10

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 39

For carrier aggregation, which of the following conditions does the downlink service satisfy at the same time, Scell is activated? (Multiple choice)

- A. Pcell 's RSRP is above the set threshold
- B. RLC cache data volume is greater than the set threshold
- C. RLC first packet delay is greater than the set threshold
- D. Scell 's RSRP is above the set threshold

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 40

The LTE TDD system has the same synchronization accuracy requirements as the FDD system.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

What are the channel coding scheme and coding rate used by the UL-SCH, the DL-SCH?

- A. Turbo coding , 1/3
- B. Tail biting convolutional coding , 1/2
- C. Turbo coding , 1/2
- D. Tail biting convolutional coding , 1/3

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 42

Regarding the re-election of the community, which of the following statements is wrong?

- A. Same frequency neighbors have the same priority
- B. The priority of the inter-frequency neighboring area must be different from the serving cell
- C. The larger the neighboring cell offset value CellQoffset, the harder it is to reselect the cell.
- D. The serving cell and the inter-frequency system neighboring cell reselection priority are sent to the UE through the system message in the cell broadcast.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 43

In the handover failure analysis process, if the eNB does not receive the measurement report, which of the following should be transferred to analyze?

- A. Uu interface problem analysis
- B. Uu/X2/S1 interface problem analysis
- C. Find MME side signaling
- D. Analysis of X2/S1 interface problems

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 44

Which is the correct description of the ping-pong switching problem?

- A. Reduce the coverage of the cell for overlapping coverage problems and reduce the coverage of overlapping coverage areas in the adjacent area
- B. When there are ping-pong problems in all neighboring areas, reduce the Ocs parameter 1-3dB

C. When there are ping-pong problems in all neighboring areas, the handover decision timer is not lower than 640ms.

D. When there are ping-pong problems in all neighboring areas, reduce the inter-frequency switching threshold 1-3dB

Answer: C (LEAVE A REPLY)

NEW QUESTION: 45

What is the role of IMRN in VOLTE?

A. Anchored Routing for CS->IMS Calls

B. Routing for IMS->CS

C. Used to prevent repeated anchoring

D. Used for IMS->IMS intra-domain call routing

Answer: A (LEAVE A REPLY)

NEW QUESTION: 46

TAL Boundary division principle, which of the following statements is wrong?

A. TAL area is not recommended across MME

B. Do not place the border in a place with high traffic

C. TAL does not require continuous coverage in geography, and the "flower arrangement" method can effectively improve the utilization rate of the cell.

D. It is possible to use the topographical factors such as the mountain body and river in the urban area as the boundary.

Answer: (SHOW ANSWER)

Valid H35-561 Dumps shared by PrepPdf.com for Helping Passing H35-561 Exam! PrepPdf.com now offer the **newest H35-561 exam dumps**, the PrepPdf.com H35-561 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H35-561 dumps with Test Engine here:

NEW QUESTION: 47

About LTE TDD special subframe description, which is correct?

A. Special subframes are used for uplink and downlink synchronization, uplink and downlink isolation.

B. Special subframes include DwPTS, GP, and UpPTS

C. The guard interval is required from the uplink and downlink subframes to the downlink subframes and the downlink subframes to the uplink subframes.

D. The length of the special subframe is also 1ms.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 48

E-UTRAN to GERAN different system switching has five switching strategies: PS HO, CCO/NACC, SRVCC, redirection and fast redirection.

- A. True
- B. False

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 49

Which of the following interface is based on the Diameter protocol?

- A. S6a
- B. S1-MME
- C. S11
- D. S1-U

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 50

What are the types of switching according to the trigger reason? (multiple choice)

- A. Overlay-based handover
- B. Load-based handover
- C. Handover based on UE moving speed
- D. Business-based handover

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 51

Which of the following is not included in the QoS Configuration?

- A. UE Timer
- B. DSCP-QCI Mapping
- C. PBR Parameter
- D. QoS Global Configuration

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

Which network element does the service flow template TFT work on? (Multiple Choice)

- A. UE
- B. eNodeB
- C. S-GW
- D. P-GW

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 53

Assuming other conditions are unchanged, if the power parameter PB is changed from 0 to 1, then which of the following statements is ?

- A. Cell reference signal power is reduced by 3dB
- B. Cell reference signal power is increased by 1dB
- C. Cell reference signal power is reduced by 1dB
- D. Cell reference signal power is increased by 3d

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 54

Which of the following are the reasons for triggering an RRC connection?

- A. Caller - signaling
- B. Paging response
- C. Caller - data
- D. High priority access
- E. Emergency call

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 55

What are the factors affecting the average TCP rate? (Multiple Choice)

- A. Delay
- B. Transmission bandwidth
- C. Transmission jitter
- D. Empty port loss

Answer: B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 56

The LTE system PDCCH uses blind detection. What is the maximum number of blind detections for a terminal?

- A. 44
- B. 33
- C. 11
- D. 22

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 57

Which of the following scenarios will not initiate a rebuild?

- A. Wireless link failure
- B. Switching failed
- C. Security mode configuration interaction failed
- D. Measurement control reconfiguration failed

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 58

Which of the following scenarios does not the PCC anchor selection occur in?

- A. UE initial access
- B. Switch in
- C. Re-election
- D. Connection reconstruction

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 59

After the UE reports a large number of A3 events in the LTE system, it has not received the switch command of the eNodeB feedback. What are the possible reasons? (Multiple Choice)

- A. Path Switch failed
- B. UL channel quality difference
- C. Neighbor missing
- D. Target cell access failure

Answer: A,B,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 60

Which of the following connection is carried between UE and the S-GW?

- A. EPS bearer
- B. E-RAB
- C. DRB
- D. SRB

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

How many subcarriers does PSS (Primary Synchronization Signal) occupy in the frequency domain?

- A. 10
- B. 72
- C. 108
- D. 6

Answer: B ([LEAVE A REPLY](#))

exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com H35-561 dumps with Test Engine here:

<https://www.preppdf.com/Huawei/H35-561-prepaway-exam-dumps.html> (62 Q&As

Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 62

Which of the following descriptions of propagation loss are correct? (Multiple choice)

Which of the following descriptions of propagation loss are correct?

- A. The loss of open space in the building is less than the loss of the wall area with the corridor
- B. The loss in the window area is generally smaller than the loss in the window area.
- C. Street brackets with aluminum brackets produce less attenuation than brackets without aluminum
- D. The average penetration loss of buildings located in urban areas is greater than that of suburban and remote areas.

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 63

In handover based on frequency priority, event A1 is used to stop inter-frequency measurement.

- A. False
- B. True

Answer: A (LEAVE A REPLY)

NEW QUESTION: 64

Which of the following radio bearers can carry NAS messages? (Multiple Choice)

- A. SRB2
- B. SRB0
- C. SRB3
- D. SRB1

Answer: C (LEAVE A REPLY)

NEW QUESTION: 65

What is the minimum measurement period for the performance measurement task?

- A. 60 minutes
- B. 30 minutes
- C. 5 minutes
- D. 15 minutes

Answer: (SHOW ANSWER)
