NEW QUESTION: 1

Which two statements describe Juniper ATP Cloud? (Choose two)

- A. Juniper ATP Cloud runs mime with network traffic to Nock all traffic before reaching endpoint.
- B. Juniper ATP Cloud is an added app that must be instated with Security Director
- C. Juniper ATP Cloud provides protection against zero-day threats
- D. Juniper ATP Cloud can use a sandbox to detect threats that use evasion techniques.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 2

You are designing a security solution for an existing data center. All traffic must be secured using SRX Series devices, however, you are unable to change the existing IP addressing scheme.

Which firewall deployment method satisfies this requirement?

- A. one-arm deployment
- B. two-arm deployment
- C. transparent deployment
- D. inline deployment

Answer: C (LEAVE A REPLY)

NEW QUESTION: 3

When designing the security for a service provider core router, you are asked to add a firewall fitter on the to0 interface in this scenario, which two protocols would you want to allow through the filter? (Choose two.)

- A. STP
- B. BGP
- C. SSH
- D. LLDP

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 4

Which two features would provide protection from known malware? (Choose two.)

- A. ALGs
- B. Junker ATP Cloud
- C. IPS
- D. screens

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

A new virus is sheading across the Internet, with the potential to affect your customer's network
Which two statements describe how Policy Enforcer interacts with other devices to ensure that the network is protected in this scenario? (Choose two.)

- A. Policy Enforcer automates the enrollment of SRX Series devices with Jumper ATP Cloud
- B. Security Director pulls security intelligence feeds from Juniper ATP Cloud and applies them to Policy Enforcer
- C. Policy Enforcer pulls security policies from Juniper ATP cloud and applies them to SRX Series devices
- D. Policy Enforcer pulls security intelligence feeds from Juniper ATP Cloud to apply to SRX Series devices

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 6

You must implement a solution to deploy end-to-end security services on network elements.
Which solution will accomplish this task?

- A. JSA
- B. Network Director
- C. Security Director
- D. SRX Series devices

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

You want to reduce the possibility of your data center's server becoming an unwilling participant in a DDoS attack
When tvA3 features should you use on your SRX Series devices to satisfy this requirement? (Choose two.)

- A. UTMWebtaering
- B. Juniper ATP Cloud GeolP
- C. dynamic IPsec tunnels
- D. Juniper ATP Cloud CC feeds

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

When two security services process a packet whether it is being processed in the first-packet path or the fast path? (Choose two.)

- A. route lookup
- B. screen options
- C. ALG
- D. policy lookup

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which technology enables IPS inspection for users browsing websites that use Transport Layer Security (TLS)?

- A. SSL forward proxy
- B. SSL reverse proxy
- C. screens
- D. defense in-depth

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

You must ensure that all 10GbE interfaces have an MTU of 9192 and that an of the ge-0/0>4.0 interfaces on the SRX Series devices are in a specific zone.

Which type of a script would you use to accomplish this task?

- A. REST script
- B. commit script
- C. event script
- D. op script

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 11

As part of your service provider WAN network design, you are asked to create a design that secures BGP communication .

In this scenario, what are two reasons you would choose BGP Generated TTL Security Mechanism (GTSM)? (Choose two.)

- A. All of your router BGP connections are point-to-point
- B. All of your router BGP connections are point-to-multipoint.
- C. You do not have an easy method of rotating MD5 hashes on each router
- D. You have an automated method of rotating MD5 hashes on each router.

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 12

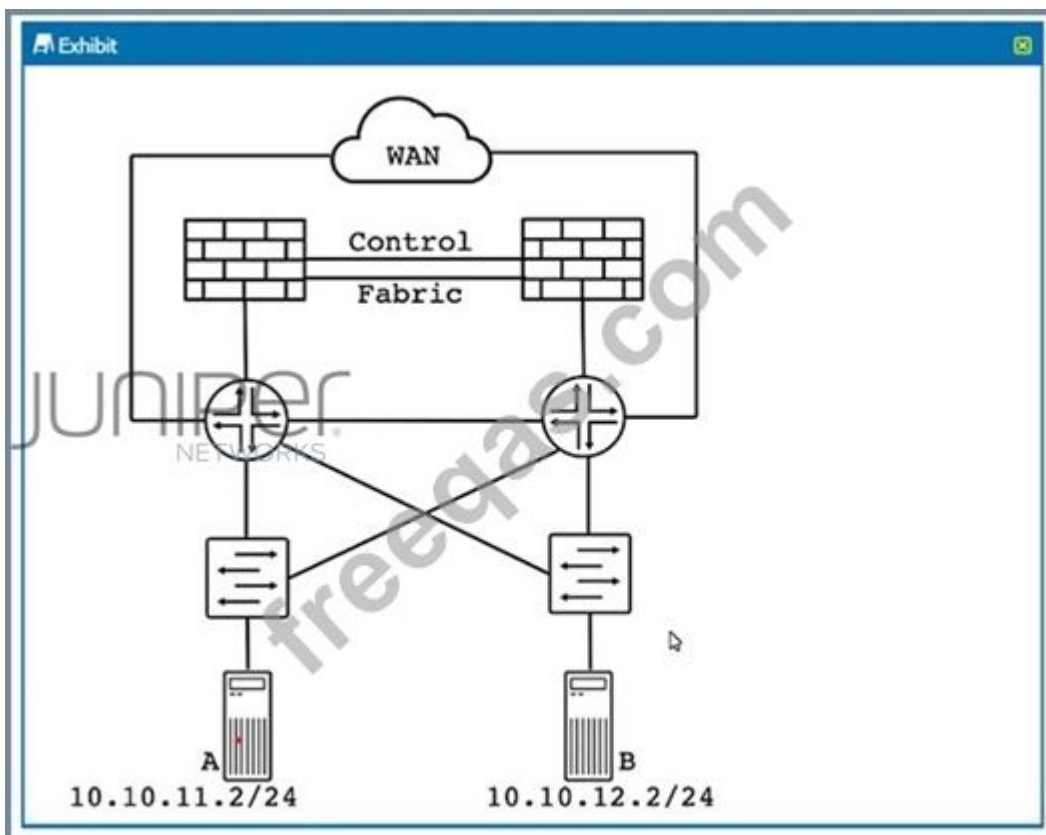

You are designing a service provider network. As part of your design you must ensure that the OSPF, BGP, and RSVP protocol communications are secured using the same authentication method. Which authentication protocol will accomplish this task?

- A. HMAC-MD5
- B. SHA-256
- C. SHA-RSA
- D. simple authentication

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 13

Refer to the exhibit.

The SRX Series devices are deployed in an off-path active/passive Cluster configuration. What are two advantages of this deployment model over an active-active cluster configuration? (Choose two)

- A. load-balancing of north/south traffic
- B. reduced latency
- C. load-balancing of east/west traffic
- D. reduced fabric link traffic

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

You are asked to provide a design proposal to secure a service provider's network against IP spoofing. As part of your design, you must ensure that only traffic sourced from the same subnet is followed on the customer-facing interfaces. Which solution will satisfy this requirement?

- A. unicast RPF with strict mode
- B. BGP labeled-unicast using the resolve-vpn option
- C. unicast RPF with loose mode
- D. BGP with source of origin community

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 15

You are asked to deploy a product that will provide east-west protection between virtual machines hosted on the same physical server with a requirement to participate with local routing instances. Which product would you use in this scenario?

- A. cSRX
- B. SRX
- C. vSRX
- D. QFX

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

When considering data center security, which aspect represents the weakest link?

- A. firewall performance
- B. application software bugs
- C. IPS signatures
- D. people

Answer: ([SHOW ANSWER](#)**)**

Valid JN0-1332 Dumps shared by PrepPdf.com for Helping Passing JN0-1332 Exam!
PrepPdf.com now offer the **newest JN0-1332 exam dumps**, the PrepPdf.com JN0-1332 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com JN0-1332 dumps with Test Engine here:

NEW QUESTION: 17

When designing security for the service provider WAN, you are asked to implement unicast reverse path forwarding (uRPF) in this scenario. On which interfaces would you choose to implement loose mode uRPF?

- A. On interfaces where the best forwarding path for routes is through the receiving interface

- B. On interfaces where all data originates on the same network as that of the router interface
- C. On interfaces that participate in multihomes environments
- D. On interfaces that are user access interfaces

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

You are asked to recommend a client remote access solution that provides direct network access and is the most secure. When connection type accomplishes this task?

- A. IPsec
- B. PPTP
- C. GRE
- D. SSH

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 19

According to Juniper Networks, what are two focus points when designing a secure network?

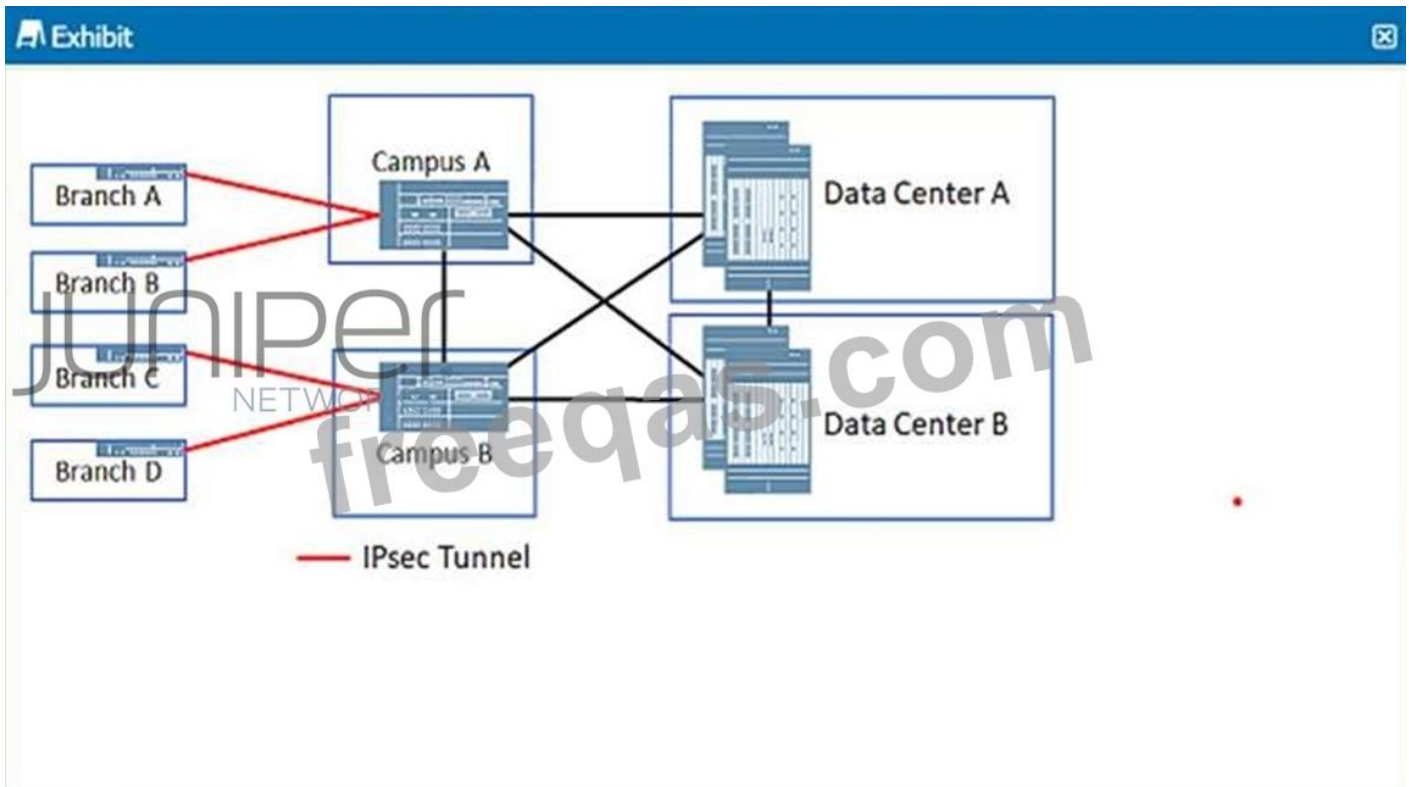

(Choose two.)

- A. performance
- B. distributed control
- C. classification
- D. automation

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 20

Exhibit.

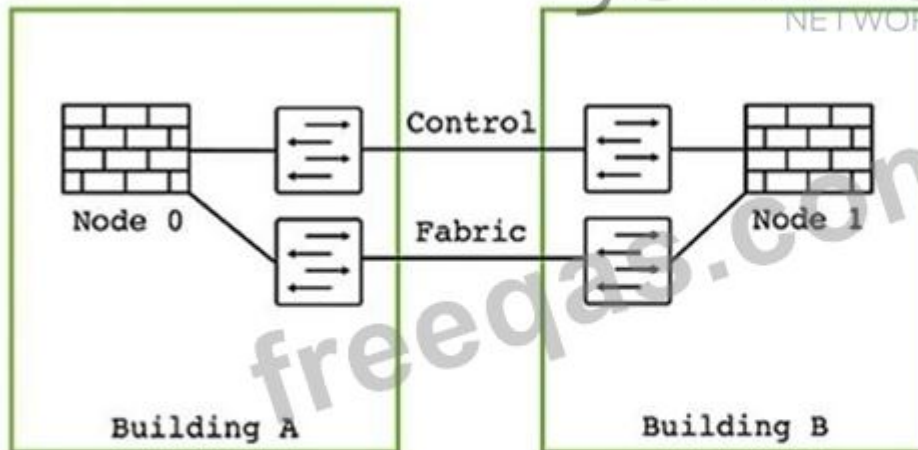

In the 3-tier VPN design shown in the exhibit, which function are the Campus A and Campus B SRX Series devices performing?

- A. WAN aggregation
- B. data center firewall
- C. Internet security gateway
- D. VPN bridging

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 21

Refer to the exhibit.

You are designing a security solution using an SRX Series chassis duster in two separate buildings. In this scenario, what are three considerations? (Choose three.)

- A. Latency on the control path must be under 100 ms
- B. Both HA links must be on physically different switches.
- C. The switches connecting to interface fab1 must support jumbo frames
- D. The switches connecting to interface fxp: must support jumbo frames
- E. Latency on the fabric path must be under 1000 ms

Answer: ([SHOW ANSWER](#))
