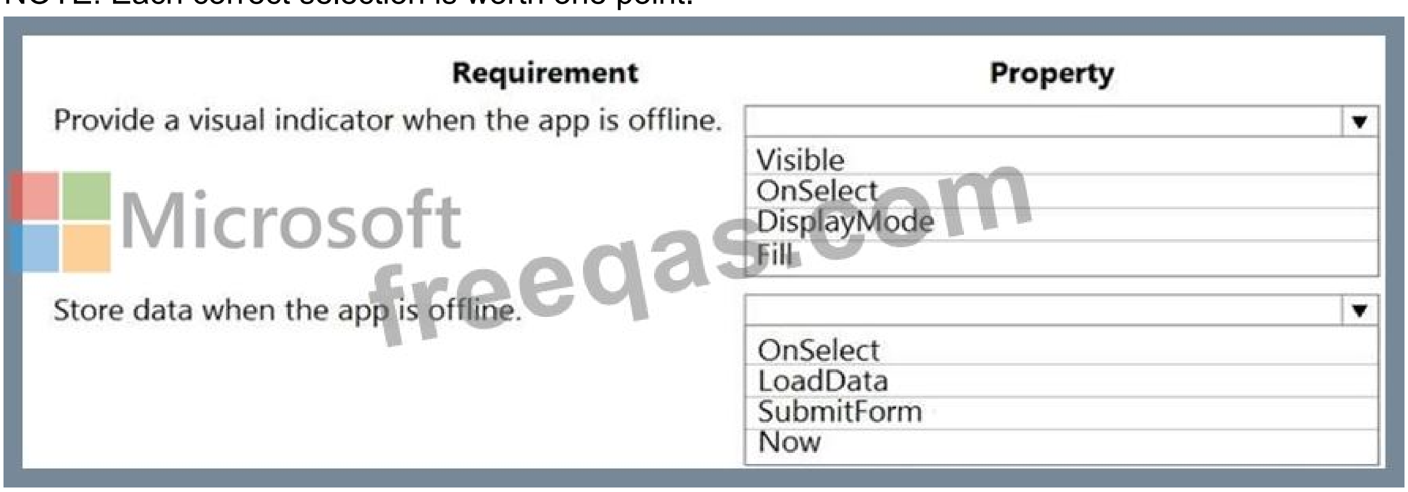
NEW QUESTION: 1

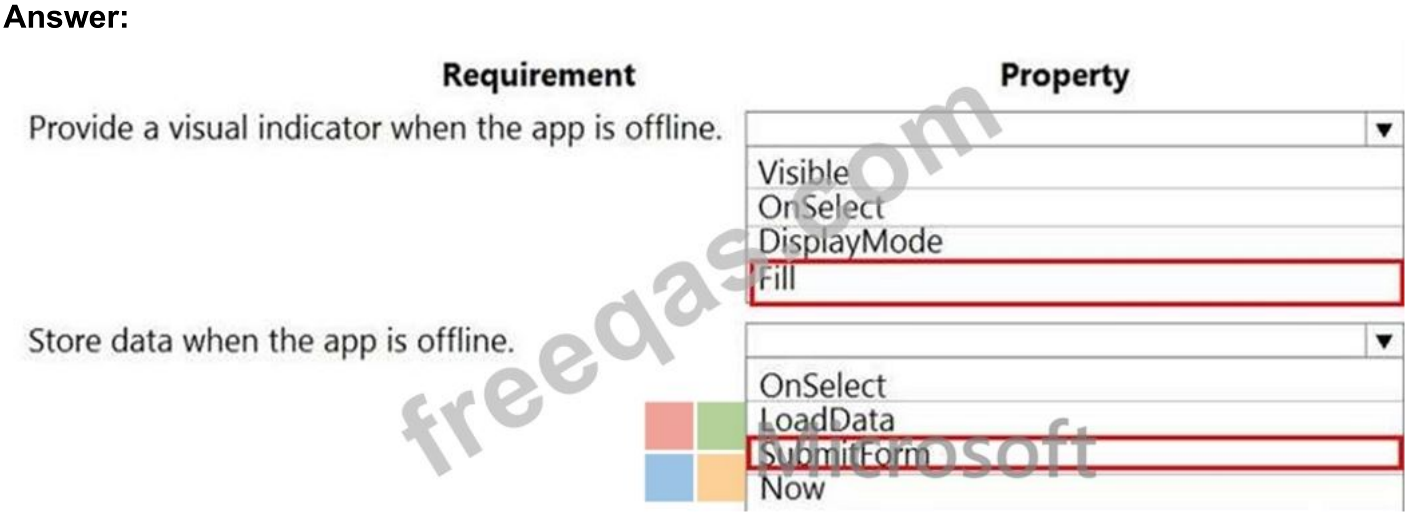
You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.



Answer:



Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION: 2

You are an app designer for a hotel.

The hotel wants to create an app to help the housekeeping staff schedule work.

You need to create a new environment for the app.

Where should you create the environment?

A. Power Platform Admin center

B. Power Apps Maker portal

C. Dynamics 365 Admin center

Answer: A ([LEAVE A REPLY]())

Manage environment in the Power Platform admin center.

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/create-environment

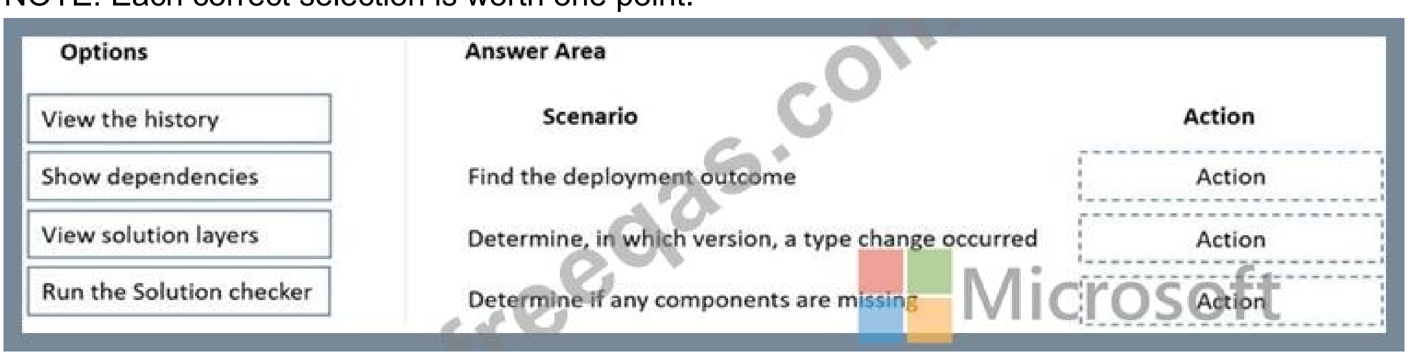
NEW QUESTION: 3

You are deploying solutions from development environments into test environments.

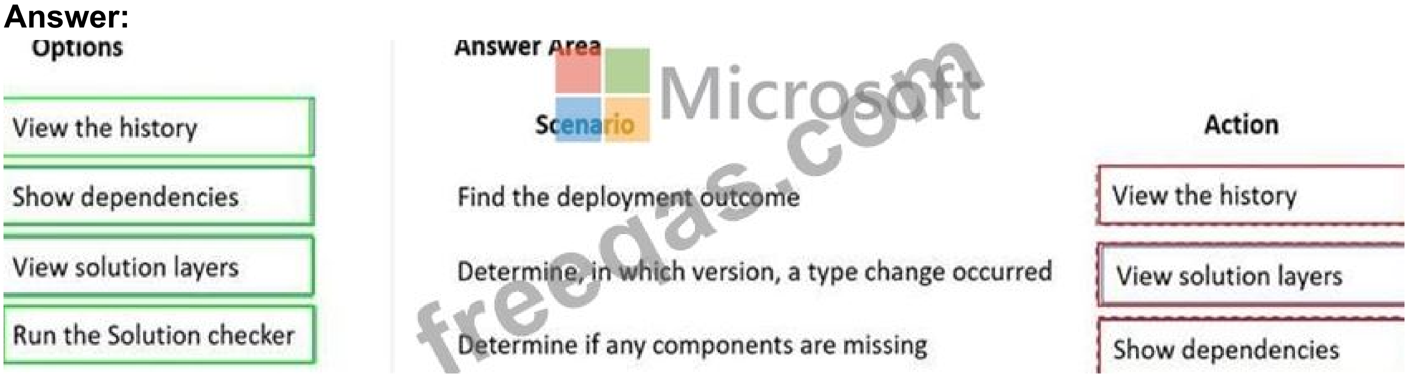
You need to gather solution information.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:



Reference:

https://docs.microsoft.com/en-us/powerapps/maker/data-platform/solution-history
https://docs.microsoft.com/en-us/powerapps/maker/data-platform/solution-layers

https://docs.microsoft.com/en-us/power-platform/alm/dependency-tracking-solution-components

NEW QUESTION: 4

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

Type of data	Data source
Sales log that show pending sales by product	Microsoft Excel workbook
Work estimates, cost estimates, and start and ending dates for each job activity by employee	Common Data Service entity
Actual work values and associated costs of work to date by job activity and employee	On-premises Microsoft SQL Server-based ERP system
Employee information	On-premises Microsoft SQL Server-based ERP system

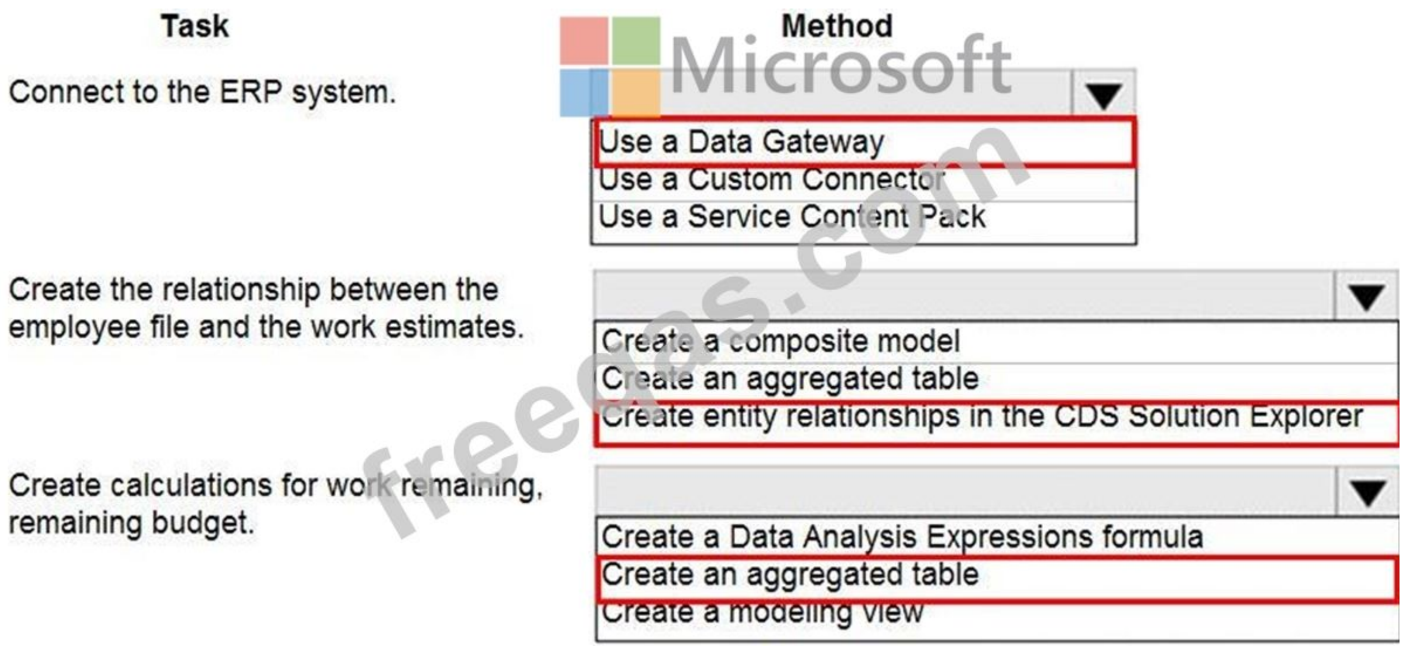
You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	Use a Data Gateway Use a Custom Connector Use a Service Content Pack
Create the relationship between the employee file and the work estimates.	Create a composite model Create an aggregated table Create entity relationships in the CDS Solution Explorer
Create calculations for work remaining, remaining budget.	Create a Data Analysis Expressions formula Create an aggregated table Create a modeling view

Answer:



Reference:

https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-sql-tutorial

https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships

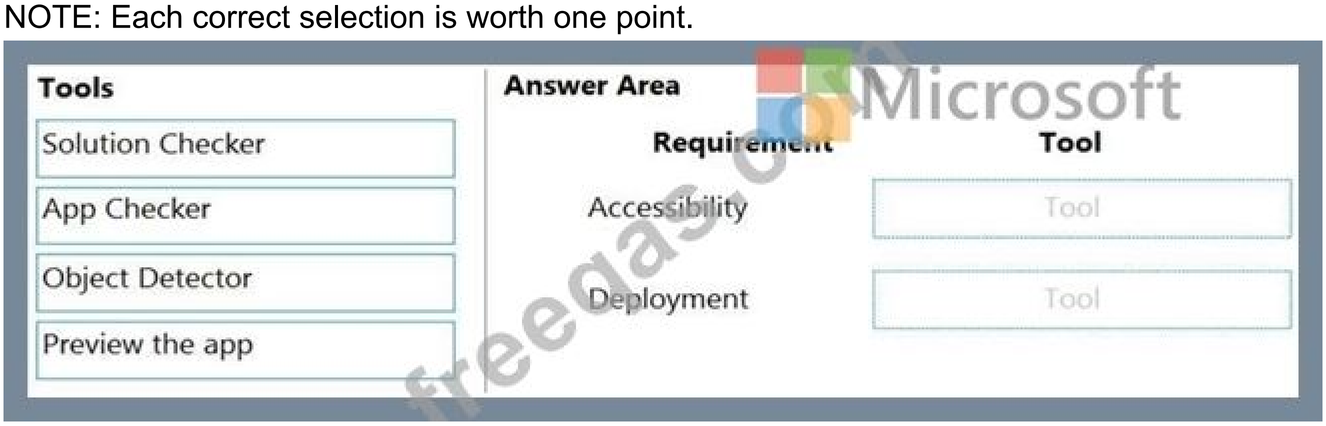
https://docs.microsoft.com/en-us/powerapps/maker/data-platform/define-rollup-fields

NEW QUESTION: 5

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area.

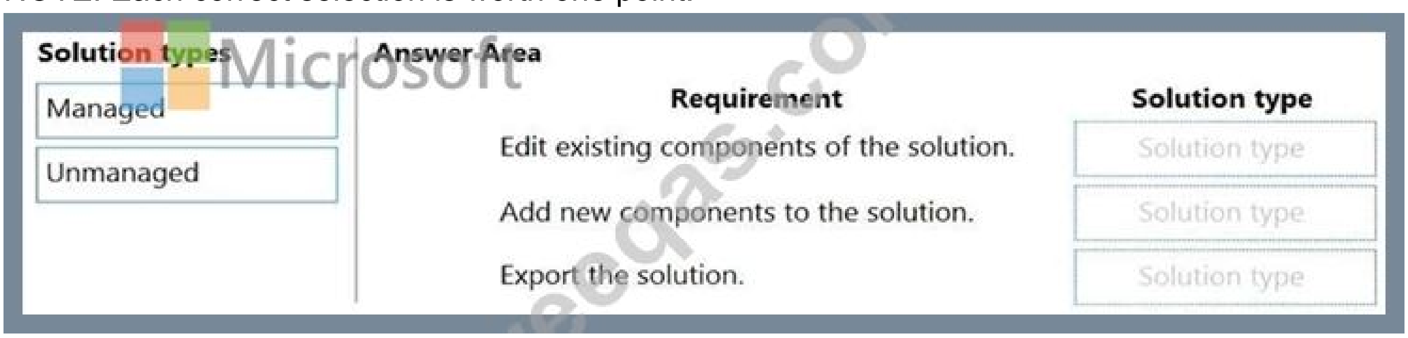
NOTE: Each correct selection is worth one point.



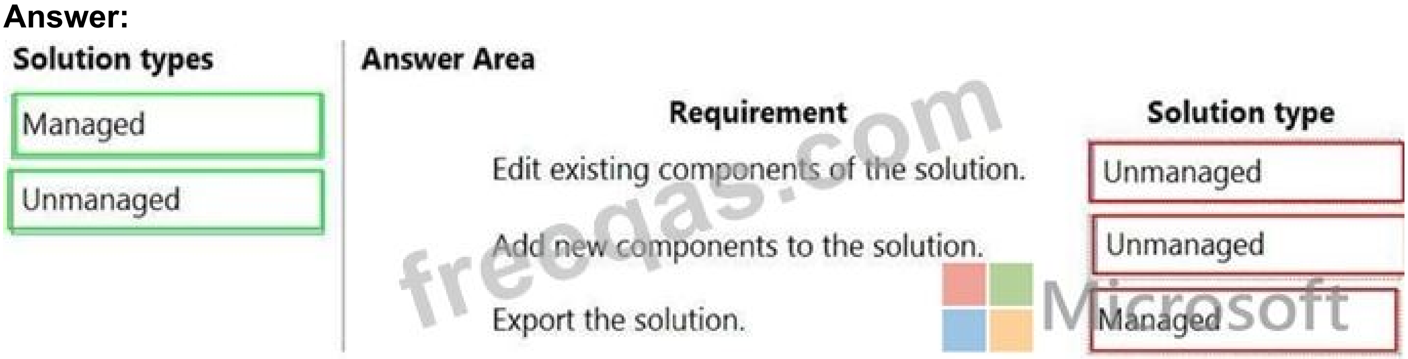
Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker

NEW QUESTION: 6
You create multiple apps as part of an unmanaged solution.
You need to move the apps to another environment.
You need to pick the appropriate solution type for each requirement.
Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION: 7
You have a Power Automate flow that processes files in a Microsoft SharePoint document library. The flow only needs to be run as required. You add steps to the flow to process the files.
Before leaving the office for the day, the manager must initiate the flow. The flow must not start processing files before 11:00 PM.
You need to configure the flow.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Add a recurrence trigger and configure to run daily at 11 00 PM.

B. Add a Condition action. If the time greater than 11:00 PM use a Terminate action prevent further processing.
C. Manually trigger the flow.
D. Add a Delay Until action and enter the timestamp for 11 00 PM.
Answer: C,D (LEAVE A REPLY)
Delay an action until a specific timestamp.
Note: The Microsoft Dataverse connector provides four ways to add wait conditions. Use these wait conditions when you need to delay processing in your flows until a particular condition is met.
Postpone triggering the flow and the first action until a specific time: Wait condition using Postpone Until.
Add a fixed delay before the next step.
Delay an action until a specific timestamp.
Delay an action until a specific event occurs.
Reference:
https://docs.microsoft.com/en-us/power-automate/dataverse/wait-conditions
Topic 1, Contoso, Ltd
Accounting system and purchasing
The company has a cloud-based ERP/accounting system and uses the General Ledger, Accounts Receivable, and Accounts Payable modules. The current system does not have any modules that handle shop floor or manufacturing planning functionality.
Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.
All purchasing of raw materials is performed based on bills of material (BOMs) generated by the engineering department when engineering prints are created.
The corporate office uses Dynamics 365 Finance. The operations manager reports that Dynamics 365 Finance will not be implemented for the manufacturing plants for at least five years.
Manufacturing and planning
The plant that Contoso, Ltd. acquires uses Microsoft Excel workbooks and Microsoft Word documents to track the sales pipeline, requests for quote responses, and work estimates. The documents are stored on shared network drives.
Printed engineering drawings are sometimes accidently used across orders. This results in rework, cost over runs, and missed deliveries.
The company uses Job Traveler documents to detail the operations that need to be performed and the materials needed for a given job number.
Sales
Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
Customer request number
Customer name
Description
Estimated value of the sale

Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled Names of the sales manager, salesperson, and estimator Name of the product line Date the quote was sent to the customer Approximate start and finish dates of the project Date the order was received, if won Job number, which is assigned if won The company has a formal process in place for managing estimates. Some sales quotes lack required supporting documentation including estimates for labor and materials even though a formal process is in place. The company wants to incorporate the formal process as part of an app.

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

An accurate sales pipeline and win/loss information cannot currently be reported because the close probability field in the Sales Log is being set to 100% when a sale is closed and 0% when a sale is lost.

Setting up a folder system on the network drive by a customer had not improved the hand-off of the current version of the sales quote to manufacturing.

Requirements

Solution

You plan to create a solution that uses Microsoft Teams and Power Platform.

You must convert the Sales Log workbook to a Common Data Service database.

Each department will have a separate Teams channel. Employees must only be able to access the channel for their department. All employees and management will have read access to a general company channel. The Teams site must include the following channels:

Sales

The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.

All Sales-related documents must be stored in folders in the files location for this channel.

Document versioning will be enabled. You must store the 10 most recent versions of a document.

Manufacturing

A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.

A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Printed paper drawings must no longer be used. The drawings must be stored in folders in the files location for the manufacturing channel.

General

You must create the following apps:

Time Tracking

You must create a canvas app to track time for each employee on mobile devices. The app must include the following:

a Sign-in screen

a screen to list the week's time entries for the employee

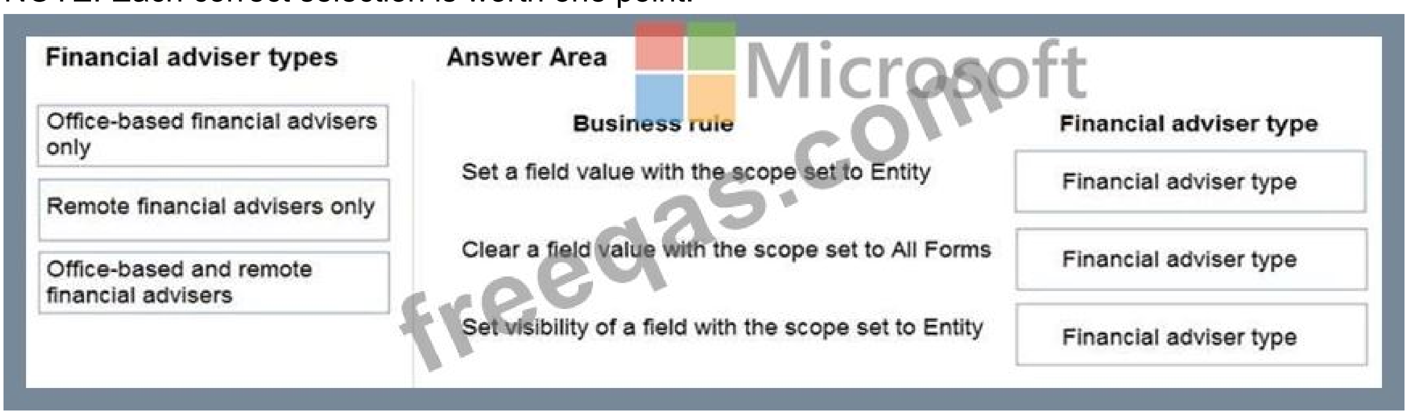
a screen to edit current time entries for the employee

The app must meet the following requirements:
The app must store its data in the existing on-premises Microsoft SQL Server instance.
Employees must only be able to access their own time tracking records from the app.
Employees must record all time spent in the fabrication of each customer job.
Employees must only be able to modify time records for the current and previous day.
Employees must be able to scan their badges to check in and out of work. Each badge contains the employee name and a current picture.
A QR code must be added to all employee badges. The code must include the employee's number.
Job Traveler documents must be printed as PDF documents and must include UPC E barcodes for the job number and task number. The barcodes will be used with the time tracking application.
Sales
The Sales app must meet the following requirements:
Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.
Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.
The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.
Automatically perform the following actions immediately when a sale is won:
Generate a sequential job number.
Copy key sales information to the Job Setup entity used by manufacturing.
If the sale is lost, the Status field must be set to Lost and the reason for the loss must be entered into a provided text field. The reason must be added to the end of the description field.
Ensure that employees can easily update the Sales Log even if they are at a customer site.
Manufacturing and planning
The app must meet the following requirements:
Provides features to plan and predict capacity resource requirements for current and upcoming orders in the pipeline.
Replace paper timesheets and track check-in, check-out, breaks, and the time spent on each job task.
Record time elapsed while performing work and for viewing of engineering drawings.
The Job Setup entity must store its data in the existing on-premises SQL Server instance.
Job Traveler documents must be generated as a PDF document and printed from the Job Setup entity.
Issues
Uses report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.

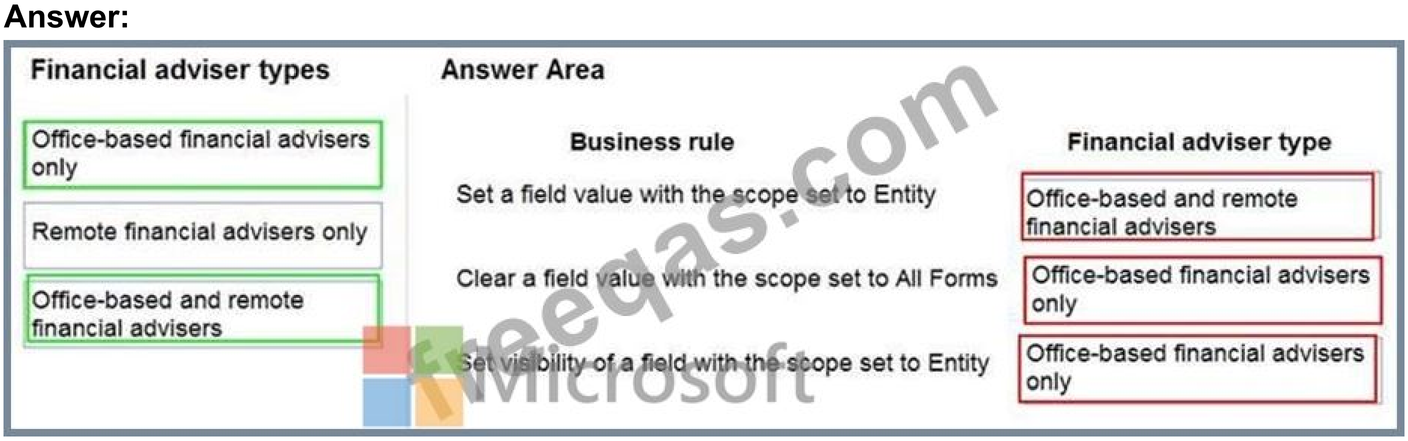
The operations manager reports that users often incorrectly sign in to the time tracking app. The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Users want to be able to see their weekly total time entered from all screens.
Testers report that they can see time entries in the Time Tracker app, not just their own. Additionally, they can also edit any existing time entries.

NEW QUESTION: 8

You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.
You need to create business rules for a custom counselling entity used by all financial advisers.
Who will be affected by the business rules?
To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule

NEW QUESTION: 9

You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.
The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.
You need to create a flow to alert the sales team.
Which type of trigger should you use?

A. Flow button for mobile
B. Power Apps
C. Office 365 Outlook
D. Common Data Service

Answer: A (LEAVE A REPLY)

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.
Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens

NEW QUESTION: 10

A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

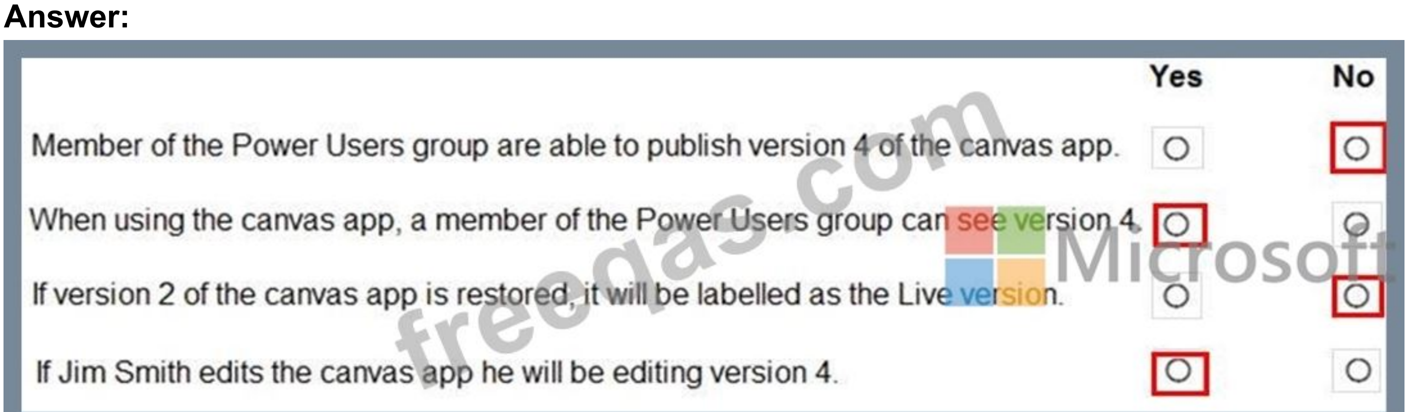
You need to ensure that sharing is configured correctly.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

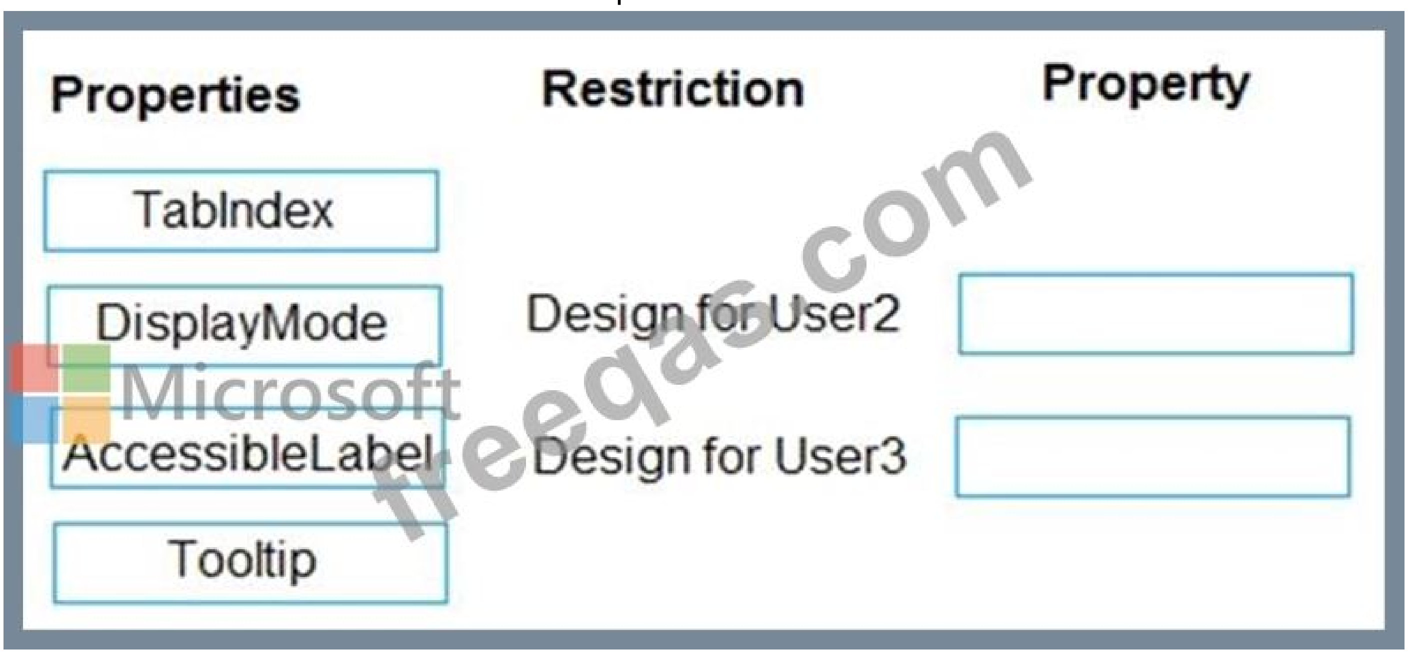
	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	○
When using the canvas app, a member of the Power Users group can see version 4.	○	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	○
If Jim Smith edits the canvas app he will be editing version 4.	○	○

Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/save-publish-app

NEW QUESTION: 11
You need to modify the app design to meet the accessibility needs of the sales associates.
Which properties should you configure? To answer, drag the appropriate properties to the correct restrictions. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:

NEW QUESTION: 12

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.

You are not able to activate the flow.

You need to troubleshoot the issue.

What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. You are not assigned the Power Platform Admin role.

B. You placed all connectors into the Business group within the DLP policy.

C. You placed all connectors into the Non-Business group within the DLP policy.

D. You are not assigned the Environment Admin role.

Answer: (SHOW ANSWER)

D: DLP policies are created in the Power Platform admin center. They affect Power Platform canvas apps and Power Automate flows. To create a DLP policy, you need to be a tenant admin or have the Environment Admin role.

B: This table describes how the DLP policy you created affects data connections in apps and flows.

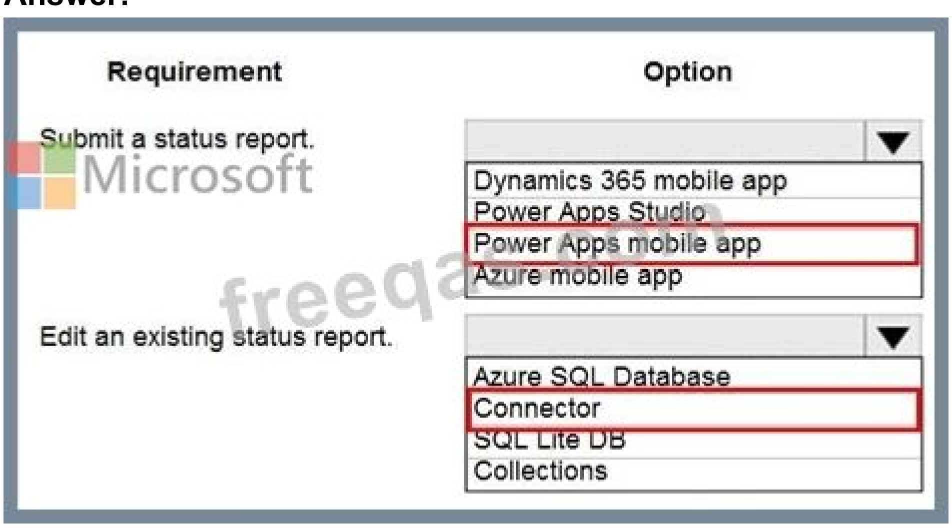
Connector matrix	SharePoint (Business)
SharePoint (Business)	Allowed
Salesforce (Business)	Allowed
Outlook.com (Non-Business)	Denied
Facebook (Blocked)	Denied
Twitter (Blocked)	$\boxed{\text{Denied}}$

Microsoft
freeqas.com

Note: Any connector that resides in the Non-Business data group-such as Outlook.com-won't share data with apps and flows by using SharePoint or Salesforce connectors. Facebook and Twitter connectors are altogether blocked from being used in any app or flow in non-test environments such as production or default environments.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION: 13
You need to resolve the issue for User1.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:



Reference:
https://powerapps.microsoft.com/en-us/blog/implementing-offline-capability-in-your-app/

NEW QUESTION: 14
You create a canvas app named Hardware Order that suggests computer hardware to customers.
A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.
You need to configure the business rule.

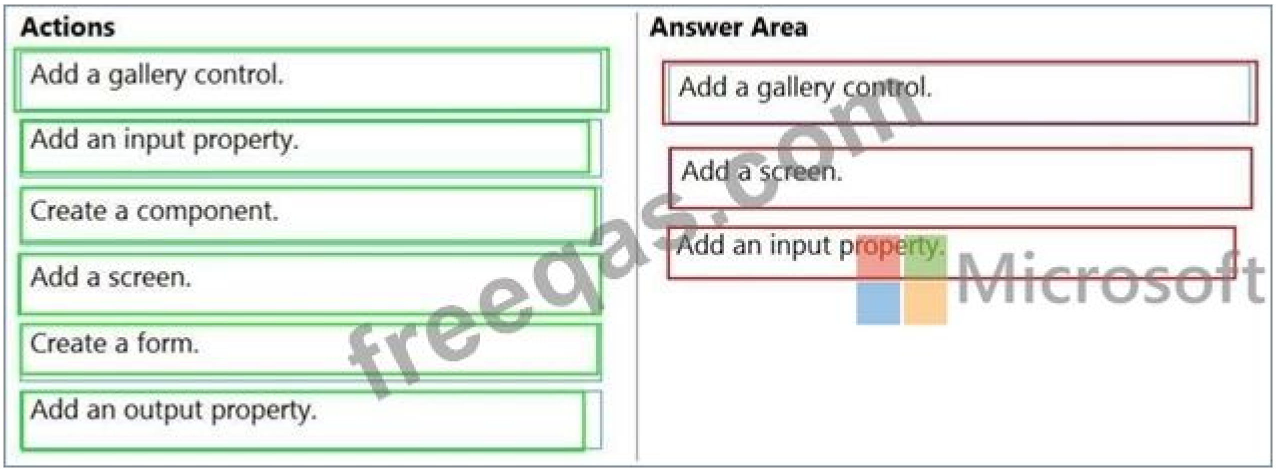
Which two actions should you perform? Each correct answer presents part of the complete solution.
NOTE: Each correct selection is worth one point.
A. Set the scope of the business rule to Entity.
B. Add a Recommendation action and configure it to enter the order type.
C. Set the scope of the business rule to All Forms.
D. Use the following condition expression:
(OrderType Does not begin with [test]) AND (Modified By Does not contain data)
Answer: (SHOW ANSWER)
A: If you're building a Canvas app, you must use Entity as the scope.
D: A business rule needs a condition.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION: 15
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
Set the data source of the form to Accounts.
Set the Item property of the form to Selected.
Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
B. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
Set the data source of the form to Accounts.
Set the Item property of the form to First(Accounts).
Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
C. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New.
Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
Set the data source of the form to Accounts.

Set the Item property of the form to Selected.
Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
D. Add a display form to Screen_AccountDetail.
Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
Set the data source of the form to Accounts.
Set the Item property of the form to Selected.
Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Answer: ([SHOW ANSWER])
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION: 16
You create an app with multiple screens.
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.
You need to create a reusable gallery that displays information based on the current record.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component

NEW QUESTION: 17
You need to implement logic in the app for lost sales.
What should you do?
A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.
Answer: B (LEAVE A REPLY)
Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
* Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
Reference:

https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule Analyze and visualize data Question Set 1

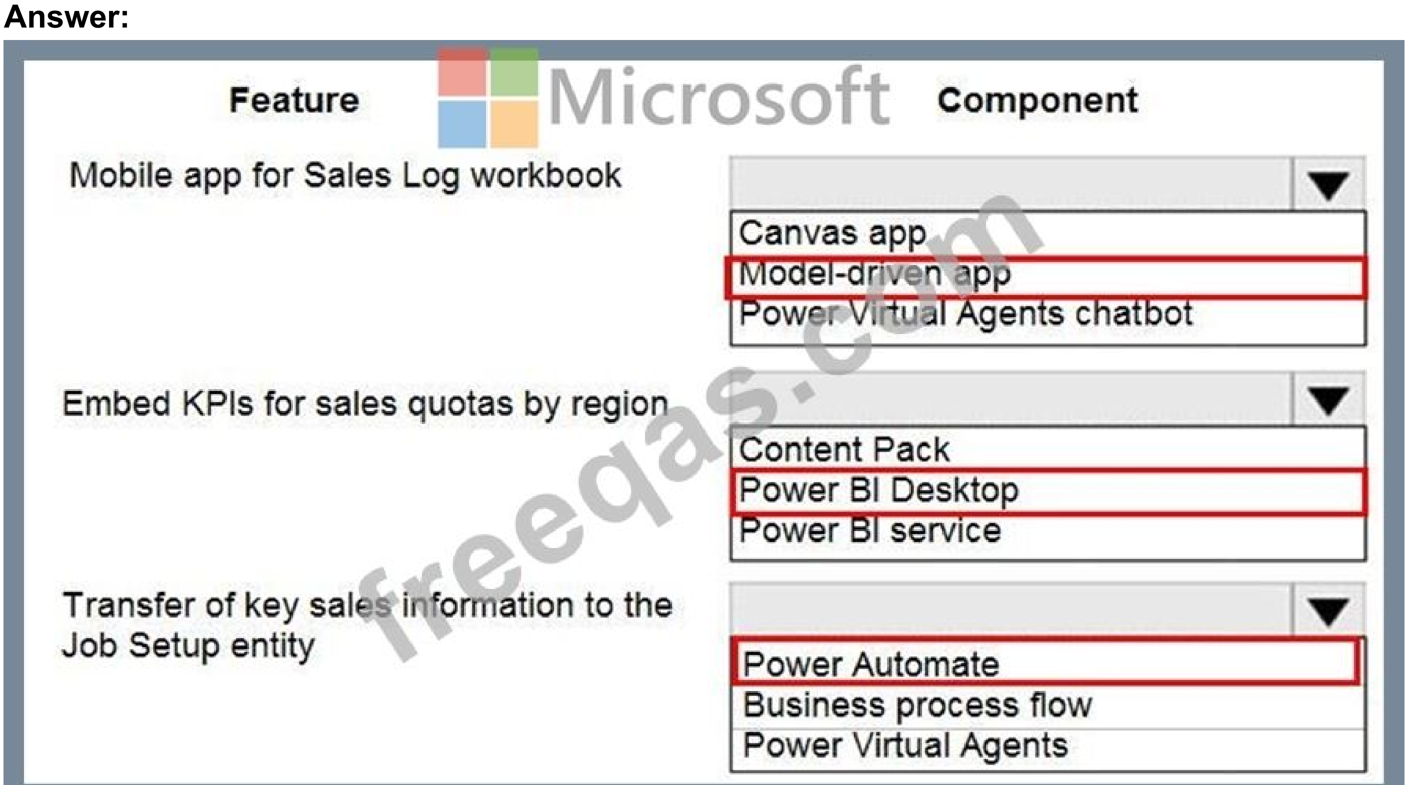
NEW QUESTION: 18

You need to implement features for the solution.

Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:



NEW QUESTION: 19

A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.

The production line workers report the following app issues from the shop floor:

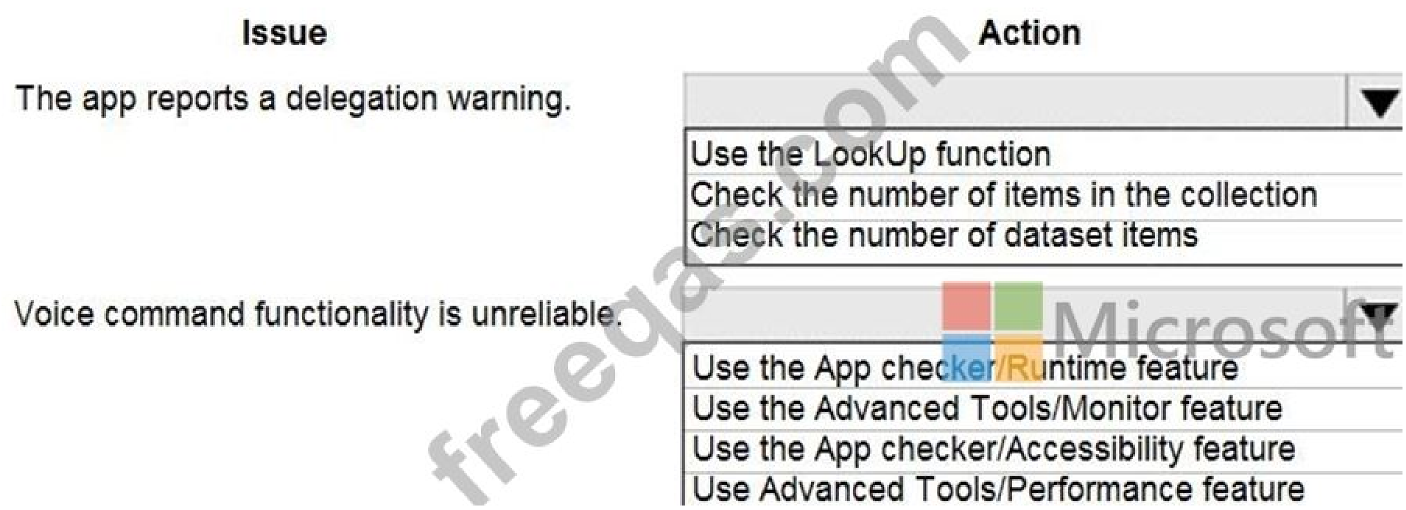
The app reports a delegation warning.

Voice command functionality is unreliable.

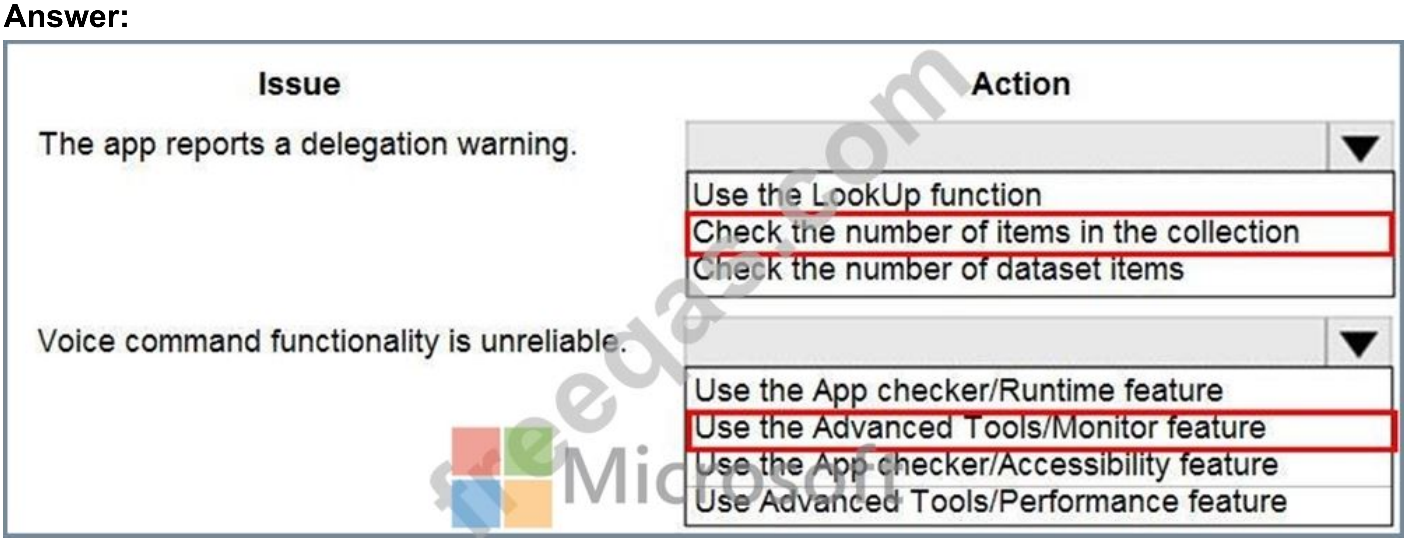
You have minimal information about the issues. You are not allowed to enter the production facility.

You need to troubleshoot the issues.

How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.



Answer:



Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/delegation-overview

https://docs.microsoft.com/en-us/powerapps/maker/monitor-canvasapps

NEW QUESTION: 20

You are creating a canvas app.

You need to store and retrieve small amounts of data on a local device when the app is offline.

Which set of functions should you use?

A. SaveData, LoadData

B. Set, Patch

C. Patch, Collect

D. Set, Collect

Answer: A (LEAVE A REPLY)

LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps

NEW QUESTION: 21

You need to store a list of products and their colors. You have a Power Apps app that includes the following elements:

a text box for the product name

a drop-down list for the product color

a button to add a product to the list

a status message that shows whether the addition of a product to the list was successful The button uses the following formula:

```
Collect(
colProductList,
{
 Product: txtProductName.Text, Color: drpColors.Selected.Value
}
);
Set(
 vStatusMessage, "Added '" & txtProductName.Text & "'"
);
timStatusMessage.Start;
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You must explicitly declare the collection before you can add product names and colors to the collection.	○	○
The formula stores the product name and the color in a collection.	○	○
`vStatusMessage` is a context variable that is used to store the status message.	○	○

Answer:

Statements	Yes	No
You must explicitly declare the collection before you can add product names and colors to the collection.	○	$\boxed{\circ}$
The formula stores the product name and the color in a collection.	$\boxed{\circ}$	○
`vStatusMessage` is a context variable that is used to store the status message.	○	$\boxed{\circ}$

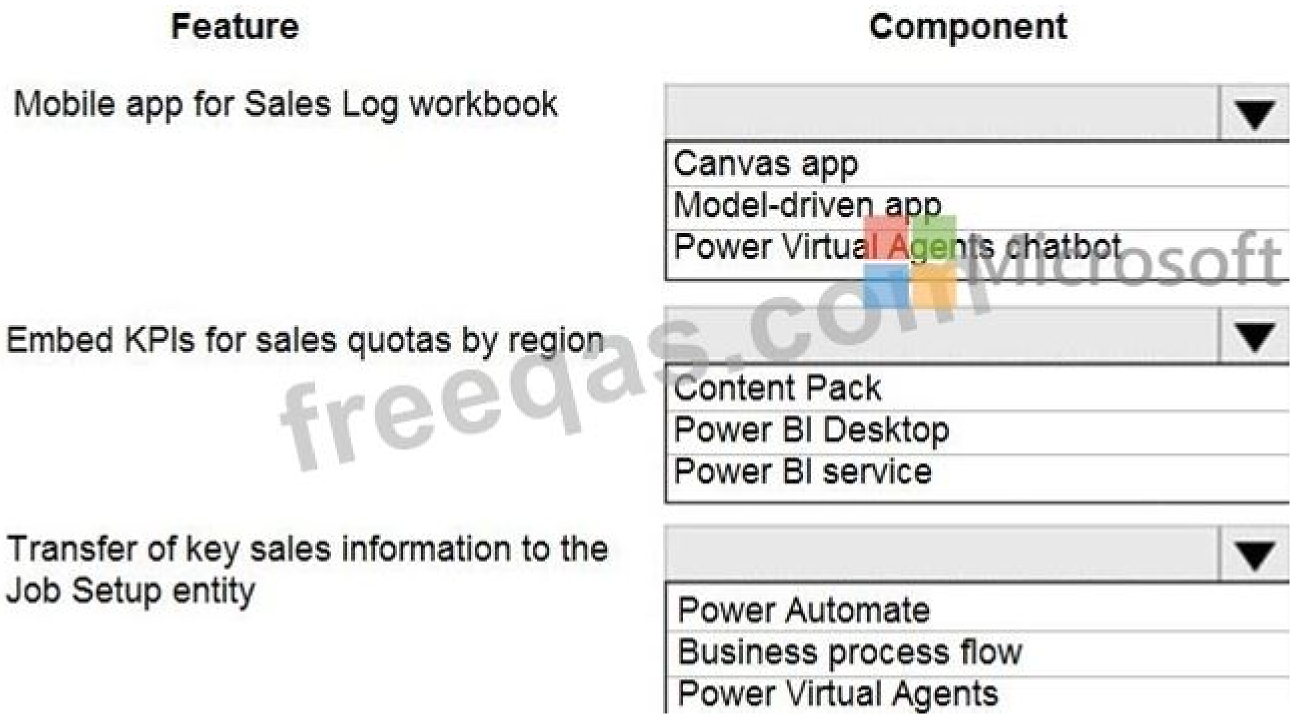
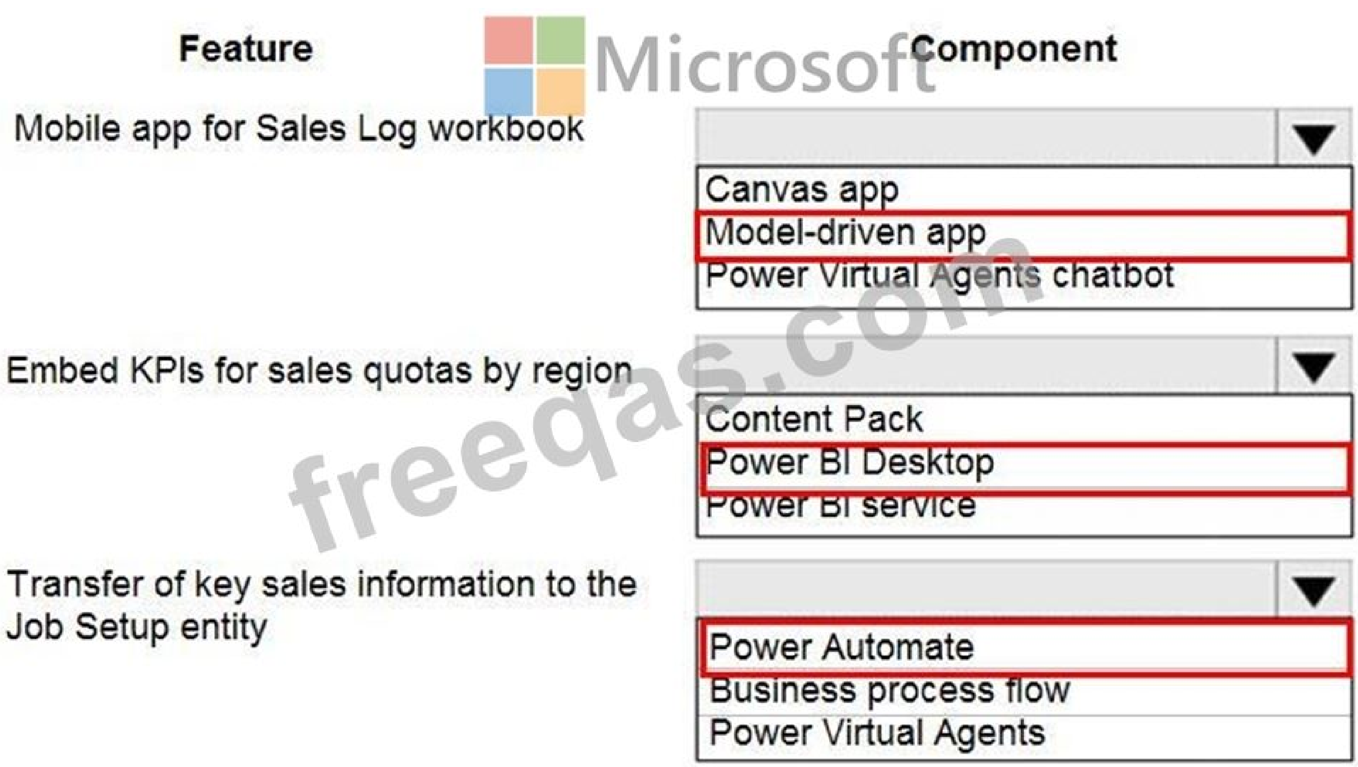
NEW QUESTION: 23

You need to implement features for the solution.
Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



NEW QUESTION: 24

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.
A Power Automate flow monitors social media channels to identify high-impact trends.

When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.
You need to streamline the Power Automate and Teams communication process.
What should you use?

A. AI Builder

B. Common Data Service business process flows

C. Adaptive cards

D. Integrated approval flows

Answer: (SHOW ANSWER)

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery." Jim Parker: Web and Collaboration Services Manager Reference:
https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform

Topic 1, Contoso, Ltd

Accounting system and purchasing

The company has a cloud-based ERP/accounting system and uses the General Ledger, Accounts Receivable, and Accounts Payable modules. The current system does not have any modules that handle shop floor or manufacturing planning functionality.

Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.

All purchasing of raw materials is performed based on bills of material (BOMs) generated by the engineering department when engineering prints are created.

The corporate office uses Dynamics 365 Finance. The operations manager reports that Dynamics 365 Finance will not be implemented for the manufacturing plants for at least five years.

Manufacturing and planning

The plant that Contoso, Ltd. acquires uses Microsoft Excel workbooks and Microsoft Word documents to track the sales pipeline, requests for quote responses, and work estimates. The documents are stored on shared network drives.

Printed engineering drawings are sometimes accidently used across orders. This results in rework, cost over runs, and missed deliveries.

The company uses Job Traveler documents to detail the operations that need to be performed and the materials needed for a given job number.

Sales

Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:

Customer request number

Customer name

Description

Estimated value of the sale

Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled Names of the sales manager, salesperson, and estimator Name of the product line Date the quote was sent to the customer Approximate start and finish dates of the project Date the order was received, if won Job number, which is assigned if won The company has a formal process in place for managing estimates. Some sales quotes lack required supporting documentation including estimates for labor and materials even though a formal process is in place. The company wants to incorporate the formal process as part of an app.

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

An accurate sales pipeline and win/loss information cannot currently be reported because the close probability field in the Sales Log is being set to 100% when a sale is closed and 0% when a sale is lost.

Setting up a folder system on the network drive by a customer had not improved the hand-off of the current version of the sales quote to manufacturing.

Requirements

Solution

You plan to create a solution that uses Microsoft Teams and Power Platform.

You must convert the Sales Log workbook to a Common Data Service database.

Each department will have a separate Teams channel. Employees must only be able to access the channel for their department. All employees and management will have read access to a general company channel. The Teams site must include the following channels:

Sales

The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.

All Sales-related documents must be stored in folders in the files location for this channel.

Document versioning will be enabled. You must store the 10 most recent versions of a document.

Manufacturing

A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.

A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Printed paper drawings must no longer be used. The drawings must be stored in folders in the files location for the manufacturing channel.

General

You must create the following apps:

Time Tracking

You must create a canvas app to track time for each employee on mobile devices. The app must include the following:

a Sign-in screen

a screen to list the week's time entries for the employee

a screen to edit current time entries for the employee

The app must meet the following requirements:
The app must store its data in the existing on-premises Microsoft SQL Server instance.
Employees must only be able to access their own time tracking records from the app.
Employees must record all time spent in the fabrication of each customer job.
Employees must only be able to modify time records for the current and previous day.
Employees must be able to scan their badges to check in and out of work. Each badge contains the employee name and a current picture.
A QR code must be added to all employee badges. The code must include the employee's number.
Job Traveler documents must be printed as PDF documents and must include UPC E barcodes for the job number and task number. The barcodes will be used with the time tracking application.
Sales
The Sales app must meet the following requirements:
Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.
Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.
The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.
Automatically perform the following actions immediately when a sale is won:
Generate a sequential job number.
Copy key sales information to the Job Setup entity used by manufacturing.
If the sale is lost, the Status field must be set to Lost and the reason for the loss must be entered into a provided text field. The reason must be added to the end of the description field.
Ensure that employees can easily update the Sales Log even if they are at a customer site.
Manufacturing and planning
The app must meet the following requirements:
Provides features to plan and predict capacity resource requirements for current and upcoming orders in the pipeline.
Replace paper timesheets and track check-in, check-out, breaks, and the time spent on each job task.
Record time elapsed while performing work and for viewing of engineering drawings.
The Job Setup entity must store its data in the existing on-premises SQL Server instance.
Job Traveler documents must be generated as a PDF document and printed from the Job Setup entity.
Issues
Uses report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.

The operations manager reports that users often incorrectly sign in to the time tracking app. The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Users want to be able to see their weekly total time entered from all screens.
Testers report that they can see time entries in the Time Tracker app, not just their own.
Additionally, they can also edit any existing time entries.

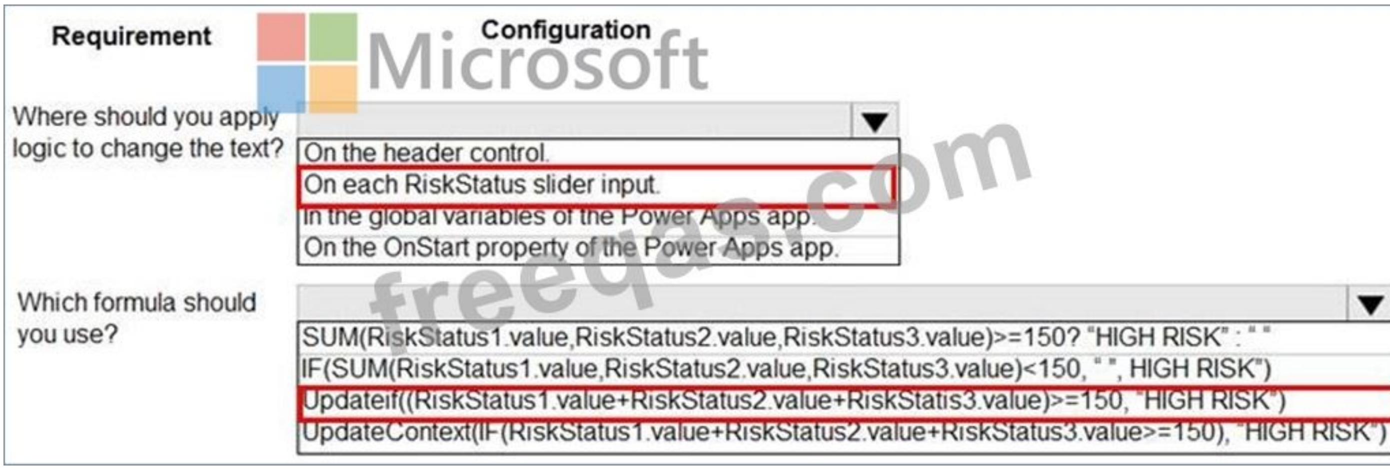
NEW QUESTION: 25
A company is building a Power Apps app to track key project tasks.
Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

Task name	Slider input control name
Task1	RiskStatus1 [0–100]
Task2	RiskStatus2 [0–100]
Task3	RiskStatus3 [0–100]

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.
You need to configure a solution to change the text on the header bar.
How should you configure the app? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration
Vhere should you apply ɔgic to change the text?	On the header control. On each RiskStatus slider input. In the global variables of the Power Apps app. On the OnStart property of the Power Apps app.
Vhich formula should ɾou use?	SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)>=150? "HIGH RISK" : " " IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)<150, " ", HIGH RISK") Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)>=150, "HIGH RISK") UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value>=150), "HIGH RISK")

Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-formulas#change-a-value-based-on-input
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-update-updateif

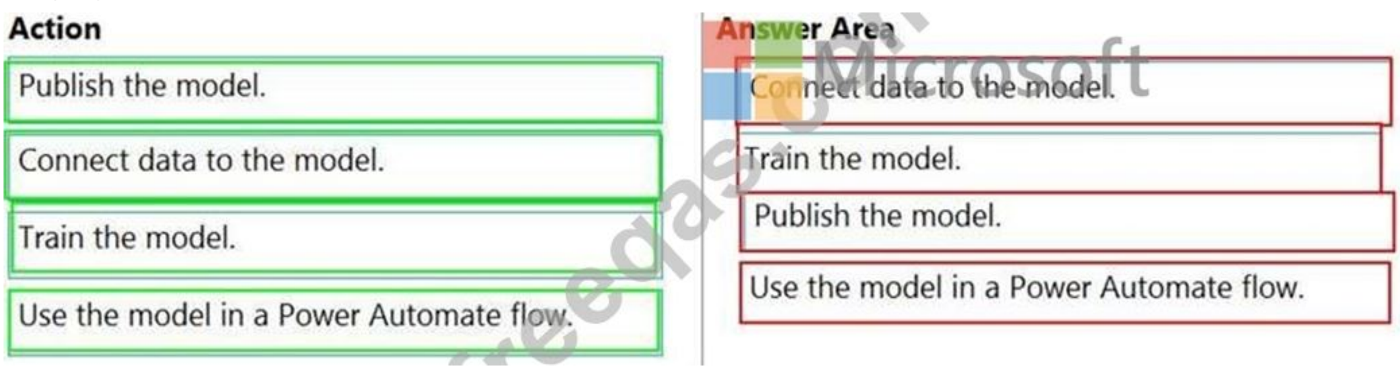
NEW QUESTION: 26
Engineers in an organization plan to attend an international product show.
The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.
You need to provide a button flow to streamline the process.
Which two AI Builder models should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Language detection
B. Sentiment analysis
C. Category classification
D. Business card reader
E. Form processing
Answer: A,D (LEAVE A REPLY)
International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return"en"instead of"en-US". The response for languages that can't be detected isunknown.
Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection

https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps

NEW QUESTION: 27

A company uses Power Automate and Power Apps to streamline business processes.
You need to use AI Builder to analyze customer reviews of the company's products.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

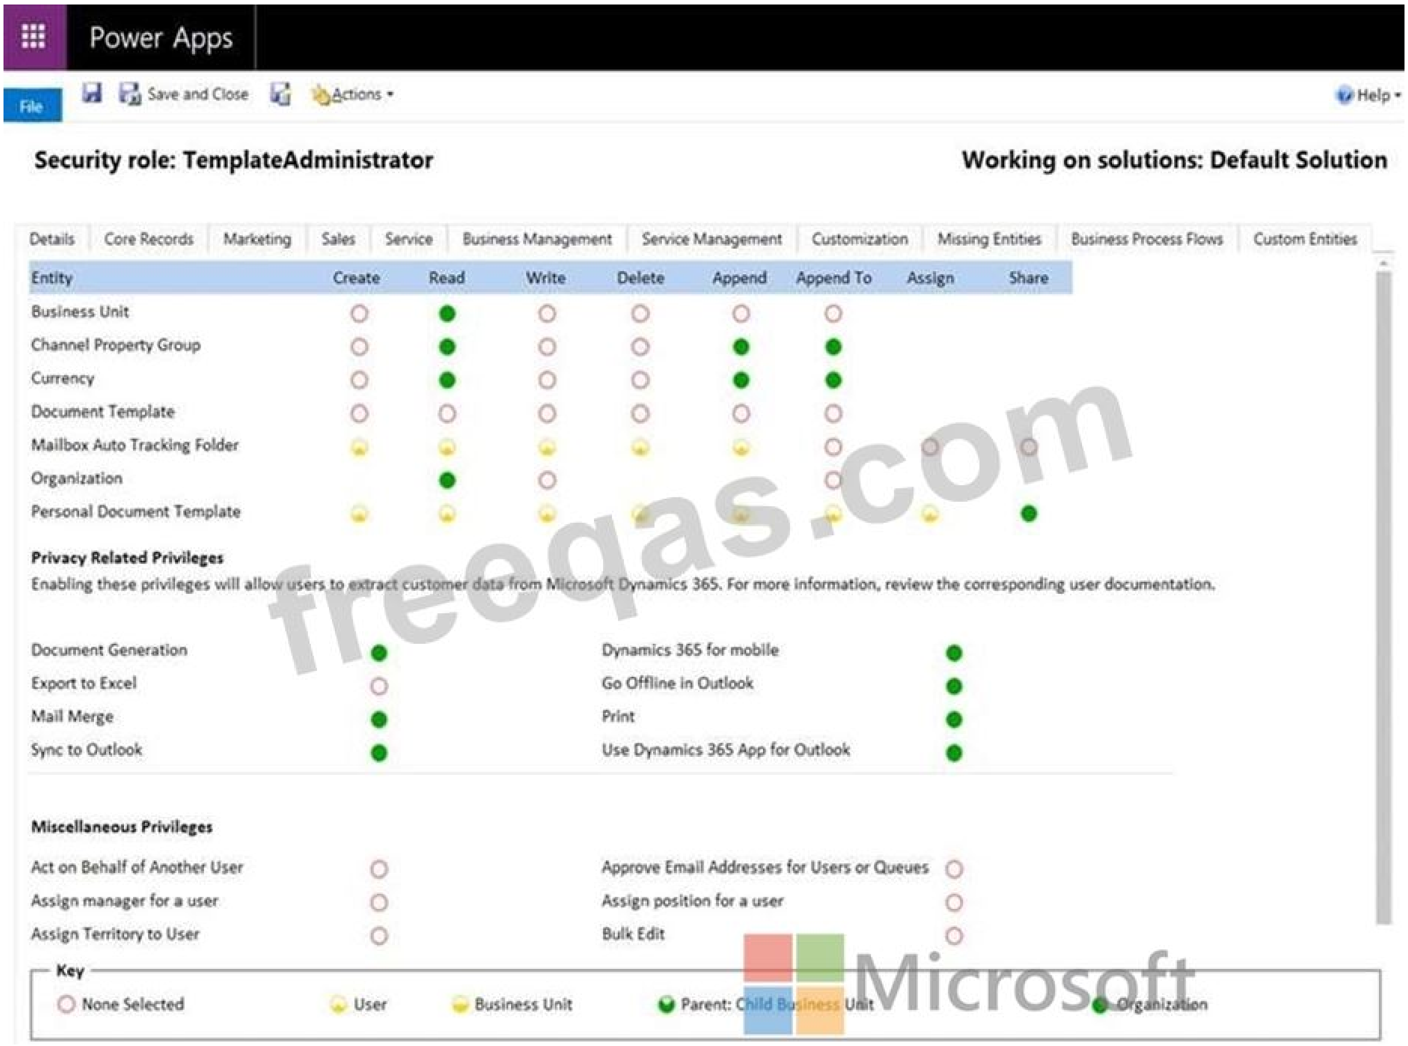
Answer:



Reference:
https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/

NEW QUESTION: 28

You are configuring security to enable users to analyze data by using Microsoft Excel templates. You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.



Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

Answer:

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

- Bulk Edit
- Export to Excel
- $\boxed{\text{Read on Document Template}}$
- Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- $\boxed{\text{Read on Personal Document Template}}$

NEW QUESTION: 29

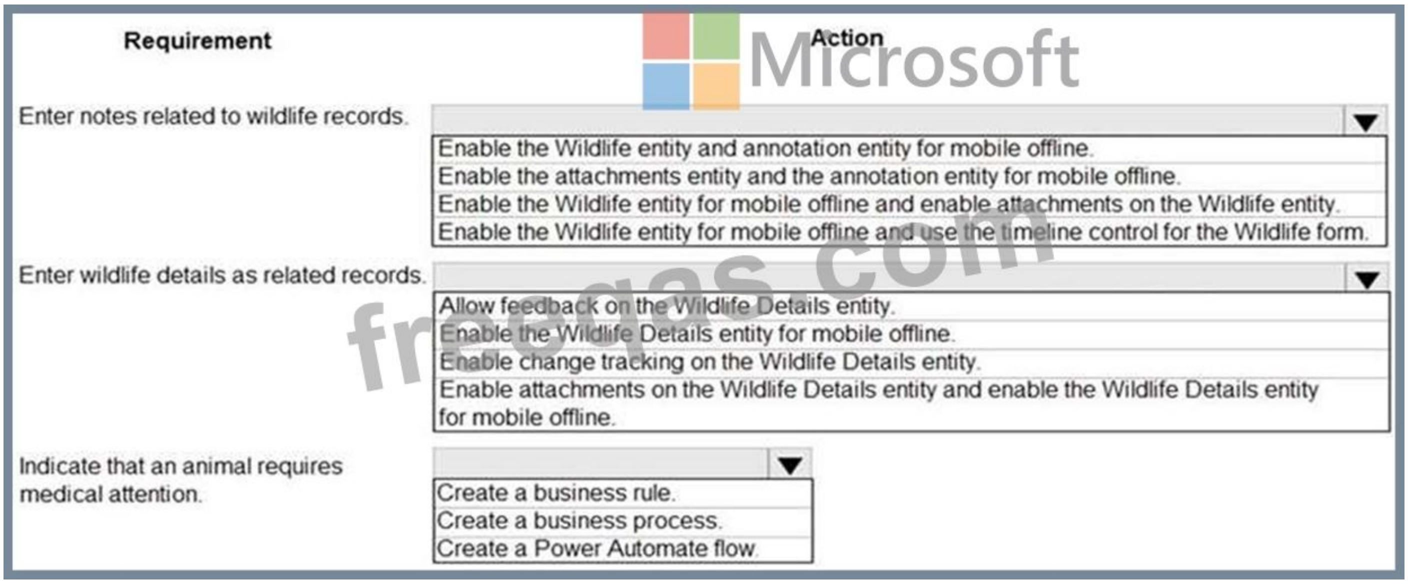
Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol.

The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.

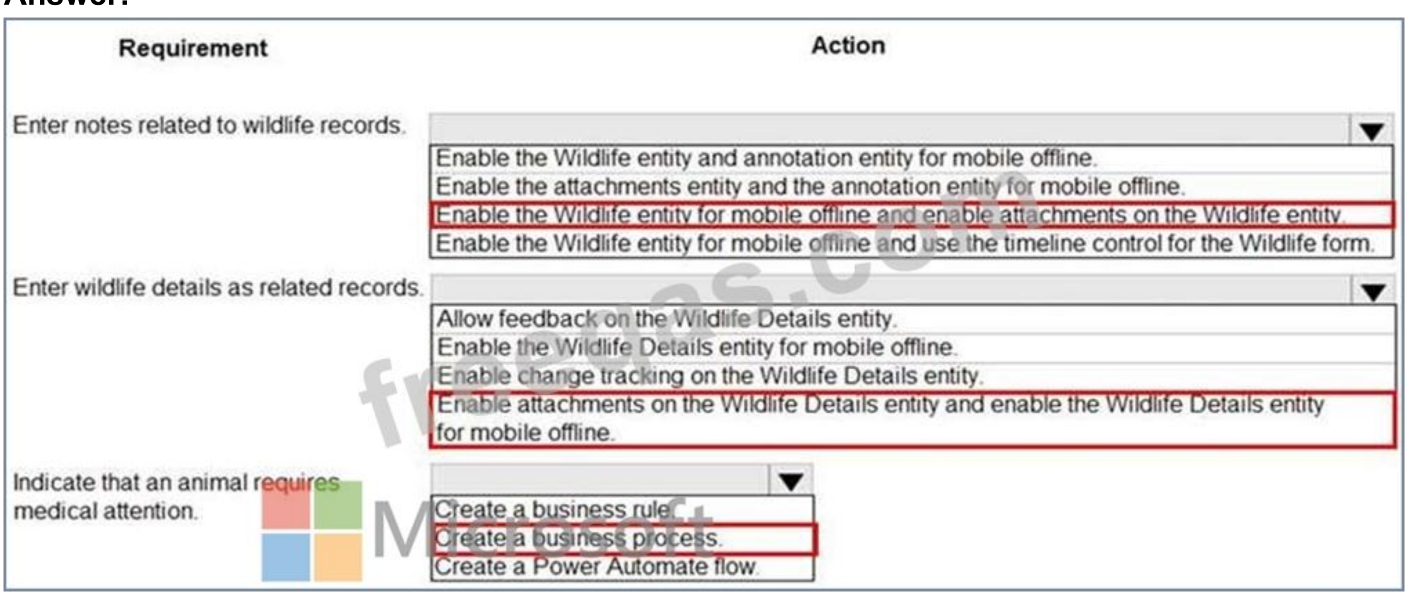
You need to design the app.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.



Answer:



Reference:

https://powerapps.microsoft.com/en-us/blog/mobile-offline-for-power-apps/

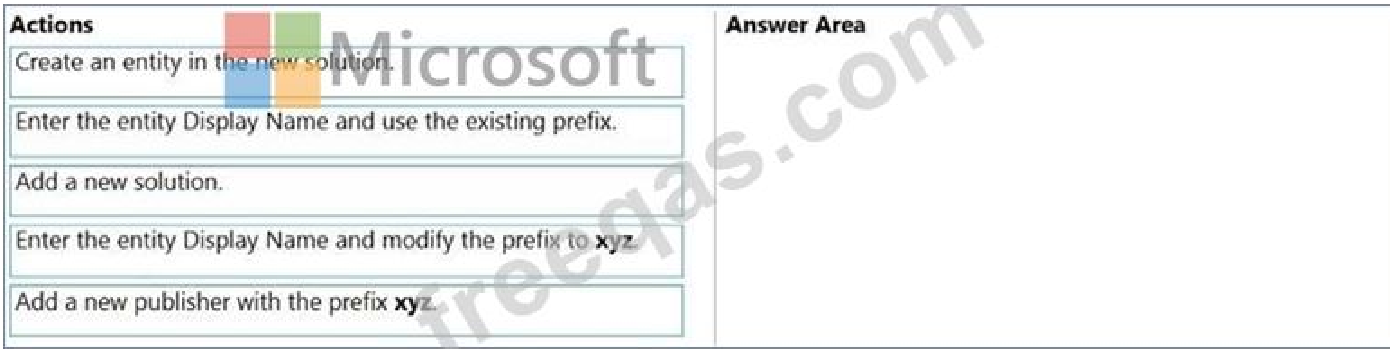
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-processes

NEW QUESTION: 30

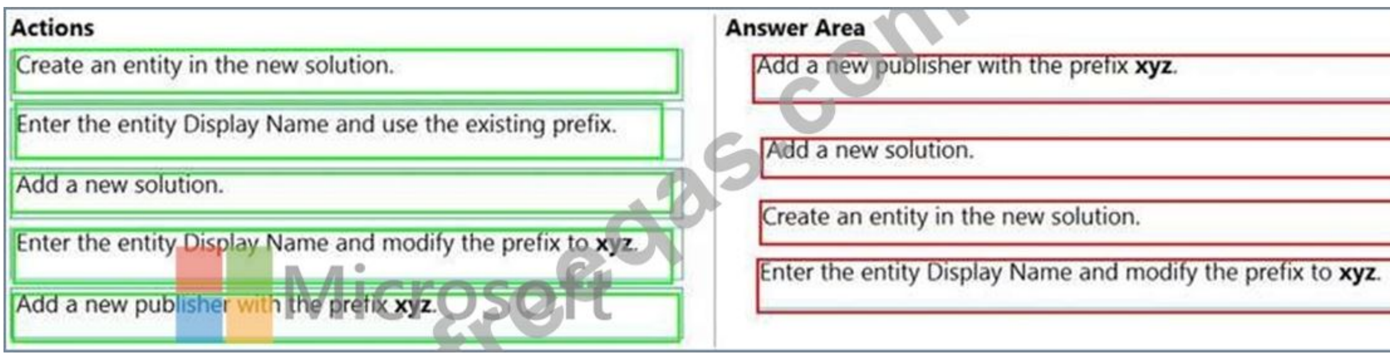
You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:



Reference:

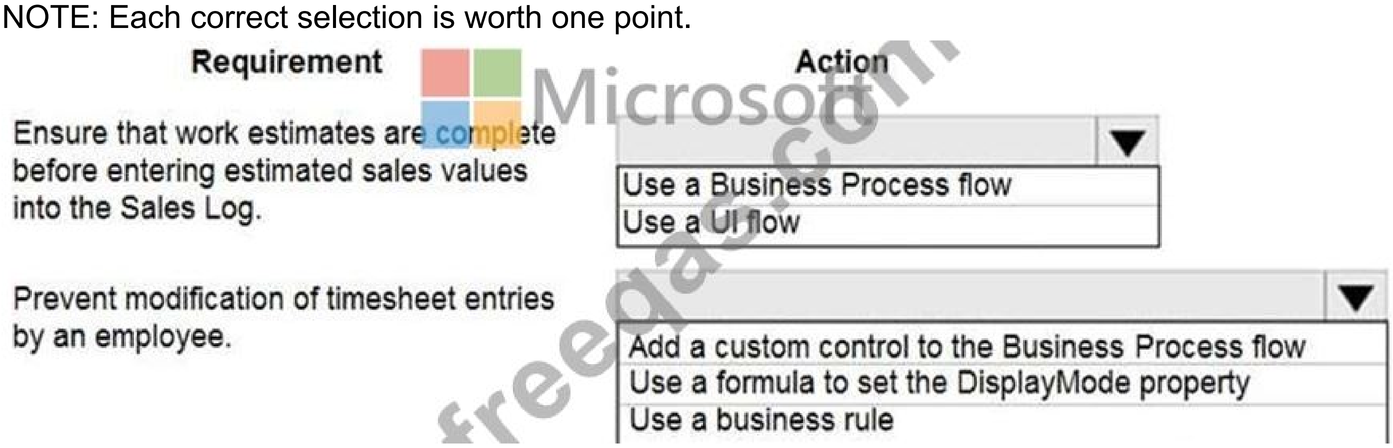
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-entity

NEW QUESTION: 31

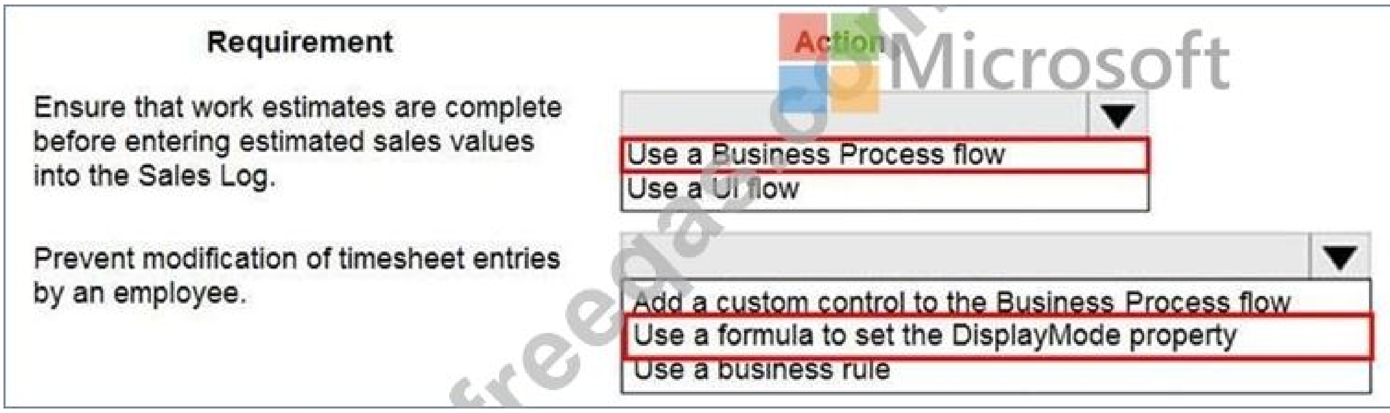
You need to configure the system to meet the sales requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail

NEW QUESTION: 32
A company is implementing the Microsoft Power Platform to assist with consolidation of onsite inspections and audits of retail stores. Currently, the data used by the retail store inspections is located across multiple systems.
The canvas app must use one database to view and record all data used in the inspection process.
You need to design the solution.
Which three capabilities should you implement? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Use an embedded access management framework for user security.
B. Execute real-time data operations against external data sources through virtual entities.
C. Use Azure Active Directory for access management.
D. Store data used by a Power Apps app on both iOS and Android mobile platforms.
E. Use Azure Data Lake storage to host the transactional data.
Answer: B,C,E (LEAVE A REPLY)
B: Virtual tables (also known as virtual entities) enable the integration of data residing in external systems by seamlessly representing that data as tables in Microsoft Dataverse, without replication of data and often without custom coding.
CE: Authenticating to a Gen 1 DataLakeStore Account
Gen 1 uses OAuth 2.0 in Azure AD for authentication.

Reference:
https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst

NEW QUESTION: 33
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.
Development and testing must be performed using production dat
a. Multiple testers must be used at each testing stage.
You need to provision and configure new environments for development and testing.
Solution:
Provision production environments named P1 and P2.
Copy the current production environment to P1 and P2.
Use P1 for development and P2 for testing.
Does the solution meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)
Production: This is intended to be used for permanent work in an organization.
Don't use production environment for development and testing.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

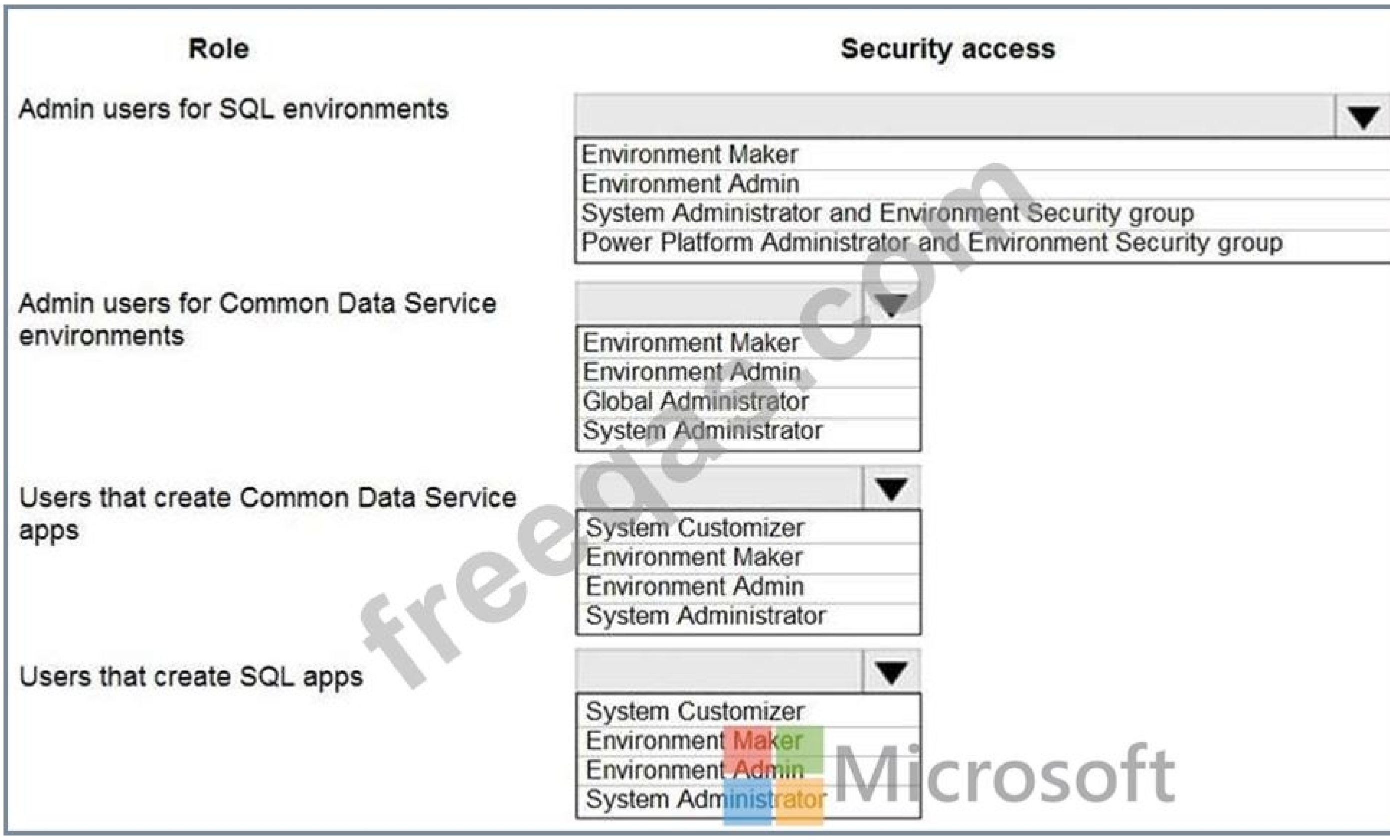
NEW QUESTION: 34
You use a Microsoft SharePoint list to record information about customers.
You must perform a series of actions only when a new item is added to a SharePoint list.
You need to configure a Power Automate flow.
Which trigger should you use?
A. When an item is created
B. When an item is created or modified
C. When a file is created (properties only)
D. For a selected item
Answer: A (LEAVE A REPLY)
Trigger - When an item is created
Triggers when an item is created.
MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

Incorrect Answers:
D: Trigger - For a selected item
This trigger allows you to start a flow for a selected item in a SharePoint list or library. You can use the columns of the list or library as output parameters. For a file, you can use the "identifier" column to get file content.
This is basically one which will trigger a flow when an item is selected and you want the user to trigger workflow manually.
Reference:
https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/

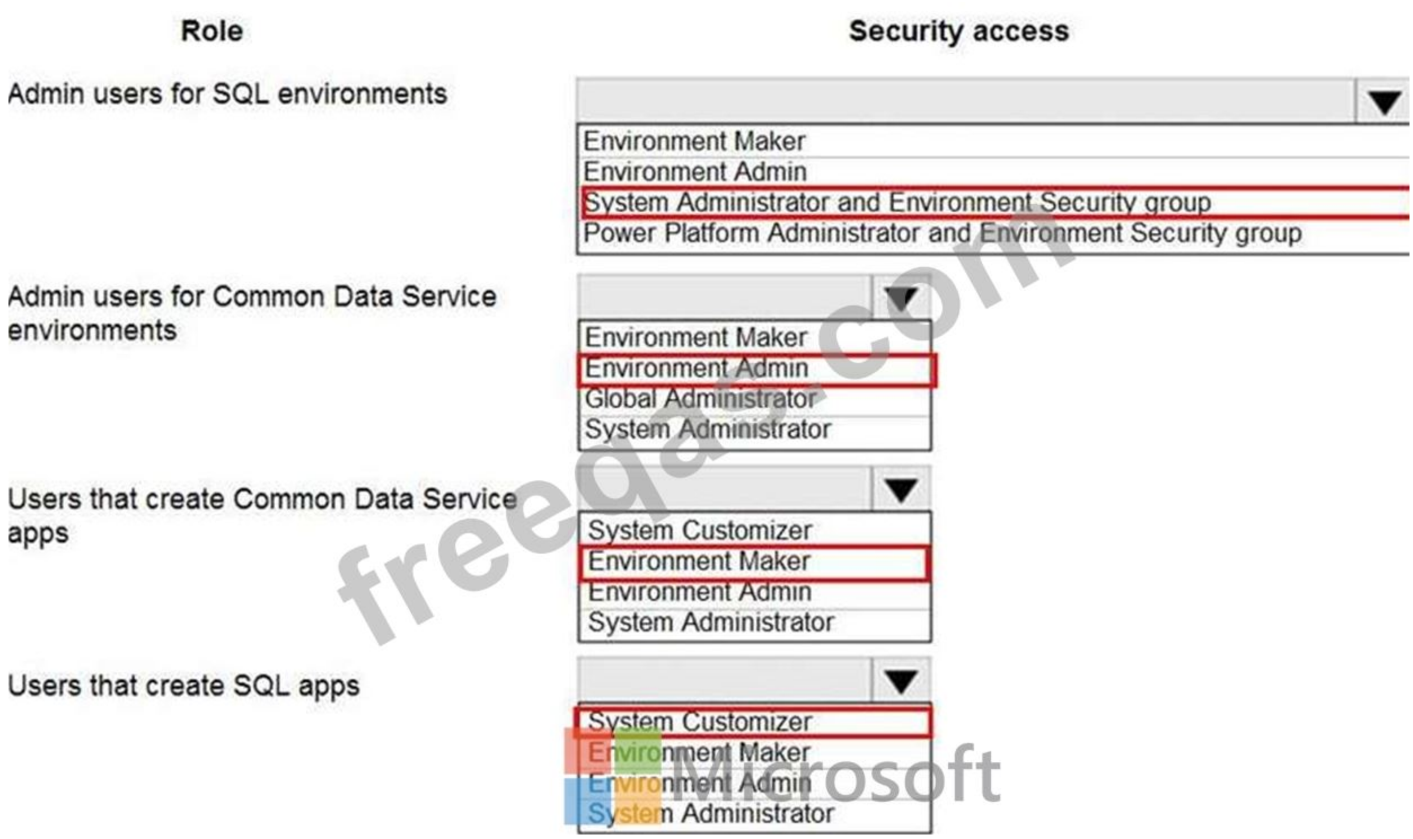
NEW QUESTION: 35
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company has locations in multiple countries and regions across four continents.
The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution:
Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.
Does the solution meet the goal?
A. Yes
B. No
Answer: B (LEAVE A REPLY)
Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes

NEW QUESTION: 36
A company uses two SQL Server environments and two Common Data Service environments.
The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct.
You need to assign security access.

What should you assign? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/power-platform/admin/database-security

NEW QUESTION: 37

You have a Power Platform solution that uses Common Data Service.

You need to secure all fields that support field-level security.

Which field can you secure?

A. createdon

B. accountid

C. owninguser

D. cr7b_accountid

Answer: D (LEAVE A REPLY)

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid

createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode Reference:

https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION: 38

You are creating entities in a Common Data Service database to capture sales data.

You create an entity named Sales that includes the following fields:

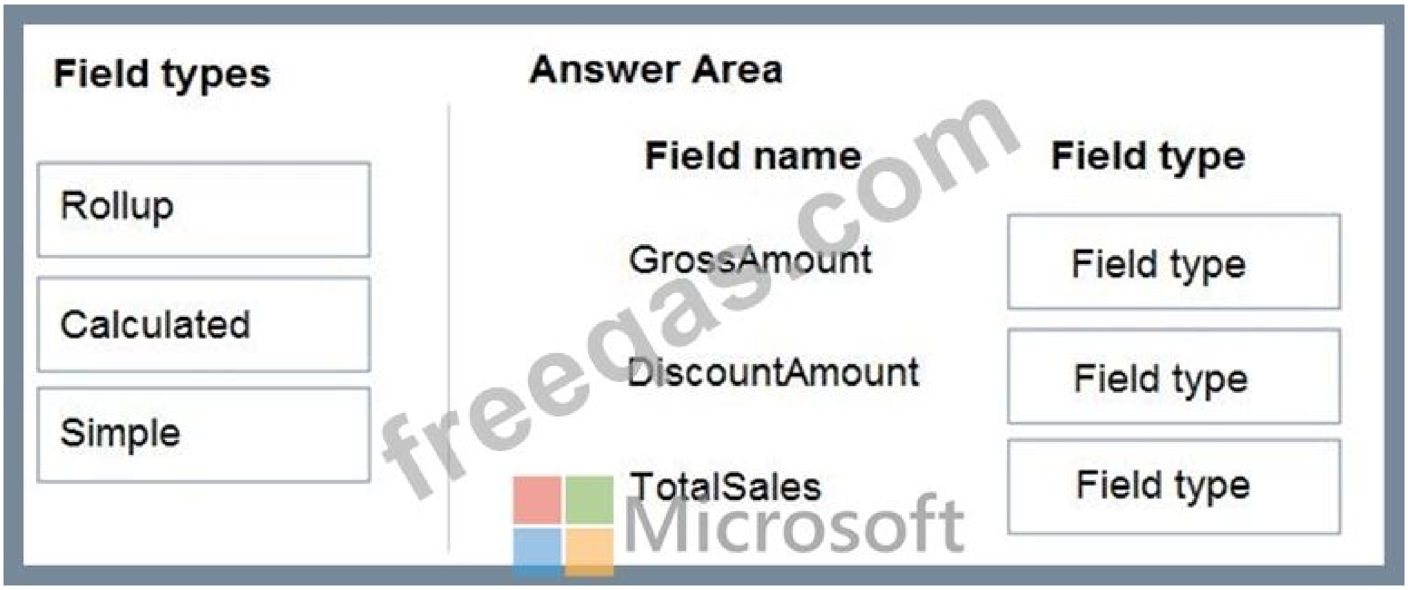
Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplaying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.

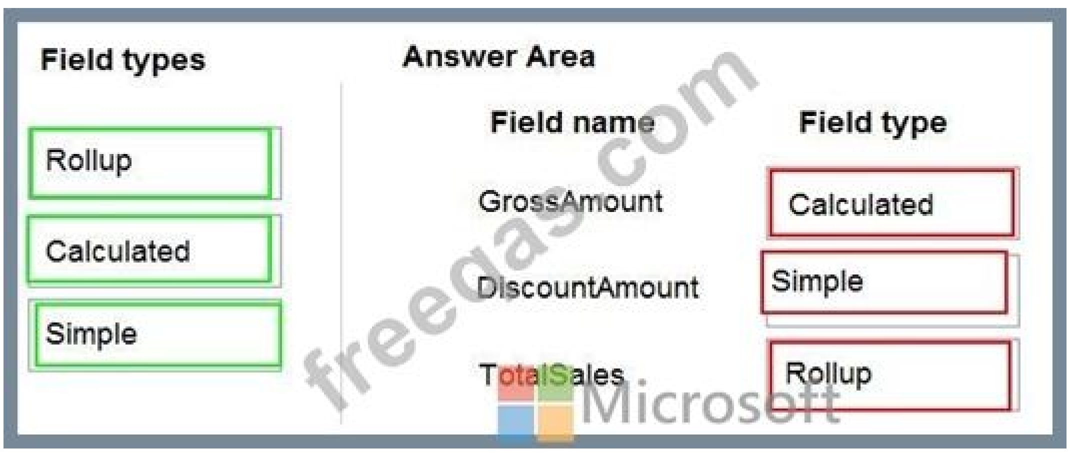
You need to configure the fields for the entities.

Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes

NEW QUESTION: 39

A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	○
When using the canvas app, a member of the Power Users group can see version 4.	○	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	○
If Jim Smith edits the canvas app he will be editing version 4.	○	○

Answer:

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	$\boxed{○}$
When using the canvas app, a member of the Power Users group can see version 4.	$\boxed{○}$	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	$\boxed{○}$
If Jim Smith edits the canvas app he will be editing version 4.	$\boxed{○}$	○

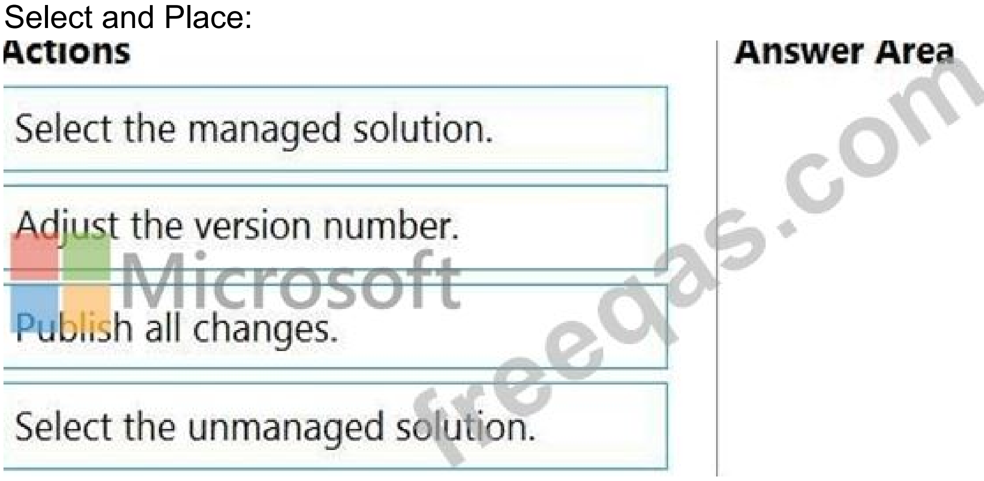
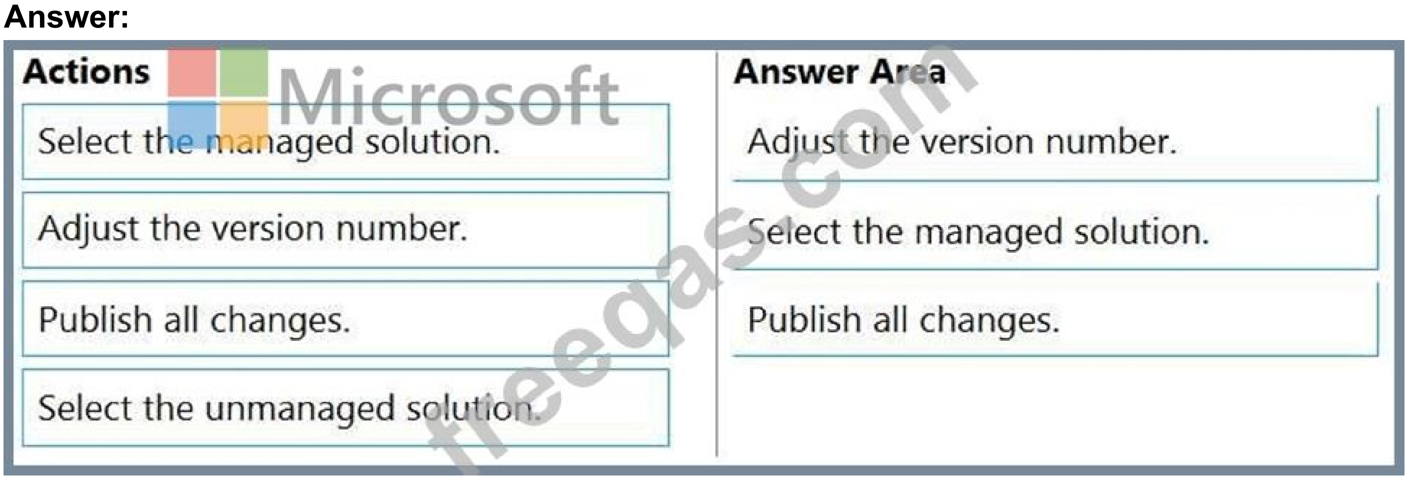
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/save-publish-app

NEW QUESTION: 40
DRAG DROP
You have a solution that contains a Power Automate flow, an environment variable, and a model-driven app.
Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
Select and Place:



Answer:



Explanation:
Step 1: Adjust the version number.
Step 2: Select the managed solution.
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations.
The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.
Step 3: Publish all changes.

Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

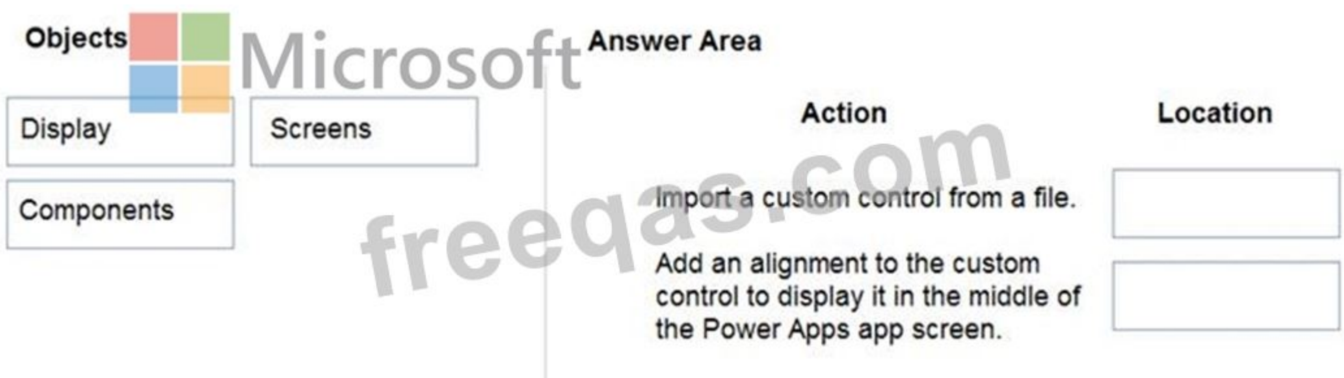
NEW QUESTION: 41

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

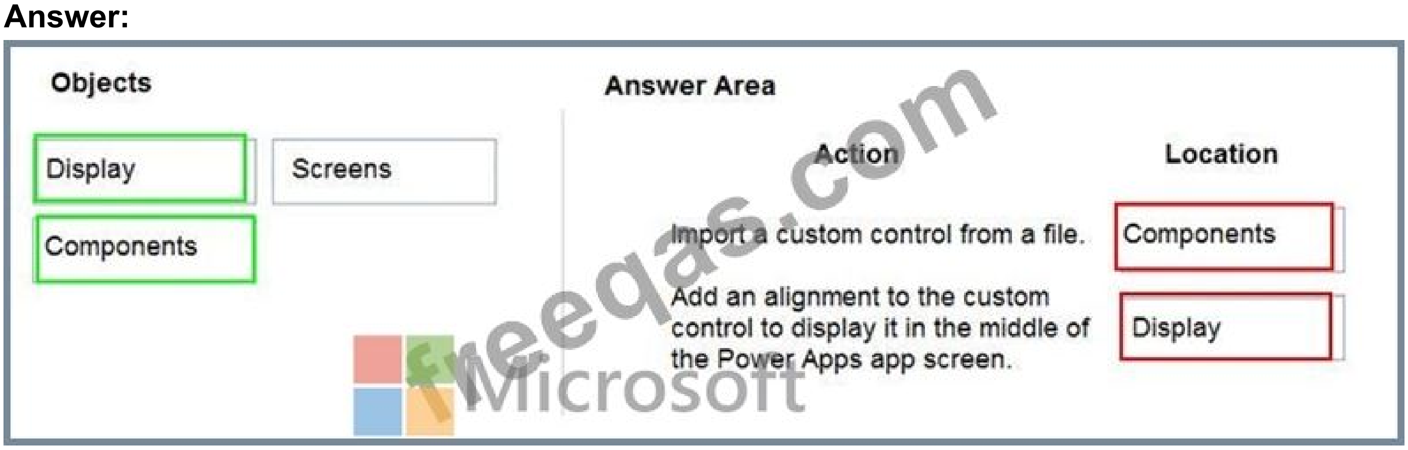
You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/developer/component-framework/component-framework-for-canvas-apps

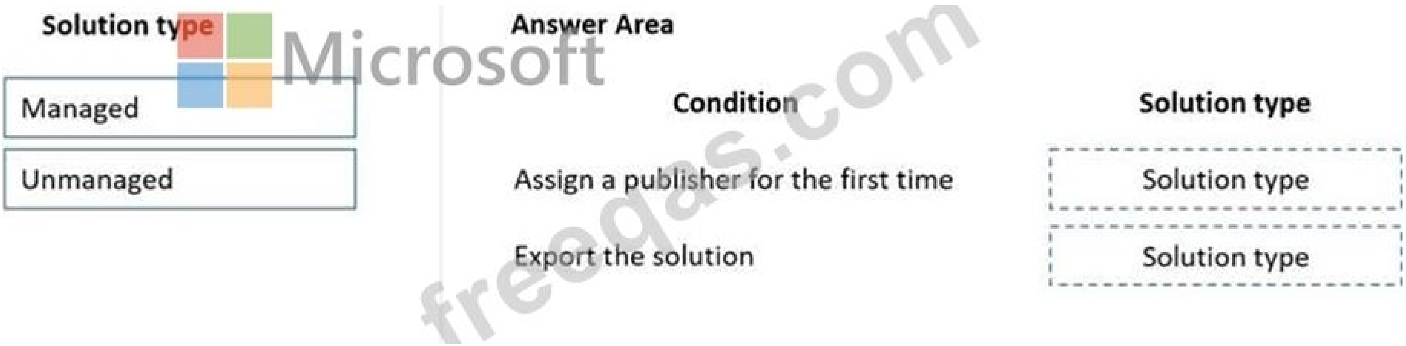
NEW QUESTION: 42

A company is creating Power Apps apps for their customer service team.

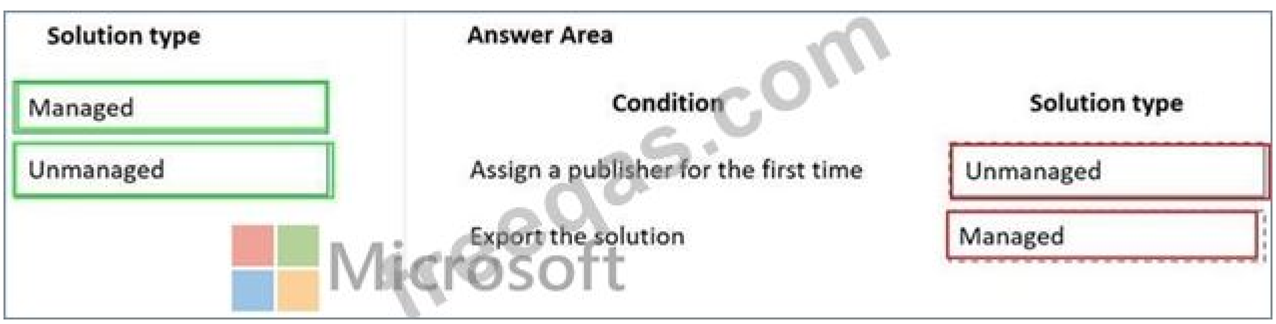
You must create a final released solution to export to their test environment that cannot be changed in the new environment.

You need to determine the types of solutions to use.

Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

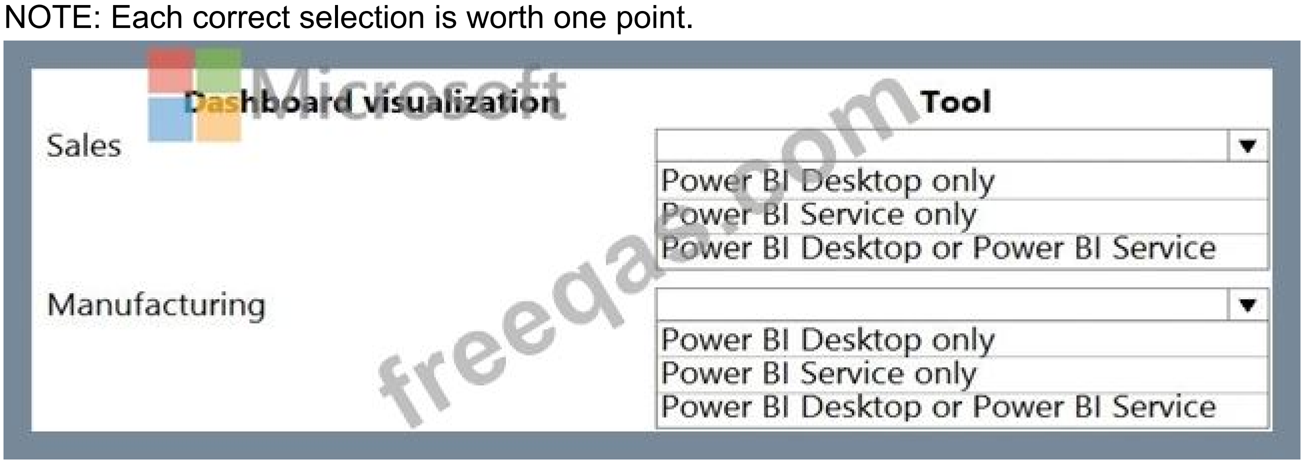


Answer:



Reference:
https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm

NEW QUESTION: 43
You need to create the solution assets.
What should you use to create the visualizations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:

Dashboard visualization	Tool
Sales	Power BI Desktop only Power BI Service only Power BI Desktop or Power BI Service
Manufacturing	Power BI Desktop only Power BI Service only Power BI Desktop or Power BI Service

Reference:
https://docs.microsoft.com/en-us/power-bi/fundamentals/service-service-vs-desktop

NEW QUESTION: 44

You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create an entity in the new solution.	
Enter the entity Display Name and use the existing prefix.	
Add a new solution.	
Enter the entity Display Name and modify the prefix to **xyz**.	
Add a new publisher with the prefix **xyz**.	

Answer:

Actions	Answer Area
Create an entity in the new solution.	Add a new publisher with the prefix **xyz**.
Enter the entity Display Name and use the existing prefix.	Add a new solution.
Add a new solution.	Create an entity in the new solution.
Enter the entity Display Name and modify the prefix to xyz.	Enter the entity Display Name and modify the prefix to **xyz**.
Add a new publisher with the prefix **xyz**.	

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-entity

NEW QUESTION: 45

You need to implement logic in the app for lost sales.

What should you do?

A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.
Answer: B (LEAVE A REPLY)
Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION: 46
You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.
Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types

- One-to-one
- One-to-many
- Many-to-one
- Many-to-many

Answer Area

Relationship

Source entity	Target entity	Relationship type
Clients	Bank accounts	Relationship type
Clients	Branch offices	Relationship type
Branch offices	Employees	Relationship type

NEW QUESTION: 47

HOTSPOT

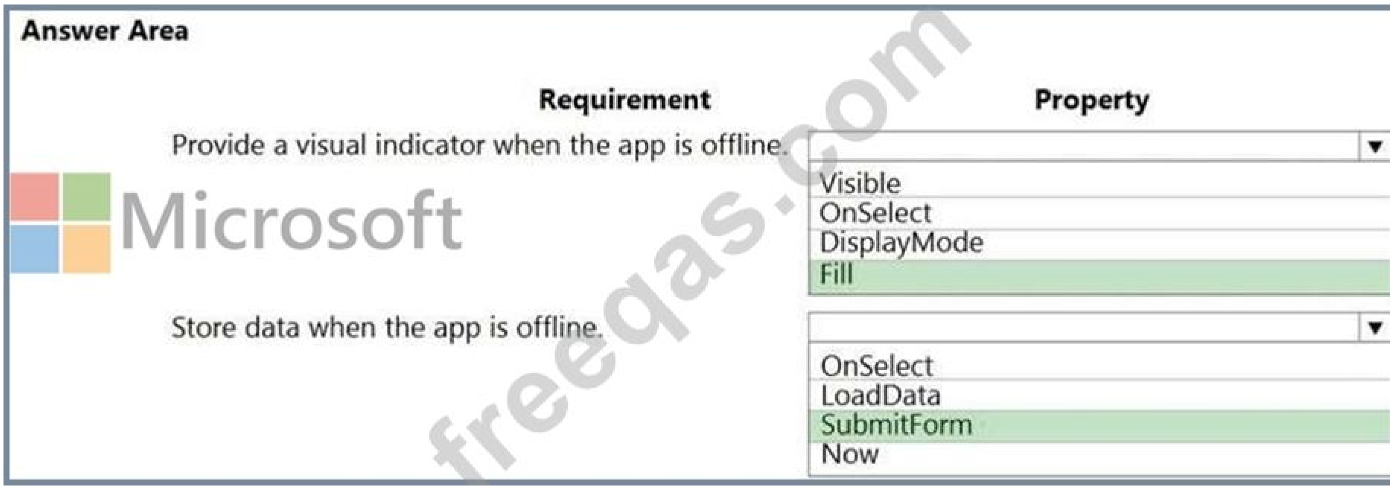
You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer:



Explanation:
Box 1: Fill
Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.
Fill - The background color of a control.
Incorrect Answers:
DisplayMode - The mode to use for data cards and controls within the form control.
Box 2: SubmitForm
Scenario: When data is submitted offline, the data must be stored in the app until the app is back online.
Use the SubmitForm function in the OnSelect property of a Button control to save any changes in a Form control to the data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen

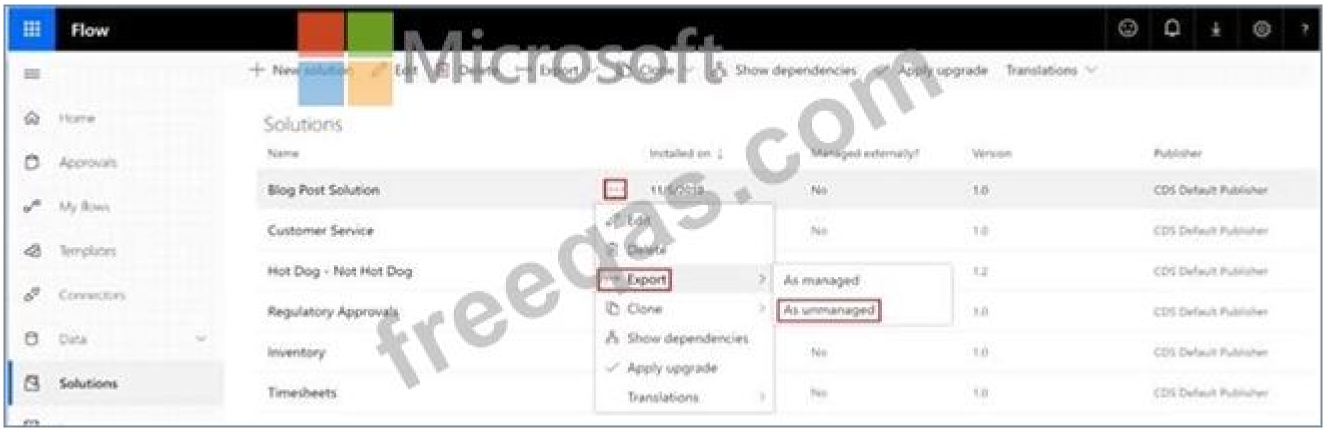
Implement and manage solutions Question Set 1

NEW QUESTION: 48
You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.
You need to ensure that you can transfer the flow to another environment.
What should you do?
A. Add the flow to the default solution of the development environment and export as a managed solution.
B. Change the environment for the flow.
C. Add the flow to the existing solution.
D. Add the flow to the default solution of the production environment.
Answer: A (LEAVE A REPLY)
It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.

Exporting our Solution

After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the ..., selecting Export.



Reference:

https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/

NEW QUESTION: 49

You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.

Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

You need to incorporate the flows that can be added to the solution.

Which two flows can you include? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

A. FlowA

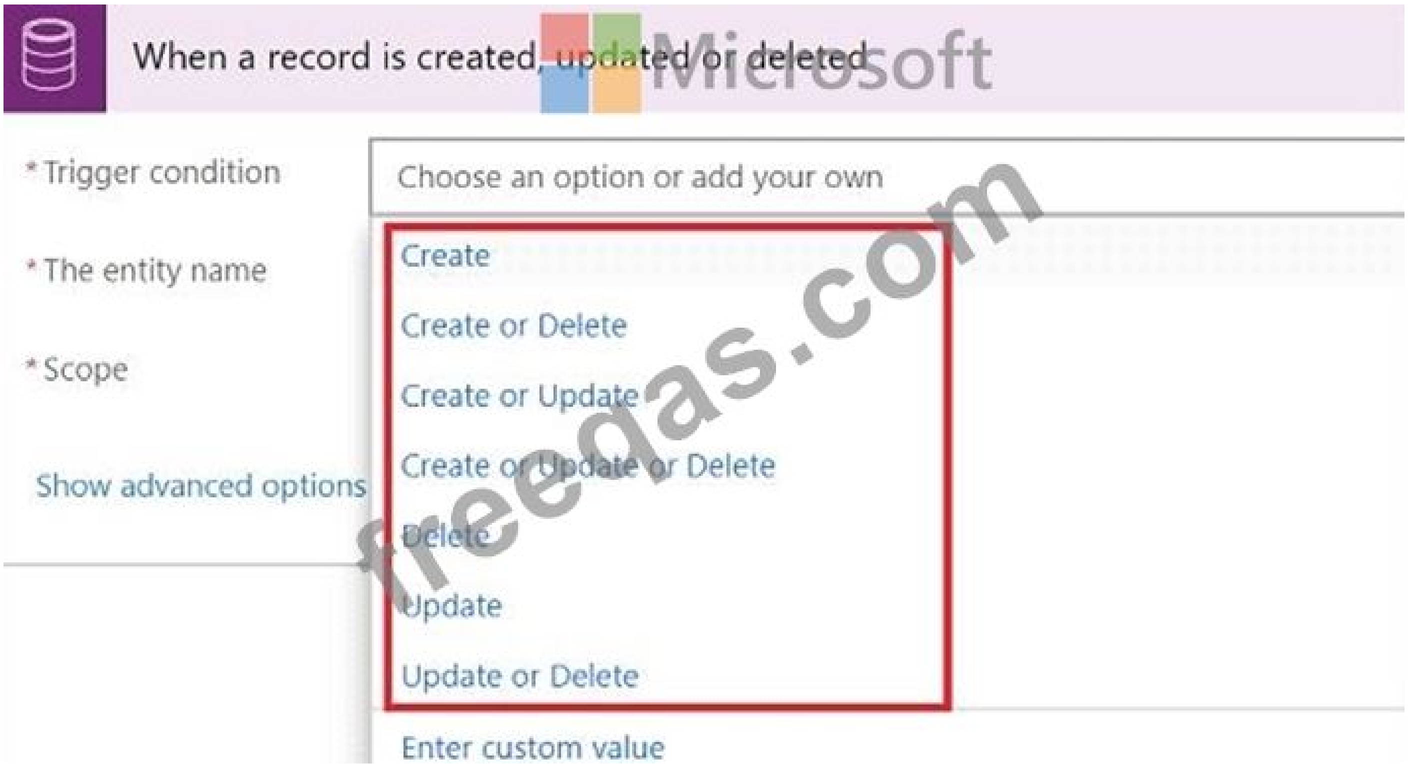
B. FlowB

C. FlowC

D. FlowD

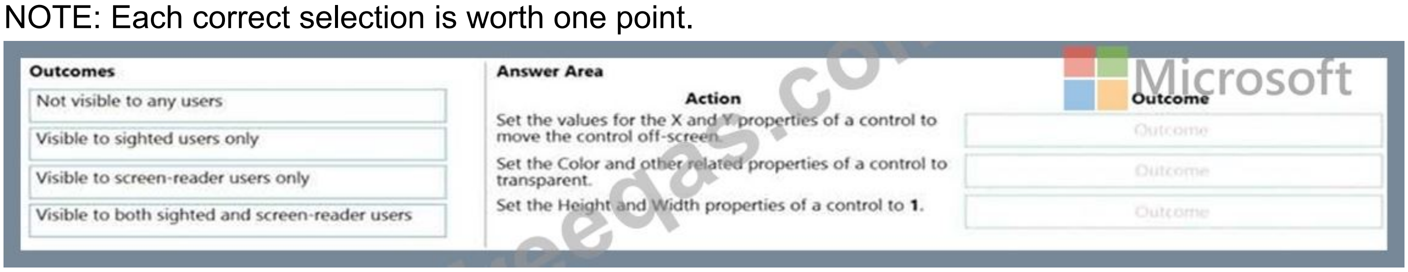
Answer: (SHOW ANSWER)

You can add any of these conditions to determine precisely when your flow is triggered.

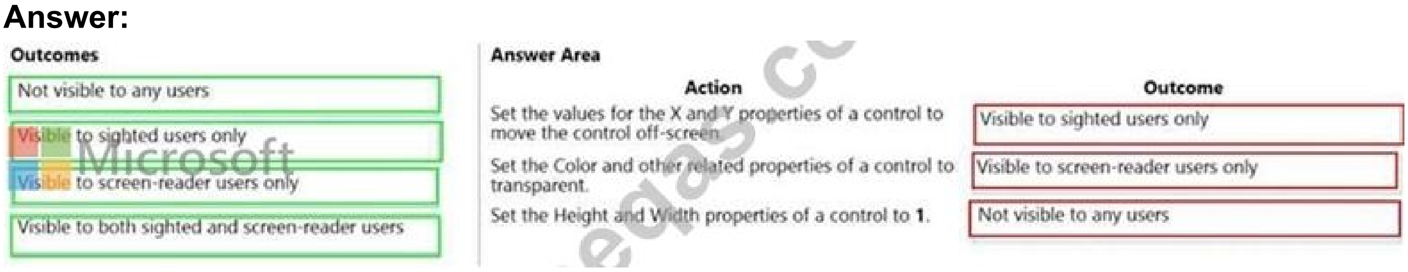


Reference:
https://docs.microsoft.com/en-us/power-automate/connection-cds-native

NEW QUESTION: 50
You are designing a canvas app that will be used by all users including users who have vision impairments.
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:

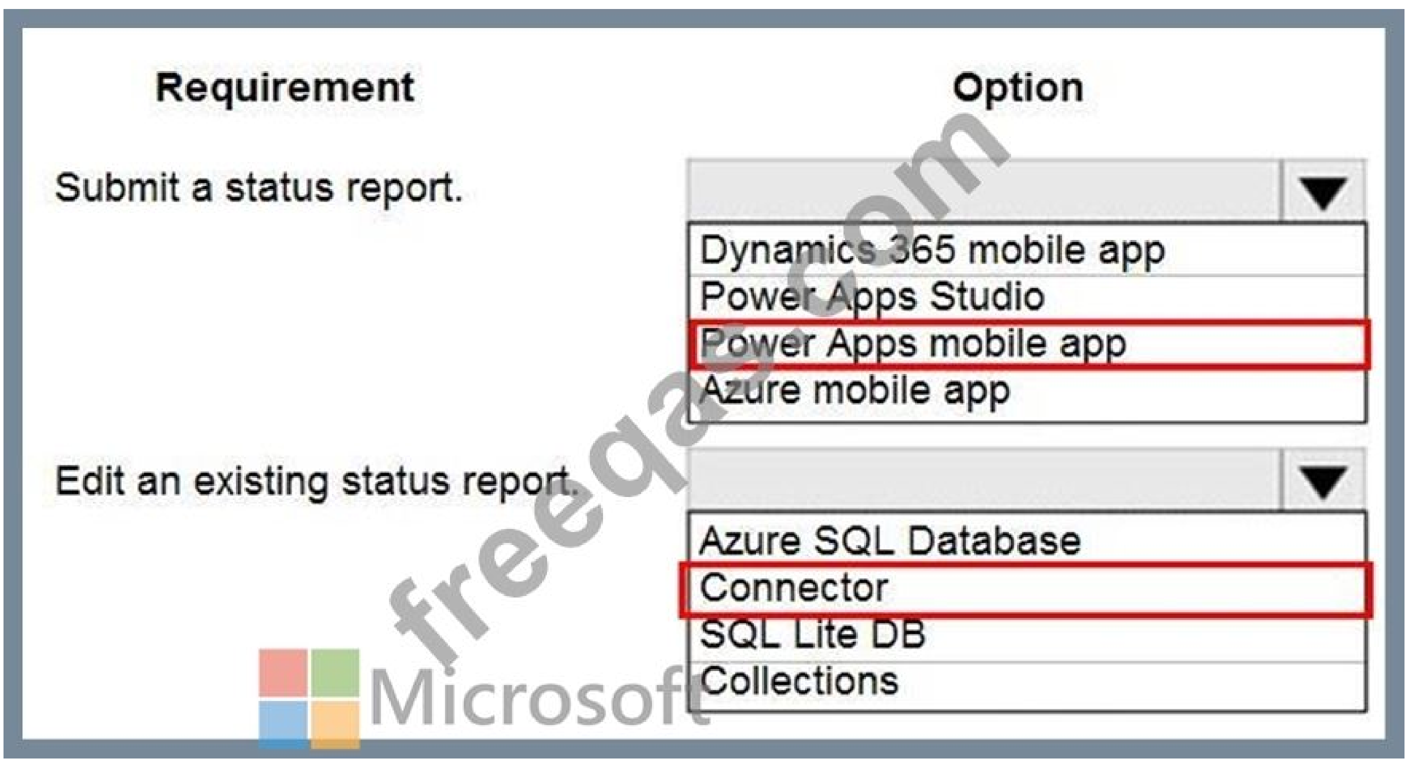


Reference:
https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION: 51

You need to resolve the issue for User1.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:



Reference:
https://powerapps.microsoft.com/en-us/blog/implementing-offline-capability-in-your-app/

NEW QUESTION: 52

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company has locations in multiple countries and regions across four continents.

The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution:
Create a custom calculated field of type currency on the order table that converts the order total to USD and displays the total amounts by region in a Power BI chart.
Does the solution meet the goal?
A. Yes
B. No
Answer: A ([LEAVE A REPLY]())
Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes

NEW QUESTION: 53
You need to meet the requirement for the time tracking app.
Which controls should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	Card Rating Slider Timer
Read the employee's number into the app.	Barcode-scanner Card Image Shape
Display a photo of an employee when the employee badge is read.	Camera Card Icon Image

freeqas.com Microsoft

Answer:

Explanation:
Box 1: Timer
A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.
Box 2: Barcode scanner
The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.
Box 3: Image
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.
If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

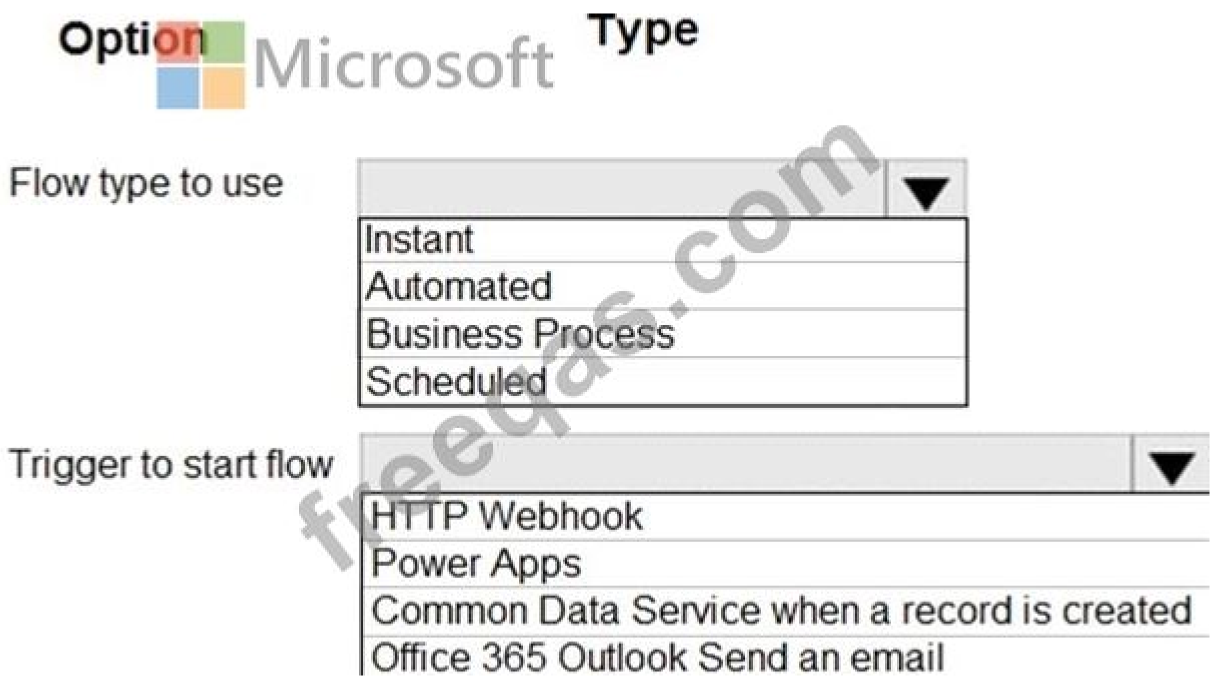
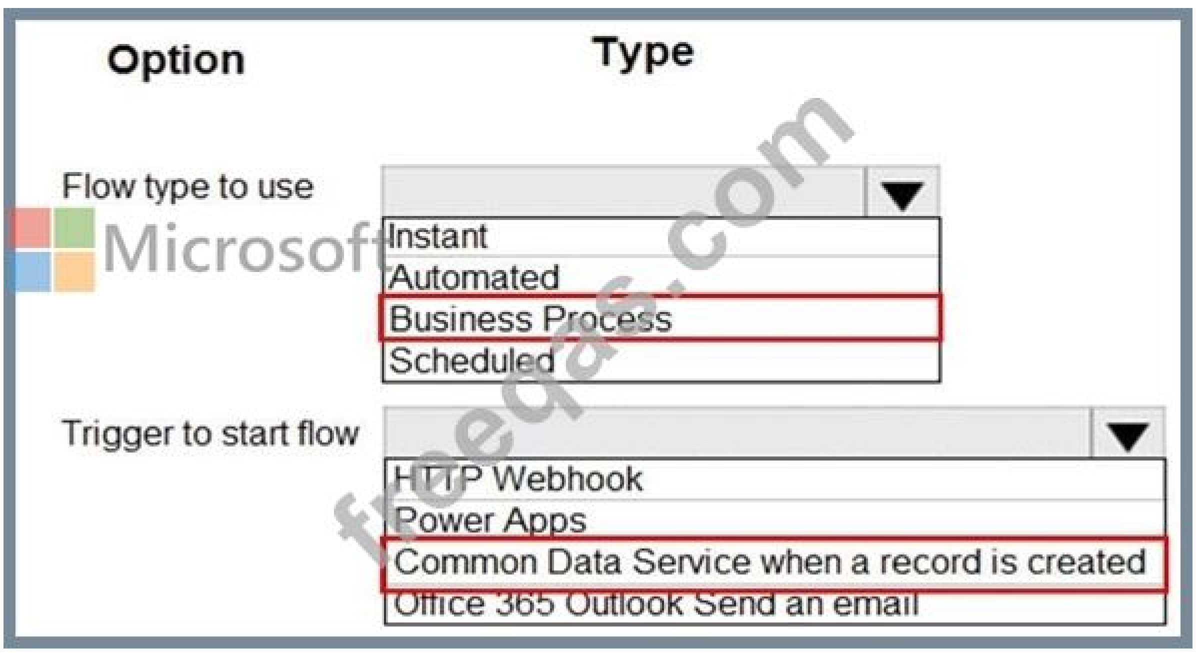
NEW QUESTION: 54
You need to create a flow for sending required emails to the regional manager.
How should you create the flow? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



Reference:

https://docs.microsoft.com/en-us/power-automate/flow-types

https://docs.microsoft.com/en-us/power-automate/dataverse/overview

NEW QUESTION: 55

You need to meet the requirements for sales representative that submit status reports.

How should you configure the flow?

A. Add a parallel branch that uses the value of a dynamic content variable

B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required

C. Add a condition that evaluates the risk value by using a dynamic content variable

D. Add a data operation action that evaluates a dynamic content variable

Answer: C (LEAVE A REPLY)

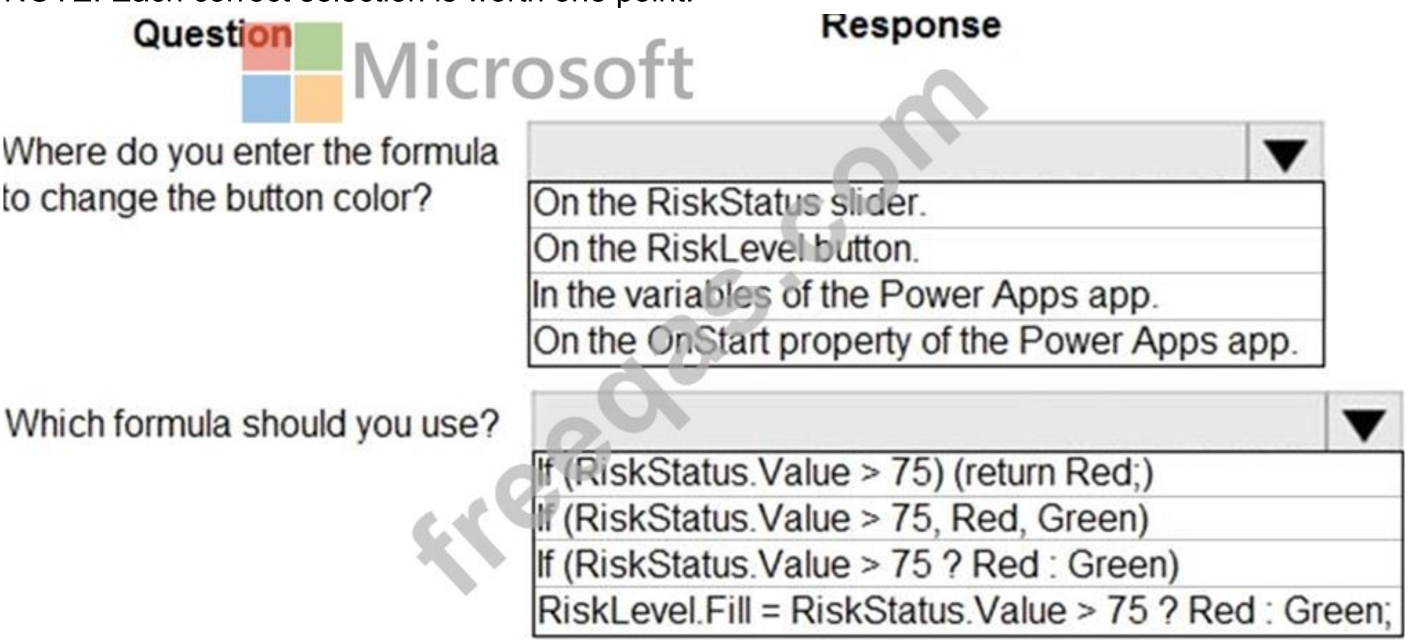
Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.
Background
Current environment
Overview
Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes.

NEW QUESTION: 56
A company is building a Power Apps app to track key project tasks.
Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.
For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

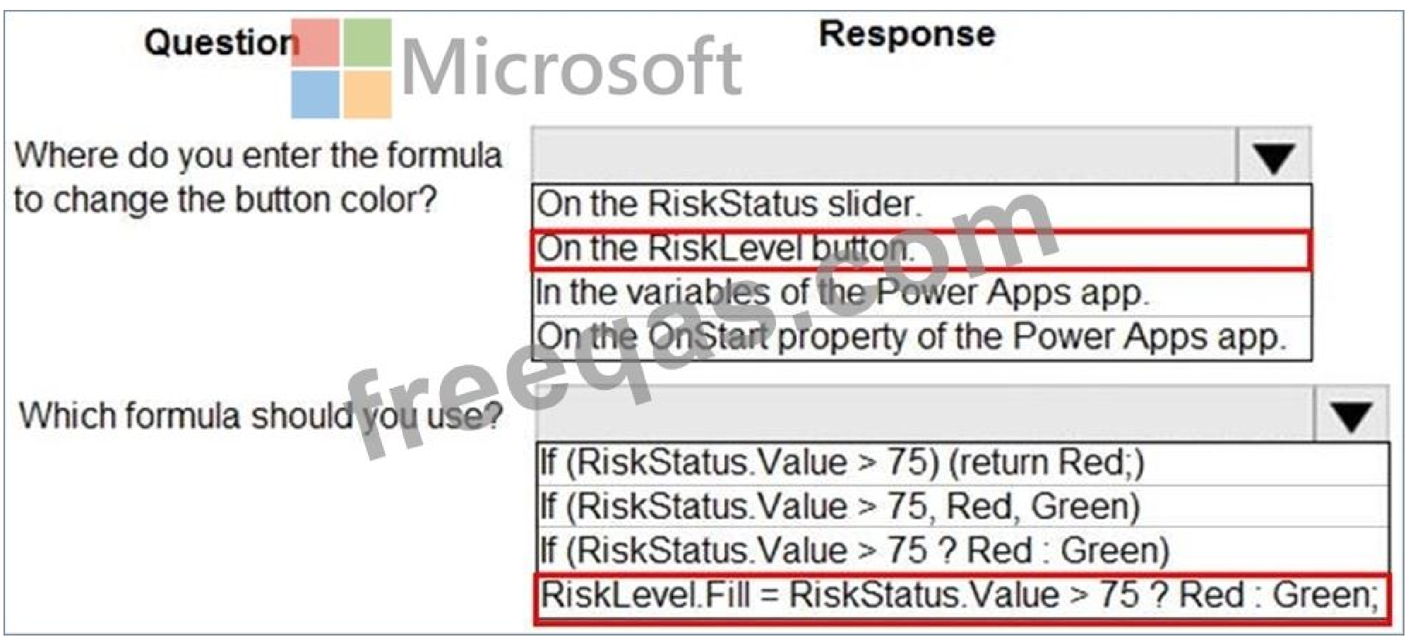
RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.

How should you configure the app? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://wonderlaura.com/2020/07/23/power-apps-gallery-conditional-formatting/

NEW QUESTION: 57
You create an app with multiple screens.
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.
You need to create a reusable gallery that displays information based on the current record.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Step 1: Add a gallery control

Add a gallery to a blank screen

1. On the Insert tab, select Gallery, and then select Vertical.

2. On the Properties tab of the right-hand pane, open the Items list, and then select your Gallery

Step 2: Add a screen Add a gallery in a screen

1. On the Home tab, select New screen > List screen.

A screen that contains a Gallery control and other controls, such as a search bar, appears.

Step 3: Add an input property

Input property is how a component receives data to be used in the component.

Incorrect Answers:

Output property is used to emit data or component state. For example, the Selected property on a Gallery control is an output property.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component

NEW QUESTION: 58

You need to connect to the data source for the Job Setup app.

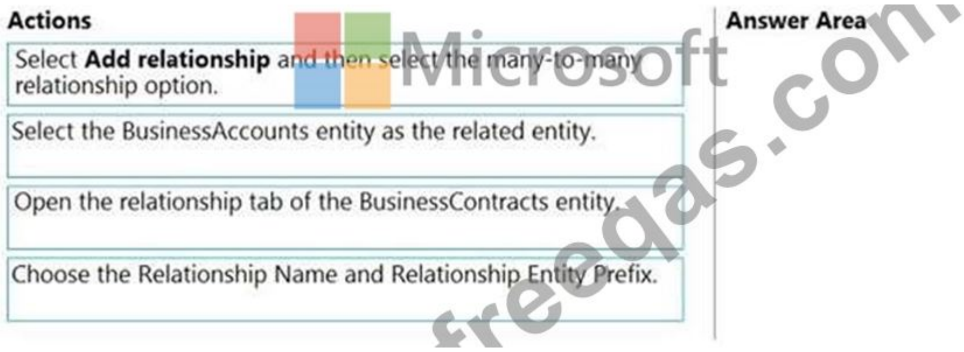
What should you do?

A. Configure a scheduled synchronization with the Common Data Service database
B. Configure SQL Server database permissions
C. Create a stored procedure that retrieves time records for a specific employee
D. Configure an on-premises data gateway
Answer: D (LEAVE A REPLY)
Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.
The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference

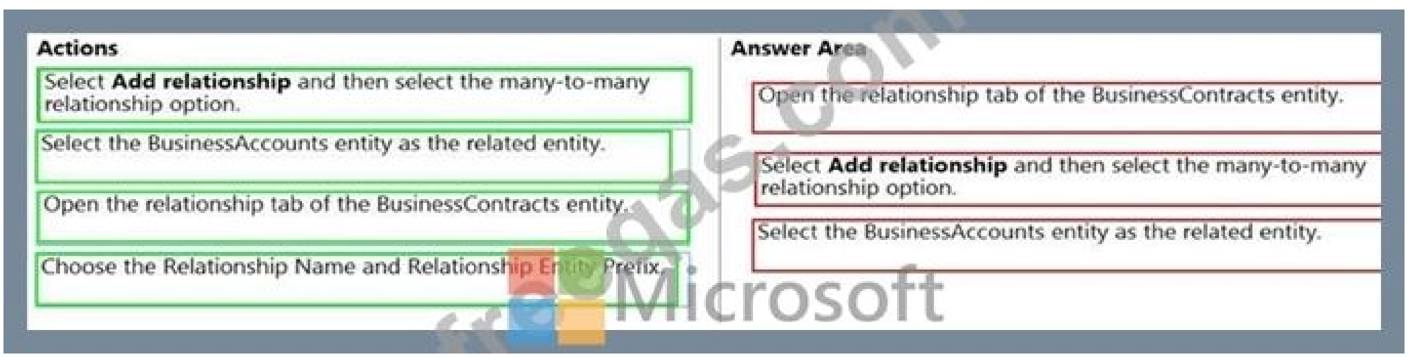
NEW QUESTION: 59
You have a Power Automate flow that processes files in a Microsoft SharePoint document library. The flow only needs to be run as required. You add steps to the flow to process the files.
Before leaving the office for the day, the manager must initiate the flow. The flow must not start processing files before 11:00 PM.
You need to configure the flow.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Add a recurrence trigger and configure to run daily at 11 00 PM.
B. Add a Condition action. If the time greater than 11:00 PM use a Terminate action prevent further processing.
C. Manually trigger the flow.
D. Add a Delay Until action and enter the timestamp for 11 00 PM.
Answer: C,D (LEAVE A REPLY)
Delay an action until a specific timestamp.
Note: The Microsoft Dataverse connector provides four ways to add wait conditions. Use these wait conditions when you need to delay processing in your flows until a particular condition is met.
Postpone triggering the flow and the first action until a specific time: Wait condition using Postpone Until.
Add a fixed delay before the next step.
Delay an action until a specific timestamp.
Delay an action until a specific event occurs.
Reference:
https://docs.microsoft.com/en-us/power-automate/dataverse/wait-conditions

NEW QUESTION: 60

You have the following Common Data Service entities: BusinessContracts and BusinessAccounts.
You need to configure an N:N relationship between the two entities.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-nn-relationships-portal

NEW QUESTION: 61
You need to create the mobile app.
Which type of app should you create?
A. model-driven app
B. portal app
C. Microsoft 365 web app
D. canvas app
Answer: D ([LEAVE A REPLY])
An accessible canvas app will allow users with vision, hearing, and other impairments to successfully use the app. In addition to being a requirement for many governments and organizations, following the below guidelines increases usability for all users, regardless of their abilities.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION: 62

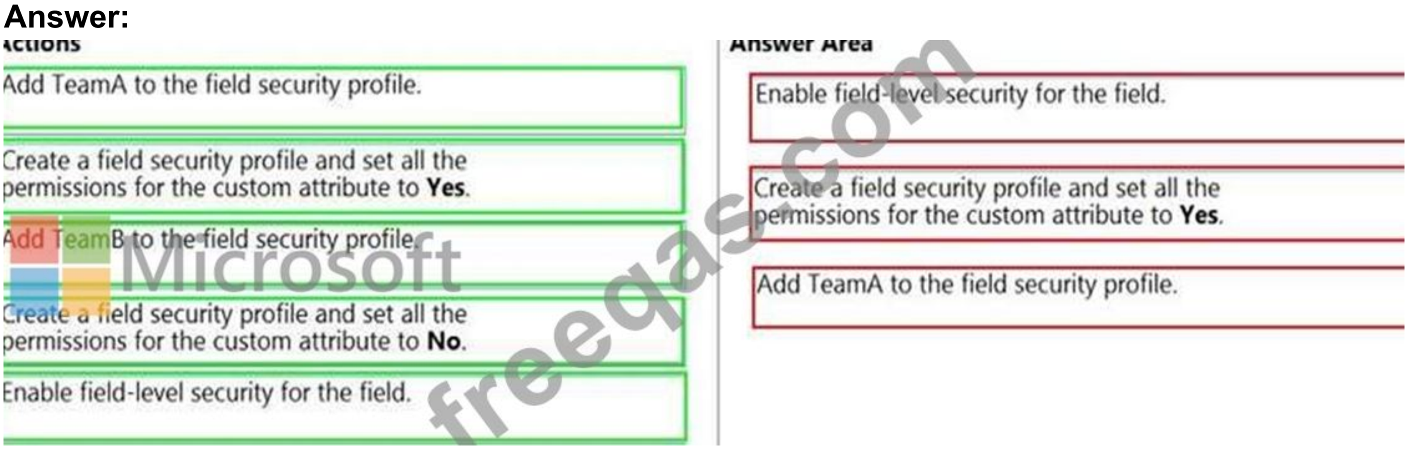
You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field.

You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:



NEW QUESTION: 63

A company uses Power Automate and Power Apps to streamline business processes.

You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action	Answer Area
Publish the model.	
Connect data to the model.	
Train the model.	
Use the model in a Power Automate flow.	

Answer:

Action	Answer Area
Publish the model.	Connect data to the model.
Connect data to the model.	Train the model.
Train the model.	Publish the model.
Use the model in a Power Automate flow.	Use the model in a Power Automate flow.

https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/

NEW QUESTION: 64

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area.

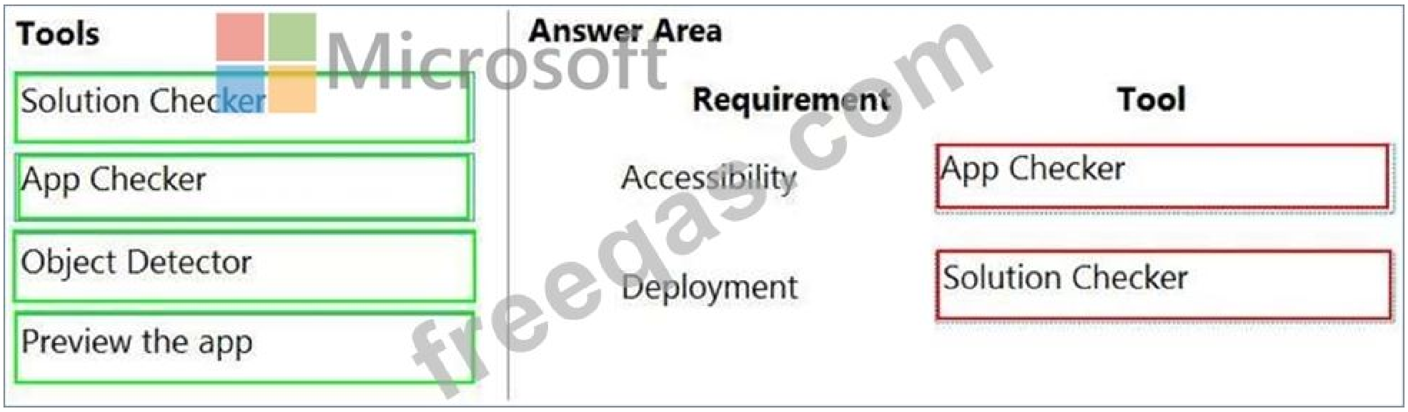
NOTE: Each correct selection is worth one point.

Tools
Solution Checker
App Checker
Object Detector
Preview the app

Answer Area

Requirement	Tool
Accessibility	Tool
Deployment	Tool

Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker

NEW QUESTION: 65
A company delivers products to multiple communities. The company creates a canvas app connected to a Common Data Service database. The app tracks communities to see where the delivery volume is the highest.
Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms.
You need to create the community field.
Which type of field should you create?
A. local option set
B. text
C. global option set
D. text area
Answer: C (LEAVE A REPLY)
Can use a global option set, no need to use localized option sets.
Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage - once you define its text values you can centrally managed it.
Reference:
https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/

NEW QUESTION: 66
You create a model-driven app for a company. The app will be used to manage events that the company organizes.
The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.

All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.
You need to configure the MarketingTeam and OtherEmployees security roles.
Which three actions should you perform? Each correct selection presents a part of the solution.
NOTE: Each correct selection is worth one point.

A. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.

B. Set the access level for the OtherEmployees security role to None Selected for the Read permission.

C. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

D. Set the access level for the MarketingTeam security role to Organization for the Read permission.

E. Set the access level for the OtherEmployees security role to Organization for the Read permission.

F. Set the access level for the MarketingTeam security role to None Selected for the Read permission.

Answer: A,D,E (LEAVE A REPLY)

NEW QUESTION: 67

You publish the first version of the app and solution on November 1, 2020.
You need to create the version numbers for the app and the solution.
Which version numbers should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/update-solutions

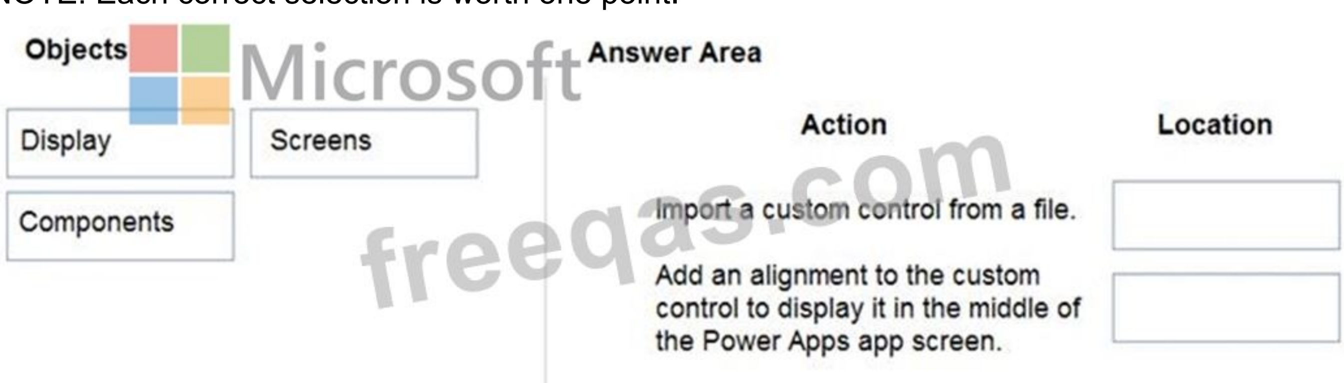
NEW QUESTION: 68

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/developer/component-framework/component-framework-for-canvas-apps

NEW QUESTION: 69
A company is building a Power Apps app to track key project tasks.
Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

Task name	Slider input control name
Task1	RiskStatus1 [0–100]
Task2	RiskStatus2 [0–100]
Task3	RiskStatus3 [0–100]

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.
You need to configure a solution to change the text on the header bar.
How should you configure the app? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	On the header control. On each RiskStatus slider input. In the global variables of the Power Apps app. On the OnStart property of the Power Apps app.
Which formula should you use?	SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)>=150? "HIGH RISK" : " " IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)<150, " ", HIGH RISK") Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)>=150, "HIGH RISK") UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value>=150), "HIGH RISK")

Answer:

NEW QUESTION: 70

You are creating a canvas app.

You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Add a drop-down field in the app
B. Create a Global Option Set
C. Add a new business rule
D. Add a component to the component library

Answer: (SHOW ANSWER)

A global Option Set can be shared across entities.

Reference:

https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/

NEW QUESTION: 71

Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol.

The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.

You need to design the app.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Enter notes related to wildlife records.	Enable the Wildlife entity and annotation entity for mobile offline. Enable the attachments entity and the annotation entity for mobile offline. Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity. Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.
Enter wildlife details as related records.	Allow feedback on the Wildlife Details entity. Enable the Wildlife Details entity for mobile offline. Enable change tracking on the Wildlife Details entity. Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.
Indicate that an animal requires medical attention.	Create a business rule. Create a business process. Create a Power Automate flow.

Answer:

Requirement	Action
Enter notes related to wildlife records.	Enable the Wildlife entity and annotation entity for mobile offline. Enable the attachments entity and the annotation entity for mobile offline. **Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity.** Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.
Enter wildlife details as related records.	Allow feedback on the Wildlife Details entity. Enable the Wildlife Details entity for mobile offline. Enable change tracking on the Wildlife Details entity. **Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.**
Indicate that an animal requires medical attention.	Create a business rule. **Create a business process.** Create a Power Automate flow.

Reference:
https://powerapps.microsoft.com/en-us/blog/mobile-offline-for-power-apps/
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-processes

NEW QUESTION: 72

You are developing a canvas app to monitor time. The app includes a Text Input control named TIC1 and a Timer control named TIM1.

You need to set TIM1 to a default value.

What should you do?

A. In the OnChange property of TIC1, set the value of the Text property for TIC1 to a context variable that stores the duration value. Assign the value of the variable to the OnTimerStart property for TIM1.

B. Assign the Text property of TIC1 to the Duration property of TIM1.

C. Assign the Text property of TIC1 to the OnSelect property of a TIM1.

D. Write code in the OnChange property of TIC1 that assigns the value of the Duration property of the Timer

Answer: ([SHOW ANSWER]())

control to Text property of the TIC1. In the OnChange property of TIC1, assign the value to the Duration property for TIM1.

Explanation:

The OnTimerStart, OnTimerEnd and OnSelect are the configurations where you can add your code.

NEW QUESTION: 75

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.
How should you configure the app? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Question	Response
Where do you enter the formula to change the button color?	On the RiskStatus slider. On the RiskLevel button. In the variables of the Power Apps app. On the OnStart property of the Power Apps app.

Which formula should you use?	If (RiskStatus.Value > 75) (return Red;)
	If (RiskStatus.Value > 75, Red, Green)
	If (RiskStatus.Value > 75 ? Red : Green)
	RiskLevel.Fill = RiskStatus.Value > 75 ? Red : Green;

Answer:

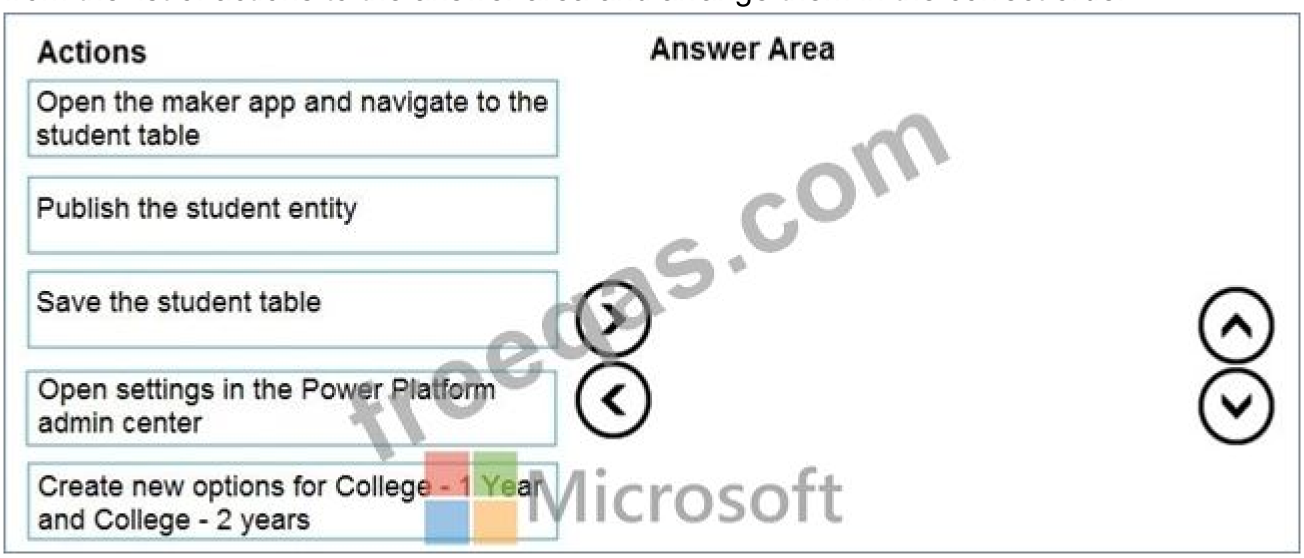
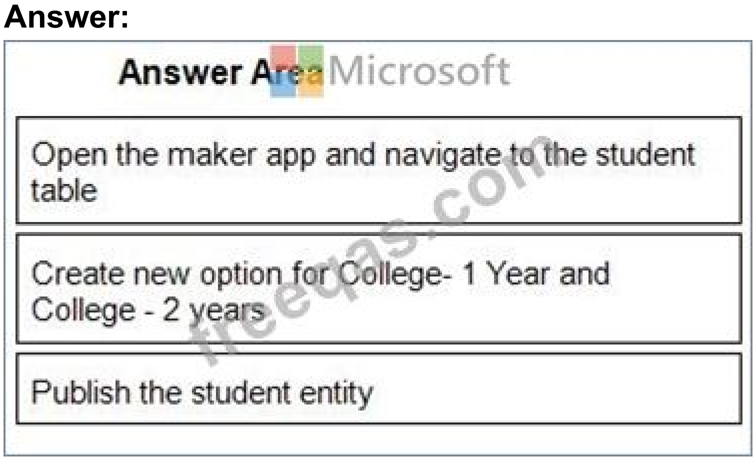
NEW QUESTION: 76

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants.
The education level at the time of enrollment is an option set is in the student entity. The entity includes three levels:
High school
College
Bachelor
You must split the College option into two option sets:
College - 1 Year
College - 2 years
The split must not impact existing data.
You need to create the two option sets.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:



1 - Open the maker app and navigate to the student table
2 - Create new option for College- 1 Year and College - 2 years
3 - Publish the student entity

NEW QUESTION: 77
You need to implement logic in the app for lost sales.
What should you do?
A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.
Answer: B (LEAVE A REPLY)
Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
* Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule Create solutions Testlet 3 This is a case study. Case studies are not timed separately. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these

buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.
Background
Current environment
Sales representatives submit weekly status reports to regional managers. There is no standardized format for these status reports. The process for managing status reports is challenging.
Wide World Importers has decided to use Microsoft 365, Microsoft Azure, and Power Platform for future app development. Both Wide World Importers and Tailwind Traders have identical Microsoft SharePoint and Azure configurations. Both companies use separate tenants.
Requirements
Application
You must create a mobile app to streamline the creation of status reports by sales representatives. You must make the same app available to Tailwind Traders. The mobile app must meet the following requirements:
* Minimize the use of code.
* Use formulas and expressions when necessary.
* Support a variety of visual layouts.
* Use a SharePoint list to store information about regional managers and sales representatives.
* Use Azure SQL Database to store other data.
Status reports
* Sales representatives must provide a weekly status report for all work processes each Monday.
* Representatives must enter the following information for each process:

Information type	Values
Category	Pipelines, Work/life balance, Coaching/Mentoring, or Communications
Status	At Risk, Acceptable, or Great
Notes	Notes as appropriate

* If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager. If the category is Work/life balance, the information must be carbon copied to the human resources department.
* If a sales representative does not submit a weekly status report by an agreed upon deadline, the system must send an email to remind the sales representative.
* The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.
* You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.
* When data is submitted offline, the data must be stored in the app until the app is back online.

Technical

Regardless of the UI layouts, the data recorded must be standardized in the Azure DB tables.

You must use global variables in the app.

Deployment

* Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.
* The completed app and all supporting components must be provided to Tailwind Traders.
* Tailwind Traders must not be able to make changes to any of the components.
* You must use the following version control numbering scheme:
* Major: The last two digits of the year the app is packaged

* Minor: Two digits that represent the month when the app is packaged
* Build: A number that is incremented to represent significant changes to the app
* Revision: The incremented revision for a package
* New versions of the application must completely replace previous versions of the app.
* When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
* Previous versions of the mobile app must be available for roll back purposes.
* All versions of software that have been used in production must be retained for five years.

Issues

The mobile app has been live for several months. Eight versions of the app have been released since the initial version of the app was deployed to sales representatives. You must revert the app to an earlier version and redesign some features.

User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report.

Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images.

User3 is unable to use a mouse.

NEW QUESTION: 78

A company uses Power Automate and Power Apps to streamline business processes.

You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action	Answer Area
Publish the model.	
Connect data to the model.	
Train the model.	
Use the model in a Power Automate flow.	

freeqas.com Microsoft

Answer:

Action	Answer Area
Publish the model.	Connect data to the model.
Connect data to the model.	Train the model.
Train the model.	Publish the model.
Use the model in a Power Automate flow.	Use the model in a Power Automate flow.

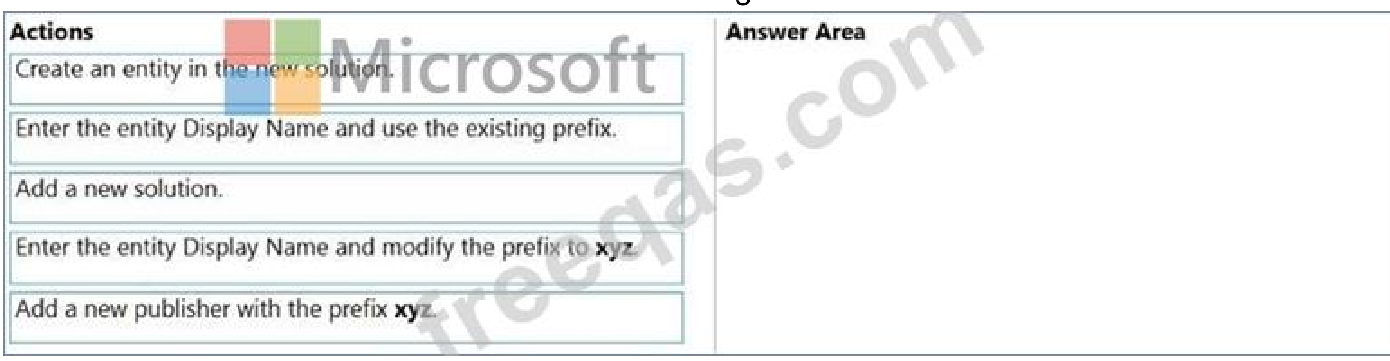
https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/

NEW QUESTION: 79

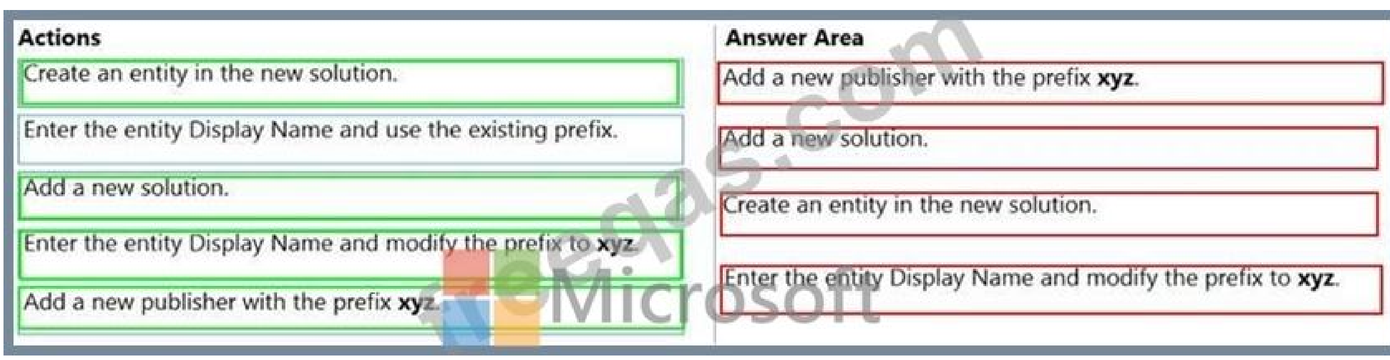
You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:



Reference:

https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-entity

NEW QUESTION: 80

DRAG DROP

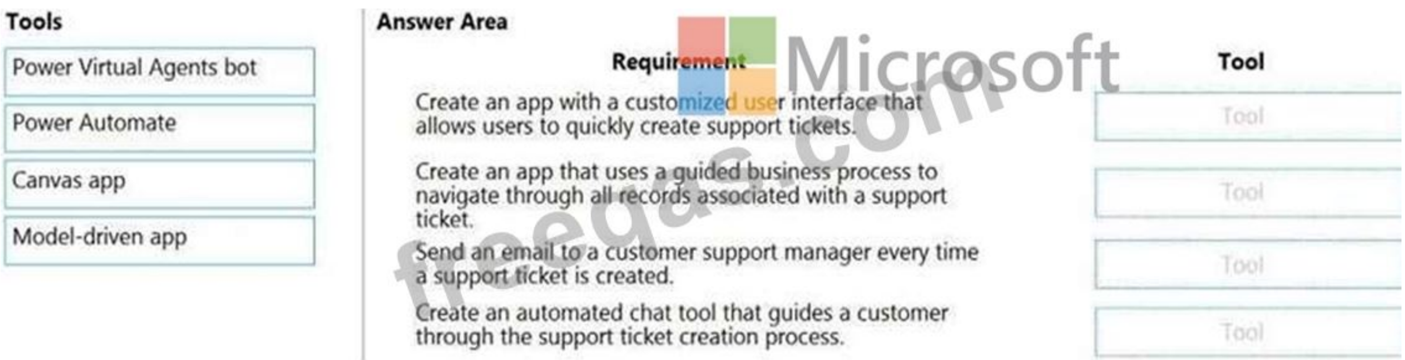
You plan to create apps for a company.

You need to identify the Power Platform tools required.

What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:



Answer:

Explanation

Explanation:

Box 1: Canvas App

Box 2: Model-driven app

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Box 3: Power Automate

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Box 4: Power Virtual Agents bot

When you create bots with Power Virtual Agents, you author and edit topics.

Topics are discrete conversation paths that, when used together within a single bot, allow for users to have a conversation with a bot that feels natural and flows appropriately.

Creating a bot with Power Virtual Agents is easy to do with the no-code authoring canvas, and there are a number of ways you can manage how topics interact, how you want the conversation to flow, and what it should feel like.

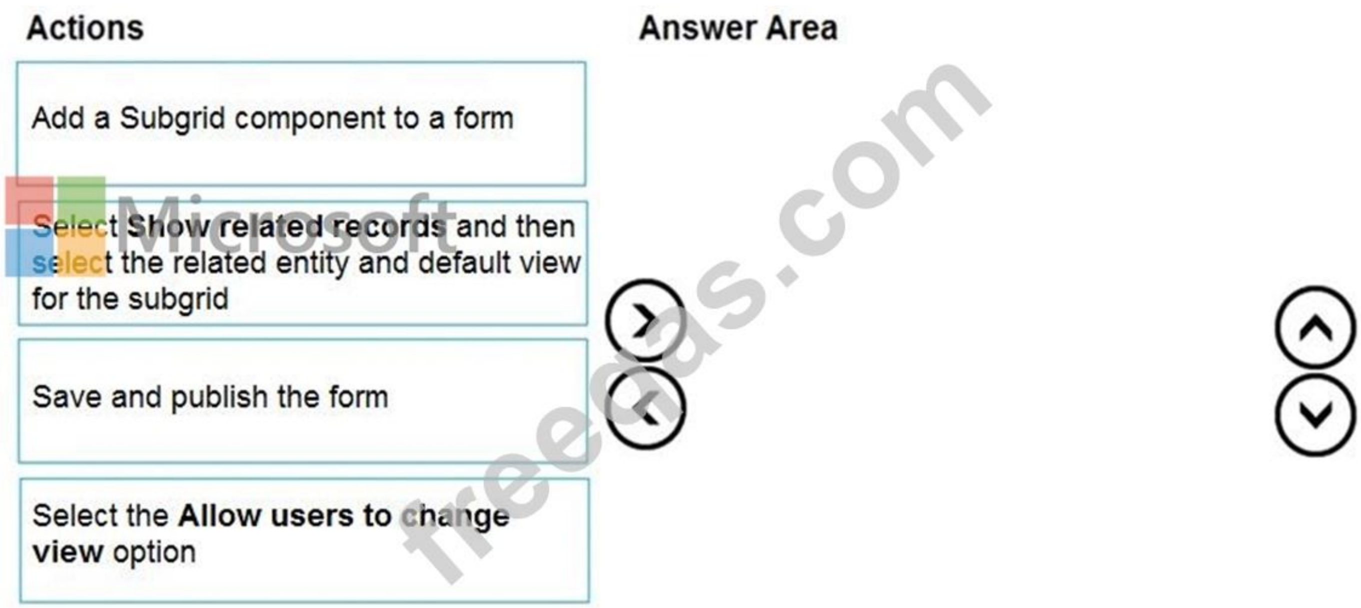
Reference:

https://docs.microsoft.com/en-us/power-virtual-agents/authoring-fundamentals

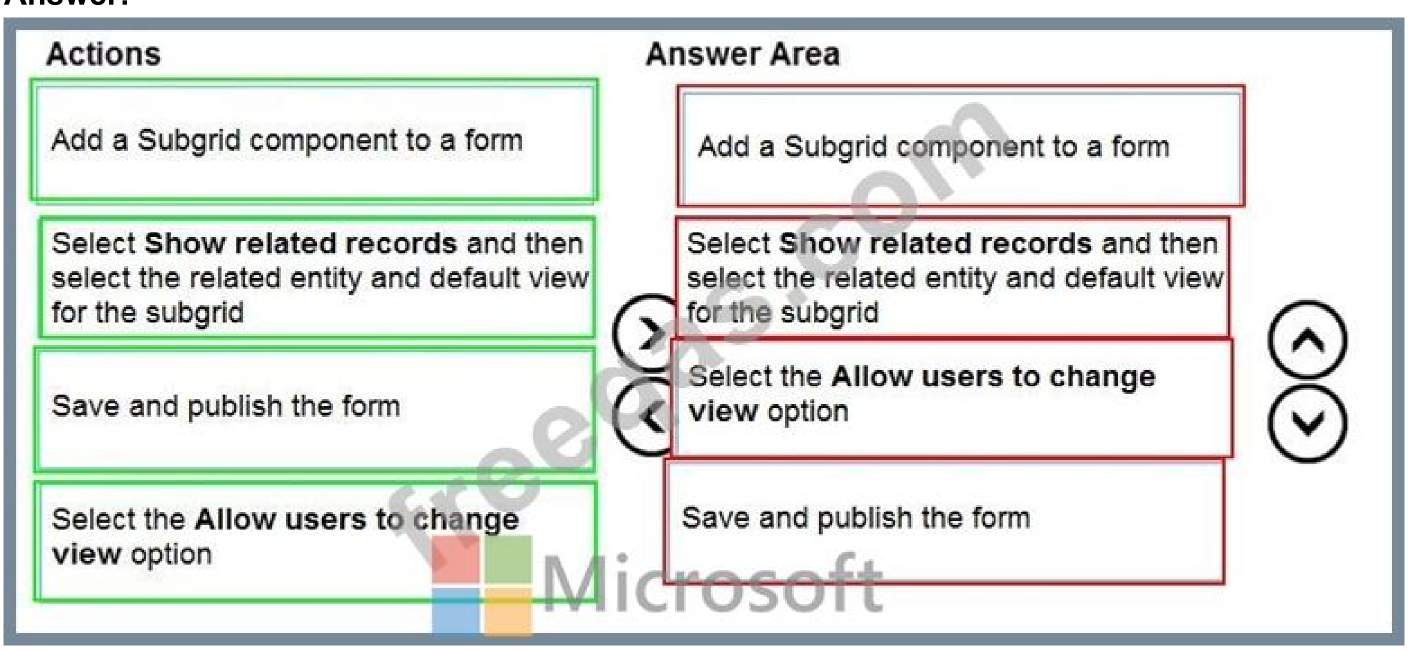
https://docs.microsoft.com/en-us/power-automate

NEW QUESTION: 81

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.
You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.
You need to embed the list of boats associated with a Marina record in the entity form.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.



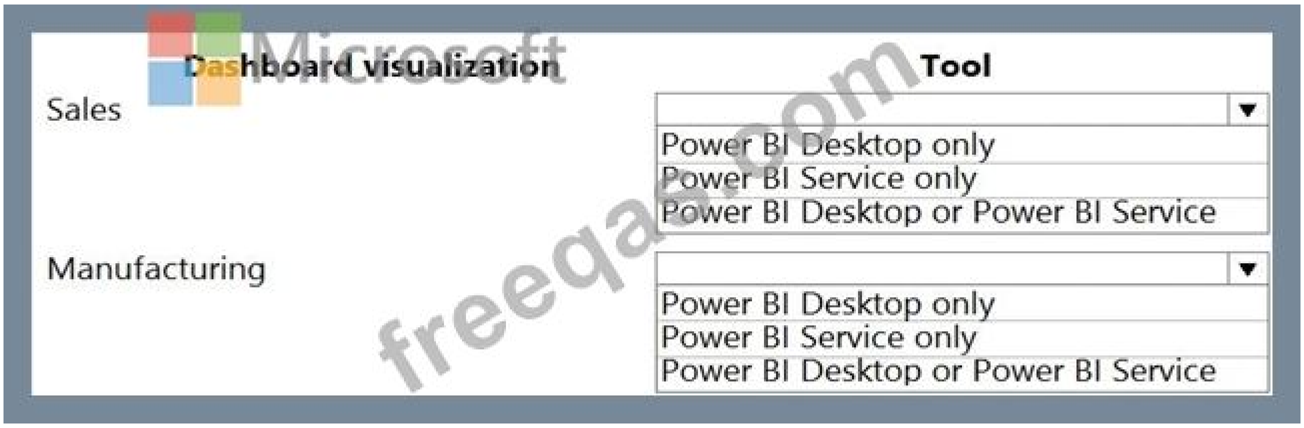
Answer:



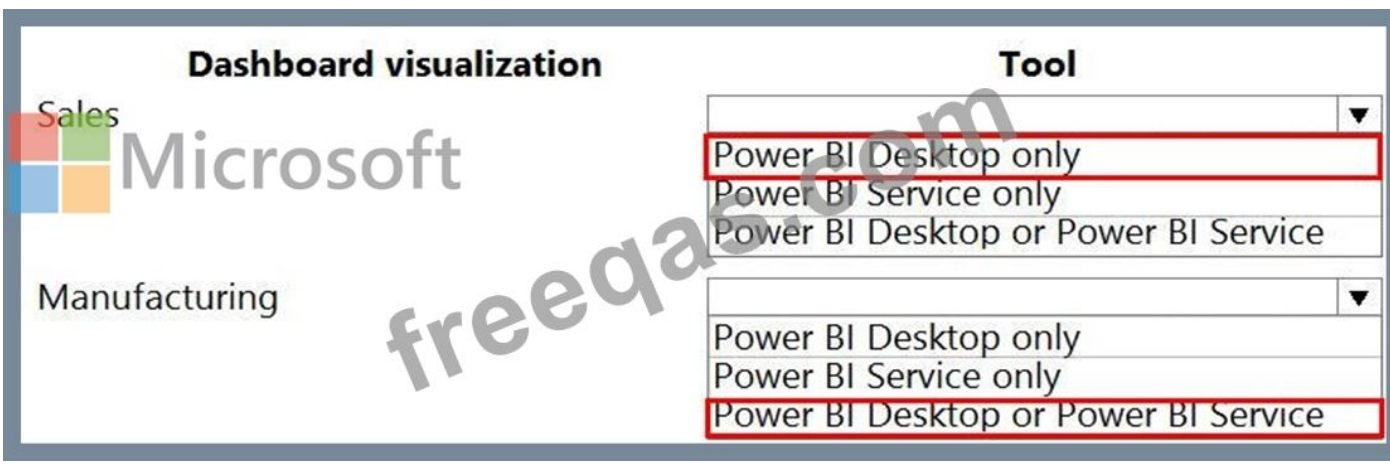
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/form-designer-add-configure-subgrid

NEW QUESTION: 82
You need to create the solution assets.

What should you use to create the visualizations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/en-us/power-bi/fundamentals/service-service-vs-desktop

NEW QUESTION: 83
You need to implement the change requested by the operations manager.
Which control should you use?
A. Camera
B. Shape
C. Add picture
D. Image
Answer: D (LEAVE A REPLY)
Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.
Incorrect Answers:
C: Add Picture: With this control users can take photos or upload image files from their device and update the data source with this content. On a mobile device the user is presented with the device's choice dialog to choose between taking a photo or selecting one already available.

This control is a grouped control containing two controls: an Image and an Add picture button.
The Image control shows the uploaded image or a placeholder if no image has been uploaded.
The Add picture button prompts for an image to be uploaded.
Not: If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image

NEW QUESTION: 84
You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.
Which formula should you use?
A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen,
ScreenTransition.Cover, RunningTotal);
B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5);
Back();), Color.Green)
C. UpdateContext({ RunningTotal:5 }); Back()
D. Set(RunningTotal, 5); Back();
Answer: D (LEAVE A REPLY)
You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.
Use the Back and Navigate function to change which screen is displayed.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate

NEW QUESTION: 85
You need to meet the requirement for the time tracking app.
Which controls should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	Card Rating Slider Timer
Read the employee's number into the app.	Barcode-scanner Card Image Shape
Display a photo of an employee when the employee badge is read.	Camera Card Icon Image

Answer:

Requirement	Solution
Automatically record the duration of work when a job number is read.	Card Rating Slider Timer
Read the employee's number into the app.	Barcode-scanner Card Image Shape
Display a photo of an employee when the employee badge is read.	Camera Card Icon Image

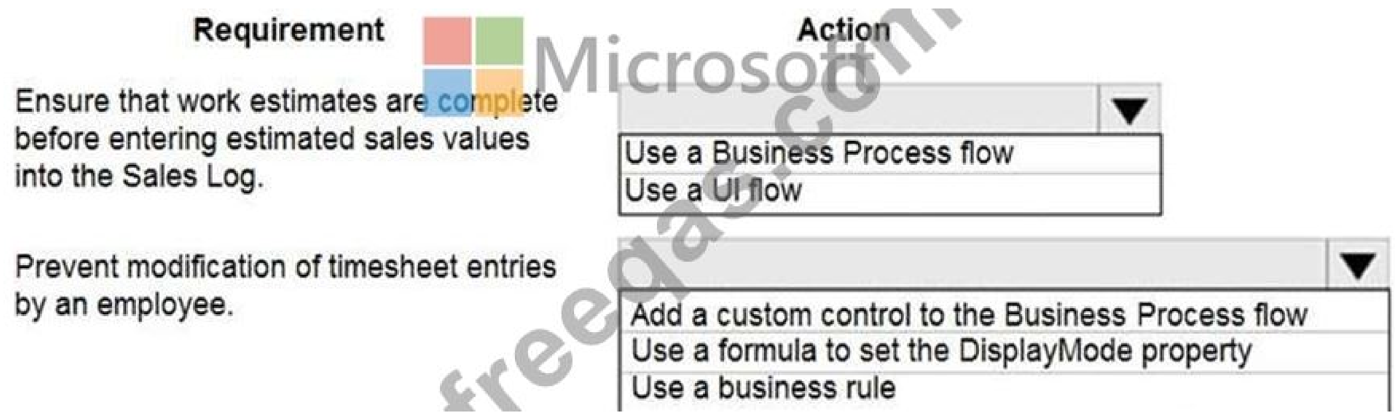
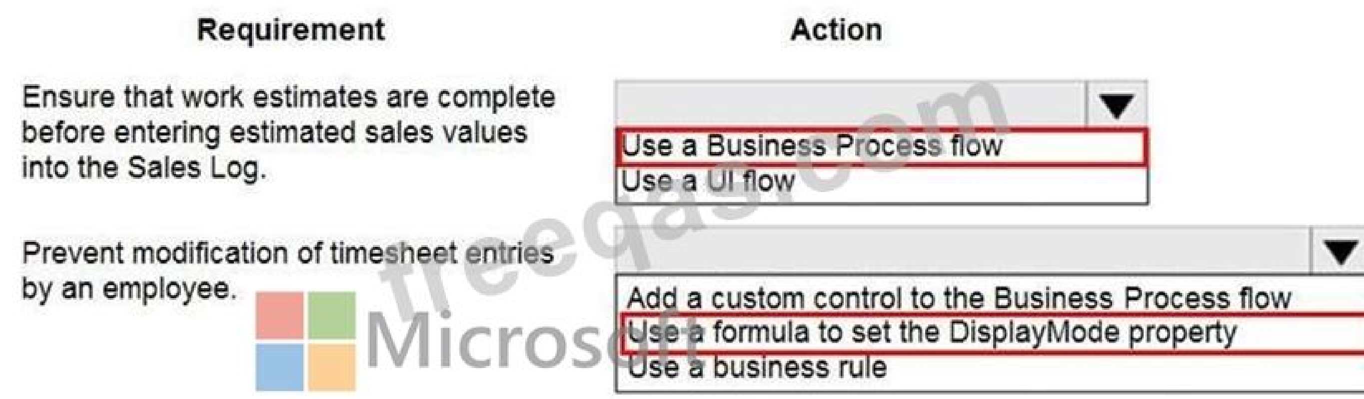
NEW QUESTION: 86
You need to configure the system to meet the sales requirements.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

freeqas.com Microsoft



Answer:



Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail

NEW QUESTION: 87

In a Common Data Service database, you create a canvas app and a custom entity. The app also reads data from the Account entity in the Common Data Service database.

Entity access permissions will be controlled by the Common Data Service User security role. You create a Common Data Service solution.

You need to replicate the changes to a new Common Data Service database.

Which two components should you include with the canvas app? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Custom entity

B. Account entity

C. Common Data Service User security role

D. Sitemap

Answer: B,C (LEAVE A REPLY)

Topic 2, Wide World Importers

Background

Current environment

Sales representatives submit weekly status reports to regional managers. There is no standardized format for these status reports. The process for managing status reports is challenging.

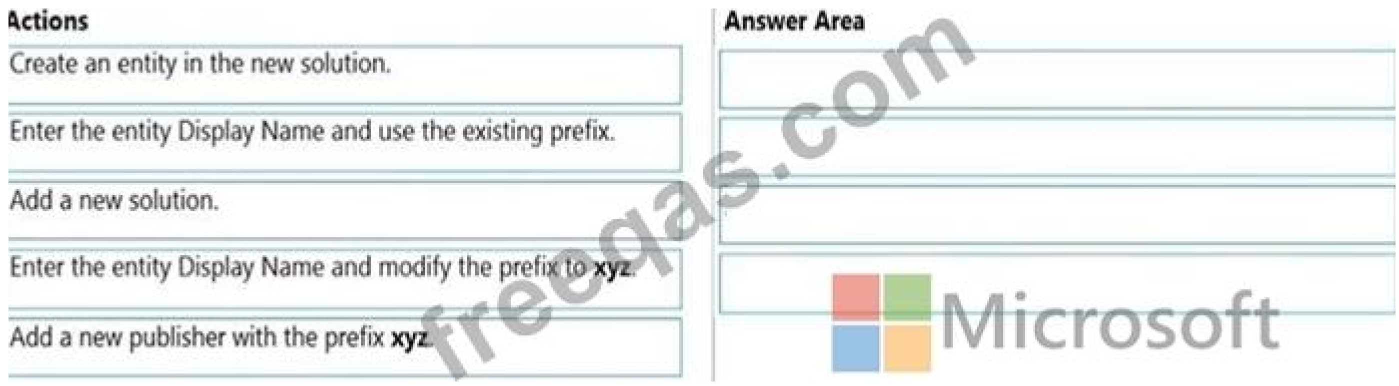
Wide World Importers has decided to use Microsoft 365, Microsoft Azure, and Power Platform for future app development. Both Wide World Importers and Tailwind Traders have identical Microsoft SharePoint and Azure configurations. Both companies use separate tenants.
Requirements
Application
You must create a mobile app to streamline the creation of status reports by sales representatives. You must make the same app available to Tailwind Traders. The mobile app must meet the following requirements:
Minimize the use of code.
Use formulas and expressions when necessary.
Support a variety of visual layouts.
Use a SharePoint list to store information about regional managers and sales representatives.
Use Azure SQL Database to store other data.
Status reports
:

Information type	Values
Category	Pipelines, Work/life balance, Coaching/Mentoring, or Communications
Status	At Risk, Acceptable, or Great
Notes	Notes as appropriate

If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager. If the category is Work/life balance, the information must be carbon copied to the human resources department.
If a sales representative does not submit a weekly status report by an agreed upon deadline, the system must send an email to remind the sales representative.
The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.

You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.
When data is submitted offline, the data must be stored in the app until the app is back online.
Technical
Regardless of the UI layouts, the data recorded must be standardized in the Azure DB tables.
You must use global variables in the app.
Deployment
Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.
The completed app and all supporting components must be provided to Tailwind Traders.
Tailwind Traders must not be able to make changes to any of the components.
You must use the following version control numbering scheme:
Major: The last two digits of the year the app is packaged
Minor: Two digits that represent the month when the app is packaged
Build: A number that is incremented to represent significant changes to the app Revision: The incremented revision for a package New versions of the application must completely replace previous versions of the app.
When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
Previous versions of the mobile app must be available for roll back purposes.
All versions of software that have been used in production must be retained for five years.
Issues
The mobile app has been live for several months. Eight versions of the app have been released since the initial version of the app was deployed to sales representatives. You must revert the app to an earlier version and redesign some features.
User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report.
Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse.

NEW QUESTION: 88
You are configuring a new Common Data Service environment by using the Power Apps Maker portal.
You need to create an entity that uses the prefix xyz.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:

https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-entity

NEW QUESTION: 89

A company is onboarding new workers to the Microsoft Power Platform.
A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.
You need to troubleshoot the app and data security configurations for the user.
Which tool should you use?

A. Azure AD Security review
B. User information page
C. Accessibility checker
D. Run diagnostics

Answer: ([SHOW ANSWER])

User access diagnostic tool in the Power Platform admin center:
Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new "Run diagnostics" feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.

https://docs.microsoft.com/en-us/power-platform/admin/troubleshooting-user-needs-read-write-access-organization

Topic 1, Contoso, Ltd
Current environment
Overview
Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes.
Accounting system and purchasing
The company has a cloud-based ERP/accounting system and uses the General Ledger, Accounts Receivable, and Accounts Payable modules. The current system does not have any modules that handle shop floor or manufacturing planning functionality.
Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.
All purchasing of raw materials is performed based on bills of material (BOMs) generated by the engineering department when engineering prints are created.
The corporate office uses Dynamics 365 Finance. The operations manager reports that Dynamics 365 Finance will not be implemented for the manufacturing plants for at least five years.
Manufacturing and planning
The plant that Contoso, Ltd. acquires uses Microsoft Excel workbooks and Microsoft Word documents to track the sales pipeline, requests for quote responses, and work estimates. The documents are stored on shared network drives.
Printed engineering drawings are sometimes accidently used across orders. This results in rework, cost over runs, and missed deliveries.
The company uses Job Traveler documents to detail the operations that need to be performed and the materials needed for a given job number.
Sales
Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
Customer request number
Customer name
Description
Estimated value of the sale
Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
Names of the sales manager, salesperson, and estimator Name of the product line Date the quote was sent to the customer Approximate start and finish dates of the project Date the order was received, if won Job number, which is assigned if won The company has a formal process in place for managing estimates. Some sales quotes lack required supporting documentation including estimates for labor and materials even though a formal process is in place. The company wants to incorporate the formal process as part of an app.
Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

An accurate sales pipeline and win/loss information cannot currently be reported because the close probability field in the Sales Log is being set to 100% when a sale is closed and 0% when a sale is lost.
Setting up a folder system on the network drive by a customer had not improved the hand-off of the current version of the sales quote to manufacturing.
Requirements
Solution
You plan to create a solution that uses Microsoft Teams and Power Platform.
You must convert the Sales Log workbook to a Common Data Service database.
Each department will have a separate Teams channel. Employees must only be able to access the channel for their department. All employees and management will have read access to a general company channel. The Teams site must include the following channels:
Sales
The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.
All Sales-related documents must be stored in folders in the files location for this channel.
Document versioning will be enabled. You must store the 10 most recent versions of a document.
Manufacturing
A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.
A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.
Printed paper drawings must no longer be used. The drawings must be stored in folders in the files location for the manufacturing channel.
General
You must create the following apps:
Time Tracking
You must create a canvas app to track time for each employee on mobile devices. The app must include the following:
a Sign-in screen
a screen to list the week's time entries for the employee
a screen to edit current time entries for the employee
The app must meet the following requirements:
The app must store its data in the existing on-premises Microsoft SQL Server instance.
Employees must only be able to access their own time tracking records from the app.
Employees must record all time spent in the fabrication of each customer job.
Employees must only be able to modify time records for the current and previous day.
Employees must be able to scan their badges to check in and out of work. Each badge contains the employee name and a current picture.
A QR code must be added to all employee badges. The code must include the employee's number.

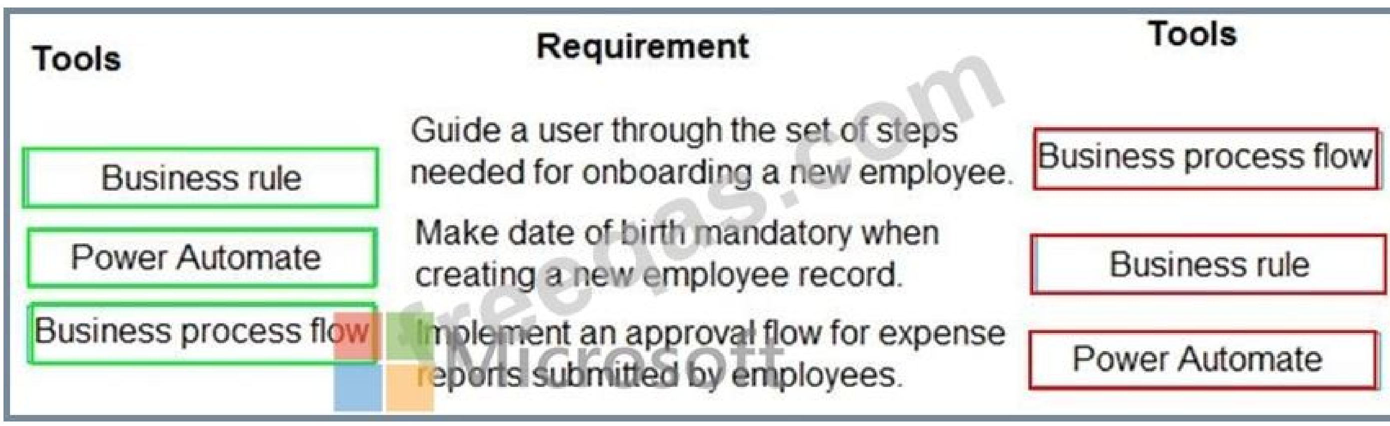
Job Traveler documents must be printed as PDF documents and must include UPC E barcodes for the job number and task number. The barcodes will be used with the time tracking application.
Sales
The Sales app must meet the following requirements:
Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.
Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.
The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.
Automatically perform the following actions immediately when a sale is won:
Generate a sequential job number.
Copy key sales information to the Job Setup entity used by manufacturing.
If the sale is lost, the Status field must be set to Lost and the reason for the loss must be entered into a provided text field. The reason must be added to the end of the description field.
Ensure that employees can easily update the Sales Log even if they are at a customer site.
Manufacturing and planning
The app must meet the following requirements:
Provides features to plan and predict capacity resource requirements for current and upcoming orders in the pipeline.
Replace paper timesheets and track check-in, check-out, breaks, and the time spent on each job task.
Record time elapsed while performing work and for viewing of engineering drawings.
The Job Setup entity must store its data in the existing on-premises SQL Server instance.
Job Traveler documents must be generated as a PDF document and printed from the Job Setup entity.
Issues
Uses report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.
The operations manager reports that users often incorrectly sign in to the time tracking app. The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Users want to be able to see their weekly total time entered from all screens.
Testers report that they can see time entries in the Time Tracker app, not just their own. Additionally, they can also edit any existing time entries.

NEW QUESTION: 90
You are creating a model-driven app for onboarding new employees.
You need to implement business logic for the app.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:



Reference:

https://docs.microsoft.com/en-us/learn/modules/intro-business-process-flows/2-differences

NEW QUESTION: 91

HOTSPOT

You need to roll back the mobile app to an earlier version.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer:

Answer Area

Requirement	Action
Identify the currently published version and view version notes.	View the session details page for the app in Power Apps Studio. View environment details for the app in the Power Admin portal. View details for the app in the Power Apps Maker portal.
Revert to an earlier version of the app.	Select Restore on the previous version of the app. Export the previous version of the app and import as a new version. Delete versions of the app until the desired version is the most recent.

Explanation:

Box 1: View the sessions details page for the app in Power Apps Studio

Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

Box 2: Select Restore on the previous version of the app.

Restore an app from your account

1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

NEW QUESTION: 92

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services.

You must also be able to connect to one or more industry data sources.

You need to configure the data sources.

What should you do?

A. Create a business process flow.

B. Create a data policy template.

C. Create a UI flow.

D. Use an existing data connector.

Answer: (SHOW ANSWER)

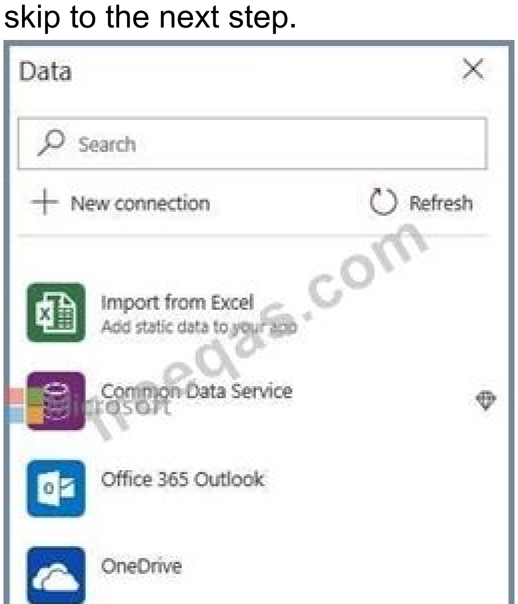
In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch.

Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

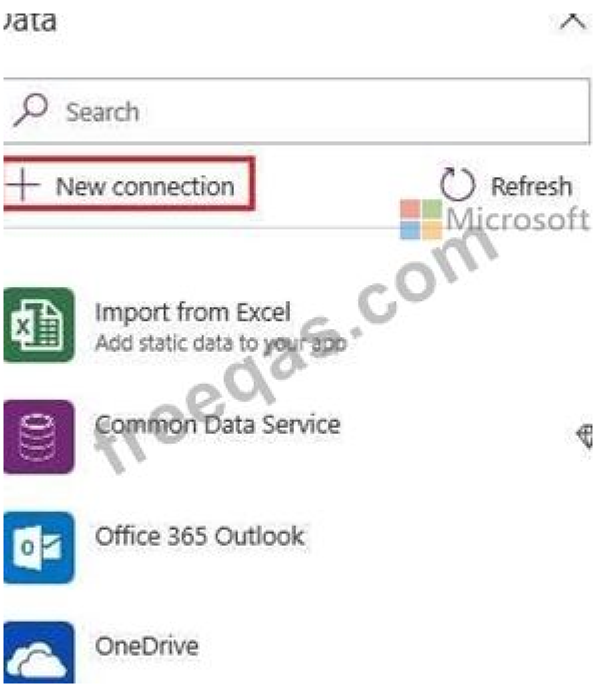
Note:

Add data source

1. In the center pane, select connect to data to open the Data pane.
2. Select Add data source.
3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.



4. Select New connection to display a list of connections.



5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

6. Select Create to both create the connection and add it to your app.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection

NEW QUESTION: 93

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions	Answer Area
Add a gallery control.	
Add an input property.	
Create a component.	
Add a screen.	
Create a form.	
Add an output property.	

Answer:

Actions	Answer Area
Add a gallery control.	Create a component.
Add an input property.	Add an input property.
Create a component.	Add a gallery control.
Add a screen.	
Create a form.	
Add an output property.	

NEW QUESTION: 94

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

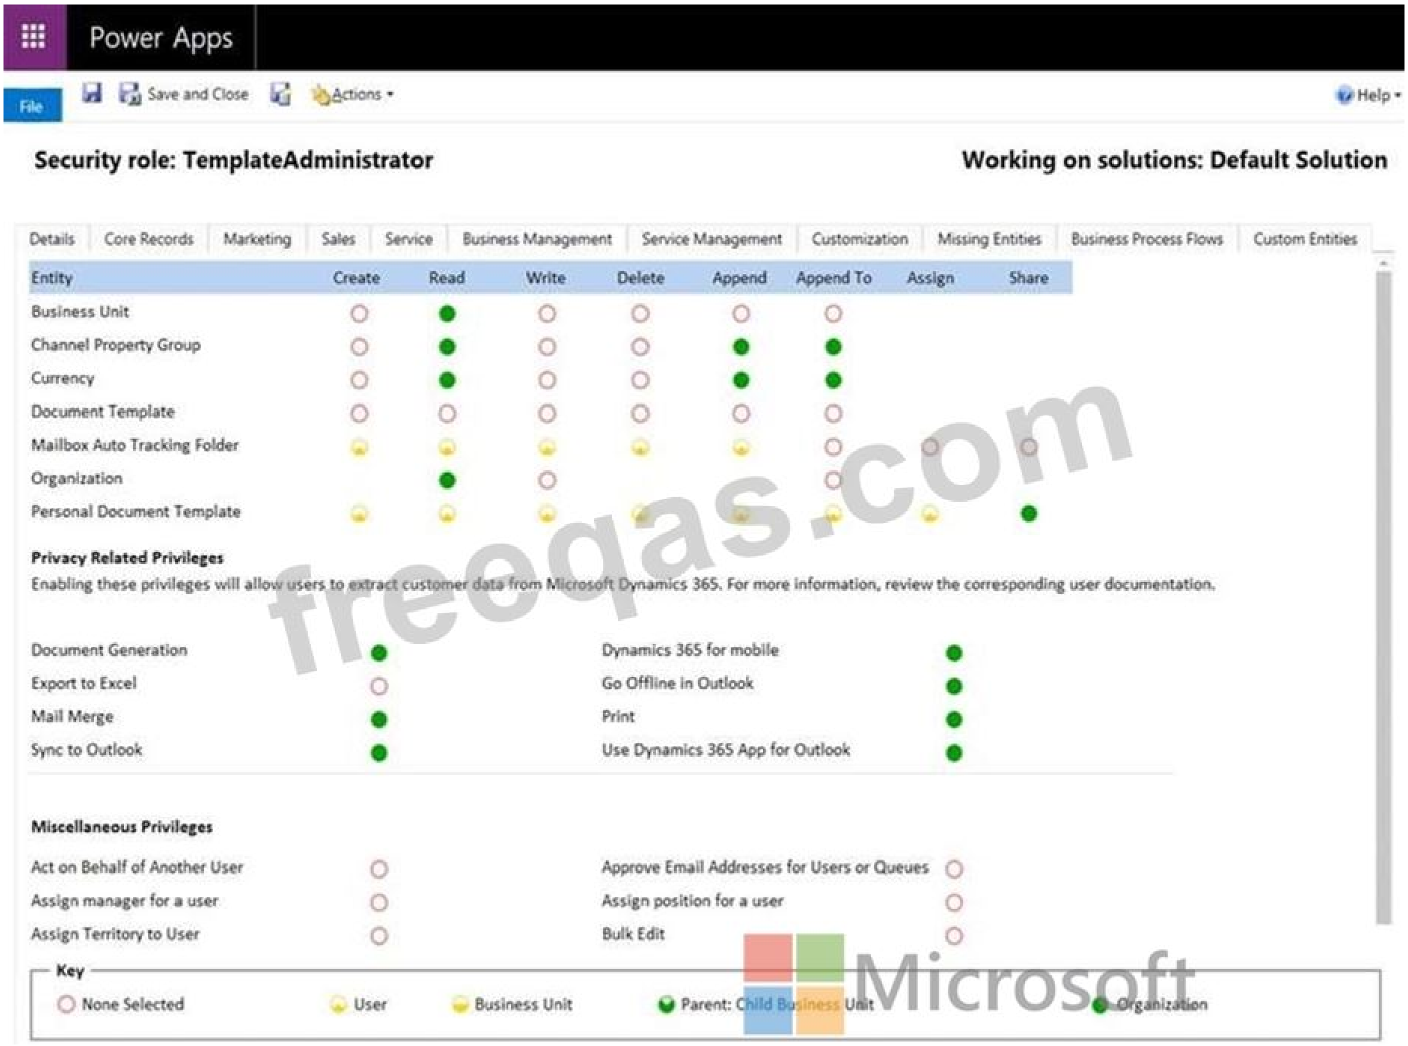
Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 95

You are configuring security to enable users to analyze data by using Microsoft Excel templates. You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.



Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

Answer:

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.

NEW QUESTION: 97

You are creating entities in a Common Data Service database to capture sales data.

You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplaying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.

You need to configure the fields for the entities.

Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Field types

- Rollup
- Calculated
- Simple

Answer Area

Field name	Field type
GrossAmount	Field type
DiscountAmount	Field type
TotalSales	Field type

Answer:

Field types

- Rollup
- Calculated
- Simple

Answer Area

Field name	Field type

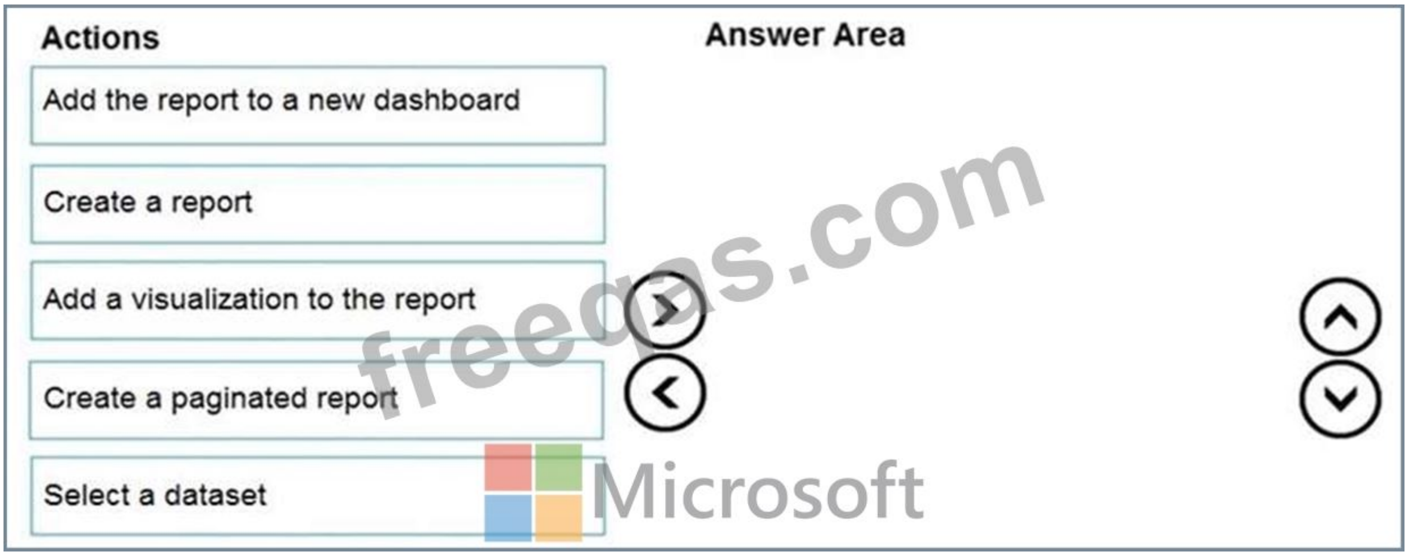
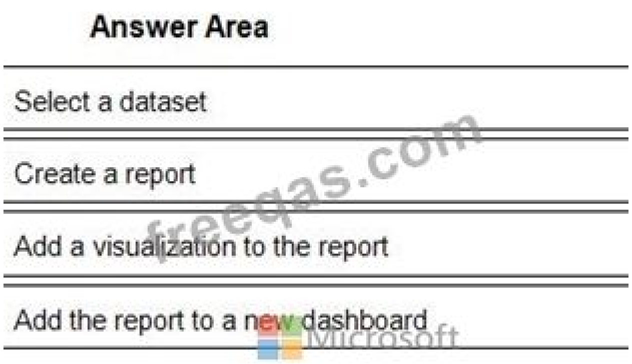
NEW QUESTION: 98
You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.
After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.
You need to determine why the background color changed.
What are two possible causes for the background color change? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.
A. You recently changed the Office 365 theme.
B. You exported a managed copy of the solution and imported the solution as an unmanaged solution. You modified the canvas app in the unmanaged solution.
C. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
D. You chose a different theme from the Theme menu inside the canvas app.
Answer: A,C (LEAVE A REPLY)
A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.
C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.
Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-themes-organization-branding

NEW QUESTION: 99
You are developing a Power BI report for a company.
The Power BI report must display company performance metrics in Power BI service. The report must include three fields in a visualization. The data for the report exists in a dataset.
The company will display the report on a large television screen during team meetings.
You need to create the report.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer and arrange them in the correct order.



Answer:



1 - Select a dataset
2 - Create a report
3 - Add a visualization to the report
4 - Add the report to a new dashboard

Reference:
https://docs.microsoft.com/en-us/power-bi/fundamentals/service-get-started
https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-report-visualizations

NEW QUESTION: 100

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen.

You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.
Solution:
* Add a display form to Screen_AccountDetail.
* Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
* Set the data source of the form to Accounts.
* Set the Item property of the form to Selected.
* Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes

B. No

Answer: A (LEAVE A REPLY)

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail
Create solutions Testlet 2 This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.
Background
Overview
Contoso, Ltd. produces industrial furnaces. The company is struggling to meet increased demand in production orders.
The company has corporate offices and manufacturing plants in Germany. The company also has offices and manufacturing plants in other regions of the world.
The company purchases a plant from another company. The plant has been in operation for over 25 years.

Current environment

Accounting system and purchasing

Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes.

Manufacturing and planning

* The company has a cloud-based ERP/accounting system and uses the General Ledger, Accounts Receivable, and Accounts Payable modules. The current system does not have any modules that handle shop floor or manufacturing planning functionality.
* Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.
* All purchasing of raw materials is performed based on bills of material (BOMs) generated by the engineering department when engineering prints are created.
* The corporate office uses Dynamics 365 Finance. The operations manager reports that Dynamics 365 Finance will not be implemented for the manufacturing plants for at least five years.

Sales

* The plant that Contoso, Ltd. acquires uses Microsoft Excel workbooks and Microsoft Word documents to track the sales pipeline, requests for quote responses, and work estimates. The documents are stored on shared network drives.
* Printed engineering drawings are sometimes accidently used across orders. This results in rework, cost over runs, and missed deliveries.
* The company uses Job Traveler documents to detail the operations that need to be performed and the materials needed for a given job number.

Requirements

Solution

* Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
- Customer request number
- Customer name
- Description
- Estimated value of the sale
- Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled
- Names of the sales manager, salesperson, and estimator
- Name of the product line
- Date the quote was sent to the customer
- Approximate start and finish dates of the project
- Date the order was received, if won
- Job number, which is assigned if won
* The company has a formal process in place for managing estimates. Some sales quotes lack required supporting documentation including estimates for labor and materials even though a

formal process is in place. The company wants to incorporate the formal process as part of an app.
* Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
* An accurate sales pipeline and win/loss information cannot currently be reported because the close probability field in the Sales Log is being set to 100% when a sale is closed and 0% when a sale is lost.
* Setting up a folder system on the network drive by a customer had not improved the hand-off of the current version of the sales quote to manufacturing.

General

You plan to create a solution that uses Microsoft Teams and Power Platform.

You must convert the Sales Log workbook to a Common Data Service database.

Each department will have a separate Teams channel. Employees must only be able to access the channel for their department. All employees and management will have read access to a general company channel. The Teams site must include the following channels:

Sales

* The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.
* All Sales-related documents must be stored in folders in the files location for this channel. Document versioning will be enabled. You must store the 10 most recent versions of a document.

Manufacturing

* A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.
* A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.
* Printed paper drawings must no longer be used. The drawings must be stored in folders in the files location for the manufacturing channel.

You must create the following apps:

Time Tracking

You must create a canvas app to track time for each employee on mobile devices. The app must include the following:
* a Sign-in screen
* a screen to list the week's time entries for the employee
* a screen to edit current time entries for the employee

The app must meet the following requirements:
* The app must store its data in the existing on-premises Microsoft SQL Server instance.
* Employees must only be able to access their own time tracking records from the app.
* Employees must record all time spent in the fabrication of each customer job.
* Employees must only be able to modify time records for the current and previous day.
* Employees must be able to scan their badges to check in and out of work. Each badge contains the employee name and a current picture.

* A QR code must be added to all employee badges. The code must include the employee's number.
* Job Traveler documents must be printed as PDF documents and must include UPC E barcodes for the job number and task number. The barcodes will be used with the time tracking application.

Sales

The Sales app must meet the following requirements:

* Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.
* Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.
* The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.
* Automatically perform the following actions immediately when a sale is won:

- Generate a sequential job number.
- Copy key sales information to the Job Setup entity used by manufacturing.

* If the sale is lost, the Status field must be set to Lost and the reason for the loss must be entered into a provided text field. The reason must be added to the end of the description field.
* Ensure that employees can easily update the Sales Log even if they are at a customer site.

Manufacturing and planning

The app must meet the following requirements:

* Provides features to plan and predict capacity resource requirements for current and upcoming orders in the pipeline.
* Replace paper timesheets and track check-in, check-out, breaks, and the time spent on each job task.
* Record time elapsed while performing work and for viewing of engineering drawings.
* The Job Setup entity must store its data in the existing on-premises SQL Server instance.
* Job Traveler documents must be generated as a PDF document and printed from the Job Setup entity.

Issues

* Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.
* The operations manager reports that users often incorrectly sign in to the time tracking app. The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
* Users want to be able to see their weekly total time entered from all screens.
* Testers report that they can see time entries in the Time Tracker app, not just their own. Additionally, they can also edit any existing time entries.

NEW QUESTION: 101

You need to resolve the user's issue with the time tracking app.

Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add a component to the time tracking screen for tracking total time.
B. Create a new component inside of the component library for the time tracking app.
C. Upload the component to AppSource.
D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: A,B (LEAVE A REPLY)

Scenario Issue: Users want to be able to see their weekly total time entered from all screens.
A component library provides a centralized and managed repository of components for reusability.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library

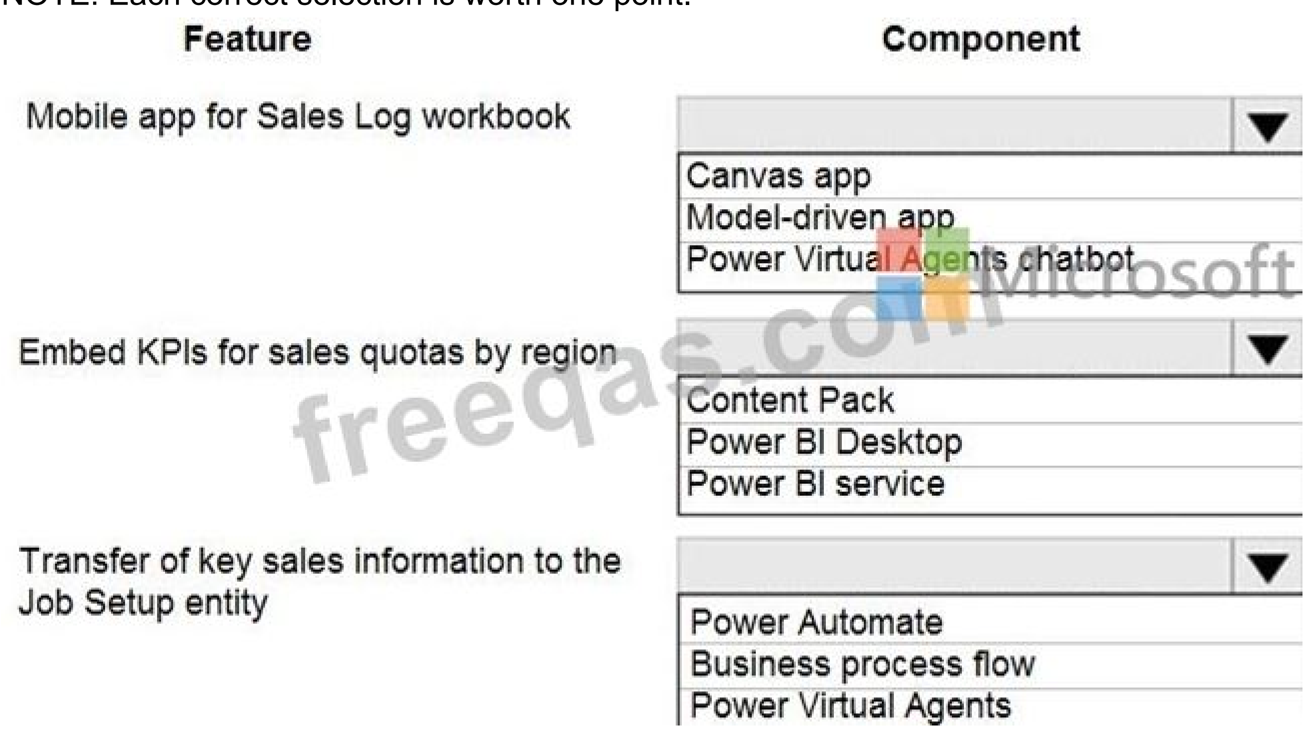
NEW QUESTION: 102

You need to create a model-driven app without using code.
Which tools should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

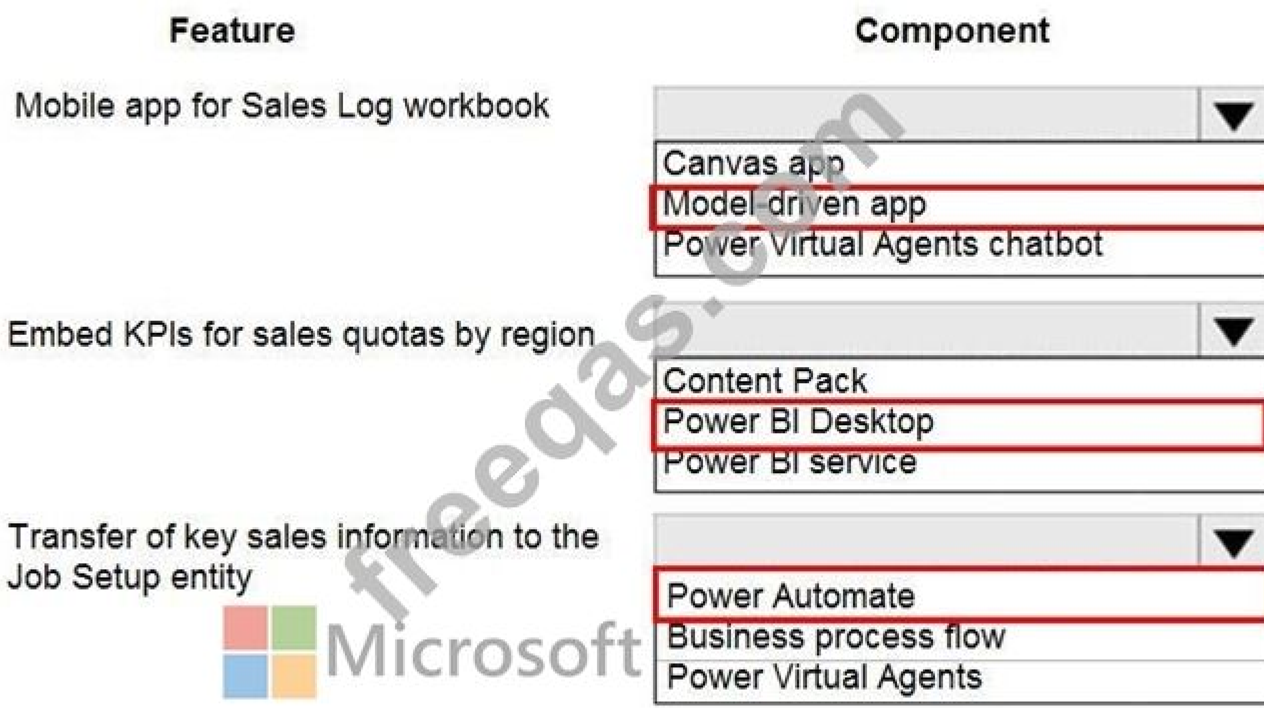
Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-site-map-app

NEW QUESTION: 103
You need to implement features for the solution.
Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



NEW QUESTION: 104

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors.

You need to verify that the focused border thickness is set to a value greater than zero.

Which section of the App checker results should you check?

A. Rules

B. Performance

C. Accessibility

D. Runtime

Answer: C (LEAVE A REPLY)

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity.

Issues include:

* Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION: 105

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code.

Sales associates must be able to act on the specific data displayed in dashboards.

You need to create the dashboards.
Which type of dashboards should you create? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Type of dashboard
Ensure that all sales associates can view the dashboard.	User System
Ensure that sales associates can interact with data from the dashboards.	Standard Multi-stream Single-stream

Answer:

Requirement	Type of dashboard
Ensure that all sales associates can view the dashboard.	User System
Ensure that sales associates can interact with data from the dashboards.	Standard Multi-stream Single-stream

Reference:
https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/create-dashboard
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashboards

NEW QUESTION: 106

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require customizations or the use of additional products.

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

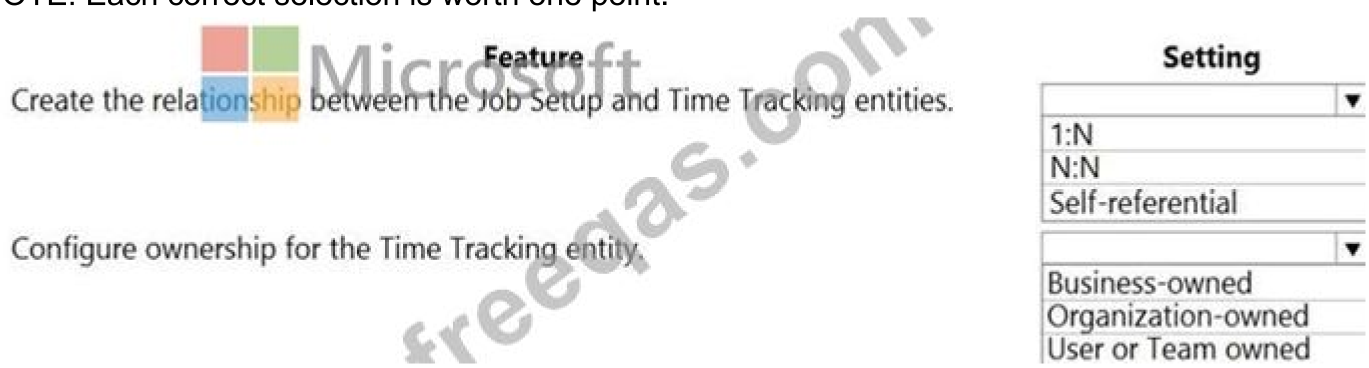
NEW QUESTION: 107

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.
Solution:
* Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New
* Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
* Set the data source of the form to Accounts.
* Set the Item property of the form to Selected.
* Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?
A. Yes
B. No
Answer: (SHOW ANSWER)
FormMode.New: the form is populated with default values and the user can modify the values of the fields. Once complete, the user can add the record to the data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION: 108
You need to configure the system to meet the requirements.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/types-of-entities

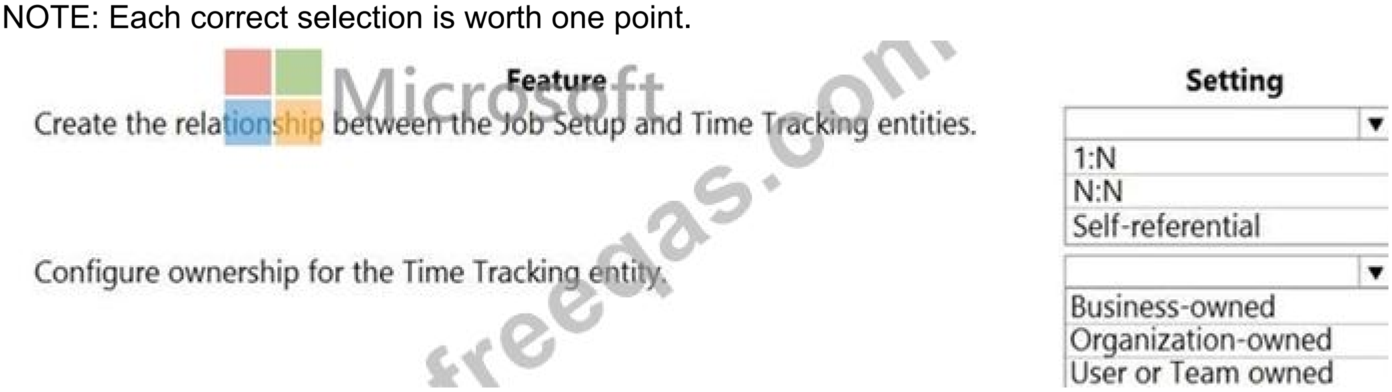
NEW QUESTION: 109

You create a canvas app within a Power Platform environment.
You need to identify potential accessibility issues for the canvas app before making the app available to other users.
Which tool should you use?
A. Portal Checker
B. App Checker
C. Solution Checker
Answer: (SHOW ANSWER)
Find accessibility issues
1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

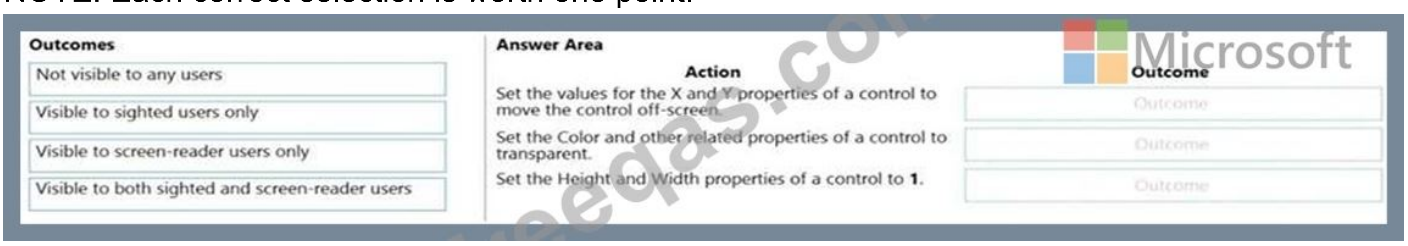
NEW QUESTION: 110
You need to configure the system to meet the requirements.
What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



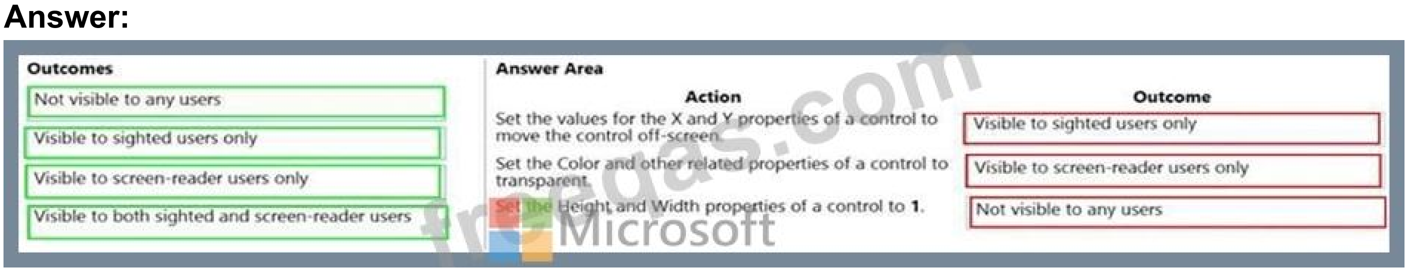
Answer:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/types-of-entities

NEW QUESTION: 111
You are designing a canvas app that will be used by all users including users who have vision impairments.
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:



Reference:
https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION: 112
You need to meet the requirements for sales representative that submit status reports.
How should you configure the flow?
A. Add a parallel branch that uses the value of a dynamic content variable
B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
C. Add a condition that evaluates the risk value by using a dynamic content variable
D. Add a data operation action that evaluates a dynamic content variable
Answer: C (LEAVE A REPLY)

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.
Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

* If the sale is lost, the Status field must be set to Lost and the reason for the loss must be entered into a provided text field. The reason must be added to the end of the description field.
* Ensure that employees can easily update the Sales Log even if they are at a customer site.
Manufacturing and planning
The app must meet the following requirements:
* Provides features to plan and predict capacity resource requirements for current and upcoming orders in the pipeline.
* Replace paper timesheets and track check-in, check-out, breaks, and the time spent on each job task.
* Record time elapsed while performing work and for viewing of engineering drawings.
* The Job Setup entity must store its data in the existing on-premises SQL Server instance.
* Job Traveler documents must be generated as a PDF document and printed from the Job Setup entity.
Issues
* Uses report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.
* The operations manager reports that users often incorrectly sign in to the time tracking app. The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
* Users want to be able to see their weekly total time entered from all screens.
* Testers report that they can see time entries in the Time Tracker app, not just their own. Additionally, they can also edit any existing time entries.

NEW QUESTION: 117
You are creating entities in a Common Data Service database to capture sales data.
You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplaying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.

You need to configure the fields for the entities.

Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Field types

- Rollup
- Calculated
- Simple

Answer Area

Field name	Field type
GrossAmount	Field type
DiscountAmount	Field type
TotalSales	Field type

Answer:

Field types

NEW QUESTION: 118

A company has the following divisions: wholesale and retail.

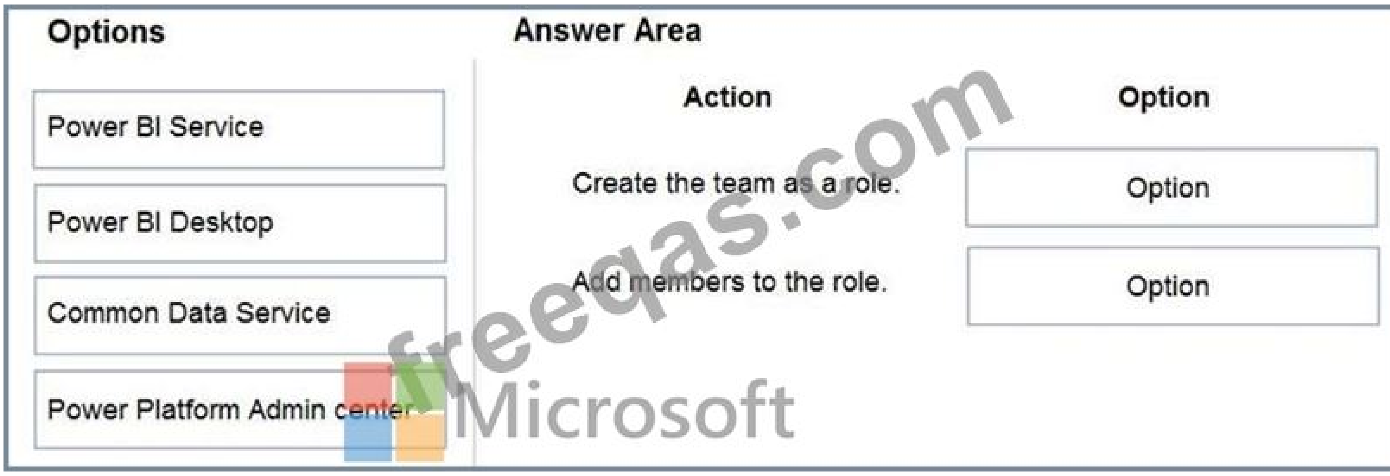
The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.

You need to ensure that each user sees data only for the team to which the user is assigned.

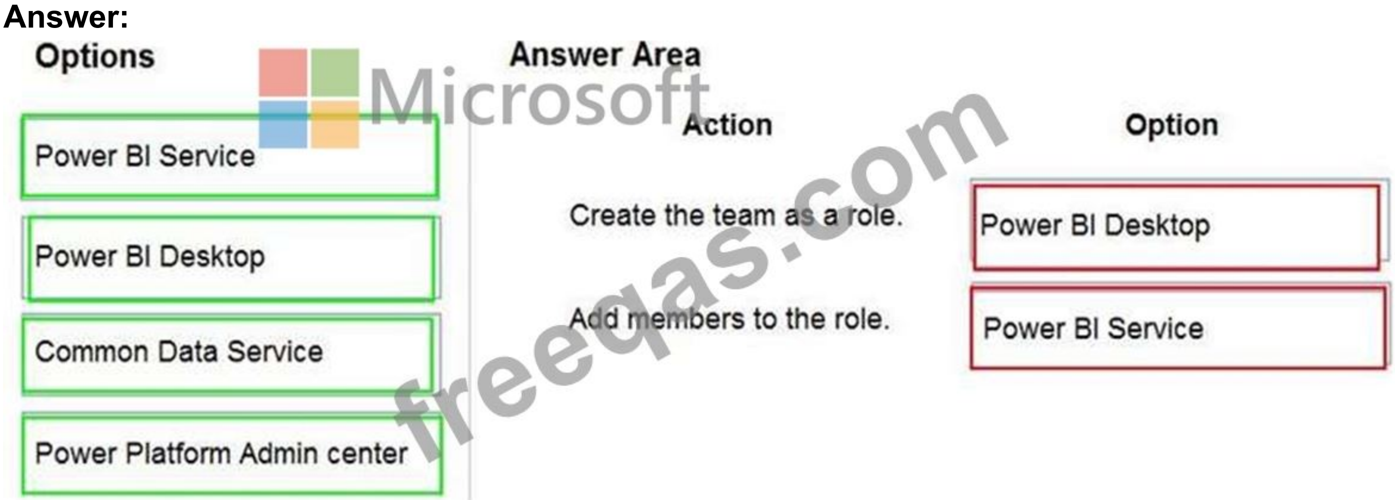
How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.



Answer:



Reference:

https://docs.microsoft.com/en-us/power-bi/create-reports/desktop-rls

NEW QUESTION: 119

You are designing a canvas app that will be used by all users including users who have vision impairments.

Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Reference:
https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION: 120

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values.

You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Collect

B. Patch

C. Navigate

D. Set

E. UpdateContext

Answer: (SHOW ANSWER)

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables:

UpdateContext

Navigate

Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen.

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext

NEW QUESTION: 121

You are creating a Power Automate flow.

You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow:

@or(equals(item()?['color'], 'red'),contains(item()?['color'],'blue'))

The filter returns results only when the expression resolves to true.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color **orange**	○	○
The filter expression yields a result if the array contains the color **red**	○	○
The filter expression yields a result if the array contains the color **sky blue**	○	○

Answer:

Statements	Yes	No
The filter expression yields a result if the array contains the color **orange**	○	$\boxed{\circ}$
The filter expression yields a result if the array contains the color **red**	$\boxed{\circ}$	○
The filter expression yields a result if the array contains the color **sky blue**	$\boxed{\circ}$	○

NEW QUESTION: 122

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen.
You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app.
Solution:
* Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
* Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
* Set the data source of the form to Accounts.
* Set the Item property of the form to Selected.
* Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?
A. Yes
B. No
Answer: A (LEAVE A REPLY)
View, edit, or create an item, save the contents, and reset the controls in an Edit form control.
FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.
This function is often invoked from the OnSelect formula of a Button or Image control.

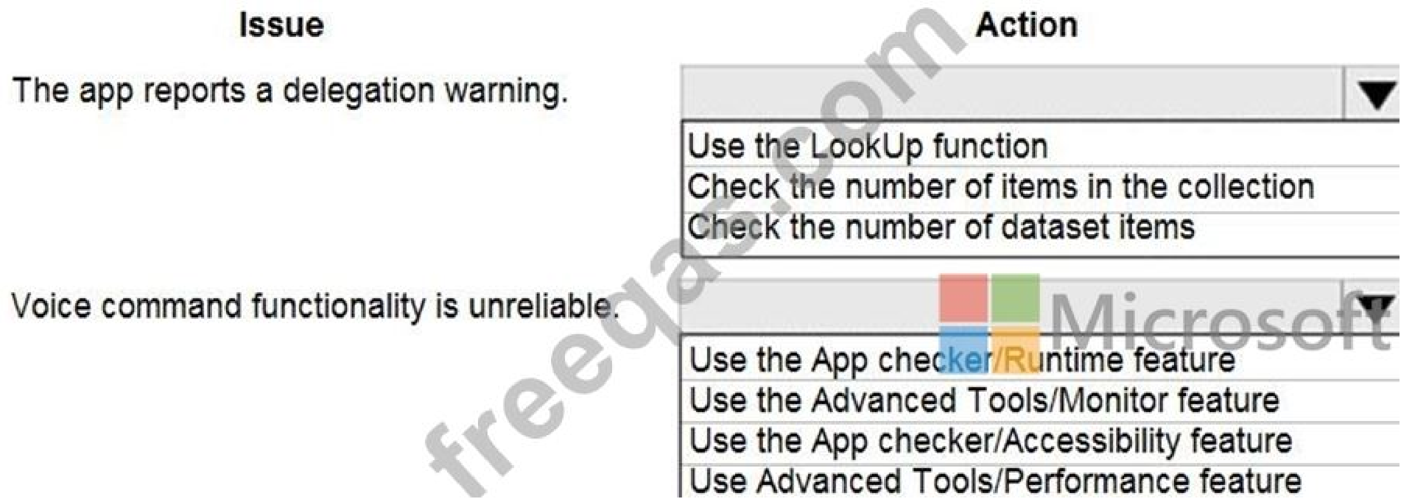
NEW QUESTION: 123
A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.
The production line workers report the following app issues from the shop floor:
The app reports a delegation warning.
Voice command functionality is unreliable.
You have minimal information about the issues. You are not allowed to enter the production facility.
You need to troubleshoot the issues.

How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.



Answer:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/delegation-overview

https://docs.microsoft.com/en-us/powerapps/maker/monitor-canvasapps

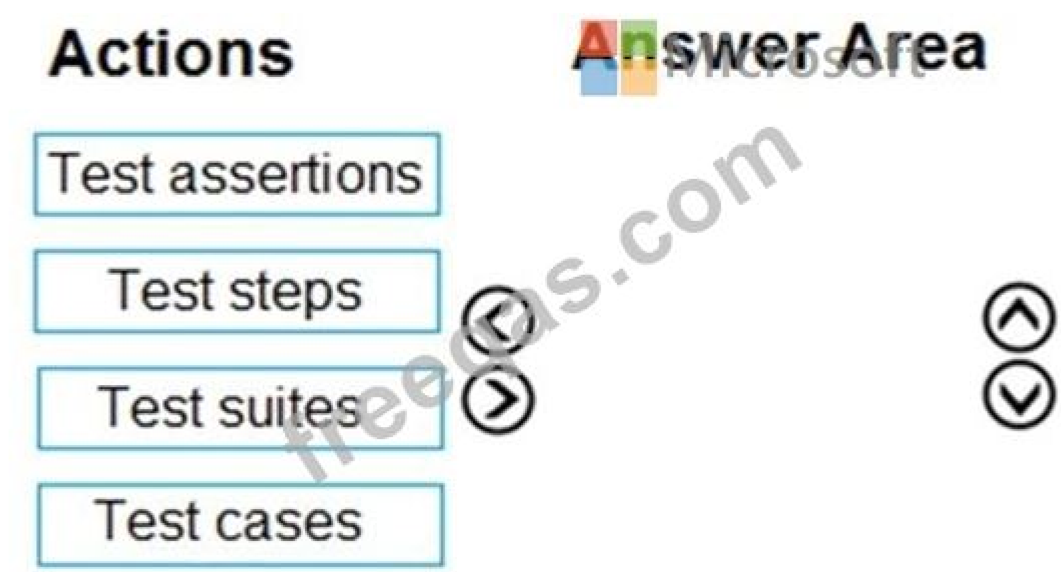
NEW QUESTION: 124

You have a canvas app that uses multiple inputs for calculations.

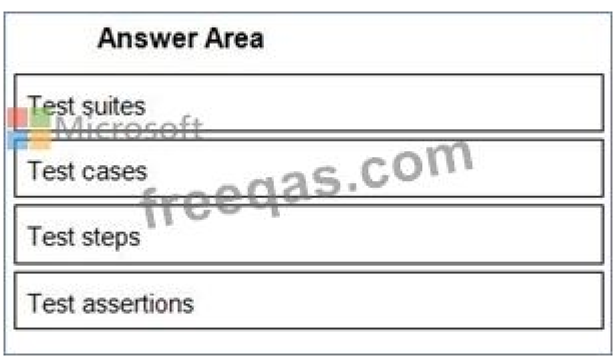
You must use Test Studio to create automated tests and confirm that the app works as expected.

You need to organize your test scenarios into a hierarchy.

In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



Answer:



1 - Test suites

2 - Test cases

3 - Test steps

4 - Test assertions
