### NEW QUESTION: 4

A user renamed the Customer entity record to Client in the Rename Records/Transactions Page. After navigating to Lists > Relationships, the user still sees Customer as the name of the record instead of Client. Why is this the case?

- A.** The user is logged into another role that uses the classic Center tab. Since renaming records or transactions is a user preference, the name change does not apply to that role.
- B.** The user renamed the Customer to Client in the English (U.S.) language, but is currently using English UK as the language under Home > Set Preferences > General > Localization > Language.
- C.** The user must have at least a Full/Edit level permission to Rename Records/Transactions in order for changes to save.
- D.** The user created a custom Center tab named Client under Lists > Relationships. Name changes are applied to standard NetSuite element names, but not to customized elements.
