

Nokia.BL00100-101-E.v2022-07-04.q14

Exam Code:	BL00100-101-E
Exam Name:	Nokia Bell Labs End-to-End 5G Foundation Certification Exam
Certification Provider:	Nokia
Free Question Number:	14
Version:	v2022-07-04
# of views:	614
# of Questions views:	140

NEW QUESTION: 1

Which of the following drive 5G low latency? (Choose two.)

- A. Support of up to 1 billion of IoT and sensors devices per km²
- B. Edge Clouds
- C. Lower Time Transmission Interval (TTI)
- D. Higher spectral efficiency

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Which one of the following requires a network service package defined in a catalog?

- A. Cloud orchestration
- B. Cloud software platform
- C. Software defined network
- D. Cloud infrastructure software

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

What are the benefits of the stateless or state-efficient aspects of network functions?

- A. Ensure the database integrity
- B. Avoid mass database corruption
- C. Provide real time access to the databases
- D. Enable scalability and extreme resiliency in the 5G Core

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which of the following statements about 5G Transport is incorrect?

- A. Internet of things devices will require a massive increase in network connectivity.
- B. Ultra Reliable Machine toMachine communication will require dependable low latency communication.
- C. Explosive traffic growth will require statically defined manually configured end to end QoS based services.
- D. Widely diverse end to end services will require the ability to create a Transport Slice with guaranteed SLAs.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

In a 5G Transport network, the encryption protection of the user and control plane are provided by which of the following?

- A. X25
- B. IPSec
- C. SSH
- D. Access Control List

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

Which of the following best defines what is meant by Network Slice isolation?

- A. Transport + Cloud isolation
- B. Resource + Traffic isolation
- C. Resource + Security isolation
- D. Security + Cloud isolation

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 7

Which of the following defines a vertical Network Slice?

- A. When it operates on the same layer of the ISO/OSI model.
- B. When it serves a given common purpose, for a use case with a defined QoS (eg a use case in transportation, in energy).
- C. When it cross all the network layers from the radio up to the core.
- D. When it serves a given customer for a specific purpose, such as a national energy network.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 8

Which of the following technologies drive 5G increased throughput capacity? (Choose three.)

- A. Higher spectral efficiency

- B. Network Slicing
- C. MU-MIMO and beamforming
- D. Multi-connectivity per User Equipment

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which of the following statements are applicable to the technology of massive MIMO?
(Select 3)

- A. The signals on each antenna are made orthogonal.
- B. Several data flows are sent at the same time on the same frequency.
- C. Transmit diversity is used in case of poor radio conditions.
- D. The data flows are sent at the same time on different frequencies.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

What is the best solution for deploying an optimal network function distribution?

- A. Using duplicated Virtual Network Functions
- B. Using Virtual Network Functions to control the routing
- C. Using Virtual Network Functions orchestrated across various Cloud Data Centers
- D. Using Virtual Network Functions in Access

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which of the following statements about Network Slicing are correct? (Choose three.)

- A. Multiple slices create multiple virtual network instances.
- B. Unique Quality of Service can be allocated to a given slice.
- C. Network Slicing is a way to physically partition the common network infrastructure.
- D. Specific resources can be allocated to a given slice.

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 12

What are the five key features of 5G Core?

- A. Dynamic Control plane, Adaptive Architecture, Multi-Access-Network, Stateless and Network Slicing
- B. Dynamic Control plane, Adaptive Architecture, Converged-Access-Network, Stateless and Network Self- healing
- C. Control and User Planes Separation, Service Based Architecture, Multi-Access-Network, State-efficiency and Network Slicing
- D. Dynamic Control plane, Service Based Architecture, Multi-Access-Network, State-efficiency and Network Slicing

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which of the following is a valid NFV attack?

- A. Hijack attack on hypervisor
- B. DDoS attack on the SDN switches
- C. Poor NFV implementation
- D. Hypervisor resources leakage

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which of the following is not a benefit of Network Slicing?

- A. Recovery of network flows when they fail
- B. Differentiated QoS flows, for different services
- C. Privacy and segmentation between flows
- D. Priority between different flows

Answer: A ([LEAVE A REPLY](#))

Valid BL00100-101-E Dumps shared by PrepPdf.com for Helping Passing BL00100-101-E Exam! PrepPdf.com now offer the **newest BL00100-101-E exam dumps**, the PrepPdf.com BL00100-101-E exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com BL00100-101-E dumps with Test Engine here: <https://www.preppdf.com/Nokia/BL00100-101-E-prepaway-exam-dumps.html> (41 Q&As Dumps, **40%OFF** Special Discount: **Exam-Tests**)
