NEW QUESTION: 1

In a manufacturing plant, a production operator in a givenshift completes a car assembly and reports this using orderless completion by referencing a Work Definition.

Identify the two purposes of the referenced Work Definition in Orderless reporting.

- A. Material usage
- B. Return material
- C. Resource usage
- D. Processing steps
- E. Scrap material

Answer: (SHOW ANSWER)

NEW QUESTION: 2

Your customer wants to mass create and modify Work Definitions and the relevant operation, items, and resources available in the spreadsheet.

Which two operations are not supported using ADFDI (Oracle Application Development Framework Desktop Integration)?

- A. Populate Descriptive flexfields
- B. Create and update ATO (Assemble To Order) model work definitions
- C. Update Work Definitions
- D. Create Work Definitions

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 3

A production Operator is executing work order in your plant. After completing move transactions, he notices that he has performed some incorrect move operations, including incorrect scrap and reject transactions. He is required to perform a reverse transaction to correct the errors. The operations are not count point enabled and not auto charged.

Identify the four transactions to correct this situation.

- A. Reverse from scrap to ready.
- B. Reverse at an operation.
- C. Reverse the product at the last operation.
- D. Reverse material issued to a work order.
- E. Reverse from reject to ready.
- F. Reverse resources charged to a work order.

Answer: A,D,E,F ([LEAVE A REPLY](#))

NEW QUESTION: 4

Work order costs are computed based on material and resource transactions reported and the cost method of the product. In a manufacturing plant, the production operator has completed a work order WO-001 ensuring proper materials and resource transactions. The materials are costed and resources are defined with rates.

A cost accountant has created cost accounting distributions. Upon reviewing the accounting distributions of the work order WO-001, resources charged to the work order are missing.

Identify the Concurrent Request that needs to be submitted to transfer resource charges to cost accounting.

- A. Transfer Costs to Cost Management
- B. Transfer Transactions from Inventory to Costing
- C. Create accounting
- D. Transfer Transactions from Production to Costing

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 5

One of the key execution capabilities that Oracle Manufacturing Cloud offers is that you can generate and manage work order exceptions.

Which option shows the production exception types that can be reported by the production operator?

- A. Work Area, Work Center, Resources, and Components
- B. Resources and Components
- C. Work Area, Work Center, Resources, Components, and Miscellaneous
- D. Work Center and Resources
- E. Work Area, Work Center, and Resources

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

A plant runs 24x7 daily using three continuous shifts of 8 hours each. One unit of an equipment resource R1 is assigned to each of the three shifts. On a specific work order, the resource R1 is required to work for 2 hours.

The resource is set up with an efficiency of 50% and utilization of 100%. R1 is scheduled to start on the given work order at noon.

What time will R1 be scheduled to finish, assuming no calendar exceptions have been set?

- A. 4:00 PM
- B. 2:00 PM
- C. 12:30 PM
- D. 1:00 PM
- E. 8:00 PM

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

A manufacturing plant works for two shifts of 8 hours each. The Manufacturing user wants a work center resource R1 of 4 units to be available during a nonworking time outside the regular shift on a particular day.

Identify the sequence of steps to create a resource exception in the Manage Work Center Resource Calendar page.

- A. Click Inside the existing Shift time on a Specific Date>Create Work Center page>Click the Resource Availability tab>Click Add icon> Select R1 from Resource Drop-down list> Enter 4 in Default Units Available.
- B. Click Outside the existing Shift time on a Specific Date> Create Work Center page> Click the Resource Availability tab> Click Add icon> Select R1 from Resource Drop-down list> Enter 4 in Default Units Availability column.
- C. Click Outside the existing Shift time on a Specific Date> Action Menu> Select Create Resource exception> Populate Start and Duration Field> Resource Availability and Overrides Region> Populate 4 units in Availability Override column.
- D. Click Inside the existing Shift time on a Specific Date> Action Menu> Select Create Resource exception> Populate Start and Duration Field> Resource Availability region> Populate 4 units in Default Availability column.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 8

Your customer has the following business requirement. There are two work definitions created in the application. One Work Definition for Engine Finished Good and other Work Definition for Pallet Finished Good. The Engine Finished Good item should have Pallet Finished Goods as one of its component.

Identify the way to establish the relationship between Pallet and Engine Work Definitions.

- A. The Work Definition versions can be used to tie the Work Orders.
- B. Create a Subinventory that could be the completion Subinventory for yielding the pallet and then the same Subinventory can serve as the supply Subinventory of the pallet in the Work Definition created for Engine.

C. Assign a higher priority to the Work Definition created for Engine and a lower one for the Work Definition for Pallet.

D. The two Work Definitions can be tied through Projector Seiban numbers.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

A production operator needs to review the materials issued, resources charged, and operations performed for a job that was executed in the previous shift.

Identify the task the operator has to select to review all the transactions in a single place for both Work Order and Orderless execution.

A. Review Production Transaction History

B. Report Resource, Material and Operation Transactions

C. Manage Work Orders

D. Review Dispatch List

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Identify three entities that must be set up in Oracle Manufacturing Cloud to create a Work Definition for an item that will be manufactured in-house.

A. Manufacturing Lead Time

B. Operation Items

C. Production Line

D. Resources

E. Operations

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

Your customer has completed the required setup steps for automatic work definition. Identify the option that shows the navigation steps needed to create an automatic work definition.

A. Manufacturing > Work Definition> Manage Standard Operations> Create automatic definition

B. Manufacturing> Work Definition> Manage Standard Operations> Select default standard operation> Actions> Create automatic work definition

C. Manufacturing > Work Definition> Manage Work Definitions> Actions> Create automatic work definition

D. Product Management> Product Information Management> Items> Edit Item > Actions> Create automatic work definition

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 12

The Plant Manager informs you that they have bought several machines for their manufacturing plant ABC.

The plant has been set up with a separate cost element set ABC in Manufacturing Cloud. You are requested to configure these machines in such a way that those are costed to the work order for which operations are performed on these machines.

Identify the correct setup that you will advise to the Plant Manager.

- A.** Set up the machines as cost element type of "Overhead" by selecting Cost Element set ABC.
- B.** Set up the machines as cost element type of "Resource" by selecting Cost Element set ABC.
- C.** Set up the machines as cost element type of "Resource" by selecting Cost Element set Common.
- D.** Set up the machines as cost element type of "Overhead" by selecting Cost Element set Common.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

A production Supervisor has noticed that Work Orders created manually are overwritten by the plan runs executed by Planning Central. After discussing this issue with the Planner, two actions are recommended to prevent the Work Orders from being overwritten by plan runs. Identify the two recommendations.

- A.** Update Firm flag in the Details region of the Edit Work Definition Names page.
- B.** Update Supply Plan Options, Overwrite Firm Planned Orders = None.
- C.** Update Firm flag in the Details region of the Edit Work Definition page.
- D.** Update Firm flag in the Details region of the Edit Work Order page.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

Identify two reports that provide work ordercost-related information to the costing user.

- A.** WIP Balance by Plant
- B.** Cost Accounting Dashboard
- C.** Work order Operational Analysis
- D.** Purchase Variance Summary

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 15

In a manufacturingcloud implementation, production operators want to perform work order updates using Dispatch List.

Identify two tasks that the Dispatch List allows the production users to perform.

- A.** Report Component Returns
- B.** Report Receipts

- C. Report Cost Transactions
- D. Report Resource Transactions
- E. Report Material Transactions by Quantity and Serial Number

Answer: D,E (LEAVE A REPLY)

NEW QUESTION: 16

The Manufacturing Engineer, responsible for creating and maintaining the Work Definitions, has scheduled the Process Item Structure Changes to Work Definitions program. However, after the execution of the program the engineer did not receive a notification with the details of the Item Structure changes.

Which two reasons could cause this?

- A. The engineer does not have Data access to Items Attributes.
- B. The engineer does not have Data access to Items.
- C. The engineer does not have Data access to Manufacturing plant in which the Item Structure change was performed.
- D. The engineer does not have Data access to Item Structures.
- E. The engineer does not have the Manage Work Definitions function privilege.

Answer: C,E (LEAVE A REPLY)

NEW QUESTION: 17

Which two steps should you use to create a new Oracle Transactional Business Intelligence report in the ManufacturingCloud?

- A. Use ibots to create the report.
- B. Use Business Intelligence answers to create the report.
- C. Use the Manufacturing subject area to select the report columns and create the report.
- D. Use Business Intelligence publisher to create a template and use that template to create the report.

Answer: B,D (LEAVE A REPLY)

Explanation

You can use Oracle Transactional Business Intelligence to create analysis and Oracle Business Intelligence Publisher to create reports.

NEW QUESTION: 18

During a Manufacturing Cloud implementation, the Production Supervisor wants to close the work orders for last month and wants to make sure that the work orders include the correct cost.

Identify the approach to be taken by the Production Supervisor.

- A.** Work order costs can be updated anytime regardless of the status of the work order.
- B.** The Production Supervisor should make sure that all costs are included while closing last month's work orders; however, variances can be included after closing the work orders.
- C.** The Production Supervisor needs to include all costs and variances in last month's work orders and close them; however, the work orders where updates are expected, should not be closed.
- D.** The Production Supervisor need not include cost variances while costing last month's work orders because those can be applied directly in subledger accounting.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 19

You can generate and manage work order exceptions in Oracle Manufacturing Cloud. Which users can report production exception and who gets notified after an exception is raised?

- A.** The Production Operator or Manufacturing Engineer can report an exception and notifies the production supervisor using Oracle Social Network since there is no system generated notification.
- B.** The Production Operator can report an exception and the application generates a notification that is sent to all users with the role of production supervisor who have access to the manufacturing plant.
- C.** The Production Operator can report an exception and the application generates a notification that is sent to all users who have access to the manufacturing plant.
- D.** The Production Operator can report an exception and notifies the production supervisor using Oracle Social Network since there is no system-generated notification.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 20

As a production supervisor, you require immediate access to critical shop floor execution systems to take action while on the go.

Which four work order related actions can be taken in the Manufacturing Supervisor mobile application?

- A.** Reviewing operation, component, and resource detail
- B.** Releasing work orders using quick swipe details
- C.** Executing standard work order and updating item and resource usage
- D.** Reviewing customer information of work orders
- E.** Creating a new standard or non standard work order
- F.** Searching for work orders and sending them through e-mail

Answer: A,B,D,F ([LEAVE A REPLY](#))

NEW QUESTION: 21

While creating an item in Product Information Management (PIM), the following two item templates are selected in sequence and applied.

1. Template: Finished Goods (WIP = No, Customer Ordered = Yes)
2. Template: Sub-assembly (WIP = Yes, Customer Ordered = No)

Identify the Item Attribute values in the application.

- A.** WIP = No, Customer Ordered = Yes
- B.** WIP = Yes, Customer Ordered = Yes
- C.** WIP = No, CustomerOrdered = No
- D.** WIP = Yes, Customer Ordered = No

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 22

In a Manufacturing Cloud post production support environment, a user wants to update some of the operations in the work orders by using the Midpoint Scheduling feature. However, the user is unable to update any of the orders.

Identify two reasons.

- A.** The scheduled resources are not part of the organization selected by the user.
- B.** The operations are missing sequence.
- C.** The work order operations do not have operations start or completion date.
- D.** None of the operations include scheduled resources.

Answer: ([SHOW ANSWER](#))
