### NEW QUESTION: 1

Your customer utilizes an authenticated webproxy to connect to the Internet. You need to install an Application Performance Monitoring (APM) agent for a WebLogic server. What should you do?

- A. Add an exception to Web browser proxy settings to access Oracle Management Cloud.
- B. Generate and download a registration key for the Web proxy.
- C. Shut down the Webproxy during APM agent installation.
- D. Update the config fileAgentHttpBasic.propertieswith the user/password ortoken.
- E. Specify a fully qualified Oracle Repository name during agent deployment.
- F. Generate a proxy token to access the Oracle Management Cloud gateway agent.

**Answer: B** ([LEAVE A REPLY](#))

### NEW QUESTION: 2

To monitor a host using Oracle Infrastructure Monitoring you need to \_\_\_\_\_.

- A. Install acloud agent on this host and explicitly enable host monitoring for this host.
- B. Install a cloud agent on this host and define the host entity with this agent.
- C. Install a cloud agent on this host, create required host monitoring credentials and define the host entity with this agent.
- D. Only explicitly enable host monitoring for this host.

**Answer: A** ([LEAVE A REPLY](#))

### NEW QUESTION: 3

You deployed the Application Performance Monitoring (APM) agent to a JBoss application server but don't see data in the APMweb user interface. What two steps should you perform to troubleshoot the issue? (Choose two.)

- A. Look in the agent log file to see if there are any errors beingreported and if it is seeing traffic.
- B. In the APM display, under agent administration, see if the agent name and last time the agent checked in with Oracle Management Cloud appear.

- C. Reboot the application because this sometimes has to be done twice to pickup changes.
- D. Confirm that the registration key is VALID and re-enter it.
- E. Close the browser to see if it is a cookie issue.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 4**

After setting up Oracle Security Monitoring and Analytics (SMA), you want to upload the user identification data in SMA. Which two options should you use? (Choose two.)

- A. Data Collector
- B. Using Identity Context Configuration interface
- C. Using Cloud Agents
- D. Using REST API calls

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 5**

To stop a Data Collector, what command should you use?

- A. omc pause collector
- B. kill -9 agent
- C. omcli stop agent
- D. kill -9 collector
- E. omc stop collector

**Answer:** C ([LEAVE A REPLY](#))

**NEW QUESTION: 6**

You find that Automatic Workload Repository (AWR) data is not being sent to the Oracle Management Cloud via the Cloud Agent. Harvesting is configured with "omcgroup". What are three possible reasons for this?(Choose three.)

- A. The Oracle Management Cloud upload directory has < 10% free space available.
- B. The database has not been enabled for Oracle Management Cloud Enterprise Edition.
- C. The Cloud Agent was deployed under a userid different from the Oracle Enterprise Manager agent.
- D. The database is not a member of the group "omcgroup".
- E. The database is a RAC database.
- F. The AWR retention period has been changed from its default period of eight days.

**Answer:** ([SHOW ANSWER](#))

**NEW QUESTION: 7**

When using Oracle Management Cloud, you observe this error:

Linux Cron Logs	/var/log/cron*	This source specifies a file that cannot be read by the agent. Ensure the file to be monitored is readable by the user the agent is installed as.
-----------------	----------------	---

How should you resolve this?

- A. Stop and start the agent.
- B. Change the owner of the LOGdirectory/var/log to match that of the Cloud agent user.
- C. Add read permissions for the agent user on /var/log/cron\*.
- D. Uninstall and reinstall the agent.

**Answer: C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 8**

Which three Oracle products can provide data to Oracle Security Monitoring and Analytics?  
(Choose three.)

- A. Oracle Cloud Access Security Broker
- B. OracleOrchestration
- C. Third-party Threat Intelligence Feeds
- D. Oracle Bid Data Cloud
- E. Oracle Log Analytics

**Answer: B,C,E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 9**

Identify the required component in an Oracle Log Analytics deployment.

- A. Gateway
- B. Proxy Agent
- C. Oracle Management Repository
- D. Data Collector
- E. File Encrypter
- F. Cloud Agent

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 10**

Where do you navigate to create an alert rule for Application Performance Monitoring?

- A. Application Performance Monitoring Start Page > Bell > Configuration
- B. Log Analytics Start Page > Application Navigator > Agents
- C. Log Analytics Start Page > Bell > Configuration
- D. Application Performance Monitoring Start Page > Clock > Configuration
- E. Home > Administrator < Alert Rules

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 11**

Which two answers are true for Baselines and Anomalies displayed on the performance charts in Oracle Infrastructure Monitoring? (Choose two.)

- A. Baselines and Anomalies are metrics averages.
- B. Baselines and Anomalies are calculated based on historical data.

- C. Baselines and Anomalies are result of build-in machine learning algorithms.
- D. Baselines and Anomalies are notavailable by default.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 12**

An Oracle Enterprise Manager customer wants only their production systems analyzed by Oracle IT Analytics.

What should you do so that the Data Collector agent collects data only from productionEnterprise Manager target systems?

- A. Deploy a new on-premises Enterprise Manager Cloud Control environment that has just the production targets and configure the Data Collector agent to harvest data from it.
- B. Within Oracle Enterprise Manager Cloud Control on-premises, place production targets in a group calledomcgroup.
- C. In Oracle Enterprise Manager Cloud Control, set the lifecycle status of production targets to Production.
- D. Modify the Data Collector agent configuration file to select only production targets.

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 13**

A customer has a target host that doesn't support agent installationbut does not have the capability to send logs via syslog. How should you configure the agent to receive syslog messages?

- A. Home > Application Navigator > Agents > Gateway Agent > Syslog Listener
- B. Home > Log Analytics > Add Data > Sources > Create > Source Type > Syslog Listener
- C. Home > Application Navigator > Agents > Cloud Agent > Syslog Listener
- D. Home > Log Analytics > Add Data > Parser > Source Type > Syslog Listener

**Answer:** ([SHOW ANSWER](#))

#### **NEW QUESTION: 14**

You need to display a specific entity's log entries in the Oracle Log Analytics explorer.

Which action should you perform?

- A. Select a Cluster chart in the Visualize panel and find your entity in the display.
- B. Select the icon resembling an entity; it contains the host name.
- C. Drag the Entity data panelto the Visualize panel.
- D. Filter and select the entity name from the Entity field in the Data panel.

**Answer:** D ([LEAVE A REPLY](#))

#### **NEW QUESTION: 15**

Which two answers include examples of tasks that can be performed using Oracle Orchestration?  
(Choose two.)

- A. Resize cloud resources, provision new instances of a database, running scripts on multiple hosts.
- B. Automatically create an OMC instance.
- C. Correct rule violations, provision an entire application stack.
- D. Configure a cloud agent, running scripts on multiple hosts.

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 16

Which four steps are involved in the setting up of an Oracle Management Cloud service? (Choose four.)

- A. Install Oracle Cloud Framework
- B. Install agents and assign License editions to entities.
- C. Sign into "My Services" in Oracle Cloud.
- D. Install Big Data repository.
- E. Download software from Oracle Technology Network (OTN).
- F. Buy a product license.
- G. Create an Oracle Management Cloud instance.
- H. Add users and assign roles.

Answer: B,C,F,G ([LEAVE A REPLY](#))

#### NEW QUESTION: 17

An Oracle Log Analytics target has stopped sending log data. Where in the Oracle Management Cloud user interface should you navigate to in order to see when the agent checked in to the Oracle Management Cloud?

- A. Management Cloud Home > Administration > Agents > Gateways
- B. Management Cloud Home > Data Explorer > Log > Log Source
- C. Management Cloud Home > Administration > Agents > Cloud Agents
- D. Management Cloud Home > Data Explorer > Log > Entity
- E. Management Cloud Home > Application Navigator > Agents > Heartbeat

Answer: ([SHOW ANSWER](#))

#### NEW QUESTION: 18

The topology (entity map) of your monitored infrastructure can be organized by various entity properties and associations including \_\_\_\_\_.

- A. Alert Status, Entity Type and Entity Status
- B. Tier, Entity Type and Entity Status
- C. Entity Type, Number of Errors and Entity Status
- D. Tier, Number of Agents, Alert Status

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 19**

You want to use machine learning to focus on threats against a specific database and its query execution activity, and the number and order of SQL executions performed by apps. Which two statements are true for using this model? (Choose two.)

- A. Learning period can be selected only as days from time unit.
- B. Auditing must be enabled for the database to be used.
- C. Security model must be based on Authentication or Data Access.
- D. Database must be backed up before being added to the SQL Analysis Model.
- E. Audit logs must be collected by Oracle Log Analytics.

**Answer: B,E (LEAVE A REPLY)**

#### **NEW QUESTION: 20**

When deploying an Oracle Management Cloud agent, an error was encountered. What is one of the methods that you would use to troubleshoot this?

- A. Review IP address of agents for any conflict and reassign the agent being deployed to a new address range.
- B. Load data into the Management Repository if found empty.
- C. Log in to Cloud.oracle.com and in MyServices check in the Agents tab for any errors and then select the "redeploy" check box.
- D. Verify that a registration key value had been input and that the key had a valid status.

**Answer: D (LEAVE A REPLY)**

#### **NEW QUESTION: 21**

Which command should you use to determine if an Oracle Management Cloud Data Collector is working?

- A. omcli status agent
- B. omc check collector
- C. ps -ef agent
- D. ps -ef harvester
- E. emctl status collector

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 22**

In Oracle Configuration and Compliance, which three of the following options can you specify when creating a custom Rule? (Choose three.)

- A. Runtime User
- B. Number of Retries
- C. Entity Type
- D. Path toScript
- E. Output Log File
- F. Standard Output Mapping

**Answer: C,D,E ([LEAVE A REPLY](#))**

**NEW QUESTION: 23**

A customer wants to identify trends for heap usage of a WebLogic Domain using Oracle Analytics. How should you demonstrate that capability?

- A. Locate the Hosts where the Domain is distributed and then analyze the memory usage trend for each Host.
- B. Keep a list of WebLogic servers in Excel and compare it to the trend of heap usage for each WebLogic in the domain
- C. Locate and consolidate all the WebLogic log files and analyze each occurrence of a heap entry.
- D. Group WebLogic servers by Domain and select the domain group you are interested in for trend analysis.

**Answer: D ([LEAVE A REPLY](#))**

**NEW QUESTION: 24**

Which are two unique features of Oracle Orchestration? (Choose two.)

- A. Automated workflow
- B. Embedded cron Kernel agent
- C. History of executions
- D. Compliance automation

**Answer: A,D ([LEAVE A REPLY](#))**
