NEW QUESTION: 1

Consider the following source material:

"The applicant will have a good credit score if the applicant has an acceptable number of credit accounts in good standing. The applicant has an acceptable number of credit accounts in good standing if the applicant has 3 or more credit accounts with a positive balance".

Suppose that you need to model whether the applicant will have a good credit score in a single rule.

What style should "the applicant has 3 or more credit accounts with a positive balance" be modeled in?

- A. OPM - Premise (level 2)
- B. OPM - Conclusion
- C. OPM - Level 1 (condition)
- D. OPM - Premise
- E. OPM - Level 2 (condition)

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 2

The policy model you are creating will be used by developers to automate decisions by calling the OPA Determinations API Assess Service.

Which elements of the project data model must be given names?

- A. attributes only
- B. attributes, entities, and screens only
- C. attributes, entities, and relationships only
- D. attributes, entities, relationships, screens, and forms only
- E. attributes and relationships only
- F. attributes and entities only
- G. attributes, entities, relationships, and screens only

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 3

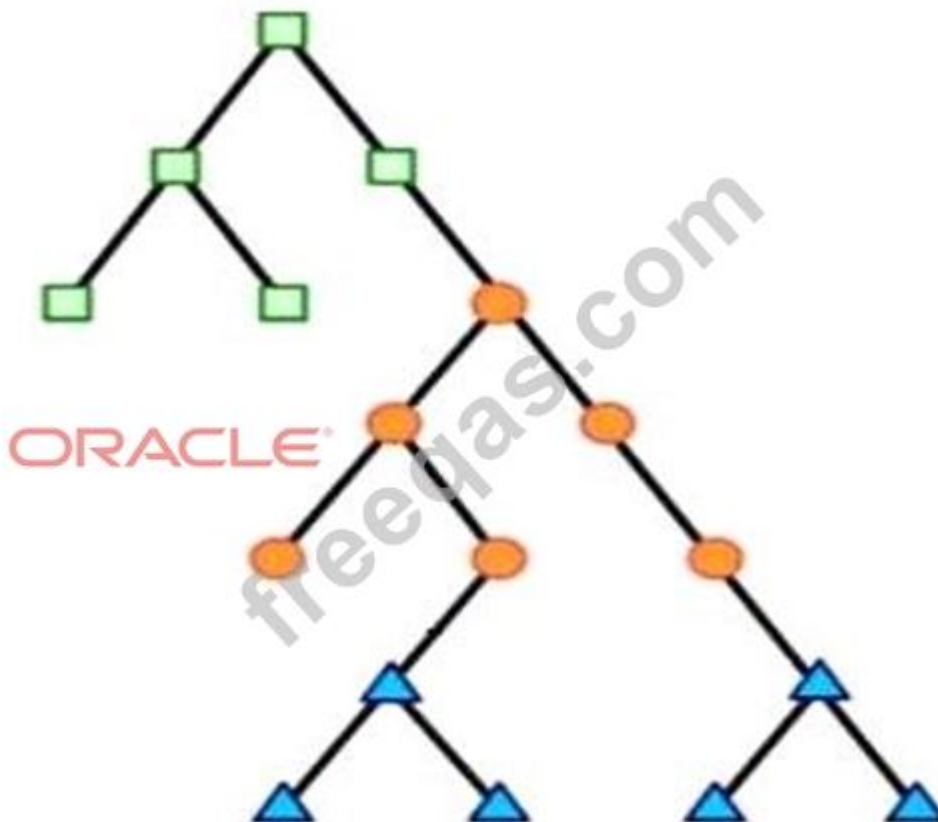

Which two statements are correct about using Collaboration on a Policy Modeling project?

- A. Collaboration should be used when there are multiple users working on a project at the same time, because it avoids conflicts between user changes by immediately being aware of areas that others are working on.
- B. Collaboration does not allow reuse of a project's assets, because projects stored in the repository cannot be reused as project inclusions in other policy modeling projects.
- C. Collaboration reduces the productivity of policy authoring for any project with more than one person.
- D. Collaboration prevents any change from being reverted before upload, thus ensuring only valid versions are uploaded.
- E. Collaboration improves productivity in a multiuser environment by incorporating and merging certain changes made by different users.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 4

You wrote rules represented conceptually by the following rule diagram:

You build and run your entire set of rules in the Debugger.

Which two methods can you use to test only the subset of five rules represented by the five black lines connecting the attributes shown as orange circles?

- A.** Set values for the lowermost blue triangle attributes via the data tab and then view the decision report for the uppermost green square attribute.
- B.** Investigate the uppermost green square attribute via the data tab and then set values for the lowermost orange circle attributes in the decision tab.
- C.** Set values for the lowermost orange circle attributes via the data tab and then view the decision report for the uppermost green square attribute.
- D.** Set values for the lowermost orange circle attributes via the data tab and then view the decision report for the uppermost orange circle attribute.
- E.** Investigate the uppermost orange circle attribute via the data tab and then set values for the base shown in the decision tab.
- F.** Investigate the uppermost orange circle attribute via the data tab and then set values for the lowermost orange circle attributes via the decision tab.
- G.** Set values for the lowermost blue triangle attributes via the data tab and then view the decision report for the uppermost orange circle attribute.

Answer: D,F ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which two statements are correct when designing screens?

- A.** Only attributes with defined names can be used when setting conditional visibility on screens.
- B.** Input controls can be set to display conditionally using the attribute editor in the Data tab.
- C.** You can set an input question to appear based on the value of another Boolean input on the same interview screen.
- D.** If an attribute has a static default value defined, this will always override any dynamic default.
- E.** You can specify an input question should be read-only based on the value of another non-Boolean Value list input on the same interview screen.
- F.** Boolean attributes can be used to set dynamic default values for date or number fields.

Answer: A,F ([LEAVE A REPLY](#))

NEW QUESTION: 6

Which two use cases are suitable for Policy Automation?

- A.** discovering new policy rules through self-learning predictive analytics on previously collected data
- B.** creating an online calculator to determine the amount of a discount or subsidy
- C.** managing the security of customer data in another application
- D.** creating a repository for storing and cataloging policy manuals
- E.** providing interactive advice on who may be eligible for a product or benefit
- F.** routing incidents and tasks to appropriate team members

Answer: A,F ([LEAVE A REPLY](#))

NEW QUESTION: 7

You have an interview screen that collects the attribute "the person's age in years". Your customer requires that an error message be displayed if "the person's age in years" is less than 0 or greater than 120.

Which option satisfies this requirement?

- A. Set the minimum and maximum values in validation rules. Set the error message text on the Project tab.
- B. Set the minimum and maximum values, and the error message text, on the Interview tab.
- C. Set the minimum and maximum values in the Screen Properties. Set the error message text in a validation rule.
- D. Set the minimum and maximum values on the Interview tab. Set the error message text in a validation rule.
- E. Set the minimum and maximum values, and the error message text, in the Edit Attribute dialog box.

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 8

Your policy model has two entities: the applicant (Global) and the applicant's income. What type of relationship does the text "the applicant's primary income" describe?

- A. many-to-many
- B. many-to-one
- C. one-to-many
- D. self-referential one-to-one
- E. one-to-one

Answer: E [\(LEAVE A REPLY\)](#)

NEW QUESTION: 9

Your policy model includes this rule:

the user is a minor if

the user's age < 18

Which two statements are true?

- A. "the user's age" should be a date attribute.
- B. If you use "the user's age" in a Word document without first defining it in Policy Modeling, then the tool will automatically create an attribute and assign a data type.
- C. "the user's age" could be compared to another attribute, "the age of majority", rather than a predefined age.
- D. If you use "the user's age" in a Word document without first defining it in Policy Automation, you will encounter a compilation error.
- E. "the user is a minor" is a number attribute.

Answer: A,D [\(LEAVE A REPLY\)](#)

NEW QUESTION: 10

You are working on a new project with other policy modelers to build an interview where data will be saved to a connected application. Each policy modeler, including yourself, is working from their own machine. Place these development steps in order from first to last step undertaken. If a step is undertaken multiple times, note only the first time the step is taken. Some development steps have been omitted.

- 1: Deploy the project.
- 2: Add the project to a repository.
- 3: Download policy modeling.
- 4: Review the work of other policy modelers.
- 5: View interview usage statistics.
- 6: Map data to the data source.
- 7: Add connections.
- 8: Download changes.
- 9: Log in to the Hub.

- A. 9 > 7 > 3 > 8 > 4 > 6 > 5 > 1 > 2
- B. 2 > 7 > 6 > 3 > 9 > 8 > 4 > 1 > 5
- C. 9 > 2 > 7 > 6 > 3 > 8 > 4 > 1 > 5
- D. 9 > 3 > 7 > 6 > 1 > 5 > 8 > 4 > 2
- E. 9 > 7 > 3 > 2 > 8 > 4 > 6 > 1 > 5

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 11

You just developed a policy model and need to test a discrete portion of the rules without using screens.

Identify the correct process.

- A. Go to Build > Test Data Model and enter the discrete portion of the rules that you want to test and assign values.
- B. Go to Debug > Data > and set the entity and attribute values that you want to test in the Oracle Policy Modeling Debugger window.
- C. Go to Build > Build and Debug and select Build and Debug without screens in the Oracle Policy Modeling Testing window.
- D. Go to Test > Discrete data Sets > and set the entity and attribute values that you want to test in the Rule Testing window.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 12

You are modeling policy material that states, "When the employee is late for work or intoxicated at work, the employee will be issued a formal warning and be required to provide a written explanation of their misconduct." Which two attributes should you create as the two conditions?

- A. the employee is required to provide a written explanation of the employee's misconduct
- B. the employee was intoxicated at work

- C. when the employee is intoxicated at work
- D. when the employee is late for work
- E. the employee will be issued a formal warning
- F. the employee was late for work
- G. the employee will be issued a formal warning and be required to provide a written explanation of their misconduct
- H. the employee was late for work or intoxicated at work

Answer: G,H ([LEAVE A REPLY](#))

NEW QUESTION: 13

You have a project containing an entity (other than the global entity) and want to create a screen to collect all instances of the entity in the interview. You create a new question screen and give it an appropriate name.

What do you do next?

- A. Click New Input and select the containment relationship for the entity.
- B. Click New Input and select any relationship for the entity.
- C. Click New Input and select the identifying attribute of the entity.
- D. Click New Control | Entity Container and select the entity.
- E. Click New Input and select an attribute of the entity.

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 14

You created an entity called "the person". You have written the following rule:

```
the person is eligible if
    the person is homeless or
    the person's score > 2
```

You test your rules in the Debugger with three entity instances of the person:

- Jane is not homeless; Jane's score is 3.
- Bill is homeless; Bill's score is 1.
- Angela is not homeless; Angela's score is 2.

What is the total score of all the persons who are eligible?

- A. Two
- B. Four
- C. One
- D. Five
- E. Three
- F. Zero
- G. Six

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

Refer to the exhibit.

Vacation Guide

Preferences

There are **many different activities** offered by our vacation packages. It's important to understand what people enjoy doing in order to recommend a great package.

Does Jane like adventure sports?
☐ Yes ☐ No

Does Jane like hiking?
☐ Yes ☐ No

Does Jane like shopping?
☐ Yes ☐ No

Does Jane like museums?
☐ Yes ☐ No

Back Next

Identify four features that have been used to enhance this interview screen.

- A. Image control
- B. Explanation
- C. Containers
- D. Substitution
- E. Configured styles
- F. CAPTCHA
- G. HTML

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

You are running multiple policy modeling projects and are using the collaboration and inclusions functionality to ensure consistent screen wording and reuse. You have a "corporate reference" project that contains some standard interview screens used in all Policy Modeling projects for your company.

Your company has had some policy changes and you are required to change the wording and layout on the common screens for all Policy Modeling projects. The changes are required immediately.

How can you achieve this using the minimum number of steps?

- A. Update the corporate reference project in Policy Modeling, then upload the new version to the Hub. Deploy the new version of the corporate reference project and the changes will then be automatically propagated to all other Policy Modeling projects.
- B. Update the corporate reference project and upload the new version to the Hub. Update all of the other projects individually by clicking the Reset button on the Inclusions tab.
- C. Update the corporate reference project and upload the new version to the Hub. Update all of the other projects individually by clicking the Update button on the Inclusions tab.

- D.** Copy the screens from the Corporate project into all of the other Policy Modeling projects individually, and then click the Add button on the Inclusions tab for each project.
- E.** Update the corporate reference project and upload the new version to the Hub. Remove and then add the inclusions for all of the other projects, because inclusions will not merge screens.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 17

Refer to the exhibit.

the customer's discount threshold	
0	The customer is a gold member
\$100	The customer is a silver member
uncertain	otherwise

Assuming "the customer's discount threshold" is an existing currency attribute, which two changes should you make to the rule for it to pass Validation?

- A.** Swap column 1 and column 2.
- B.** Change "the customer's discount threshold" to "the customer's discount threshold is".
- C.** Change "the customer's discount threshold" to "the customer's discount threshold =".
- D.** Change "The customer is a silver member" to OPM - level 1 style.
- E.** Remove the \$ sign.
- F.** Change "otherwise" to OPM - conclusion style.
- G.** Insert quotation marks around "uncertain".

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 18

Which four are valid reasons to split an existing Word document containing rules in your Oracle Policy Modeling project?

- A.** You want to mirror updates to the source material that has divided the source of your rules into two locations.
- B.** You want to add comments and footnotes to your rules.
- C.** Two developers need to work simultaneously on different areas of rules that were originally within the same Word document.
- D.** You want to define screens to run in Oracle Web Determinations.

E. You want to separate rules with different purposes.

F. You want to use the Debugger to test your rules.

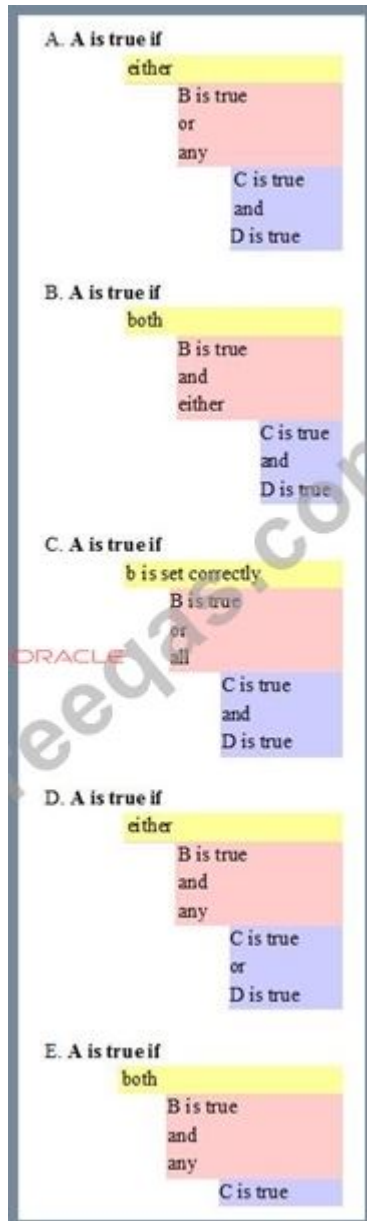

G. Editing the new documents is easier in Microsoft Word because the original document was getting too large.

H. You want to exclude part of the original document from the policy model.

Answer: A,D,E,H ([LEAVE A REPLY](#))

NEW QUESTION: 19

Which three rules will fail validation?

A. Option C

B. Option B

C. Option D

D. Option A

E. Option E

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 20

Refer to the exhibit.

You have removed an entity instance in the Debugger using the Delete instance option shown. You also want to delete the single entity instance belonging to the relationship "the brands" using the same method.

Why can't you do this?

- A. The entity instance can only be removed using the Interview tab in the Debugger.
- B. The entity instance is inferred, and can only be deleted by modifying the rules or attribute values which caused it to be created.
- C. The entity instance is inferred, and can only be deleted using the Decision tab in the Debugger.
- D. At least one entity instance of the relationship "the brands" must be retained.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 21

You have a source material for your policy model that reads as follows:

"Only families who meet the minimum work and education requirement are eligible for the competitiveness credit. A family meets the work and education requirement if all of its members are either gainfully employed or enrolled in a full-time study program. Families in which a member does not meet the requirement but is actively searching for a job can apply for a waiver".

Which statement describes the entity structure that your policy model should have?

- A. The rules will infer the necessary entities by using automatic data types.
- B. Create an entity for "the family member" and an entity for "the family".
- C. Create an entity for "the family member" and use the global entity.
- D. Create an entity for "the family member" an entity for "the family", and an entity for "the minimum work and education requirement".

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which five functions can a user with the single role of Hub Administrator access?

- A. downloading Oracle Policy Modeling
- B. changing their own password
- C. disabling another user's account
- D. changing web service API access
- E. deactivating a deployed project
- F. creating a web service connection
- G. adding a project to a repository
- H. deploying a project snapshot

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

A student admissions system must capture multiple study preferences for a prospective student. Each preference includes a preferred campus. If the student is electing to study at the Sydney campus, then the student should be asked accommodation questions.

Which condition should you use to conclude that "the student should be asked the accommodation questions"?

- A. Exists (the preferences, the preference's campus = "Sydney")
- B. InstanceCount (the preferences, the preference's campus) = "Sydney"
- C. InstanceEquals (the preferences, the preference's campus) = "Sydney"
- D. Exists (the preferences, the preference's campus) = "Sydney"
- E. ValueAt (the preferences, the preference's campus = "Sydney")

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

The policy model you are creating will be used by developers to automate decisions by calling the OPA Determinations API Assess Service.

Which elements of the project data model must be given names?

- A. attributes and entities only
- B. attributes, entities, and relationships only
- C. attributes and relationships only
- D. attributes, entities, relationships, and screens only
- E. attributes, entities, relationships, screens, and forms only
- F. attributes, entities, and screens only
- G. attributes only

Answer: F ([LEAVE A REPLY](#))

NEW QUESTION: 25

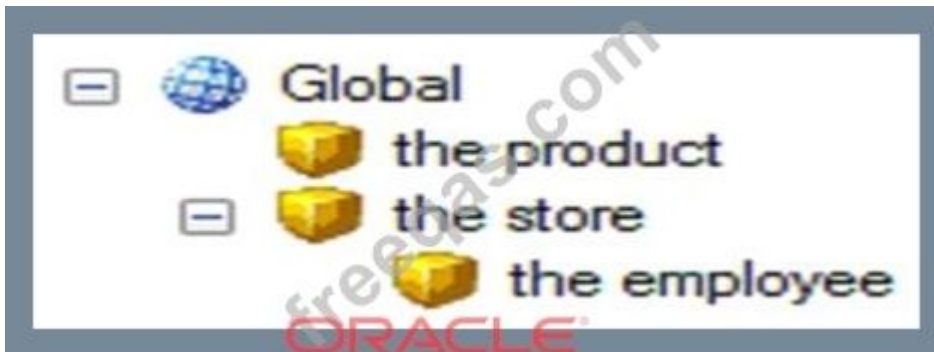

What is the purpose of an interview goal?

- A. to identify the top-level attributes in the policy model
- B. to test the policy model
- C. to drive which screens should be displayed in the interview
- D. to collect data on why the end user is using the interview
- E. to ensure that all necessary data needed to display an explanation has been collected

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 26

Refer to the exhibit.

Assuming that no relationship text has been manually defined or changed, what type of relationship is "all instances of the store"?

- A. a self-referential relationship with the store as both the source and target entity
- B. a reference relationship with the store as the target entity
- C. a containment relationship with Global as the target entity
- D. a containment relationship with the store as the target entity
- E. a reference relationship with Global as the target entity
- F. a containment relationship with the employee as the target entity

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 27

Below is a screen from the Pathfinder sample policy model installed with Policy Modeling:

Higher Education

About You Campus Choices Path Finder

Your Details

Your Details

Next

Your name: *

Residency status: *

Which subject area are you most interested in? *

Any specific discipline?

ORACLE®

Where should you go to change the text "Higher Education"?

- A. Interview tab | About You screen
- B. Interview tab | Styles
- C. Interview tab | Your Details screen
- D. Project tab | Summary

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

You are asked to make a pdf-formatted form available for download at the end of an interview, containing all responses that the user provided during the interview.

Which three steps are required to accomplish this?

- A. Create a form template using BI Publisher containing values referenced from OPA.
- B. Using labels and other controls, re-create the content of the form on the final interview screen.
- C. Add names to the attributes you want to include in the form.
- D. In the Interview tab, add a form control on the final screen.
- E. Add an upload control in your final interview screen.
- F. Link to a pre-made pdf on the final screen of the interview, containing a list of all possible questions that may be posed in the interview.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 29

You are given the following source material.

"The store must comply with the working regulations which are as follows. Employees under the age of 16 on the date they joined the company must not work more than 20 hours in any week. All other employees must not work more than 48 hours in any given week, unless they have chosen to opt out of the Working Time Directive regulations. Note the option to opt out is not available to employees under the age of 21." You have created a policy model from the above source

material, and have created and used all of the attributes below. Your rules include an entity of "the employee".

Which four are the minimal set of input attributes?

- A. the store compiles with the working regulations
- B. the date the employee joined the company
- C. the employee has worked more than 48 hours in the week
- D. the employee has opted out of the Working Time Directive regulations
- E. the employee's date of birth
- F. the employee was aged under 16 on the date they joined the company
- G. the number of hours the employee has worked in the week
- H. the interview is complete
- I. the employee is eligible to opt out of the Working Time Directive regulations

Answer: B,C,D,E,I ([LEAVE A REPLY](#))

NEW QUESTION: 30

You are creating an online advice tool to help students work out if they may be eligible for a subsidy on textbooks. Your customer has this requirement for the final interview screen:

Display the bookstore's address, but only if the student is eligible for the subsidy and the application date is after 1 January 2017.

Which three steps satisfy this requirement?

- A. Create an attribute rule concluding "the bookstore's address should be displayed" is true if "the student is eligible for the subsidy" and "the application date > 2017-01-01".
- B. Attach the visibility rule to the screen control containing the bookstore's address.
- C. Attach the attribute 'the student is eligible for the subsidy' to the screen control containing the bookstore's address.
- D. Attach the visibility rule to the bookstore address attribute in the Data tab.
- E. Create an attribute containing the bookstore's address.
- F. Create a screen label containing the bookstore's address.

Answer: A,E,F ([LEAVE A REPLY](#))

NEW QUESTION: 31

Which action creates a shared version of a project for two policy modelers to work on together?

- A. Project tab | Deploy snapshot
- B. Project tab | Share a copy of this project
- C. Project tab | Inclusions | Add
- D. Project tab | Upload changes
- E. Project tab | Add project to repository
- F. Project tab | Open project from Hub
