NEW QUESTION: 1

New: An electric utility is starting an Advanced Meter Infrastructure (AMI) roll-out for their residential customers. The initial plan is to roll out devices from their manufacturer with potentially three different device models. The customer has not decided what head-end systems they will use to communicate with these devices. Based on the customer's initial roll-out strategy, the devices will have to be configured consistently to support existing tariffs for billing.

Which is a valid consideration to determine the setup of device type administrative data for this implementation?

- A. the device's date of manufacturer
- B. the model number
- C. valid head-end systems, valid device configuration types, and the electricity service type
- D. billing usage rules

Answer: A (LEAVE A REPLY)

NEW QUESTION: 2

For a customer to receive a Subscription communication, what must they have?

- A. an active person contact preference
- B. an active address type preference
- C. an active address contact preference
- D. an active account contact preference

Answer: D (LEAVE A REPLY)

NEW QUESTION: 3

Which three initial measurement data (IMD) exception categories are available when you execute VEE rules?

(Choose three.)

- A. Terminate
- B. Low
- C. Information
- D. Complete
- E. Issue

Answer: A,C,E ([LEAVE A REPLY](#))

NEW QUESTION: 4

Using a base-supplied algorithm type, what is payment distribution priority typically determined by?

- A. Debt Age
- B. Payment Type + Debt Age
- C. Customer Class and Debt Age
- D. Service Agreement Type's Priority and Debt Age
- E. Customer Class and Service Agreement Type

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

What contains the details of how a bill was calculated and how it will be printed on a bill?

- A. Bill
- B. Bill Segments
- C. Service Agreement
- D. Rate Schedule
- E. Calculation Rules

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

When creating a new business object for a service point (SP), what items are required to be able to view and update the new elements associated with the SP?

- A. Display UI Map, Display Map Service Script, and Maintenance UI Map
- B. Maintenance Object, Application Service, and Schema
- C. Schema, Validation Algorithm, and Maintenance UI Map
- D. Validation Algorithm, Post Processing Algorithm, and Lifecycle

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 7

Throughout its lifecycle, an asset's disposition changes as it is moved between locations and service statuses.

Which are valid asset dispositions?

- A. In Receipt; Installed; In Stores; Retired
- B. In Receipt; In Field; In Stores; Retired
- C. Receiving; Installed; Storage; Retired
- D. Receiving; In Field; Storage; Retired

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Which statement correctly describes the relation between a device and a measuring component?

- A. A device can have any combination of interval and/or scalar measuring components.
- B. A device should have only one measuring component type.
- C. A device configuration links a device only to interval channels.
- D. Two measuring components on the same device should have the same Units of Measure (UOM).

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

When the source of a Financial Transaction is canceled, what does it result in?

- A. The source Financial Transaction is deleted and a new reversal Financial Transaction is created.
- B. A new reversal Financial Transaction is created.
- C. No change occurs.
- D. The source Financial Transaction is deleted.
- E. The source Financial Transaction status is changed to "Canceled".

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 10

The base package usage transaction business object is represented by D2-UsageTransaction. The usage calculation engine or process drives the specifics of the usage to be calculated on this business object.

Based on this, which three configuration areas will have an impact on the usage calculation process? (Choose three.)

- A. Usage Rule
- B. Factor Override
- C. VEE rule
- D. TOU map

Answer: A,B,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

As part of the service order processing, the algorithm D1-CNSPINS DV (Connect SP and/or Install Device) determines if a specific activity needs to be created based on the state of the service point.

Based on the status of the service point, what can this algorithm create?

- A. Device
- B. Service Point
- C. Device Configuration
- D. Smart Meter Command

Answer: (SHOW ANSWER)

NEW QUESTION: 12

How should you configure the derived values that are relevant for a device?

- A. Configure the derived values on the Measuring Component for the measuring components to be defined on the device.
- B. Configure the derived values on the Measuring Component Type for the measuring components to be defined on the device.
- C. Configure the derived values on the Device Type for the derived values to be defined on the device.
- D. Configure the derived values on the Final Measurement Type for the measuring components to be defined on the device.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 13

How many Tenders can a Payment Event have?

- A. one Tender for each form of Payment submitted
- B. one Tender per Payment Event
- C. one Tender for each account the payment is applied to
- D. no Tenders for Payment Events, only Payment Segments
- E. no Tenders for Payment Events, only Payments

Answer: A (LEAVE A REPLY)

NEW QUESTION: 14

Which three statements are true about the different types of measuring components?

(Choose three.)

- A. Seconds-per-interval (SPI) is one of the attributes of scalar measuring components.
- B. The measuring component types are physical, standalone, scratchpad, and TOU.
- C. Only physical measuring components reference a device configuration.
- D. Scalar measuring components contain a single measurement for an arbitrary period of time.
- E. The terms register and channel are synonyms for measuring component.

Answer: B,D,E (LEAVE A REPLY)

NEW QUESTION: 15

How many devices can be installed at a service point at an instance in time?

- A. up to three devices
- B. one for each measuring component
- C. one for each service type
- D. exactly one device

Answer: D (LEAVE A REPLY)

NEW QUESTION: 16

A Service Order Orchestrator determines the steps required to complete the service. As an example, based on the state of the service point, what does the Enable Service Orchestrator determine the actions for?

- A. Create a Service Point; Install a Device; Turn on the Device
- B. Connect the Service Point; Install a Device; Turn on the Device
- C. Create a Device Configuration; Install a Device; Turn on the Device
- D. Connect the Service Point; Install a Device; Create a Usage Subscription

Answer: A (LEAVE A REPLY)

NEW QUESTION: 17

You are configuring a VEE group to include rules to be executed when loading the initial measurement data (IMD).

What is the VEE group directly associated with?

- A. Device Configuration Type
- B. Usage Type
- C. Device Type
- D. Measuring Component Type
- E. Device Type and Measuring Component Type

Answer: A (LEAVE A REPLY)

NEW QUESTION: 18

Your client has installed scalar devices to measure the solar energy generated (Export) and the energy received (Import) from the National Grid. This data is stored in separate measuring components (registers).

The validation rules are generally the same for both measuring components, but there is one exception. The Negative Consumption check applies only to energy received (import). Which two are possible configurations resulting in the Negative Consumption rule being checked for energy received (import) only? (Choose two.)

- A. Use Eligibility Criteria.
- B. Remove the Negative Consumption check from the VEE group.
- C. Modify the base VEE rule.
- D. Create two different VEE groups.
- E. Use the Skip Flag in the VEE rule.

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 19

How many bill segment-related financial transactions do pay plans have?

- A. one
- B. unlimited
- C. none
- D. depends on the number of payments that is part of the pay plan
- E. depends on the number of bills that will contain the customer's pay plan commitments

Answer: E (LEAVE A REPLY)

NEW QUESTION: 20

Which four statements correctly describe what a Service Agreement Type controls? (Choose four.)

- A. It controls where the bill is to be sent.
- B. It controls the Late Payment Charge Calculation Method.
- C. It controls debt age.
- D. It controls the Service Type to be billed.
- E. It controls the valid Rates that can be applied to the service agreement type.

Answer: B,C,D,E (LEAVE A REPLY)

NEW QUESTION: 21

What can cause multiple bill lines for a rate component to be produced in a bill calculation header?

- A. changes in Rate Version Calculation Group and Bill Factor
- B. change in Rate Version Calculation Group
- C. changes in Rate Schedule and Bill Factor
- D. change in Rate Schedule
- E. change in Bill Factor

Answer: (SHOW ANSWER)

NEW QUESTION: 22

What happens when a device's measuring components are reconfigured (a new measuring component will be read) at a service point?

- A. The original installation event is updated with the "removal" (expire old device configuration) and a new installation event is created to "install" (new device configuration).
- B. A device with a new configuration type is created. Moreover, a new installation event is created to "install" (new device configuration).
- C. The original installation event is updated with the "removal" (expire old device configuration).
- D. A new installation event is created to "install" (new device configuration).
- E. A device with a new configuration type is created.

Answer: (SHOW ANSWER)

NEW QUESTION: 23

What can cause a bill segment to have multiple bill calculation headers?

- A. proration at Calculation Rules level
- B. proration at Bill Factor level
- C. multiple service agreements being covered by a bill segment
- D. multiple Scheduled Read Dates covered by the bill period
- E. multiple Rate Version Calculation Group

Answer: B (LEAVE A REPLY)

NEW QUESTION: 24

When you cancel a payment, what will the system automatically do?

- A. charge a NSF Fee for the payment cancellation
- B. cancel all tenders associated with the payment
- C. impact the credit rating
- D. generate a new Financial Transaction to reverse the original Financial Transaction

Answer: A (LEAVE A REPLY)
