NEW QUESTION: 1

Which two are the minimum prerequisites to launch a DB system?

- A. Public key in OpenSSH format
- B. Virtual Cloud Network with default service gateway
- C. Dynamic Routing Gateway
- D. Private key in OpenSSH format
- E. Virtual Cloud Network with default security list

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Which three are PaaS services?

- A. Oracle Enterprise Performance Management Cloud
- B. Data Integration Platform Cloud
- C. Oracle Analytics Cloud
- D. Big Data Cloud
- E. Oracle Tax Reporting Cloud

Answer: B,C,D ([LEAVE A REPLY](#))

<http://www.oracle.com/us/corporate/contracts/paas-iaas-universal-credits-3940775.pdf> Eligible

Oracle PaaS Cloud Services The current eligible Oracle PaaS Cloud Services categories include:

- * Analytics Cloud Services
- * Application Development Cloud Services
- * Big Data Cloud Services
- * Content and Experience Cloud Services
- * Data Integration Cloud Services
- * Data Management Cloud Services
- * Enterprise Integration Cloud Services
- * Management Cloud Services

* Security and Identity Cloud Services

NEW QUESTION: 3

You want to enable the EM Express console for a database in the DB system. Which procedure/function would you use?

- A. DBMS_XDB_CONFIG.SETLISTENERENDPOINT
- B. DBMS_XDB_CONFIG.GETHTTPSPORT
- C. DBMS_XDB_CONFIG.SETHTTPSPORT
- D. DBMS_XDB_CONFIG.GETHTTPPORT

Answer: C (LEAVE A REPLY)

<https://www.oracle.com/technetwork/database/manageability/emx-intro-1965965.html>

NEW QUESTION: 4

What are the three autonomous optimizations available in Autonomous Data Warehouse database?

- A. parallel joins and aggregations
- B. columnar data formats
- C. row data formats
- D. fast complex analytics
- E. data caching to avoid IO

Answer: A,B,D (LEAVE A REPLY)

<https://blogs.oracle.com/database/what-to-expect-from-oracle-autonomous-transaction-processing>

NEW QUESTION: 5

You want to launch a DB system that is less expensive and can be used for test and dev environments. Which type of DB system would satisfy the requirement?

- A. Autonomous transaction processing
- B. Bare metal DB system
- C. Exadata DB system
- D. VM DB system

Answer: (SHOW ANSWER)

NEW QUESTION: 6

Which three are the basic security considerations for using any application securely?

- A. Use the default password allocated by the administrator while creating an account.
- B. Review user privileges to determine relevance to current work requirements.
- C. Ensure that different applications have separate Virtual Cloud Networks (VCN).
- D. Establish who should access which system components and how often, and monitor those components.
- E. Keep up-to-date on security information and apply all the security patches.

Answer: B,D,E (LEAVE A REPLY)

https://docs.oracle.com/cd/E66029_01/doc.732/e66033/sec_overview.htm#ITGSC108 Basic Security Considerations The following principles are fundamental to using any application securely:

Keep software up to date. This includes the latest product release and any patches that apply to it.

Limit privileges as much as possible. Users should be given only the access necessary to perform their work. User privileges should be reviewed periodically to determine relevance to current work requirements.

Monitor system activity. Establish who should access which system components, how often they should be accessed, and who should monitor those components.

Install software securely. For example, use firewalls, secure protocols (such as SSL), and secure passwords. See "Performing a Secure Network Integrity Installation" for more information.

Learn about and use Network Integrity security features. See "Implementing Network Integrity Security" for more information.

Use secure development practices. For example, take advantage of existing database security functionality instead of creating your own application security. See "Security Considerations for Developers" for more information.

Keep up to date on security information. Oracle regularly issues security-related patch updates and security alerts. You must install all security patches as soon as possible from the Oracle Technology Network web site:

<http://www.oracle.com/technetwork/topics/security/alerts-086861.html>

NEW QUESTION: 7

Which three statements are true about using Oracle Cloud Infrastructure?

- A. provides high availability and scalability
- B. supports VM and bare metal DB systems only
- C. supports bare metal DB systems only
- D. provides complete life cycle automation
- E. runs everything from small VMs to a large bare metal cluster

Answer: A,D,E (LEAVE A REPLY)

NEW QUESTION: 8

Which two statements are true about the regions and availability domains (AD)?

- A. OCI is hosted in one region with multiple availability domains.
- B. A region can have only one AD for disaster recovery capability.
- C. Regions provide disaster recovery capability.
- D. OCI is hosted in multiple regions and multiple availability domains.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 9

Which Oracle database editions and versions are supported on bare metal DB systems?

- A. all database editions and DB versions starting from 11.2
- B. all database editions and all versions
- C. all database editions and versions starting from 12c
- D. all database editions and versions starting from 18c

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Which is the default choice for the DNS names resolution for the instances in your VCN?

- A. Custom Resolver
- B. Internet Gateway
- C. Internet and VCN Resolver
- D. Dynamic Routing Gateway

Answer: C ([LEAVE A REPLY](#))

DEFAULT CHOICE: INTERNET AND VCN RESOLVER

This is an Oracle-provided option that includes two parts:

Internet Resolver: Lets instances resolve hostnames that are publicly published on the internet.

The instances do not need to have internet access by way of either an internet gateway or a connection to your on-premises network (such as an IPSec VPN connection through a DRG).

VCN Resolver: Lets instances resolve hostnames (which you can assign) of other instances in the same VCN. For more information, see About the DNS Domains and Hostnames.

<https://docs.cloud.oracle.com/en-us/iaas/Content/Network/Concepts/dns.htm#choices>

NEW QUESTION: 11

You created a new PDB in a VM DB system and while creating a tablespace in the PDB an error is returned:

ORA-28374: typed master key not found in wallet.

What could be the possible reason?

- A. Entry for the TDE wallet in the sqlnet.ora is missing.
- B. TDE wallet is corrupted or lost.
- C. Master key encryption is not activated for the new PDB.
- D. TDE wallet does not exist.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 12

Examine the steps to create a backup using CLI:

1. Log in to DB system with `opc` user and `sudo` to root user.
2. Log in to DB system with `opc` user and `sudo` to oracle user.
3. Get the ID of the database.
4. Create a backup configuration.
5. Get the ID of the backup configuration.
6. Associate the backup config ID with the database ID.
7. Create the database backup.

ORACLE

Identify the required steps in correct order.

- A. 1,4,3,5,6,7
- B. 2,3,4,5,6,7
- C. 2,4,3,5,6,7
- D. 1,3,4,5,6,7

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

You want to connect to a DB system with SSH using putty from a Windows machine. Which two are the prerequisites?

- A. Public key
- B. OCID
- C. Listener port number
- D. Private key
- E. Public IP of the DB system

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

Examine the command:

```
dbcli describe-component
```

What information will you get by executing this command?

- A. displays all the components related to the Object Storage
- B. displays the latest patch available for the DB system
- C. displays all the storage objects created
- D. displays the installed patch versions for the DB system

Answer: D ([LEAVE A REPLY](#))

<https://docs.cloud.oracle.com/en-us/iaas/Content/Database/References/dbacli.htm> Use the dbcli describe-component command to show the installed and available patch versions for the server, storage, and/or database home components in the DB system.

NEW QUESTION: 15

Examine the command:

```
[root@dbsys ~]# dbcli update-database -bi 78a2a5f0-72b1-448f-bd86-cf41b30b64ee -i 71ec8335-113a-46e3-b81f-235f4d1b6fde
```

Which statement is true about the execution of the command?

- A. associates the configuration ID with the database ID
- B. updates the DB system with the latest CLI commands
- C. recovers the incremental level 0 backup with the incremental level 1 backup
- D. associates the backup job ID with the database ID

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

In your company there are two teams working on different projects with different instances and storage but a single VCN is used.

Which service will help you in restricting the users from accessing the other teams instances?

- A. Infrastructure Monitoring Cloud Service
- B. Configuration and Compliance Cloud Service
- C. Security Monitoring and Analytics Cloud Service
- D. Identity and Access Management service

Answer: B (LEAVE A REPLY)

NEW QUESTION: 17

Examine the steps to enable a port on the DB system.

```
1. Log in as sys and then sudo to the root user.
2. Log in as sys and then sudo to the oracle user.
3. Execute the command: iptables -I INPUT 6 -p tcp -m state --state NEW -m tcp --dport 5500 -j ACCEPT -m comment --comment 'Required for EM Express.'
4. Execute the command: service iptables status
5. Execute the command: iptables-save > /tmp/iptables.orig
6. Execute the command: /sbin/service iptables save
7. Update the DB system's security list.
```

Identify the required steps in the correct order.

- A. 2,5,3,4,6,7 :
- B. 1,5,3,4,6,7
- C. 2,3,5,6,4,7
- D. 1,3,5,6,4,7

Answer: (SHOW ANSWER)

NEW QUESTION: 18

Which type of DB system(s) would provide Instance isolation?

- A. Exadata DB systems only
- B. Bare metal DB systems only
- C. Virtual Machine DB systems only
- D. Bare metal and virtual machine DB systems

Answer: (SHOW ANSWER)

NEW QUESTION: 19

What are the three autonomous optimizations available in Autonomous transaction processing database?

- A. row data formats
- B. columnar data formats
- C. creates missing indexes
- D. data caching to avoid IO
- E. fast complex analytics

Answer: A,C,D ([LEAVE A REPLY](#))

NEW QUESTION: 20

Which two statements are true about OCI load balancing service?

- A. It is a public regional service available in one availability domain.
- B. It supports SSL offloading, SSL termination, SSL end to end, and SSL tunneling.
- C. It distributes the large amounts of traffic to multiple back end servers in a VCN.
- D. It supports TCP and HTTP/2 protocols only.

Answer: B,D ([LEAVE A REPLY](#))

<https://docs.cloud.oracle.com/en-us/iaas/Content/Balance/Concepts/balanceoverview.htm>

NEW QUESTION: 21

You administer a database that is configured in ARCHIVELOG mode. A full RMAN backup exists. In which two scenarios is RMAN incomplete recovery required?

- A. if the data file of an UNDO tablespace that is in use is lost
- B. if a copy of the multiplexed control file is lost
- C. if SYSTEM tablespace data file is lost
- D. if all members of the CURRENT online redo log group are lost
- E. if all members of an ACTIVE online redo log group are lost when attempting to open the database

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 22

What is the use of port 6200 on a DB system?

- A. Oracle Enterprise Manager Database Console
- B. EM Express Console
- C. Oracle High Availability Services
- D. Oracle Notification Services (ONS)

Answer: D ([LEAVE A REPLY](#))

https://docs.oracle.com/cd/E11882_01/install.112/e41962/ports.htm#RILIN1179

NEW QUESTION: 23

Which three are true about Transparent Data Encryption (TDE)?

- A. dbcli update_tdekey command is used to update the master encryption key for a PDB.

- B. TDE allows you to encrypt sensitive data in individual columns.
- C. TDE overrides access controls configured using Oracle Database Vault.
- D. When the TDE master encryption key is reset, backups taken using the old TDE master encryption key become obsolete.
- E. Set encrypt new table spaces parameter to false to stop encrypting the tablespaces.
- F. TDE stores the master key outside the database in an external security module.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 24

Which two important factors need to be considered while configuring a DB system?

- A. Transparent Data Encryption
- B. Service Gateway
- C. Network Time Protocol
- D. Dynamic Routing Gateway
- E. Cluster Time Synchronization Service

Answer: A,C ([LEAVE A REPLY](#))
