### NEW QUESTION: 1

There is a QlikView document with separate "City" and "State" fields A system administrator needs to create

separate QVW documents each with a singular "City and State" field.

Which method should the system administrator use?

- A. Loop and reduce by "City and State"
- B. Concatenate "City" and "State" then loop and reduce by "City and State"
- C. Loop and reduce by "City" only
- D. Concatenate "City" and "State" then loop and reduce by "City and State" bookmark

**Answer: C ([LEAVE A REPLY](#))**

### NEW QUESTION: 2

A system administrator needs to create a QlikView Publisher task that triggers the execution of a Windows

batch file on successful reload of a QlikView document.

Which task should the administrator create?

- A. A Loop and Reduce task
- B. A Reload only task
- C. An Event Driven Execution (EDX) triggered task
- D. An External Program Supporting task

**Answer: ([SHOW ANSWER](#))**

### NEW QUESTION: 3

A system administrator has a QlikView Server cluster environment. The administrator needs to configure the

load balance method to direct clients to the least busy QlikView Server.

Which setting should the administrator adjust?

- A. Loaded Document
- B. CPU with RAM Overload
- C. Server Cluster Name
- D. Random

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 4**

A system administrator needs to deliver QlikView Data (QVD) files to developers to create new QVW files.

The QlikView deployment includes QlikView Publisher.

How should the administrator meet this requirement?

- A. Create a new QVW that includes the STORE command in the load script, then configure a reload/distribution task from this
- B. Use the QVD Creation feature on the Supporting Tasks QMC page to create a new QVD file then distribute the QVD to the developers
- C. Add the STORE command to the load script in an existing QVW file, then provide the QVD location to the developers
- D. Use the Database Command feature on the Supporting Tasks QMC page to create a new QVD file then distribute the QVD to the developers

**Answer: D (LEAVE A REPLY)**

#### **NEW QUESTION: 5**

A user needs access to a QlikView document for which security is controlled using Section Access.

A system administrator adds the user to the data source that is loaded into the Section Access table of the QlikView document.

However the user is still unable to access the QlikView document.

What should the administrator do?

- A. Reload and distribute the QlikView document
- B. Add the user to the QlikView Administrators group
- C. Create a task configured to reduce the data and then distribute the QlikView document to the user
- D. Restart the QlikView Directory Services Connector service

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 6**

A QlikView Server deployment with QlikView Publisher license has been deployed on a single server. When the system reloads a specific QlikView document, users experience decreased performance while viewing QlikView documents. The system administrator determines that the QlikView document was developed correctly.

What should the administrator do to improve the performance of the system?

- A. Create a cluster of at least two QlikView Distribution Services
- B. Create a cluster of at least two QlikView Servers
- C. Shorten the reload time of the document
- D. Install the QlikView Distribution Service on another server

**Answer: C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 7**

A system administrator finds this error message in the event log file:  
500 Warning WorkingSet: Virtual Memory is growing beyond parameters - 22.761(22.393) GB

Which is the cause of the error?

- A. QlikView Server memory is above the Low limit for the Working Set
- B. QlikView Server memory is above the Cache limit for the Working Set
- C. QlikView Server memory is below the Low limit for the Working Set
- D. QlikView Server memory is above the High limit for the Working Set

**Answer: D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 8**

A system administrator wants to set the value of a variable in a Source Document in the task reload. Which option should the administrator use?

- A. Distribute > Load Field in Document > Destination
- B. Reduce > Reduce By Field Value
- C. Reload > Script Parameters
- D. Reduce > Loop and Reduce

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 9**

A system administrator needs to configure IIS to allow any user to access QlikView content. What should the administrator do?

- A. Disable Anonymous Authentication and enable Windows Authentication on the QlikView virtual paths

**B.** Enable Anonymous Authentication and disable Windows Authentication on the QlikView virtual paths

**C.** Disable Anonymous Authentication on the QlikView virtual paths

**D.** Change the QlikView IIS application pool identity to the local administrator

**Answer: A (LEAVE A REPLY)**

#### **NEW QUESTION: 10**

A company has three QlikView developers who lease QlikView Desktop licenses from QlikView Server, two

business analysts who access five QlikView documents on a daily basis, and a supervisor who accesses a

specific QlikView document every day.

Which CALs should be assigned to meet these requirements?

**A.** 5 Named User CALs and 1 Document CAL

**B.** 3 Named User CALs, 2 Document CALs and 1 Session CAL

**C.** 3 Named User CALs and 10 Document CALs

**D.** 2 Named User CALs, 3 Document CALs and 1 Session CAL

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 11**

A system administrator needs to add resilience redundancy and increase capacity of a QlikView Distribution

Service (QDS) What should the administrator do?

**A.** Install license and configure additional QlikView Server nodes in a QlikView Server Cluster

**B.** Install, license and configure additional QDS nodes in a QDS Cluster

**C.** Add more CPU and memory resources to the server running the QDS

**D.** Add more free disk space to the server running the QDS

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 12**

In a new QlikView Server installation a system administrator checks that all the QlikView services have been

installed The Windows Services console shows five QlikView services are up and running. However, in the

QMC. under Status > Services, only four services are listed

Why are only four services shown in the QMC?

**A.** The QlikView Server is not licensed

**B.** The fifth service will appear after its 24 hour quarantine period.

**C.** The system administrator has performed a custom installation

**D.** The QlikView Publisher is not licensed

**Answer: D (LEAVE A REPLY)**

**NEW QUESTION: 13**

The QlikView Distribution Service fails to allocate a QlikView Batch (QVB) engine. The system administrator needs to monitor the QlikView Publisher for 24 hours to determine if the current QlikView Publisher schedule has over-allocated QVB engines.

Which two tools should the administrator use? (Select two )

- A. Microsoft Performance Monitor
- B. QlikView Governance Dashboard
- C. Microsoft Task Manager
- D. Wireshark
- E. HTTP Watch

**Answer: B,C (LEAVE A REPLY)**

**NEW QUESTION: 14**

When configuring QlikView Server to integrate with Microsoft IIS which QlikView service should be

installed on the Microsoft IIS server?

- A. QlikView Settings Service
- B. QlikView Publisher Service
- C. QlikView Redirect Service
- D. QlikView Webserver Service

**Answer: D (LEAVE A REPLY)**

**NEW QUESTION: 15**

Which two file formats or databases are supported for the QlikView Publisher Repository? (Select two.)

- A. CSV
- B. MySQL database
- C. MS SQL database
- D. XML
- E. NoSQL database

**Answer: C,D (LEAVE A REPLY)**

**NEW QUESTION: 16**

A QlikView Server is using more than 93% of its total memory. Users report slow performance when working within a QlikView document. The Working Set Low value is 70% and the Working Set High value is 90%.

What is causing the performance issue on the server?

- A. The Object Calculation Time Limit has been reached
- B. The QlikView Server has begun to drop cached results from memory
- C. The QlikView Server PGO files have been removed
- D. The QlikView Server swapped physical RAM to virtual memory

**Answer: (SHOW ANSWER)**

#### **NEW QUESTION: 17**

A system administrator needs to open a support case for an issue related to QlikView Distribution Service task

failures. The administrator gathers the appropriate QlikView document and task log files for support staff to analyze.

What additional information should the administrator provide for support staff to ensure optimum response and resolution time?

- A. Example QlikView data files (QVDs)
- B. Example QlikView documents
- C. Meta files related to the failing QlikView documents
- D. QlikView system information

**Answer: B (LEAVE A REPLY)**

#### **NEW QUESTION: 18**

A system administrator upgrades to QlikView 12. Tasks no longer start or trigger. The administrator uses

Windows Task Manager to look at the environment and notices the overall CPU usage is above 75%.

Which QVDistributionService.exe.config setting should be changed to allow tasks to start?

- A. Adjust the QvbWaitTimeoutMinutes value from the default value of 45 to 85
- B. Adjust the CpuOverLoadLimit value from the default value of 75 to 85
- C. Adjust the MemoryOverloadLimit value from the default value of 90 to 85
- D. Adjust the FileSizeInMbToCheckForFullDisc value from the default value of 20 to 85

**Answer: (SHOW ANSWER)**

**NEW QUESTION: 19**

A system administrator is configuring a two node QlikView Server cluster and will install QlikView Publisher

on its own separate node. The configuration of services is as follows:

Node A QlikView Server service, QlikView Management service Node B QlikView Server service, QlikView

Management service Node C QlikView Distribution service QlikView Settings service

QlikView Directory

Service Connector service.

Which part of this configuration does NOT conform to best practices?

- A.** Running two simultaneous QlikView Management services on separate nodes
- B.** Running the QlikView Server service and QlikView Management service on the same node
- C.** Running the QlikView Distribution service and the QlikView Directory Service Connector service on the same node
- D.** Running two simultaneous QlikView Server services on separate nodes

**Answer: A (LEAVE A REPLY)**

**NEW QUESTION: 20**

A company has a QlikView developer that needs to license QlikView Personal Edition

Which CAL type

should a system administrator assign to the developer?

- A.** Usage CAL
- B.** Document CAL
- C.** Named User CAL
- D.** Session CAL

**Answer: C (LEAVE A REPLY)**
