### NEW QUESTION: 1

Which header name displays are available in the Report Options menu of the SAP IBP Excel interface? Note:

There are 2 correct Answers to this question.

- A. Caption, as defined in configuration for the default name
- B. Changed member names that the user had created
- C. Full unique name including the dimension and technical name
- D. Business meaning, as defined in configuration

**Answer: C,D (LEAVE A REPLY)**

### NEW QUESTION: 2

You are creating advanced copy operators as part of an SAP IBP solution that is being implemented.

What do you need to be aware of when defining data transfer? Note: There are 2 correct Answers to this question.

- A. Specifying target key figure is mandatory.
- B. Specifying target key figure that is time independent is possible.
- C. Selecting by attribute with option 'contain' is possible.
- D. Specifying source key figure is mandatory.

**Answer: A,D (LEAVE A REPLY)**

### NEW QUESTION: 3

You need to define a new logic for a key figure to drive values from the PERPRODCUSTREGION level to the PERPRODCUST level. Which of the following configuration options are possible for this process?

Note: There are 2 correct Answers to this question.

- A.** Splitting the values from aggregated to detailed level based on stored split-factor key figure
- B.** Splitting the values from aggregated to detailed level using multiplication by the proportions
- C.** Splitting the values from detailed to aggregated level by using copy operator
- D.** Splitting the values from aggregated to detailed level based on time profile attribute

**Answer: A,B ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 4**

Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the Advanced Analytics app?

Note: There are 2 correct Answers to this question.

- A.** Group data.
- B.** Apply filters on your data.
- C.** Merge charts together.
- D.** Open graphics in Excel.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 5**

NO.23 You are redesigning planning for supply chain that is facing the issue of variability. What is the best solution for dampening variability via demand classification?

- A.** SAP IBP for Inventory
- B.** SAP IBP for Demand Driven Replenishment
- C.** SAP IBP for Sales and Operations Planning
- D.** SAP IBP for Demand

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 6**

Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct Answers to this question.

- A.** The total number of attributes that can use subtotals in the planning view can be restricted.
- B.** The total value can be added before or after the selected attribute.
- C.** Only attribute-based totals can be added to the planning view.
- D.** The values of the attribute-based total at the highest attribute level in the planning level can be changed.

**Answer: A,B ([LEAVE A REPLY](#))**

#### NEW QUESTION: 7

You are using the Resource Location master data type. How do you specify capacity supply as time- dependent?

- A. Set the Capacity Supply Time Series indicator attribute as a key.
- B. Maintain the CAPASUPPLY key figure values in the planning area.
- C. Set the Capacity Supply Time Series indicator in the Resource Location master data type.
- D. Set the Capacity Supply additional attribute in the time profile.

**Answer: C ([LEAVE A REPLY](#))**

#### NEW QUESTION: 8

You create an S&OP operator for heuristics on an SAP IBP project. What must you enable for the S&OP operator that is specifically relevant for subnetworks?

- A. Balance Receipts parameter
- B. Normalize Quotas parameter
- C. Compute Expected Supply parameter
- D. Supply propagation

**Answer: C ([LEAVE A REPLY](#))**

#### NEW QUESTION: 9

Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

- A. Production maximization
- B. Resource maximization
- C. Profit maximization
- D. Delivery maximization

**Answer: ([SHOW ANSWER](#))**

#### NEW QUESTION: 10

SAP is transitioning IBP customers to the new process of export/import. What are some of the features of this new process?

Note: There are 2 correct Answers to this question.

- A. You can create a collection of items and export it.
- B. You can move a transported item from one collection to another.
- C. You can choose to import only some of the items that were exported.
- D. You can export from a planning area that is on a different release.

**Answer: B,D ([LEAVE A REPLY](#))**

#### NEW QUESTION: 11

What is a prerequisite for modeling outsourced manufacturers with production capacity?

- A. Model production costs for internal and external production resources to model priority.
- B. Model target inventory and stocks at the outsourced location.
- C. Use production lead times and offsets to manage components at the outsourced location.
- D. Ensure that multiple modes of transportation are set up.

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 12**

Which of the following checks for master data and key figures does the Check Mode algorithm trigger?

Note: There are 3 correct Answers to this question.

- A. It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- B. It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- C. It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- D. It checks whether the sourcing in the Production Source Item Master Data type exists.
- E. It checks whether the required planning level master data exists for a subset of input key figures.

**Answer: B,C,E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 13**

When can filter blocks appear in calculations? Note: There are 2 correct Answers to this question.

- A. When modeling attribute as a key figure
- B. When modeling cross-period calculations
- C. When using IFISNULL statements in the formula
- D. When modeling attribute transformations

**Answer: B,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 14**

You want to restrict value entries outside of a specified range into a key figure. What setting will you use to achieve that goal?

- A. Select Protect Active Worksheet in the About section of SAP IBP tab
- B. IBP -> Lock Selected cells in IBP Formatting Sheet tab
- C. By restricting data input in the Key Figure Configuration app
- D. IBP -> Data Validation in IBP Formatting Sheet tab

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 15**

You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer?

Note: There are 2 correct Answers to this question.

- A. Location Product Sub Cost Rate
- B. Flag 'Disable Substitution of Location Products
- C. Loc-Prod Subst Valid-From Date
- D. Promotion duration

**Answer: C,D (LEAVE A REPLY)**

#### NEW QUESTION: 16

Which property of an attribute will allow it to be used as an attribute as a key figure?

- A. Type DECIMAL
- B. Type TIMESTAMP
- C. Type NAVCHAR
- D. Type INTEGER

**Answer: A (LEAVE A REPLY)**

**Valid C-IBP-2202 Dumps** shared by PrepPdf.com for Helping Passing C-IBP-2202 Exam! PrepPdf.com now offer the **newest C-IBP-2202 exam dumps**, the PrepPdf.com C-IBP-2202 exam **questions have been updated** and **answers have been corrected** get the **newest** PrepPdf.com C-IBP-2202 dumps with Test Engine here:

Dumps, **40%OFF** Special Discount: **Exam-Tests**)

#### NEW QUESTION: 17

Which of the following key functions are supported by SAP IBP for sales and operations?

Note: There are 2 correct Answers to this question.

- A. An advanced demand planning process
- B. A basic demand planning process
- C. Finite resource planning
- D. Manual creation of feasible constrained plans

**Answer: (SHOW ANSWER)**

#### NEW QUESTION: 18

Which features apply to quota violations modeled with the optimizer?

- A. Quotas require sourcing ratios to be maintained.
- B. Min and Max Quotas have to be the same as sourcing ratios.
- C. Quota violation cost is maintained as an attribute as a key figure.

D. Quotas can be modeled for sourcing location, production, and consensus demand.

**Answer: A ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 19**

NO.53 Which calculations can be processed within the pre-processing step in the forecasting model? Note:

There are 2 correct Answers to this question.

- A. Missing Values can be substituted.
- B. Promotion Sales Lift Ups can be deleted.
- C. Rounding can be executed for the sales history.
- D. Correlations can be evaluated.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 20**

Which of the following configuration options are part of the new key figure creation process? Note:

There are 3 correct Answers to this question.

- A. Hiding or displaying totals for the key figure
- B. Enabling planning notes for the key figure
- C. Setting disaggregation logic for the key figure
- D. Setting permitted planning levels
- E. Enabling fixing for the key figure

**Answer: B,C,E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 21**

You are working to realign the data due to a recent warehouse closure. What should you be aware of in regards to configuration of realignment steps? Note: There are 2 correct Answers to this question.

- A. The realignment step status must be set to In Review for it to be executed.
- B. If a realignment step fails, subsequent steps are not processed.
- C. The number of steps in realignment run is limited to 255.
- D. The name of the realignment step should be no longer than 20 characters.

**Answer: ([SHOW ANSWER](#))**

#### **NEW QUESTION: 22**

While modeling costs for optimization, you are conscious of the necessity to respect inventory targets and meet demands in the short term.

Which of the following are valid relationships between costs you must adhere to?

Note: There are 2 correct Answers to this question.

- A. Target inventory violation cost should be greater than discount for demand lateness.
- B. Target inventory violation cost should be less than transportation cost rate.

- C. Target inventory violation cost should be greater than inventory holding cost rate.
- D. Target inventory violation cost should be less than max inventory violation cost.

**Answer: B,C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 23**

You have set up a planning area and data is available. You adjust the necessary time profile settings and run the consistency check.

Which settings can you change and still run a successful consistency check?

Note: There are 2 correct Answers to this question.

- A. Remove an attribute assigned to the time profile level if the attribute is used in a planning level.
- B. Change the description of the attributes in the time profile.
- C. Change the past and future horizon of the levels in the time profile.
- D. Add a new time profile level to the time profile.

**Answer: B,C ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 24**

You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM?

Note: There are 3 correct Answers to this question.

- A. Units of measure are usually not time-dependent.
- B. Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI
- C. Units of measure are usually not time-independent.
- D. Unit of measure is an attribute of a master data type, such as Product.
- E. Analytics provide the user with the option to select the target unit of measure.

**Answer: A,D,E ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 25**

Which of the following are features of lag-based snapshots? Note: There are 2 correct Answers to this question.

- A. Target key figures for these snapshots are exposed to the user in planning views.
- B. Lag-based snapshots are automatically assigned to a snapshot operator.
- C. Lag-based snapshots are created in the Configuration app for a fixed time range.
- D. Target key figures for these snapshots must have lag as a root attribute.

**Answer: B,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 26**

Which of the following approaches could you take to reduce run times of an optimizer?

Note: There are

2 correct Answers to this question.

- A. Avoid using telescopic time buckets.

- B. Split into multiple planning areas to support weekly vs. daily planning needs.
- C. Use a subnetwork ID to reduce the size of the problem.
- D. Increase the use of incremental lot size beyond the frozen horizon.

**Answer: A,C ([LEAVE A REPLY](#))**
