NEW QUESTION: 1

Which are two methods to gather the Horizon Client log bundle? (Choose two.)

- A. At the Command Line use Support.bat.
- B. In the Horizon Client, select About VMware Horizon Client and click Collect Support Data.
- C. Gather the log bundle remotely from the connection server.
- D. Start the Horizon Client with the /supportbundle option.
- E. From the Horizon Help Desk, select generate client log bundle from the session properties.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Drag and drop the Anywhere Workspace components on the left to their respective function on the right.

Anywhere Workspace Component	Function Provided
Workspace ONE UEM	Ensures that the end user devices are in compliance with the organization's IT policies.
Workspace ONE Access	Delivers a virtual desktop and application infrastructure.
VMware Horizon	Provides authentication and conditional access to resources.

Answer:

Anywhere Workspace Component

Workspace ONE UEM

Workspace ONE Access

VMware Horizon

vmware[®] Function Provided

Workspace ONE Access

Ensures that the end user devices are in compliance with the organization's IT policies.

Workspace ONE UEM

Delivers a virtual desktop and application infrastructure.

VMware Horizon

Provides authentication and conditional access to resources.

NEW QUESTION: 3

Refer to the exhibit.

```
C:\Windows\System32\cmd.exe
Set log levels for VMware Horizon (8.3)
Checking the VMware Horizon role this computer plays by examining installed MSIs...
This computer has 'VMware Horizon Agent' installed
Please select a feature.
 1. All
 2. Virtual Channel [DEFAULT]
 3. Agent Core [DEFAULT]
 4. Blast [DEFAULT]
 5. PCoIP [DEFAULT]
 6. VDPService [DEFAULT]
 7. Remote Features
or...
 0. Reset to installation defaults
Choice [blank to exit]:
```

Which command is run to produce the output shown in the exhibit?

- A. C:\Program Files\VMware\VMware Horizon Agent\DCT\support.bat loglevels
- B. C:\Program Files\VMware\VMware View\Agent\DCT\support.bat setlogs
- C. C:\Program Files\VMware\VMware View\Agent\DCT\support.bat loglevels
- D. C:\Program Files\VMware\VMware Horizon Agent\DCT\support.bat setlogs

Answer: C (LEAVE A REPLY)

NEW QUESTION: 4

An administrator wants to leverage Horizon Cloud Service to manage their Horizon on-premises deployment.

What does the administrator need to install to achieve this?

- A. Deploy the Horizon Cloud Connector with a static IP.
- B. Deploy a Unified Access Gateway using DHCP.
- C. Deploy the Horizon Cloud Connector using DHCP

D. Deploy a Unified Access Gateway with a static IP

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 5

Which of the following statements are true about Application Profiler?

A. Application Profiler is installed using VMware Dynamic Environment Manager Enterprise Setup Wizard and explicitly selecting local drive installation.

B. VMware Dynamic Environment Manager Agent and the Application Profiler cannot be installed on the same machine.

C. Application Profiler is installed automatically when installing VMware Dynamic Environment Manager FlexEngine.

D. Application Profiler is installed automatically when installing Dynamic Environment Manager Management Console.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 6

What must be implemented on all Connection Servers for logon segment information to be populated in the Horizon Helpdesk Tool?

A. Vdmadmin -1timingProfiler -enable

B. Vdmadmin -A -d dtpool2 -m machine1 -getstatus

C. Blast Secure Gateway

D. Horizon Helpdesk Agent

Answer: A ([LEAVE A REPLY](#))

<https://www.carlstalhood.com/vmware-horizon-8-connection-server/#timingprofiler>

NEW QUESTION: 7

What is the benefit of using the Browse local Profile feature in the Dynamic Environment Manager to adjust the Import/Export configuration for an application DirectFlex?

A. The registry or filesystem paths do not have to be typed in the editor.

B. The Microsoft Windows users profile configuration can be changed.

C. The Import/Export Config can be deleted from a user profile.

D. It allows backup of the user profile.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

A Horizon administrator has been tasked to deploy an agentless anti-malware solution for their virtual desktops.

What VMware solution is required to achieve the requirement?

A. VMware vRealize Automation

B. VMware vShield Manager

C. VMware vRealize Operations

D. VMware MSX-T with Guest Introspect

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Having configured two standalone Horizon pods, what steps should be taken to join them in a Cloud Pod Architecture (CPA) deployment?

- A. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Cloud entitlements, and add local pool from each pod.
- B. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Cloud Entitlements, and sync pool from each pod.
- C. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Global Entitlements, and add local pools from each pod.
- D. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Global Entitlements, and add local pools from each pod.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 10

What are two Cloud Pod Architecture feature limitations? (Choose two.)

- A. Cloud Pod Architecture does not support Active Directory two-way trusts between domains.
- B. Kiosk mode clients are not supported unless a workaround has been implemented.
- C. Cloud Pod Architecture cannot span multiple sites and data centers simultaneously.
- D. The Cloud Pod Architecture feature is not supported in an IPv6 environment.
- E. Cloud Pod Architecture is not supported with Unified Access Gateway appliances.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 11

An administrator has been tasked by their organization with determining the type of Horizon deployment to use.

These requirements have been provided to the administrator:

Implement quickly the deployment of Windows and Linux desktops.

Provide hybrid cloud support.

Provide centralized brokering.

Ensure the environment is secure from end-to-end.

Which deployment solution meets the requirements?

- A. vSphere Desktop Edition
- B. Workspace ONE Unified Endpoint Management
- C. Horizon On-Premises
- D. Horizon Cloud on Azure

Answer: C (LEAVE A REPLY)

Explanation

The best choice given these options is to setup a CPA on-prem so you have highly available instance. You could also deploy VMware Horizon on Azure which is different than a VMware Horizon Cloud instance.

Guest support for Horizon Cloud: <https://kb.vmware.com/s/article/78170> You would also be able to deploy Horizon in the Azure cloud in a IaaS model and achieve this goal.

<https://docs.microsoft.com/en-us/azure/azure-vmware/azure-vmware-solution-horizon>

NEW QUESTION: 12

An administrator wants to provision a new Golden Image but doesn't see the VM in the list with golden images. Which could be the cause of the issue? (Choose two.)

- A. The golden image VM is not configured with a CD-ROM player.
- B. The golden image was not optimized.
- C. No snapshot was made after optimizing the golden image.
- D. The wrong Guest OS Version was selected when creating the golden image.
- E. There is more than 1 active snapshot on the golden image.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 13

Select the correct command to decommission the Horizon Connection Server replica.

- A. vdmadmin.exe
- B. viewdbchk.cmd
- C. vdmexport.exe
- D. lvmutil.cmd

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 14

Refer to the exhibit.

An administrator schedules the push of a new image to desktop pool and receives the exhibit.

Where should the administrator first look for the cause of the issue?

- A. vCenter Server Administrator Account
- B. Golden Image Active Directory Computer Account
- C. Instant-clone Engine Domain Account
- D. Account used to login to the Horizon Console

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

An administrator has added a support PCI graphics accelerator to a virtual machine configuration. Which the administrator tries to power on the virtual machine, an error is displayed and the virtual machine remains powered off.

Which of the following virtual machine configuration settings needs to be applied to enable the virtual machine to power on?

- A. Reserve all guest memory.
- B. Set Memory Shares to High
- C. Enable Video Card 3D Graphics.
- D. Disable CPU Hot Plug.

Answer: (SHOW ANSWER)

Explanation

"In the same New PCI Device window, reserve all memory when creating the VM by clicking Reserve all memory."

<https://techzone.vmware.com/resource/deploying-hardware-accelerated-graphics-vmware-horizon-7>

NEW QUESTION: 16

An administrator needs to deploy an application to specific users in their instant-clone desktop environment with the following characteristics:

The application needs to be updated very frequently.

The application needs to be installed as soon as possible.

The application is not multi-user aware.

Which solution would meet the requirements?

- A. VMware Thinapp
- B. VMware App Volumes
- C. VMware Dynamic Environment Manager
- D. VMware Horizon Published Application

Answer: D (LEAVE A REPLY)

NEW QUESTION: 17

An administrator wants to ensure users can access an application that uses .NET 3.0 for desktops available on Horizon On-premises and on Horizon Cloud Service on Microsoft Azure.

Which two options would achieve this requirement? (Choose two.)

- A. Create a ThinApp package and provision it with App Volumes.
- B. Install the application on the primary image.
- C. Copy the vhd and .json file to the Azure storage.
- D. Capture the application in App Volumes.
- E. Copy the vmdk and .json file to the Azure storage.

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 18

An administrator is tasked with enabling two-factor authentication for Horizon administrators to login to the Horizon Console. Which option will the administrator use that supports two factor authentications?

- A. SAML
- B. RSA SecureID
- C. RADIUS
- D. Smart Card Authentication

Answer: C (LEAVE A REPLY)

Explanation

<https://docs.vmware.com/en/VMware-Horizon/2203/horizon-console-administration/GUID-42FE829B-C000-4D>

NEW QUESTION: 19

Integration of VMware Horizon resources with Workspace ONE consists of several high-level steps.

Drag and drop the integration steps on the left into the correct sequential order on the right.

<u>Integration Step</u>	<u>Correct Sequence</u>
Create one or more virtual apps collections for the VMware Horizon pods in Workspace ONE Access	Step 1
Configure Workspace ONE Access to use the same AD domain as VMware Horizon	Step 2
Configure the SAML authenticator on the Horizon Connection Server	Step 3
Verify that users see assigned resources in Workspace ONE catalog and when clicked the resource triggers the SAML SSO process	Step 4
Synchronize Horizon AD users to the Workspace ONE Access service using Directory Sync	Step 5

Answer:

<u>Integration Step</u>		<u>Correct Sequence</u>
Create one or more virtual apps collections for the VMware Horizon pods in Workspace ONE Access	Step 1	Create one or more virtual apps collect VMware Horizon pods in Workspace O
Configure Workspace ONE Access to use the same AD domain as VMware Horizon	Step 2	Configure Workspace ONE Access to us AD domain as VMware Horizon
Configure the SAML authenticator on the Horizon Connection Server	Step 3	Synchronize Horizon AD users to the W Access service using Directory Sync
Verify that users see assigned resources in Workspace ONE catalog and when clicked the resource triggers the SAML SSO process	Step 4	Synchronize Horizon AD users to the W Access service using Directory Sync
Synchronize Horizon AD users to the Workspace ONE Access service using Directory Sync	Step 5	Configure the SAML authenticator on tl Connection Server

NEW QUESTION: 20

A Horizon administrator wants to implement Dynamic Environment Manager so that application configuration data is injected when the application is started. Which option would provide this feature?

- A. Application Migration
- B. Group Policies
- C. Triggered Tasks
- D. DirectFlex

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 21

An administrator is tasked with reinstalling a Connection Server replica that has failed to boot.

Drag and drop the procedural steps on the left into the correct order on the right to add the replica back to the Horizon pod with the same name.

<u>Procedural Step</u>	<u>Correct Sequence</u>
Remove replica server from the pod using vdmadmin	Step 1
Power Off the failed replica server	Step 2
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3

Answer:

<u>Procedural Step</u>	<u>Correct Sequence</u>
Remove replica server from the pod using vdmadmin	Step 1
Power Off the failed replica server	Step 2
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3

NEW QUESTION: 22

End-users are complaining that they are frequently being asked for credentials when opening additional apps. Which step should the administrator take to resolve the issue?

- A. Configure a time limit by modifying the Horizon GPO.
- B. Configure Desktop Timeout by modifying the Pool Settings in Horizon Administrator.
- C. Configure SSO Timeout by modifying the Global Settings in Horizon Administrator.
- D. Configure Session Timeout by modifying the Client Settings in Horizon Client.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 23

An administrator needs to upgrade a Unified Access Gateway (UAG) appliance. The UAG is connected to a load balancer with other UAGs and has existing sessions.

Which option provided allows zero downtime for maintenance?

- A. Power off the UAG appliance
- B. Enable Quiesce Mode in the UAG Admin UI.
- C. Suspend the UAG appliance.
- D. Remove the Horizon Connection Server thumbprint in the UAG Admin UI.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 24

Drag and drop the VMware Horizon deployment type on the left to the solution it delivers on the right.

Deployment Type	Solution Delivered
Horizon On-Premises	Centralized Management
Horizon Cloud Service on Microsoft Azure	Quick-provisioning of desktops
Horizon Control Plane	Consumption-Based Pricing

Answer:

Deployment Type	Solution Delivered	
Horizon On-Premises	Horizon Control Plane	Centralized Management
Horizon Cloud Service on Microsoft Azure	Horizon On-Premises	Quick-provisioning of desktops
Horizon Control Plane	Horizon Cloud Service on Microsoft Azure	Consumption-Based Pricing

Explanation

Horizon Control Plane - Centralized Management

On-Prem = Quick Provisioning

Horizon Cloud on Azure = Consumption-based pricing

NEW QUESTION: 25

An administrator is deploying Horizon and wants to enable users to connect from the internet.

What does the administrator need to deploy?

- A. Unified Access Gateway in the DMZ
- B. Replica Connection Server in the DMZ
- C. Security Server in the DMZ
- D. New Horizon Pod in the DMZ

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 26

A junior-level Horizon administrator is not able to see all RDS farms.

Where would a high-level administrator need to make changes to correct the issue?

- A. Global Entitlements
- B. Global Policies
- C. Category Folder
- D. Access Groups

Answer: D ([LEAVE A REPLY](#))

Explanation

"...You configure administrator access to the resources in an access group by assigning a role to an administrator on that access group. Administrators can access the resources that reside only in access groups for which they have assigned roles..."

"...You can use Horizon Administrator to create access groups and to move existing desktop pools to access groups. When you create an automated desktop pool, a manual pool, or a farm, you can accept the default root access group or select a different access group..."

<https://docs.vmware.com/en/VMware-Horizon-7/7.13/horizon-administration/GUID-E89B0429-2DE4-4CF8-845>

NEW QUESTION: 27

Which two databases are supported in horizon 8 for Event Database configuration? (Choose two.)

- A. DynamoDB
- B. MySQL
- C. Microsoft SQL
- D. MariaDB
- E. Oracle DB

Answer: C,E ([LEAVE A REPLY](#))

NEW QUESTION: 28

An administrator used the Horizon Console to specify the Active Directory account for joining instant-clone VMs to the Active Directory domain.

What two permissions must be granted to the Active Directory account to perform this task? (Choose two.)

- A. Create and delete computer objects.
- B. Grant the Global Domain Administrator role.
- C. Grant the Horizon Domain Admin role.
- D. Write properties in the domain or in the organization units.
- E. Grant Inventory Administrator role.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 29

Drag and drop each Horizon console predefined role on the left to its matching function on the right.

Horizon Role	Function
Administrator	Performs all desktop, session, and pool-related operation.
Inventory Administrator	Performs all administrative functions and applies to an Access Group.
Local Administrator	No rights to manage CloudPod or the Global Data Layer.

Answer:

Horizon Role	Function
Administrator	Performs all desktop, session, and pool-related operation.
Inventory Administrator	Performs all administrative functions and applies to an Access Group.
Local Administrator	No rights to manage Cloud Pod or the Global Data Layer.

Explanation

inventory administrator--> Performs all desktop,session, and..

Local Administrator --> No rights to manage Cloud pod or the global...

Administrator --> Performs all administrative functions and applies to an access group.

<https://docs.vmware.com/en/VMware-Horizon-7/7.13/horizon-administration/GUID-ADC0577C-C1EF-485D-81>

NEW QUESTION: 30

What are three valid options to store Horizon events? (Choose three.)

- A. flat files
- B. MS SQL
- C. D82
- D. MYSQL
- E. syslog

Answer: A,B,E (LEAVE A REPLY)

Explanation

<https://docs.vmware.com/en/VMware-Horizon/2006/horizon-installation/GUID-5E3C2EC0-87C3-486A-A5E1-E>

NEW QUESTION: 31

An administrator needs to submit a network change request to have firewall ports opened to allow users to connect to a Horizon environment using RDP via Unified Access Gateway with the minimum number of ports.

Which ports selection meets the requirements?

- A. 80,443
- B. 7443
- C. 443, 3389, 4172
- D. 443
- E. 443, 4172

Answer: C (LEAVE A REPLY)

NEW QUESTION: 32

An administrator is preparing to upgrade Horizon Connection Servers in parallel.

What action must first be performed to ensure that there are no issues with Horizon LDAP replication within the Pod?

- A. Execute repadmin.exe /showrepl localhost:389.
- B. Execute ViewDBChk.cmd --scanMachines.
- C. Execute vdmadmin.exe -s.
- D. Execute vdmexport.exe -f Myexport.LDF.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 33

Which of the following statements are true about Application Profiler?

- A. VMware Dynamic Environment Manager Agent and the Application Profiler cannot be installed on the same machine.
- B. Application Profiler is installed using VMware Dynamic Environment Manager Enterprise Setup Wizard and explicitly selecting local drive installation.
- C. Application Profiler is installed automatically when installing VMware Dynamic Environment Manager FlexEngine.
- D. Application Profiler is installed automatically when installing Dynamic Environment Manager Management Console.

Answer: A (LEAVE A REPLY)

Explanation

<https://docs.vmware.com/en/VMware-Dynamic-Environment-Manager/2209/com.vmware.dynamic.environmen>

NEW QUESTION: 34

Which three Horizon based resources does Unified Access Gateway provide access to? (Choose three.)

- A. virtual desktops
- B. physical desktops
- C. thin client
- D. RDSH-based applications
- E. IOT devices

Answer: A,B,D (LEAVE A REPLY)

Explanation

Virtual (VDI, RDSH desktops), Physical (Blade Workstation/RDSH host) and Published Apps.

NEW QUESTION: 35

Drag and drop the App Volumes components on the left to their matching function on the right.

App Volumes Component

Function Provided

App Volumes Agent

It is used for the assignment of packages and writable volumes.

App Volumes Manager

It runs on a virtual desktop or RDSH server.

Application

It is a collection of packaged versions of programs.

Writable Volume

It is a container of user installed applications.

Answer:

App Volumes Component

Function Provided

App Volumes Agent

Writable Volume

It is used for the assignment of packages and writable volumes.

App Volumes Manager

App Volumes Agent

It runs on a virtual desktop or RDSH server.

Application

Application

It is a collection of packaged versions of programs.

Writable Volume

App Volumes Manager

It is a container of user installed applications.

NEW QUESTION: 36

Which two types of pools can be created in Horizon on Azure VMware Solutions(AVS)? (Choose two.)

- A. full clone
- B. Raw clones
- C. linked clones
- D. Instant-done
- E. Pool clones

Answer: ([SHOW ANSWER](#))

Explanation

<https://techzone.vmware.com/resource/horizon-on-azure-vmware-solution-architecture#nasuni-file-data-platform>

NEW QUESTION: 37

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

Smart Card Authentication Step

Obtain the root certificate from the CA

Prepare the AD for smart card authentication

Configure smart card settings in the VMware Horizon console

Add the root certificate to a server's truststore file

Correct Sequence

Step 1

Step 2

Step 3

Step 4

Answer:

Smart Card Authentication Step

Obtain the root certificate from the CA

Prepare the AD for smart card authentication

Configure smart card settings in the VMware Horizon console

Add the root certificate to a server's truststore file

Correct Sequence

Step 1

Obtain the root certificate from the CA

Step 2

Add the root certificate to a server's truststore file

Step 3

Configure smart card settings in the VMware Horizon console

Step 4

Prepare the AD for smart card authentication

NEW QUESTION: 38

Which two steps must be completed in order to expand a writable volume? (Choose two.)

- A. Specify a size which is at least 1GB larger than the current size of the volume.
- B. Specify a size which is at least 1MB larger than the current size of the volume.
- C. Modify the snapvol.cfg to reflect the new size.
- D. Select Volumes > Writables > Select Volume > Update Writable.
- E. Select Volumes > Writables > Select Volume > Expand.

Answer: A,E (LEAVE A REPLY)

NEW QUESTION: 39

An administrator wants to leverage Horizon Cloud Service to manage their Horizon on-premises deployment. What does the administrator need to install to achieve this?

- A. Deploy the Horizon Cloud Connector with a static IP.

- B. Deploy a Unified Access Gateway with a static IP
- C. Deploy the Horizon Cloud Connector using DHCP
- D. Deploy a Unified Access Gateway using DHCP.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 40

An administrator needs to monitor Connection Server health by using a http request.

Which command is the correct command to use?

- A. GET Error! Hyperlink reference not valid.
- B. GET Error! Hyperlink reference not valid.
- C. GET Error! Hyperlink reference not valid.
- D. GET Error! Hyperlink reference not valid.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 41

An administrator is tasked with allowing managers to request desktops and changes to desktops for their employees.

What VMware solution can be used to meet this requirement?

- A. vRealize Operations
- B. Horizon Automated Pools
- C. vRealize Automation
- D. Horizon Help Desk

Answer: C ([LEAVE A REPLY](#))

Explanation

<https://docs.vmware.com/en/VMware-Horizon-7/7.13/using-vro-plugin-for-horizon/GUID-60AE2989-8D25-4C4> For an end-user enablement, vRealize Orchestrator Plug-in for Horizon integrates with vRealize Automation to provide self-service access to applications and desktops. The plug-in workflows can be integrated with the request and approval processes that are built into the vRealize Automation service catalog, allowing end users to refresh their own desktops. End users can make requests that follow a standardized and auditable process that can result in immediate action, or they can direct their requests for administrative approval. For desktop environments where virtual machines must support rapid change and reuse, end users can provision desktops for themselves and de-provision, or recycle, the desktops to reduce waste of resources and capacity.

NEW QUESTION: 42

A Horizon administrator does not see the health status for the Unified Access Gateways (UAG) they configured in the Horizon Console.

What two options could be causing the issue? (Choose two.)

- A. Another license is needed for UAG health overview.
- B. The pod needs to be added to the Cloud Pod Federation.
- C. The name entered in the Horizon console doesn't match up with the system name in UAG.
- D. The firewall hasn't been configured properly to allow traffic on port 443.
- E. The Connection Server needs to be rebooted.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 43

After a disaster recovery failure which left the data center unavailable, a company's Horizon Administrator team has dedicated to increase the capacity of their Horizon desktop pools and their resiliency.

Which two deployment options would support the requirement? (Choose two.)

- A. Horizon deployed in the same Local Data Center.
- B. Horizon deployed in a Remote Data Center
- C. Horizon deployed on VMware Cloud on VMware.
- D. Horizon deployed on VMware Cloud on AWS.
- E. Horizon Desktop deployed as a Service on vCloud Air.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 44

After a disaster recovery failure which left the data center unavailable, a company's Horizon Administrator team has dedicated to increase the capacity of their Horizon desktop pools and their resiliency.

Which two deployment options would support the requirement? (Choose two.)

- A. Horizon deployed on VMware Cloud on AWS.
- B. Horizon Desktop deployed as a Service on vCloud Air.
- C. Horizon deployed in a Remote Data Center
- D. Horizon deployed in the same Local Data Center.
- E. Horizon deployed on VMware Cloud on VMware.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 45

An administrator is tasked with reinstalling a Connection Server replica that has failed to boot.

Drag and drop the procedural steps on the left into the correct order on the right to add the replica back to the Horizon pod with the same name.

<u>Procedural Step</u>	<u>Correct Sequence</u>
Remove replica server from the pod using vdmadmin	Step 1
Power Off the failed replica server	Step 2
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3

Answer:

<u>Procedural Step</u>	<u>Correct Sequence</u>
Remove replica server from the pod using vdmadmin	Power Off the failed replica server
Power Off the failed replica server	Remove replica server from the pod using vdmadmin
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod

Correct Sequence

Step 1	Power Off the failed replica server

NEW QUESTION: 47

An administrator has been tasked with determining the type of Horizon deployment for their organization. These requirements have been provided to the administrator:

- * It must support Windows 7 and Windows 10 desktops.
- * It must support App Volumes Cloud.
- * It must support hybrid cloud.
- * It must support Centralize brokering.
- * It must automatically route end to the most appropriate virtual workspace.

Which deployment solution meets the requirements?

- A. Horizon On-Premises
- B. vSphere Desktop Edition
- C. Workspace ONE Unified Endpoint Management
- D. Horizon Cloud Service on Azure

Answer: ([SHOW ANSWER](#))

Explanation

<https://blogs.vmware.com/euc/2019/09/windows-virtual-desktop-horizon-azure.html>

NEW QUESTION: 48

Which pre-requisite should be met before installing the Connection Server?

- A. The host system must be a vSphere VM with a static IP address.
- B. Install AD DS and AD LDS Tools on the Connection Server.
- C. Use a domain user account with administrator privileges on the Connection Server.
- D. An SSL server certificate must be installed on the Connection Server.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 49

Which two can an administrator whose organization is running VMware Horizon Standard use to determine the transport protocol being used by a user? (Choose two.)

- A. Horizon Console
- B. Horizon Help Desk Tool
- C. Horizon Logon Monitor
- D. Horizon Performance Tracker
- E. Horizon Agent Logs

Answer: ([SHOW ANSWER](#))

Explanation

NEW QUESTION: 50

An administrator notices that a cloud pod is not in the correct site.

What can be done to solve this issue?

- A. Under Settings > sites, select the site, and select move pod to this site.
- B. Under Settings > sites, select the pod, click edit, and select the correct site from the menu.
- C. Under Settings > Cloud Pod Architecture, select the pod and change the name of the site.
- D. Under Settings > Cloud Pod Architecture, select the pod, click edit and select the correct site.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 51

A Horizon administrator does not see the health status for the Unified Access Gateways (UAG) they configured in the Horizon Console.

What two options could be causing the issue? (Choose two.)

- A. The name entered in the Horizon console doesn't match up with the system name in UAG.
- B. Another license is needed for UAG health overview.
- C. The pod needs to be added to the Cloud Pod Federation.
- D. The firewall hasn't been configured properly to allow traffic on port 443.
- E. The Connection Server needs to be rebooted.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 52

Drag and drop the VMware Horizon deployment type on the left to the solution it delivers on the right.

<u>Deployment Type</u>	<u>Solution Delivered</u>
Horizon On-Premises	Centralized Management
Horizon Cloud Service on Microsoft Azure	Quick-provisioning of desktops
Horizon Control Plane	Consumption-Based Pricing

Answer:

<u>Deployment Type</u>	<u>Solution Delivered</u>
Horizon On-Premises	Centralized Management
Horizon Cloud Service on Microsoft Azure	Quick-provisioning of desktops
Horizon Control Plane	Consumption-Based Pricing

NEW QUESTION: 53

Drag and drop the App Volumes components on the left to their matching function on the right.

App Volumes Component

Function Provided

App Volumes Agent

It is used for the assignment of packages and writable volumes.

App Volumes Manager

It runs on a virtual desktop or RDSH server.

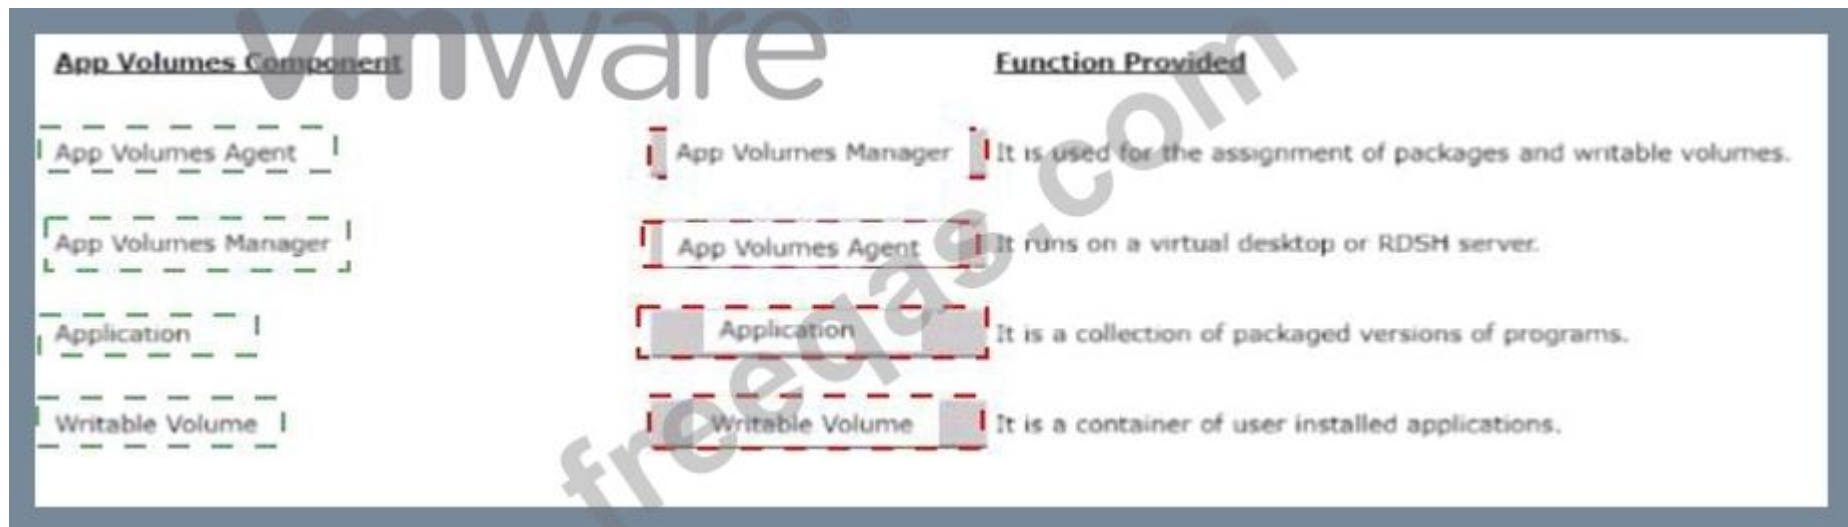

Application

It is a collection of packaged versions of programs.

Writable Volume

It is a container of user installed applications.

Answer:

Explanation

<https://techzone.vmware.com/resource/app-volumes-architecture#architecture-overview> App Volumes Manager> ok. Assignment of Packages and Writable volumes App Volumes Agent> ok. It Runs on a VD or RDSH Server Writable Volume>It is a container of user installed applications Application>Its A Collection of packaged version of programs

NEW QUESTION: 54

An administrator configured a virtual machine to use an NVIDIA card but the virtual machine is not starting up.

What could be the cause of the issue? (Choose two.)

- A. 3D graphics cannot be used with local storage.
- B. No suitable host could be found.
- C. Not all CPU has been reserved on the VM.
- D. Not all memory has been reserved on the VM.
- E. The Desktop Pool doesn't support 3D cards.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 55

What must be implemented on all Connection Servers for logon segment information to be populated in the Horizon Helpdesk Tool?

- A. Vdmadmin -1timingProfiler -enable
- B. Vdmadmin -A -d dtpool2 -m machine1 -getstatus

C. Horizon Helpdesk Agent

D. Blast Secure Gateway

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 56

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

<u>Smart Card Authentication Step</u>	<u>Correct Sequence</u>
Obtain the root certificate from the CA	Step 1
Prepare the AD for smart card authentication	Step 2
Configure smart card settings in the VMware Horizon console	Step 3
Add the root certificate to a server's truststore file	Step 4

Answer:

<u>Smart Card Authentication Step</u>	<u>Correct Sequence</u>
Obtain the root certificate from the CA	Step 1 Obtain the root certificate from the CA
Prepare the AD for smart card authentication	Step 2 Add the root certificate to a server's truststore file
Configure smart card settings in the VMware Horizon console	Step 3 Configure smart card settings in the VMware Horizon console
Add the root certificate to a server's truststore file	Step 4 Prepare the AD for smart card authentication

NEW QUESTION: 57

An administrator is tasked with reinstalling a Connection Server replica that has failed to boot.

Drag and drop the procedural steps on the left into the correct order on the right to add the replica back to the Horizon pod with the same name.

<u>Procedural Step</u>	<u>Correct Sequence</u>
Remove replica server from the pod using vdmadmin	Step 1
Power Off the failed replica server	Step 2
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3

Answer:

<u>Procedural Step</u>	<u>Correct Sequence</u> [®]
Remove replica server from the pod using vdmadmin	Step 1 Power Off the failed replica server
Power Off the failed replica server	Step 2 Remove replica server from the pod using vdmadmin
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3 Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod

NEW QUESTION: 58

A user is complaining that each time they logon they need to change the settings for the e-mail client. Which three options can an administrator deploy to make sure the user's settings are being saved?

- A. Mandatory profiles
- B. Flexible profiles
- C. VMware App Volumes Writeable Volumes:
- D. VMware Dynamic Environment Manager
- E. Roaming Profiles

Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 59

An administrator is tasked with allowing managers to request desktops and changes to desktops for their employees. What VMware solution can be used to meet this requirement?

- A. Horizon Help Desk
- B. vRealize Operations
- C. Horizon Automated Pools

D. vRealize Automation

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 60

An end-user is experiencing a black screen when connecting to their virtual desktop. After a few seconds, the connection closes. Which could be the cause of the issue? (Choose three.)

- A. The Horizon Virtual Machine video memory is too high.
- B. There is an incorrect firewall configuration.
- C. The incorrect video driver version is installed on the Horizon virtual machine.
- D. There is a vRAM shortage on the Horizon virtual machine.
- E. The Client machine video memory is too high.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 61

Drag and drop the high-level configuration steps for smart card authentication on the left into the correct sequential order on the right.

<u>Smart Card Authentication Step</u>	<u>Correct Sequence</u>
Obtain the root certificate from the CA	Step 1
Prepare the AD for smart card authentication	Step 2
Configure smart card settings in the VMware Horizon console	Step 3
Add the root certificate to a server's truststore file	Step 4

Answer:

<u>Smart Card Authentication Step</u>	<u>Correct Sequence</u>
Obtain the root certificate from the CA	Step 1 Obtain the root certificate from the CA
Prepare the AD for smart card authentication	Step 2 Add the root certificate to a server's truststore file
Configure smart card settings in the VMware Horizon console	Step 3 Configure smart card settings in the VMware Horizon console
Add the root certificate to a server's truststore file	Step 4 Prepare the AD for smart card authentication

NEW QUESTION: 62

How does an administrator enable debug logging for a single user in VMware Dynamic Environment Manager?

- A. Configure the FlexEngine GPO to DEBUG.
- B. Create an empty FleDebug.log file in the log folder.
- C. Create an empty FlexDebug.txt file in the log folder.
- D. Update the FlexEngine registry to DEBUG.

Answer: C (LEAVE A REPLY)

<https://kb.vmware.com/s/article/2113514>

NEW QUESTION: 63

An administrator wants to ensure that user's desktop experience is consistent regardless of the desktop they connect to. What solution should be used to meet the requirement?

- A. Dynamic Environment Manager
- B. Temporary Profiles
- C. Persona Management
- D. Local Profiles

Answer: (SHOW ANSWER)

NEW QUESTION: 64

A Horizon administrator is tasked with creating a new pool of desktops with hardware-accelerated graphics with vMotion support. Which graphic acceleration types can the administrator choose to meet the requirement?

- A. Virtual Shared Direct 3D
- B. Virtual Shared 3D rendering
- C. Virtual Dedicated Graphics Acceleration
- D. Virtual Shared Pass-through Graphics Acceleration

Answer: (SHOW ANSWER)

Explanation

<https://techzone.vmware.com/resource/deploying-hardware-accelerated-graphics-vmware-horizon-7#virtual-dedi> Virtual Shared Graphics Acceleration support vMotion. Virtual Dedicated Graphics Acceleration does not support vMotion.

NEW QUESTION: 65

Which Horizon feature provides high availability desktops across datacenters?

- A. vCenter Linked Mode

- B. Replica Connection Servers
- C. Instant-Clones
- D. Cloud Pod Architecture

Answer: B (LEAVE A REPLY)

NEW QUESTION: 66

Having configured two standalone Horizon pods, what steps should be taken to join them in a Cloud Pod Architecture (CPA) deployment?

- A. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Cloud entitlements, and add local pool from each pod.
- B. Initialize the CPA on both Pods. On the second pod, sync the CPA. On one pod, create Global Entitlements, and add local pools from each pod.
- C. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Global Entitlements, and add local pools from each pod.
- D. On one pod, initialize the CPA. On the second pod, join the CPA. On one pod, create Cloud Entitlements, and sync pool from each pod.

Answer: C (LEAVE A REPLY)

Explanation

CPA creates a global data layer. Global Entitlements are automatically synchronized so there is no need to synchronize pools manually. You initialize CPA at one site, then from the other site join the CPA federation.

Next create Global Entitlements and add local pools from each site to the Global Entitlement. You do have to be connected to the Connection Server where the local pools exist in order to add to the Global Entitlement.

NEW QUESTION: 67

An administrator needs to submit a network change request to have firewall ports opened to allow users to connect to a Horizon environment using RDP via Unified Access Gateway with the minimum number of ports.

Which ports selection meets the requirements?

- A. 443, 3389, 4172
- B. 443
- C. 80,443
- D. 443, 4172
- E. 7443

Answer: B (LEAVE A REPLY)
